

MONTHLY UPDATE

Chad: monthly update, July 2026

Edition of 2026-08-13 · 18 systems and instruments tracked, 42 of them not held

Developments recorded from artefacts published between 2026-07-01 and 2026-08-06 — July 2026 carried forward to the date of issue, so the report holds the nightly catch to the day it was cut. Sections follow the status report.

Digital Payments and Fintech

On 24 July the Ministry of Finance took delivery of [3,000 smart electronic payment terminals](#) supplied under the World Bank-financed *Projet d'appui à la transformation numérique*, intended to digitise collection of public revenue; the ministry named no deployment schedule, target sites or per-agency allocation.

The 2027 budget orientations, reported 4 August, [restate](#) the mandate for exclusive electronic payment of state obligations — bank or mobile transfer only, against a standardised electronic invoice — for a start of 1 January 2027. The same regime had already been [mandated for budget year 2026](#) — exclusively bank or mobile payments, cash and cheques out; nothing in the base shows that 2026 mandate operating, so the restatement is a year's slip rather than a new commitment. Chad had already launched the standardised electronic invoice itself, among the first CEMAC states to do so, under the 2026 budget; the August orientations move only the exclusivity date.

On 29 July, at Douala, the BEAC and GIMAC [launched the CEMAC's interoperable QR-code payment standard](#), in force under a monetary-union regulation of 8 April 2026 across all six member states including Chad and letting any bank, mobile-money or microfinance account settle a purchase at any merchant's code, routed and settled through the regional switch. No Chadian bank, wallet or merchant deployment is on record: Chad is covered by the regulation rather than shown live.

Public debate and participation in policymaking

On 4 August the Haute autorité des médias et de l'audiovisuel [announced](#) that it suspends, "jusqu'à nouvel ordre", examination of applications to create online newspapers. The regulator presented the freeze as implementation of its 2026–2028 three-year strategic plan, one axis of which is to clean up the profession and better address "information disorder", and said it would study new arrangements for governing online newspapers with all stakeholders. The communiqué carried no date of its own, set no end date, no published criteria and no transitional treatment for applications already filed, so the outlets already licensed become a closed list for the duration.

Artificial intelligence and the technology sector

No development moved this month on artificial intelligence, the technology industry or Chad's bilateral digital-cooperation tracks with the United States, China, India or Gulf states. The most recent dated positions on record for each — the state operator's privatisation, the third mobile-operator licence, the Huawei backbone contract, the United States digital work programme and the Indian digital partnership — all predate 1 July.

Inclusion and capacity

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
