

## PROGRESS REPORT

# DR Congo: progress report, August 2025 – August 2026

Edition of 2026-08-27 • 123 systems and instruments tracked

GOVERNANCE • FINANCE • ICT INFRASTRUCTURE • DPI • DIGITALISATION • TECHNOLOGY • CAPACITY •  
INCLUSION • DATA • GEOPOLITICS • WHERE THE RECORD IS THIN

This report asks the same set of questions of every country. The rows below are a fixed frame of indicators, one row each, chosen in advance and covering all thirty-eight subjects the base tracks — so what appears here is decided by the frame and not by whichever records happened to accumulate. Each row says what happened on that indicator during the period, with every claim linked to the source it rests on.

Where a row reads *No evidence*, the base holds nothing on that indicator. **That is a statement about this base, not about the country** — it does not mean nothing exists, only that nothing has been collected here yet. The rows that carry evidence say what it is; the rows that do not are left to speak for themselves.

*The period is 2025-08-01 to 2026-08-27.*

**Progress values.** *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a reported position worsened. *Mixed* — the indicator's instruments moved in different directions in the period; the clause after the comma names which moved which way. *No change* — the base holds a standing position and nothing in the period touched it. *No evidence* — the base holds nothing on this indicator at all. A value may carry a qualifying clause after a comma, as in *Advanced, regulations still pending*.

## Governance

| TOPIC                          | INDICATOR                              | DEVELOPMENTS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | PROGRESS    |
|--------------------------------|----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| Strategies, plans and policies | <b>Digital transformation strategy</b> | <p>A <a href="#">sectoral digital economy policy 2026-2030</a> was validated and referred to the Council of Ministers, uncosted and unpublished.</p> <p>2026-08-04 - the policy was presented and validated by government on axes covering infrastructure, digital transformation of the administration, the digital economy, innovation and start-ups, cybersecurity and data governance, and referred to the Council of Ministers for adoption . It is not published, not costed and not budgetable, and the validators' own conditions name what is missing: reliable baseline data and a completed costing</p> <p>.</p> <p>Behind it sits a national digital plan carrying a US\$1.5bn envelope, US\$1bn of treasury investment over five years plus US\$500m of external partner support ; no finalised plan document is locatable and the treasury half is an announcement rather than an appropriation.</p> <p>2026-07-29 - a governance framework was launched with a ten-dimension maturity diagnostic and a proposed six-to-twelve-month timetable</p> <p>.</p> | ADVANCED    |
| Strategies, plans and policies | <b>ICT strategy</b>                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | NO EVIDENCE |
| Strategies, plans and policies | <b>Broadband strategy</b>              | <p>A <a href="#">National Connectivity Strategy 2026-2035</a> was published with a target of 3,000 localities and 16 million people by 2030.</p> <p>2026-08-13 - the strategy was published on a shared-infrastructure model led by a tower company, with subsidy agreements signed with the four mobile operators to extend service to 40 underserved localities covering about 258,000 people, against a target of 3,000 localities and 16 million people by 2030</p> <p>.</p> <p>The fund publishes its selection framework: a 100-point priority index weighting strategic class 30, coverage deficit 20, population density 15, public infrastructure 15, local economic potential 10 and feasibility 10, with localities above 60 points classed for immediate deployment, subsidy confined to sites where an operator shows a negative return over four years, and national roaming imposed on sites above 70 . The strategy text is not held , and the index did not select the first 40 localities.</p>                                                          | ADVANCED    |

