

## PROGRESS REPORT

# Strategies, plans and policies: progress report, 2025-08-01 to 2026-08-27

Edition of 2026-08-27 · compiled by Claude Opus from the documents in the Corpus repository

31 places. Every table below is carried verbatim from that place's own progress report; nothing is written here.

CHAD · ESWATINI · LESOTHO · LIBYA · MADAGASCAR · MALAWI · MALI · MAURITANIA · MAURITIUS · MOROCCO · MOZAMBIQUE · NAMIBIA · NIGER · NIGERIA · RWANDA · SAO TOME AND PRINCIPE · SENEGAL · SEYCHELLES · SIERRA LEONE · SOMALIA · SOUTH SUDAN · SUDAN · TANZANIA · TOGO · TUNISIA · UGANDA · ZAMBIA · ZIMBABWE · AFRICA · SOUTHERN AFRICA · WEST AFRICA

**Movement values.** *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a measured position worsened. *Closed* — the programme ended. *No change* — the position at both ends is the same. *Baseline not held* — the base carries no position at the start of the period, so no movement can be stated. A value may carry a qualifying clause after a comma, as in *Advanced, slipped*.

The place reports do not share one window; the period above is the range they span.

## Chad

| SYSTEM OR INSTRUMENT                                                  | AT 2025-08-01                     | AT 2026-08-25                                                                                                                                                                                                                                                                                                                                                                          | MOVEMENT                    |
|-----------------------------------------------------------------------|-----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|
| Economic and social council recommendations on the digital transition | Did not exist                     | Recommendations adopted after a plenary session running 5 to 19 August on the public administration facing the digital transition, calling for an affirmed national digitalisation policy of wider scope, a durable national financing mechanism for the sector, adequate power supply, stronger public-agent skills and specialised digital training, and public-private partnerships | ADVANCED                    |
| Tchad Connexion 2030                                                  | No record at the window's opening | In force as the umbrella strategy, targeting at least 80 per cent national internet coverage and about 80 per cent mobile penetration by 2030; its regulatory components - reform of the regulator, privatisation of the state operator, a third operator and number portability - have no dated delivery on record                                                                    | ADVANCED, BASELINE NOT HELD |
| National data governance strategy                                     | Did not exist                     | Under development with regional-commission and donor support; terms of reference issued by the ministry in April 2026                                                                                                                                                                                                                                                                  | BASELINE NOT HELD           |

| National Digital Cloud Policy                                                 | Did not exist            | In force on publication apart from its sovereignty provisions, which await presidential approval. It makes cloud the default for new federal systems, with time-bound exemptions assessed by the IT development agency against published criteria and kept in a register; pools ministry demand through the government infrastructure company under framework agreements bought on a National Digital Marketplace, with the procurement bureau overseeing compliance; and sorts government and regulated data into four levels, Level 4 national-security data hosted only in Nigeria, Level 3 financial, health, biometric and identity data stored at rest in Nigeria, Level 2 hybrid by prior authorisation and Level 1 unrestricted. It imposes no general localisation on commercial data, and a regulator must apply to have a category designated sovereign. A US\$50m private cloud and data-centre investment target is set for 24 months | ADVANCED                 |

| <b>National AI Strategy</b> | A parliamentary motion for an AI policy and legal framework was under public debate in July 2025; no strategy, draft or institutional home announced | A strategy text exists and is now held, which settles the question the three accounts of its stage left open: the technology ministry's statement of 2026-08-07 that the current strategy is nearing the end of its implementation cycle is consistent with the document, and the Presidential Delivery Unit's July 2026 description of one nearing completion is a reference to a successor rather than to this text. What the document cannot settle is which cycle is ending, its cover and its running headers giving horizons a year apart, and no successor draft is published | ADVANCED |

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
