

STATUS REPORT

Comoros: status report

Edition of 2026-09-01 • 172 systems and instruments tracked

Compiled 2026-09-01 by Claude Opus from the documents in the Corpus repository, from [outputs/reports/COM/Ledger.csv](#) (172 systems and instruments, 24 of them **Not held**). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

[SUMMARY OF POSITION](#) • [GOVERNANCE](#) • [FINANCE](#) • [ICT INFRASTRUCTURE](#) • [DPI](#) • [DIGITALISATION](#) • [TECHNOLOGY](#) • [CAPACITY](#) • [INCLUSION](#) • [DATA](#) • [GEOPOLITICS](#) • [GAPS TO FILL](#)

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

The Comoros has built its payment rails ahead of everything else and legislated most of the rest on paper only. The [national interoperable switch is live](#) and the [data centre for the public administration is in service and certified to the third tier](#). Against that the [digital code is not adopted, its 2024 target missed](#), the [data protection law of 26 June 2014 has never had the supervisory commission it creates at article 19](#), and the [2018 strategy remains the stated delivery frame, unrevised](#). Twenty-four of 172 rows are *Not held*, and what widening the base showed is that the instruments mostly exist and the machinery inside them mostly does not.

Code de l'information et de la communication, as amended	IMPLEMENTED, AMENDING LAW ADOPTED AND NOT SHOWN PROMULGATED ↗	Adopted by the Assembly of the Union by 31 votes of 33 deputies

The [data protection law of 26 June 2014](#) runs to [sixty-eight articles](#); the commission it institutes at article 19 has never been constituted, and the consultancy to stand it up has submissions open to 2027-03-12. The [cybersecurity and cybercrime law](#) was [promulgated on 2022-01-18](#) and names the digital agency's [cybersecurity directorate](#) the competent authority. The [Code numerique](#) passed a target the agency set itself and is not adopted, no [electronic-signature instrument](#) exists, and [no access-to-information law](#) has been adopted. The regulator now runs an [annual quality-of-service control](#), [twenty-two indicators across the three islands in February 2026](#) and both operators [deficient](#), and has still never published the annual activity report the statute requires of it.

Financing instrument behind the technology park	NOT HELD	—

The digital ministry's vote for 2026 is [KMF 338,724,932](#) and includes the first appropriated state capital line the ministry has carried in the three-year corpus, at KMF 50,000,000. The largest single digital appropriation sits in another ministry: the [information systems directorate of the finance ministry](#) carries KMF 277,128,000 under a service code the 2025 rectificative had zeroed. The [Chambre du Numerique](#) transfer falls to KMF 50,000,000 from KMF 73,000,000, and the [regulator](#) is absent from every Comorian budget instrument and funded by statutory levy, so its size is established from no source held. The [Direction de l'Etat Civil et Casier Judiciaire](#) has KMF 4,000,000 for 2026, wholly goods and services, against the KMF 324,000,000 of civil-status document revenue the same law books; and the [Site Web et Consommation Internet](#) line stood at KMF 15,000,000 after half of it went to guarding costs in November 2024. The projects themselves are externally financed: the [continental bank's project to support digitisation of the economy](#) is in execution and the [Islamic bank's project](#) is approved and undisbursed.

Direction nationale de la cybersecurite	IMPLEMENTED ↗	Designated the competent authority by article 6 of the 2021 law
National computer emergency response team	NOT HELD	—

International connectivity is on the record and its capacity is not. Three submarine systems land through one state vehicle, [EASSy since May 2011](#), [FLY-LION3 from 2019](#) and [Africa2 from 12 January 2023](#), and the cable company states an [exchange point installed at Moroni](#) and [2Africa in service](#), where the regional programme's own attempt at an exchange point failed for want of operator commitment. No capacity, tariff or redundancy figure exists. The one built asset is the [data centre for the public administration](#); [satellite internet deployment is prohibited pending a licence](#). Power bounds all of it: [91 per cent of generation is imported diesel](#) and [Mwali's plant ran on a seventh of the fuel it needs in August 2026](#).

Teleprocédures fiscales	IN DEVELOPMENT ↗	Implementing corpus appropriated and validated at a three-day workshop, 15-17 April 2026
Integrated financial management information system	NOT HELD	—

The systems in operation are concentrated in payments, identity and registries. The central bank's [KomorPay](#) entered service on 2026-04-23 and settles between banks only, with no retail leg, and Komor Switch is running the first of its three phases, with online purchases explicitly not covered; the [government securities market has its regulations in force and its first operations unlaunched](#). Identity rests on a production concession rather than on a state system: biometric passport and identity card production passed to a new supplier on 2026-03-31, with Comorian biometric data domiciled in the country where the previous concession had stored it in Belgium, while the [personal identification number](#) and the [Agence Nationale de l'Etat Civil](#), both provided for by the law of 27 July 2023, remain in development, the agency existing in law and not in fact. The registries are further on than the systems that should read them. The [social register's technical build was near complete at December 2025, with interoperability to the identity, civil-registration and health systems listed as work still recommended](#), and the [customs platform, in operation since 2018, was audited in June 2026 with the single window's requirements mapped](#). One row here is *Not held*: an integrated financial management information system.