| TOPIC                          | INDICATOR                                        | DEVELOPMENTS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | PROGRESS                                                                                                                |
|--------------------------------|--------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Strategies, plans and policies | <b>Data storage / cloud strategy</b>             | <p>A <a href="#">sovereign government cloud is named among ministry projects to be ordered and made executable</a>, with no hosting location or operator stated.</p> <p>2026-07-29 - the sovereign cloud was named as an existing ministry project alongside the digital and data strategies, the identity platform and a certification authority, with no hosting location, operator, procurement, budget line or date stated .</p> <p>The base carries no statement about a sovereign cloud before that date, so its opening position is unknown rather than zero and no direction can be stated. What exists in the meantime is a budget line for a national data centre and two privately owned facilities, neither of them a state cloud, and no hosting, classification or residency rule to govern what would sit in one.</p>                                                                                                                                | <div>NO CHANGE</div> <p>a first appearance in the record with nothing earlier behind it</p>                             |
| Strategies, plans and policies | <b>Data interoperability framework / roadmap</b> | <p>The <a href="#">e-government strategy's master plan, governance framework, enterprise architecture and interoperability framework are all still to be defined by a consultant</a>.</p> <p>The strategy is named but not operational: its strategic priorities, master plan, governance framework, enterprise architecture and interoperability framework are all still to be defined by a consultant not yet appointed .</p> <p>It is dated 2025 to 2030 and its defining work was still being tendered in mid-2026, which is the whole of the movement here. No standard, reference architecture or connection obligation on any public body exists on file, and the minister's July 2026 statement of common bases on a national architecture reference framework is the same object restated at ministerial level with nothing built.</p>                                                                                                                     | <div>NO CHANGE</div> <p>the framework and the architecture are still deliverables of a consultant not yet appointed</p> |
| Strategies, plans and policies | <b>AI strategy</b>                               | <p>A <a href="#">national artificial-intelligence strategy was validated and referred to the Council of Ministers on 4 August 2026</a>, its text unpublished.</p> <p>Drafting was launched in October 2025 with external technical and financial support, so the object did not exist at the window's opening.</p> <p>2026-07-23 to 27 - the draft was technically validated on four pillars - governance, ethics, trust and regulation; data, digital and energy infrastructure; human capital, research and innovation; industrialisation and value creation - and on 4 August referred to the Council of Ministers for adoption, with no adoption date established and the text not published .</p> <p>A Congolese academy of artificial intelligence is a provision on paper to train young talent and stimulate applied research, with no site, budget line, governing text or date , and whether it survived into the validated draft is not established.</p> | <div>ADVANCED</div>                                                                                                     |
| Strategies, plans and policies | <b>Data localisation policies</b>                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <div>NO EVIDENCE</div>                                                                                                  |
| Strategies, plans and policies | <b>Data governance policy</b>                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | <div>NO EVIDENCE</div>                                                                                                  |

| Legislation and regulation | <b>Access to information legislation</b>  | <p>A <a href="#">bill setting access as the norm</a> was declared admissible on 27 March 2026; a classification regime was presented two weeks earlier.</p> <p>2026-03-27 - the bill was declared admissible and referred to a joint commission with ten days to report: it sets access as the norm and limitation the exception, applies to public services and some private actors, and requires a simple, fast and free request procedure, proactive publication, reasoned refusals and a right of appeal . Four months past that ten-day deadline, no commission report, plenary date or adoption is held.</p> <p>2026-03-13 - an information note to the Council of Ministers set out four levels of classification with access limited to cleared agents, traceability of transmissions, reinforced archiving and a ban on sending sensitive documents over private messaging , tied by its own account to the security situation in the east.</p> | <p><b>MIXED</b></p> <p>an access-to-information bill was declared admissible while a four-level classification regime was put to the Council of Ministers</p> |
| Data protection            | <b>Data protection authority</b>          | <p>A <a href="#">network of data-protection officers</a> launched in March 2026, while the <a href="#">authority required by article 262</a> is still not created.</p> <p>The authority is required by article 262 of the code and the decree defining its organisation and functioning was never drafted or signed, leaving the body non-operational - now two years of the same finding, running alongside a twenty-year exclusive foreign concession over citizens' identity data. It was named again in July 2026 as a link in the cybersecurity chain .</p> <p>2026-03-12 - a national network of data-protection officers was launched with two civil-society bodies, framed as alignment with the continental convention . It is the first concrete step under article 262 since 2023, and it moves the enforcement gap without closing it: a professional network is not a supervisor with sanctioning powers.</p>                               | <p><b>MIXED</b></p> <p>a national network of data-protection officers was launched while the authority the code requires is still not created</p>             |
| Data protection            | <b>National data protection readiness</b> | <p>A <a href="#">drone and citizen-reporting deployment</a> runs in Kinshasa through a private company, and a <a href="#">ministry memorandum</a> names digital identity in scope.</p> <p>2026-01 - a drone surveillance and citizen-reporting deployment was reported, operated through a private company, with the reporting outlet itself raising privacy and operator-integrity concerns and no procurement value, legal basis, data-retention rule or oversight arrangement held .</p> <p>2026-08-13 - the digital economy ministry signed a memorandum with a commercial bank to modernise financial services and accelerate banking inclusion, covering digital identity and artificial-intelligence integration , with no term, value, workplan or data-protection provision published.</p> <p>Both process personal data, neither states a safeguard, and no supervisor exists to ask.</p>                                                      | <p><b>REGRESSED</b></p>                                                                                                                                       |

