

## PROGRESS REPORT

# Ethiopia: progress report, August 2025 – August 2026

Edition of 2026-08-27 · 100 systems and instruments tracked

GOVERNANCE · FINANCE · ICT INFRASTRUCTURE · DPI · DIGITALISATION · TECHNOLOGY · CAPACITY · INCLUSION · DATA · GEOPOLITICS · WHERE THE RECORD IS THIN

This report asks the same set of questions of every country. The rows below are a fixed frame of indicators, one row each, chosen in advance and covering all thirty-eight subjects the base tracks — so what appears here is decided by the frame and not by whichever records happened to accumulate. Each row says what happened on that indicator during the period, with every claim linked to the source it rests on.

Where a row reads *No evidence*, the base holds nothing on that indicator. **That is a statement about this base, not about the country** — it does not mean nothing exists, only that nothing has been collected here yet. The rows that carry evidence say what it is; the rows that do not are left to speak for themselves.

*The period is 2025-08-01 to 2026-08-27.*

**Progress values.** *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a reported position worsened. *Mixed* — the indicator's instruments moved in different directions in the period; the clause after the comma names which moved which way. *No change* — the base holds a standing position and nothing in the period touched it. *No evidence* — the base holds nothing on this indicator at all. A value may carry a qualifying clause after a comma, as in *Advanced, regulations still pending*.

## Governance

| TOPIC                          | INDICATOR                       | DEVELOPMENTS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | PROGRESS |

| Strategies, plans and policies | Digital transformation strategy | <p>Digital Ethiopia 2030 was launched in December 2025 on three pillars of access, equal opportunity and trust, and is the standing national strategy.</p> <p>The strategy sets targets of 128m subscriptions and an identity for every adult by 2030, together with a sevenfold rise in digital payments ( Digital Ethiopia 2030 ).</p> <p>The council overseeing the programme restated in July 2026 that it is to be judged on lives changed rather than systems deployed, a claim with no published measure behind it</p> <p>.</p> <p>No implementation plan, budget allocation against the pillars or progress report is held.</p> | ADVANCED |

| TOPIC                          | INDICATOR                                        | DEVELOPMENTS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | PROGRESS    |
|--------------------------------|--------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| Strategies, plans and policies | <b>ICT strategy</b>                              | <p>The <a href="#">Digital Government Strategy and Enterprise Architecture 2024-2029</a> has been in force since July 2024 with no revision on the record.</p> <p>The strategy and its enterprise architecture were published in July 2024 and run to 2029, and remain the standing statement of how government systems are to be built ( the strategy ).</p> <p>The base holds nothing on implementation against it: no progress report, no compliance review and no register of systems assessed against the architecture.</p> | NO CHANGE   |
| Strategies, plans and policies | <b>Broadband strategy</b>                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | NO EVIDENCE |
| Strategies, plans and policies | <b>Data storage / cloud strategy</b>             | <p>A sovereign cloud and a forensic laboratory are <a href="#">named in the national strategy</a> as intentions, with no separate storage or cloud policy held.</p> <p>December 2025's national strategy places a sovereign cloud and a forensic laboratory among the foundations it sets out ( Digital Ethiopia 2030 ).</p> <p>No siting decision, procurement, operator or date exists for either facility, and no data storage or cloud strategy is held as a document in its own right.</p>                                  | ADVANCED    |
| Strategies, plans and policies | <b>Data interoperability framework / roadmap</b> | <p>The <a href="#">e-government interoperability framework</a> has been in development since July 2024 and the base records no completion.</p> <p>The framework was published in July 2024 and is recorded as still in development two years on ( the framework ).</p> <p>No adopted version, compliance mandate or list of systems built to it is held, which is the gap the approved national data exchange platform would have to close.</p>                                                                                  | NO CHANGE   |
| Strategies, plans and policies | <b>AI strategy</b>                               | <p>A <a href="#">national artificial intelligence policy</a> adopted in 2024 is in force, known to the base only at second hand.</p> <p>The policy was adopted in 2024 and its existence reaches the base through a July 2026 account of the country joining a Shanghai-based cooperation body ( policy in force ).</p> <p>The policy text, its objectives, any implementation plan and any review are all absent, so what is recorded is that a policy exists and not what it says.</p>                                         | NO CHANGE   |
| Strategies, plans and policies | <b>Data localisation policies</b>                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | NO EVIDENCE |

| TOPIC                          | INDICATOR                              | DEVELOPMENTS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | PROGRESS    |
|--------------------------------|----------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| Strategies, plans and policies | <b>Data governance policy</b>          | <p>A national data governance strategy is being drafted <a href="#">around named use cases</a> in health, agriculture and public financial management.</p> <p>The strategy is being anchored in concrete use cases rather than written first and applied afterwards, with agriculture and public financial management the test domains alongside health ( use-case approach ).</p> <p>No draft text, adopting instrument or timetable is published, so the approach is on the record and the policy itself is not.</p>                                                                                                                                                                                                                                                                                                                                                                                                | ADVANCED    |
| Strategies, plans and policies | <b>Open data policy</b>                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | NO EVIDENCE |
| Legislation and regulation     | <b>Data protection legislation</b>     | <p><a href="#">Proclamation 1321/2024</a> has been in force since July 2024, a comprehensive regime with extraterritorial reach and no secondary directives behind it.</p> <p>The proclamation took effect on 24 July 2024 as a comprehensive personal data regime reaching beyond the country's borders ( Proclamation 1321/2024 ).</p> <p>What the base does not hold is any instrument under it: the directives that would give the proclamation operative content were still unissued a year after commencement ( a year on ).</p>                                                                                                                                                                                                                                                                                                                                                                                | NO CHANGE   |
| Legislation and regulation     | <b>Cybersecurity legislation</b>       | <p><a href="#">Proclamation 1426/2026</a> designates twelve critical sectors and places eighteen obligations on their owners and operators, commencing about July 2027.</p> <p>The proclamation was signed at Addis Ababa on 21 July 2026, and article 28 sets commencement one year after gazettelement ( Proclamation 1426/2026 ).</p> <p>The designated sectors run from information and communications technology, financial services and transport to agriculture, trade and industry; a Critical Infrastructure Cybersecurity Fund is established, and the security agency is to write sector standards, give technical assistance and enforce through the transition ( briefing on the proclamation ).</p> <p>Ratification, assent and commencement dates are not established in the base, and the regulations the Council of Ministers and the agency may make under articles 26 and 27 do not yet exist.</p> | ADVANCED    |

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