Rural civil-registry field consultations	IN DEVELOPMENT ↗	Field consultation at Fomboni 2026-08-28, continuing to Djando and Nioumachoi
Universal service or rural digital access fund	NOT HELD	—

Digitalisation outside the capital is a set of projects, none of them a service. 58 of 74 public health facilities capture stock in real time, 45 per cent of public primary schools are on the school platform against every public secondary, and computer kits with solar power have reached four rural primaries on Ngazidja with eleven planned. Civil-status digitalisation is still being designed: the project was consulting midwives, village chiefs, cadis and mayors on Mwali in August 2026. The administration's own connectivity is at tender, twenty-three finance ministry sites across the three islands. No municipal or island-government digital service is held, and no universal service fund exists.

Technopole numerique	PILOTING ↗	Pilot phase launched at the Palais du peuple with a supplier present
Wamanga wa Komor hackathon	IMPLEMENTED ↗	Ten finalists funded at the closing ceremony of 2026-08-06

The technology record is first-of-kind and small, and it now has a legal edge. The amended communication code requires content generated by artificial intelligence to be labelled, with sanctions to one million francs - the country's only rule on the technology, sitting inside a media statute. Predictive modelling is being integrated into the national

[health platform for malaria early warning](#), the only sectoral system with any machine learning attached. Start-up finance is entirely external: a [hackathon funded ten finalists at EUR 1,500 to 5,000 each in August 2026](#) under a European Union programme, and no start-up statute, tax regime or domestic innovation fund exists. Nothing measures the sector's contribution to output.

Universal service or rural access fund	NOT HELD	—

Inclusion is carried by instruments that exist and machinery that does not. The [2014 disability law is formally in force and largely unimplemented - the high authority it creates at article 45 was never constituted and the equality-of-opportunity card is not applied](#), and nothing in it addresses digital accessibility. The widest citizen feedback channel on file is a [justice ministry contact form](#) with no response time or case count behind it. There is [no national asylum system](#), for a caseload of twenty-four people. No official internet-penetration or affordability series and no rural access fund exist, which is what makes the rest unmeasurable.

Census cartography capability at the statistics institute	IN DEVELOPMENT ↗	A ten-day geographic information systems training, 13-24 April 2026, under a World Bank statistical capacity project
Earth observation indicators for agricultural monitoring	IMPLEMENTED ↗	A live country dashboard maintained by the food and agriculture organisation
Meteorological observation and forecasting capability	IMPLEMENTED ↗	Five-day national digital transformation training, 23-27 February 2026
National spatial data infrastructure or address register	IN DEVELOPMENT ↗	Fourteen-theme national geospatial database validated January 2026
Regional early-warning project for the south-west Indian Ocean	IMPLEMENTED ↗	A second phase in the pipeline

Dissemination is real, narrow and unpoliced. The statistics institute's [national microdata archive held fifteen datasets at 23 August 2026](#), access conditioned on registration rather than an open licence, and no open-data policy sits behind it; nothing outside the statistical system publishes a dataset at all. Geospatial capability is further on than it was: the cartographic unit's [fourteen-theme national database was validated in January 2026](#), four years after the country had no repository for basic geographic data. Earth observation covering the country is not the country's - the [agricultural indicators are run by the food and agriculture organisation](#) and no Comorian body is named as using them.

Indian digital or technology cooperation instrument	IMPLEMENTED, A 2019 FRAMEWORK WITH NO PROJECT ON RECORD ↗	Six 2019 memoranda still the standing framework, on India's own brief

Four relationships are now on the record and each is a different kind of thing. The United States supplies access and training: an [American Corner at the university](#) and cybercrime investigation training for Comorian officers. China supplies infrastructure and skills - a financed national backbone, a network modernisation and a [vendor academy opened in November 2025](#). India supplies a framework: [six memoranda from October 2019 that remain the standing position](#), with nothing on file delivered under them. No Gulf digital or telecom instrument was found; the one Gulf commitment in the window is a [solar and storage microgrid](#).