| Regional collaboration | <b>Regional policy collaboration</b>       | <p>The <a href="#">African Telecommunications Union's return to Kinshasa was ratified on 23 July 2026</a> after arrears were paid.</p> <p>2026-07-23 - the union's seventh Plenipotentiary Conference ratified the return of its headquarters to Kinshasa after arrears were paid, with no date for the move stated, and a bid for an ITU Administrative Council seat for 2027-2030 pending</p> <p>.</p> <p>The arrears figure and the account are the posts and telecommunications minister's own, given marking a year in office, and no union document, decision text or move timetable is held. Hosting a continental body is the clearest regional position the base records for this country in the window.</p>                                                                                 | ADVANCED    |
| Regional collaboration | <b>Regional legal harmonisation</b>        | <p>A <a href="#">regional free-roaming resolution mandating implementation by 30 June 2026</a> passed its deadline with nothing on record.</p> <p>2026-02-24 - regional regulators adopted a resolution mandating effective free roaming across Central Africa by 30 June 2026, at a session hosted in Kinshasa.</p> <p>The deadline has passed with no implementation, tariff or country-specific measure held. Nothing states whether Congolese operators were consulted, what a compliant tariff would look like, or what follows a missed regional deadline; the resolution is the only harmonisation instrument on this ledger and it has produced nothing measurable.</p>                                                                                                                       | STALLED     |
| Regional collaboration | <b>Shared regional infrastructure</b>      | <p>A <a href="#">fibre route linking Goma to Mombasa via Kampala was reported lit</a>, tying the east into the Indian Ocean corridor.</p> <p>2026-02 - the route was reported lit, tying eastern DR Congo into the East African terrestrial corridor to the Indian Ocean</p> <p>.</p> <p>The event date is not separately established from the publication date and both held accounts are trade press. No capacity, pricing, operator agreement or traffic figure is published, and the route serves the same eastern provinces where mobile and internet service has been cut for months at a time, so what it delivers on the ground is not established by anything on file.</p>                                                                                                                   | ADVANCED    |
| Regional collaboration | <b>Cross-border data transfers</b>         | <p>A regional expert panel <a href="#">recommended terrestrial gateways inside the region and citizens' data kept on the continent</a>, at a session hosted in Kinshasa.</p> <p>2026-02-24 - the panel recommended that non-geostationary satellite providers establish terrestrial gateways within the region's jurisdiction, meet obligations equivalent to traditional operators and keep citizens' data on the continent</p> <p>.</p> <p>It is a recommendation, not an adopted instrument, and the country is the host rather than its author. No national rule on transferring personal data abroad exists on this ledger, which matters because the identity platform running here is operated under a twenty-year concession by a foreign party and no source states where its data sits.</p> | ADVANCED    |
| Standards              | <b>National interoperability standards</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | NO EVIDENCE |

