

STATUS REPORT

Mali: status report

Edition of 2026-08-27-2 · 77 systems and instruments tracked

Compiled 2026-08-27 by Claude Opus from the documents in the Corpus repository, from [outputs/reports/MLI/Ledger.csv](#) (77 systems and instruments, 4 of them **Not held**). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

[SUMMARY OF POSITION](#) · [GOVERNANCE](#) · [FINANCE](#) · [ICT INFRASTRUCTURE](#) · [DPI](#) · [DIGITALISATION](#) · [TECHNOLOGY](#) · [CAPACITY](#) · [INCLUSION](#) · [DATA](#) · [GEOPOLITICS](#) · [GAPS TO FILL](#)

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

Mali's digital programme is a sovereignty programme, and the objects it has built are those that keep data and identity inside the state or inside the three-country Sahel confederation. A [Tier III National Data Centre opened in Bamako in January 2026](#); the passport is [issued to AES specification by a Chinese supplier that replaced a French one](#); the state [took majority control of SOTELMA in June 2026](#).

The regulatory layer is older than the build. The data-protection authority has enforced under a 2013 statute since before this record opens, and [opened its second 2026 session with more than 1,000 files](#). In the same period the cybercrime pole [sentenced a journalist to 12 months with six suspended](#) for saying in public that cybercrime law was being used against journalists.

What is thin is money reaching users. The universal access fund [cut its 2026 budget by 32% in July after spending 8% of it in six months](#), and digital payment at civil registry centres [raised about FCFA 200 million across 23 months](#).

A national AI strategy, a data-management law and a national public key infrastructure exist only as [recommendations made at the end of July 2026](#).

Governance

Strategies, plans and policies

Membership of the African Telecommunications Union board	IMPLEMENTED ↗	Re-elected for 2027-2031 at the Abuja plenipotentiary
Smart Africa cooperation	IMPLEMENTED ↗	Ministerial meeting at MWC 2026

Public debate and participation in policymaking

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Disinformation awareness campaign	IMPLEMENTED ↗	Campaign launched 20 August 2026 with a target of 60,000 people

The authority here is older than the systems it regulates. Loi n2013-015 has been in force since May 2013 and the APDP enforces under it: [about 2,000 declaratory files reviewed in 2025](#), with one 5m FCFA fine and more than 100 formal notices, a [regional antenna at Segou](#), and [more than 1,000 files before a ten-day session opened on 3 August 2026](#). No figures for sanctions issued or files cleared are published, so the docket is a workload count.

Platform regulation took the opposite route. On [29 July 2026 the justice minister instructed prosecutors](#) to act against content networks using penal and cybercrime provisions already on the books — no new statute, no notification to platforms, and enforcement duties pushed onto parents, landlords and hotel keepers. Five days later the cybercrime pole [sentenced Chahana Takiou, publication director of 22 septembre, to 12 months with six suspended](#) for arguing that journalists should be tried under press-offence law rather than cybercrime law. Neither the judgment nor the charging instrument is held.

Three instruments exist only as [recommendations from the Semaine du Numerique of 1 August 2026](#): a data-management law, a startups law and a Conseil national du Numerique. Externally, Mali was [re-elected to the African Telecommunications Union board for 2027-2031](#) and spoke for the three AES states at the UEMOA digital economy salon. The European Commission states [the EUR 151m committed for 2021-2024 has no 2025-2027 successor](#),

funding running instead through a shared central-Sahel allocation with no digital activity named. An academic evaluation [finds no single access-to-information law](#), the right split across Loi 98-012, Loi 2013-015 and Loi 2017-062.

Finance

New investments

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
AGEFAU conventions with the education and employment ministries	IMPLEMENTED ↗	Two four-year renewable conventions signed 2026-07-22
Agence de Gestion du Fonds d'Acces Universel	IMPLEMENTED ↗	New director-general named 2026-07-23

The universal access fund is where Mali's inclusion money sits and where the record is sharpest. AGEFAU [cut its 2026 budget by 32%, from FCFA 41,151,471,000 to FCFA 27,886,688,000, on 23 July 2026](#), after spending 8% of the annual budget in the first half against receipts at 56% of forecast. In the same week it [signed two four-year conventions with the education and employment ministries](#), committing cumulative education spend under the conventions to above FCFA 17bn.

