

MONTHLY UPDATE

EU activities: monthly update, July 2026

Edition of 2026-08-27-2 · compiled by Claude Opus from the documents in the Corpus repository

6 places. Every block below is carried verbatim from that place's own monthly update, where it was written, sourced and checked; nothing is written here.

CONGO · KENYA · MALI · MOROCCO · NIGERIA · UGANDA

Congo

An [exploratory session on 14 July](#) opened a channel with a European member-state development bank under the [European gateway programme](#), with no commitment, sum or timetable named.

Kenya

A European data-adequacy decision was described as being in prospect, in a [development agency interview that mentions it in passing alongside cross-border identity work](#). No application, assessment stage or timetable is stated, and neither the European Commission nor the government has said anything on the record here.

Mali

There is [no dedicated European Union country programme for Mali for 2025 to 2027](#): the country is funded instead from the central-Sahel complex-settings allocation, with no digital or data-governance activity named in either tranche. No separate termination instrument for the previous programme has been found.

Morocco

Morocco holds [no European Union adequacy decision: the Commission's list names sixteen jurisdictions plus one international organisation, none of them in Africa](#). Neither source establishing this is tagged to Morocco, and no Morocco-tagged governance source the base holds mentions the European Union at all.

Nigeria

The European Union [committed EUR 820m to the digital sector](#) at the Abuja workshop that validated a national innovation hub standards framework, which would set one standard across the country's hubs. The envelope is stated at a workshop rather than in an instrument, the framework is validated rather than adopted, and neither carries a disbursement schedule or a hub count.

Uganda

A technical-assistance tender was published on 31 July, estimated at EUR 938,170 over thirty months from 15 September, performed from the regional secretariat in Arusha, with designs to be tested against the universal safeguards framework and against local data-protection and localisation law. The same tender names an added national funding window for a sovereign digital public infrastructure loan package with the ICT ministry, for which no amount, instrument or date is stated.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