|--------------|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Connectivity | <b>Mobile penetration</b>   | <p>Mobile subscriptions reached <b>73.93m at 67.8% penetration in 2025, from 63.96m and 60.5% in 2024.</b></p> <p>The first regulator-submitted regional dataset the base holds puts the country at 73.93m mobile subscriptions and 67.8% penetration in 2025, against 63.96m and 60.5% in 2024</p> <p>.</p> <p>It is a regional compilation of the national regulator's own returns rather than a published national series, and the regulator itself publishes nothing comparable that the base holds. The same return reports no mobile-money transaction value at all, so a country with tens of millions of wallets contributes no payment volume to the regional statistics it now files into.</p> <p>The next generation is not moving: a public consultation on introducing 5G opened in March 2025 and seventeen months later no consultation report, spectrum award, licence or revised timetable has been published.</p> | ADVANCED  |
| Connectivity | <b>Internet usage</b>       | <p>Mobile-internet subscriptions stand at <b>36.98m, 33.9% penetration, with mobile-internet revenue of US\$970.2m in 2025.</b></p> <p>The regional dataset records 36.98m mobile-internet subscriptions at 33.9% penetration and mobile-internet revenue of US\$970.2m in 2025, nearly matching voice revenue</p> <p>.</p> <p>The earlier position the base holds is a Council of Ministers record of 30.79% mobile-internet access and under 0.02% fixed access , which is close enough to the 2025 figure to say the level is stated rather than a movement measured. Fixed access remains statistically absent, and no household or individual usage survey exists on this ledger.</p>                                                                                                                                                                                                                                          | ADVANCED  |
| Connectivity | <b>Mobile affordability</b> | <p>Bundle validity was cut without notice: <b>1GB at 1,500 francs fell from 48 hours to 24</b>, and the 2GB bundle was replaced.</p> <p>Subscribers in Bukavu and the eastern provinces report that a 1GB bundle at 1,500 Congolese francs, formerly valid 48 hours, is now valid 24 hours, and a 2GB bundle at 2,000 francs valid 48 hours has been replaced by 1GB valid 72 hours at the same price</p> <p>.</p> <p>Both ends are subscribers' and resellers' accounts ; no operator or regulator statement is on record and the changes are reported as unannounced. It is the only affordability evidence on this ledger, and it comes from the same eastern provinces where service has been cut outright for months at a time.</p>                                                                                                                                                                                            | REGRESSED |

| TOPIC        | INDICATOR                               | DEVELOPMENTS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | PROGRESS    |
|--------------|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| Connectivity | <b>National fibre backbone</b>          | <p>7,000 km of backbone is deployed against a target of more than 18,500 km, leaving 11,500 km outstanding to 2030.</p> <p>2026-08-03 - the 95th ordinary Council meeting was told 7,000 km had been deployed against a target of more than 18,500 km, leaving 11,500 km outstanding, tied to connecting 145 territories by 2030</p> <p>. The minister cites budget constraints and a low disbursement rate on external financing, and the remaining distance over the 2030 horizon implies about 2,900 km a year against about 7,000 km delivered in the programme's first year</p> <p>.</p> <p>2026-07 - a memorandum was signed with a Chinese supplier for about 2,100 km along and beside the Congo River at a stated US\$1.5bn, more than US\$400m of it required for the first phase , with no financing close, contract or works. Both figures are company-reported.</p>                                                | ADVANCED    |
| Connectivity | <b>International internet bandwidth</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | NO EVIDENCE |
| Connectivity | <b>Internet Exchange Points</b>         | <p>One exchange became distributed across two carrier-neutral facilities and another moved into a Tier III facility.</p> <p>2026-05 - an exchange established in 2023 and operating from a single presence added a second presence at a Kinshasa carrier-neutral facility, making it the country's first distributed exchange, open to licensed operators, service providers, mobile networks, cloud and content providers</p> <p>.</p> <p>2026-08-20 - a second exchange relocated its infrastructure into a carrier-neutral Tier III data centre, the operators stating it connects more than 20 networks with over 1 Tbps of available capacity and expecting more than 2 Tbps after the move, as one of three points under a national exchange project managed by the internet service providers association</p> <p>. Capacity and network counts are the operators' own and no traffic measurement is held for either.</p> | ADVANCED    |