Cybersecurity

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Agence nationale de la Securite des Systemes d'Information	IMPLEMENTED ↗	Created by Council of Ministers texts 2026-06-10
Criminal chamber of the national cybercrime pole	IMPLEMENTED ↗	Began hearing cases 2026-05-21, four cases and eight accused
National Cybersecurity Strategy 2026-2030	IMPLEMENTED ↗	Adopted by the Council of Ministers 2025-12-09

The [Tier III National Data Centre](#), inaugurated on 31 January 2026 with a stated availability of 99.982%, is the centrepiece, and no rack, floor or power capacity figure has been published for it. The institutional cyber stack was assembled around it in the same twelve months: a [National Cybersecurity Strategy 2026-2030](#) adopted in December 2025, ANSSI created in June 2026, and the cybercrime pole's [criminal chamber hearing its first four cases](#) in May 2026.

Access is carried by two operators. Orange Mali is building [300 4G towers](#), half of them rural, and fibre to about [300,000 households](#) under a [EUR 80m IFC-led loan](#), with diesel-to-solar site conversion in scope; Moov Africa Malitel [doubled fibre speeds to up to 100 Mbps across six cities in June 2026](#) and [announced ADSL retirement for end-2026](#). Satellite 3G and 4G reaches about 360,000 remote residents.

International routing improved without any Malian asset changing hands: [CSquared added 2Africa West capacity to the backbone that reaches inland to Mali](#), giving an independent subsea route behind the Abidjan, Accra and Lagos landing concentration.

Two positions are recommendations rather than systems: [a law making SMTD-SA the sole national operator of transport infrastructure](#), and [universal connectivity by 2030](#). A named-analyst investigation carried by Maliweb reports [AFRIBONE as the sole surviving independent provider](#), buying wholesale IP transit at near-retail prices. Starlink kit imports remain restricted: after an October 2024 lifting, AMRTP [restated the ban on unauthorised equipment in March 2026](#) and [announced seizure and dismantling operations in June 2026](#).

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
.ml country-code domain administration	IMPLEMENTED ↗	13,441 domain names across 30 registrars (2025-12)
Diaspora services platform	IMPLEMENTED ↗	Launched 2025-02-18
Government action monitoring and evaluation system	IMPLEMENTED ↗	First published evaluation covering the second half of 2025
Government Intranet	IN DEVELOPMENT ↗	13 services integrated (2025-12)
Integrated human resources management system	IN DEVELOPMENT ↗	Reported to the pan-African public administration forum July 2026
Online criminal record and nationality certificate	IMPLEMENTED ↗	Launched during the Week of Justice February 2026
SIGIP territorial administration data management	IN DEVELOPMENT ↗	Presented 2025-09-16
Sigui-Dolo driving licence and vehicle registration	IMPLEMENTED ↗	Presented 2025-09-16

Identity runs through the confederation. The [E-AES passport](#) is issued in five categories to ICAO specification, supplied by Emptech since October 2025; the [CIB-AES card](#) was piloted in Bamako in June 2026 for Burkinabe residents, on specifications the three AES security ministers validated in November 2024. Domestically the [NINA number authenticates service applications](#), while [birth registration](#) stands at 89.5% across 747 functional centres and [death registration](#) at about 20%.

The base layer is older than any of that. A [draft ordinance adopted on 24 July 2026](#) formalises the [cahier de recensement](#), the hand-kept village register from which family record books are issued, replacing a 2006 statute — so civil registration still begins on paper.

Service platforms are numerous and mostly unmeasured. [Online criminal-record and nationality certificates went live in February 2026](#) with an authenticity check against forgery; [Sigui-Dolo handles driving licences and vehicle registration](#) and is linked to TresorPay and the customs system; OpenClinic and SIGIP remain in build; a [national digital health portal launched in July 2026](#), and [one Bamako hospital runs an end-to-end circuit on a unique patient identifier](#).

Payments have two state flows and one market. Pension payment has a completed bank-channel pilot; [digital payment at civil registry centres raised about FCFA 200 million between July 2024 and May 2026](#), and every collectivite has been ordered to report within 30 days on why. In the market a [second telco-led prepaid card launched in April 2026](#). Against that, the BCEAO records Mali's [mobile-money distributor numbers down 46.34% in 2024, the steepest fall in the Union](#), and its share of Union transaction value at 11.7%, down from 12.1%.

Government's own systems are being wired together: [13 services on the AGETIC intranet](#) and [13,441 domain names under .ml](#), an integrated human-resources system in build, and a monitoring system that [published a completion rate of 43.43% for the second half of 2025](#). A national public key infrastructure is recommended and not built. INSTAT runs [its own microdata catalogue — a NADA archive of 107 studies led by the 2022 census \(August 2026\)](#).

