

PROGRESS REPORT

Gulf/UAE activities: progress report, 2025-08-01 to 2026-08-26

Edition of 2026-08-27 · compiled by Claude Opus from the documents in the Corpus repository

8 places. Every table below is carried verbatim from that place's own progress report; nothing is written here.

ESWATINI · MALI · MAURITANIA · NAMIBIA · NIGER · SUDAN · UGANDA · ZIMBABWE

Movement values. *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a measured position worsened. *Closed* — the programme ended. *No change* — the position at both ends is the same. *Baseline not held* — the base carries no position at the start of the period, so no movement can be stated. A value may carry a qualifying clause after a comma, as in *Advanced, slipped*.

The place reports do not share one window; the period above is the range they span.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