| Connectivity | <b>Satellite broadband licensing and availability</b>  | <p>A <a href="#">satellite direct-to-cell service launched commercially on 14 August 2026</a>, while the <a href="#">sovereign satellite programme is unchanged</a>.</p> <p>The satellite provider has been licensed since May 2025, reversing a March 2024 prohibition , a decision civil society welcomed as a corrective to incumbent monopoly abuse ; the licence conditions and any enforcement outcome are not established.</p> <p>2026-08-14 - a satellite-to-mobile service launched commercially, the first African operator to take such a partnership out of testing: a compatible handset with a clear view of the sky reaches messaging and voice where there is no terrestrial coverage, with no dish or router, on a phased rollout the regulator has confirmed . A free 30-day trial is the only access term published .</p> <p>The sovereign satellite programme has no contract, operator selection, build or launch date twelve months on .</p> | <p><b>MIXED</b></p> <p>a satellite-to-mobile service launched commercially while the sovereign satellite programme did not move in twelve months</p> |
| Data Storage | <b>Local data centre capacity (all providers)</b>      | <p>The <a href="#">largest facility is unchanged at 400 racks, 1,542 square metres and 1.5 MW</a>; only its parent's capital moved.</p> <p>The facility has operated since August 2024 as the country's largest, Tier III certified, at 400 racks over 1,542 square metres and 1.5 MW, on US\$30m invested . No utilisation, capacity-sold or expansion figure is held, and its position did not move in the window.</p> <p>What moved is its parent's balance sheet: committed capital rose from US\$350m to US\$380m, with six times as much power contracted in the first half of 2026 as a year earlier . That is group-level across six live markets and none of it is allocated to this country in the source, so it says nothing about capacity here.</p>                                                                                                                                                                                                   | <p><b>NO CHANGE</b></p>                                                                                                                              |
| Data Storage | <b>Local data centre capacity (national providers)</b> | <p>The enacted 2026 finance law <a href="#">carries FC 26,756,546,346 for national data-centre acquisition</a>, with no procurement or site held.</p> <p>No national data-centre appropriation is established at the window's opening. The enacted 2026 budget carries FC 26,756,546,346 for national data-centre acquisition .</p> <p>No procurement, site, operator, specification or execution evidence is held, and no 2026 execution data has been published at all, so an appropriation is the whole of it. Set against the prior year's payment rate of just over half the revised credit on the same section, an appropriation on this line is a weaker signal here than it would be elsewhere.</p>                                                                                                                                                                                                                                                        | <p><b>ADVANCED</b></p>                                                                                                                               |

| Digital Identity and CRVS    | Digital id from birth                                 | <p>A rural eastern sector <a href="#">has had no birth registers for several months and newborn registration has stopped outright</a>.</p> <p>2026-07-25 - a sector chief told the provincial interior division that his civil-status office has had no birth registers for several months, that newborn registration has stopped outright, and that the province promised resupply with no date . The stated consequences are exclusion from school enrolment and from proof of nationality.</p> <p>It is the concrete measure of how far civil-registry modernisation reaches into rural territories, and it runs in the same year a national digital identity platform launched in Kinshasa. No registration rate, register-stock figure or resupply programme appears anywhere on this ledger.</p> | REGRESSED   |
| Digital Identity and CRVS    | Interoperability of birth registration and digital id |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | NO EVIDENCE |
| Digital Identity and CRVS    | Use by other systems                                  | <p>The <a href="#">biometric passport stands at US\$75, 2,400 a day across 100 stations</a>, with no later figure held.</p> <p>The passport price was cut to US\$75 with a new supplier and online enrolment, on 50 fixed and mobile stations plus 50 at missions and a stated 2,400 a day , against prior prices of US\$185 then US\$99, under a 2022 contract worth US\$48m.</p> <p>No later price, volume or station figure is held, so the position is unchanged through the window. Nothing states whether the passport draws on, or will draw on, the identity platform launched in June 2026, which is the question the indicator asks and which no held source addresses.</p>                                                                                                                  | NO CHANGE   |
| Digital Payments and Fintech | Governance role of central bank                       | <p>The central bank <a href="#">set 9 April 2027 as the date from which no foreign-cash transaction of any amount is permitted</a>.</p> <p>2026-05 - the central bank set 9 April 2027 as the date from which no foreign-cash transaction of any amount is permitted . The deadline stands with no implementing instrument, exemption schedule or enforcement mechanism held.</p> <p>It runs directly against the dollar-denominated rails proliferating around it, including a stablecoin settlement use case live on a card-network partner's rail whose peg is inferred rather than disclosed. No held source reconciles the two, and no supervisory statement addresses what a de-dollarised retail payment system would settle in.</p>                                                            | ADVANCED    |