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
National computer emergency response team	Any decree, digital agency statement or regulator decision establishing an incident-response body, or a statement that none exists; the 2018 strategy costed a national cybersecurity apparatus at KMF 942,931,440 and nothing on file says what was built	2026-08-31
Electricity supply to digital infrastructure	A national utility annual report, an inspectorate audit of it, or an operator statement on grid availability at telecom sites; the incumbent names consolidation of energy infrastructure as a 2025 priority without a figure, and the subject holds no Comorian source at all	2026-08-31
Data centre capacity and utilisation	The digital agency's own statement or annual report, or the facility's tier certification record; the only market-level document is a commercial briefing whose figures are held and deliberately not absorbed	not yet probed
Universal service or rural digital access fund	The regulator's statutory annual activity report, which does not exist for any year; the electronic communications statute funds the regulator from a turnover levy and the base records no access fund	not yet probed
Municipal or island-government digital services	A communal or island-executive digital plan, or the decree organising the collectivities; mayors and prefects appear only as stakeholders in the civil-registry programme	not yet probed
Integrated financial management information system	The public finance programme's procedures manual, or a French development agency appraisal naming the expenditure-chain system; the tax system covers tax only	not yet probed
Conseil National sur le Numerique	The decree or order constituting the council, or a digital agency or government statement of the sector's steering arrangements; the 2018 strategy designs it as the sector's political steering organ and nothing since mentions it	not yet probed
Regulator sanctions, licensing decisions and spectrum awards	The regulator's decisions series, of which the base holds exactly one item, or the statutory annual activity report that would list them	not yet probed
National artificial-intelligence strategy or policy	A published strategy or the ministry's or digital agency's own statement of one; the first national forum on the subject was held 2026-03-31 and discussed regulation as a structural challenge without producing an instrument	2026-08-31
Deployed or piloted artificial-intelligence system	Any named operational system in Comorian government or industry, or a ministry inventory of them; the base names artificial intelligence only as a forum theme, a training strand and a procurement line	2026-08-31
Digital sector contribution to gross domestic product	The statistics institute's national accounts by branch, or the regulator's statutory annual activity report, which has never been published; no sector-size, employment or firm-count figure exists in the base for any year	not yet probed
Gulf-state digital or technology cooperation instrument	A bilateral digital agreement, or the Islamic bank's own board approval document for the e-government project, which would at least date and characterise the component the base knows only through a procurement notice	2026-08-31

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Universal service or rural access fund	A published universal-service provision in the electronic communications statute, whose promulgating decree is held and whose own text is not, or a regulator decision establishing a fund and its levy rate; a corpus-wide search returns such funds in four other countries and nothing Comorian	not yet probed
National digital-literacy or digital-skills programme	An education ministry or digital agency programme document, or the education chapter of the 2018 strategy's implementation plan, naming a programme with a target and a budget line	not yet probed
Official internet-penetration or affordability series	The regulator's statutory annual activity report, which does not exist for any year, or connectivity figures actually stored rather than pointed at; the wiki holds a reference report for Comoros whose stored body carries no figures at all	2026-08-31
Execution of the 2025 digital vote	The budget execution report for 2025, due mid-2026 on the ministry's own cadence, or the fiscal operations table; neither exists at 2026-08-04, and only the 2024 outturn exists, by nature	not yet probed
Financing instrument behind the technology park	The World Bank appraisal document or aid-transparency activity for the operation carrying the US\$4,090,000, which would identify the lending instrument and disbursement schedule	not yet probed
Annual budget execution report	A companion record in raw/ for the budget-execution report held as a PDF in OSINT's budget-archive; the document exists there and Corpus cannot cite it (notes-for-osint 13).	2026-08-14
Budget framing letter	A companion record in raw/ for the lettre de cadrage budgetaire held as a PDF in OSINT's budget-archive (notes-for-osint 13).	2026-08-14
Contract for information technology equipment for the rural development centres	A companion record in raw/ for the equipment contract held as a PDF in OSINT's budget-archive (notes-for-osint 13).	2026-08-14
List of contracts and beneficial owners	A companion record in raw/ for the contracts and beneficial-owners list held as a PDF in OSINT's budget-archive (notes-for-osint 13).	2026-08-14
Access to information law	An adopted access-to-information statute, a published bill, or a dated government statement of intent with a timetable; UNESCO's periodic-review submission of January 2026 records that none has been adopted and the 2023 anti-corruption law only anticipates that one will be	2026-08-31
National asylum system	A refugee or asylum statute, an implementing decree, or a dated government statement that determination has been assigned to a named body; the refugee agency's December 2025 mission recorded the absence of a national asylum system and recommended the government organise referral pathways	2026-08-31
Open government data policy	An open-data policy, licence or release calendar binding government beyond the statistical system; the statistics institute's microdata archive operates as a dissemination platform with no instrument behind it and access conditioned on registration	2026-08-31

Twenty-four rows are *Not held*, down from thirty-one over a base half again as large, and they now cluster differently. Six are the budget record - execution reports, framing letters, contract and beneficial-ownership lists - the group the site cannot close from here, the documents sitting in an archive Corpus cannot reach. The rest are measurements rather than instruments: no data-centre capacity or utilisation, no electricity supply position for digital infrastructure, no internet-penetration series, no measure of the digital sector's contribution to output. Four are searched absences with citations behind them - no artificial-intelligence strategy, no access-to-information law, no asylum system, no Gulf instrument - which is a stronger statement than a gap in the record.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