Digitalisation

Digitalisation of sub-national government

Innovation ecosystem

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Citizen content reporting and checking application	IMPLEMENTED ↗	Launched alongside the closing report of a digital campaign

Mali has no national AI strategy. One was [recommended on 1 August 2026](#), and the only AI-governance instrument the country has joined is the [Francophone West African guidelines adopted with five other states in July 2026](#). The [Centre d'intelligence artificielle et de robotique](#) has one demonstration on record, of a locally built intrusion-detection technology; the other AI system on the ledger is an [operator's customer assistant launched in June 2026](#).

The sector's largest movement was ownership rather than technology. The state [raised its stake in SOTELMA from 49% to 56% for FCFA 160bn in June 2026](#), cutting Maroc Telecom to a minority 17 years after privatisation, and the [passport supplier changed from Idemia of France to Emptech of China in October 2025](#), which officials described as regained sovereignty and local data management. No United States or India bilateral digital instrument is held. UAE operator e& [committed \\$6bn to the ITU's Partner2Connect coalition across 16 markets including Mali and Niger, in March 2024](#), undivided, with no Mali-specific figure.

Capacity

Training and skills

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Digital-skills programme for 15,000 young people	IN DEVELOPMENT ↗	First cohort recruitment opened 2026-08-01
Teacher-training institute ICT equipment	IMPLEMENTED ↗	Handover of FCFA 88,740,927 of equipment to eight institutes 2026-07-30

Research institutions

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Higher-education and research digital capacity	IN DEVELOPMENT ↗	Universite Numerique du Mali strategic framework and action plan validated 2024-05-07

Higher-education and research digital capacity rests on a [national policy document naming a Universite Numerique du Mali strategy](#) rather than on delivered provision. No enrolment, platform or funding line is held.

Inclusion

Digital divides

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Women's digital-training target	PLANNED ↗	70% by 2032 target set in the IFC-led loan

AGEFAU, the universal access fund, [signed two four-year conventions with the education and employment ministries](#), committing it to connect every secondary, technical and vocational school by end-2027. The fund sits under direct Primature tutelle, an arrangement a [named-analyst investigation dates to 2012](#) and contrasts with the regulator-attached funds of neighbouring states.

Skills programmes are being opened faster than they are being measured. Recruitment for the first cohort of a [15,000-youth programme with the Association Kabakoo opened on 1 August 2026](#); an operator reports [350 graduates placed](#); and eight teacher-training institutes received [FCFA 88,740,927 of Japan-funded equipment](#) with no maintenance, connectivity or software provision stated. The IFC-led loan carries a [70%-by-2032 women's digital-training target](#) with no interim figure. A [2009 ministry policy document recorded no long-term national research strategic plan](#), against a 1:100 teacher-student ratio at Bamako. [UNESCO backed validation of a strategic framework for the planned Université Numérique du Mali in May 2024](#), citing 132,186 students across 16 institutions and an 81:1 ratio against its own 25:1 norm; no creation decree has followed.

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
e& Partner2Connect digital-infrastructure pledge	IMPLEMENTED, UNDIVIDED AMONG 16 MARKETS ↗	\$6bn pledged to ITU's Partner2Connect coalition across 16 markets 2024-03-01

India activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
India bilateral digital cooperation	NOT HELD	—

No India bilateral digital cooperation is held for Mali. The base carries no instrument under this heading at all, which is a statement about the record rather than about the country's external relations.

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
National Data Centre capacity	A rack, floor-area, power or storage figure for Mali's Tier III National Data Centre, from the digital economy ministry, AGETIC or the builder.	2026-08-10
Open-data portal or policy	A Malian government open-data portal, open-data policy or right-to-information instrument, or an official statement that none exists.	2026-08-10
United States bilateral digital cooperation	A US government programme document, agreement or funding decision on digital or data cooperation with Mali after the 2023 Digital Ecosystem Country Assessment.	2026-08-10
India bilateral digital cooperation	A bilateral memorandum, DPI cooperation programme or ministerial readout naming a Mali-India digital instrument.	2026-08-10

Four rows carry no reliable statement of status. The National Data Centre's availability figure is published but its rack, floor-area or power figure is not. No open-data portal or policy is held: an academic evaluation finds no single access-to-information law, the right split across three statutes. The remaining two are bilateral — whether any United States or India digital instrument exists at all.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