| Digital Payments and Fintech | <b>G2P functionality</b>         | <p>A rural payroll arrangement was scoped to three territories, while Kinshasa agents demonstrated over two months of arrears.</p> <p>2026-07 - a state bank and the payroll monitoring committee settled technical and organisational terms for rural payroll, scoped to three named territories and others where no other bank operates, with August 2026 named as a target, the bank's director-general saying a fixed date is premature, the state contract unsigned and its core banking replacement still in test . The bank's reach is reported at both around 40 sites and about thirty territories , and that reach is the whole rationale for the arrangement.</p> <p>2026-07-23 - Kinshasa urban administration agents demonstrated over two months of unpaid salary, beneficiary listings already transmitted to the paying bank but neither bank staff nor payroll agents attending the appointed payment - a failure at the last mile of an otherwise complete digital chain.</p> <p>The biometric civil-servant registry stands at more than 118,000 cards across 26 provinces with no updated figure in twelve months .</p> | <p><b>MIXED</b></p> <p>a rural payroll route was scoped while Kinshasa's urban administration went two months unpaid and the biometric civil-servant register published no new figure</p> |
| Digital Payments and Fintech | <b>Revenue collection</b>        | <p>Standardised electronic invoicing is mandatory since 1 December 2025, with quarterly VAT mobilisation up from CFC 280-290bn to CFC 340bn.</p> <p>The system was initiated in 2017 and operationalised on 1 August 2025. It is mandatory since 1 December 2025 for all firms liable to VAT after a two-month moratorium and a further 30-day grace period, the state having distributed more than 4,000 free billing units and electronic fiscal devices to liable small and medium firms, with quarterly VAT mobilisation risen from a CFC 280-290bn average to CFC 340bn, which the finance minister still calls very largely below potential . Fiscal clinics closed in August 2026 with immediate targeted sanctions ordered against non-compliant taxpayers and revenue staff alike. The figures are the minister's own and unaudited.</p> <p>2026-06-11 - a province made electronic payment of an airport levy official from July through a private technical partner with real-time tracking ; whether it went live is not established.</p>                                                                                       | <p><b>ADVANCED</b></p>                                                                                                                                                                    |
| Digital Payments and Fintech | <b>B2B and B2G functionality</b> | <p>A partnership agreement covers connecting microfinance institutions and cooperatives to the national switch across 145 territories.</p> <p>2026-04 - a payments firm and two sector associations signed on core banking, enterprise resource planning and card modules, 10,000 payment terminals with biometric authentication, chip cards, and connection of microfinance institutions and cooperatives to the national switch across 145 territories .</p> <p>Nothing is deployed on file. The switch connection is the load-bearing item and no go-live is held; the arrangement is externally financed, and no source names the operator of the switch, the connection standard or what an institution must meet to join.</p>                                                                                                                                                                                                                                                                                                                                                                                                        | <p><b>ADVANCED</b></p>                                                                                                                                                                    |

| China activities    | Chinese MoUs, engagements and commitments | <p>A <a href="#">US\$1.5bn Congo River fibre memorandum was signed</a>, and a <a href="#">police cooperation accord names cybercrime</a>.</p> <p>2026-07 - a memorandum with a Chinese supplier covers about 2,100 km, 1,700 km along the river plus nearly 400 km terrestrial, at a stated US\$1.5bn with more than US\$400m required for the first phase, with no financing close, contract or works . Both figures are company-reported. It is the country's largest single tracked non-state digital commitment, and it is a memorandum.</p> <p>2026-05 - an accord signed in Beijing by the interior vice-premier and China's public-security minister gives Chinese technical assistance to the national police naming cybercrime alongside urban crime and mining fraud, with a standing joint working group . No text, value, equipment or software list, and no data-handling or oversight arrangement is held.</p> | ADVANCED    |
| EU activities       | EU MoUs, engagements and commitments      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | NO EVIDENCE |
| Gulf/UAE activities | Gulf MoUs, engagements and commitments    | <p>The digital economy minister <a href="#">met a Gulf-based delegation on data-centre proposals in February 2026</a>; talks only.</p> <p>2026-02 - the minister met a Gulf-based delegation on data-centre proposals, with a proposed technical-specification working group and no memorandum, site, capacity or follow-up recorded six months on .</p> <p>It is the whole of the relationship as the base holds it. No investment, agreement or presence has followed, and the working group that was proposed has produced nothing on record, so what is stated is an exploratory meeting rather than a commitment.</p>                                                                                                                                                                                                                                                                                                   | ADVANCED    |
| India activities    | India MoUs, engagements and commitments   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | NO EVIDENCE |

## Where the record is thin

| SYSTEM OR INSTRUMENT                                                | WHAT WOULD SETTLE IT                                                                                                                                                                     | LAST PROBED    |
|---------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| Functioning national incident-response capability                   | a founding instrument for a computer emergency response team, an incident report or advisory, or an international cybersecurity assessment for the country                               | not yet probed |
| National technical-capacity base                                    | a named compute or high-performance computing facility, a national technical or testing institution with a dated status, or a skills-for-infrastructure programme with enrolment figures | not yet probed |
| Energy provision for digital infrastructure                         | a utility-operator power agreement, a dated telecom-site electrification programme with site counts, or a data-centre power-purchase arrangement                                         | not yet probed |
| National data governance strategy                                   | the strategy document or the decree adopting it                                                                                                                                          | not yet probed |
| National open-data policy or portal                                 | a decree creating an open-data portal, a statistics-institute microdata release policy, or the access-to-information bill once adopted                                                   | not yet probed |
| EU digital governance or regulatory cooperation                     | the EU financing agreement or gateway package document, or an EU delegation statement on digital regulation, data adequacy or governance support                                         | not yet probed |
| Use of satellite or earth-observation data in public administration | a statistics-institute, planning-ministry, land-administration or agriculture-ministry statement naming an earth-observation data source or a satellite-imagery procurement              | not yet probed |
| India-DR Congo digital or technology engagement                     | an India-DR Congo memorandum, line of credit, training placement or Indian supplier contract naming the country                                                                          | not yet probed |

| SYSTEM OR INSTRUMENT                                       | WHAT WOULD SETTLE IT                                                                                                           | LAST PROBED    |
|------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>FY2026 budget execution</b>                             | the budget ministry's monthly or quarterly execution statements for the 2026 exercise                                          | not yet probed |
| <b>Audited outturn for the digital sections</b>            | the audit court's general report or the settlement law for FY2024, at section grain                                            | not yet probed |
| <b>Gender-disaggregated connectivity or usage</b>          | a mobile-industry gender-gap country cut, or a statistics-institute or central-bank survey with sex-disaggregated tables       | not yet probed |
| <b>National digital literacy rate or skills baseline</b>   | an international digital-skills indicator for the country, a household survey module, or the sectoral policy's baseline annexe | not yet probed |
| <b>Domestic public funding for digital and AI research</b> | a finance-law section or programme line for scientific research, or the AI strategy's costed roadmap                           | not yet probed |

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
