

STATUS REPORT

Liberia: status report

Edition of 2026-08-18 · 56 systems and instruments tracked, 8 of them not held

Compiled 2026-08-17 from the Data Landscapers source base, from [outputs/reports/LBR/ledger.csv](#) (56 systems and instruments, 8 of them **Not held**). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

Liberia's digital programme is being built by executive order and financed from outside, and the register at its centre spent much of the last year unable to issue a card. Enrolment under the mandatory biometric scheme stood at [about 740,000 people, under 15% of about 5.3m, at a US\\$5 fee](#), and issuance halted in March 2026 when the system's builder [withheld database access over a US\\$1.7m unpaid balance](#). The fix is a concession: an Austrian firm is to [finance enrolment of the whole population in 18 months, operate the system and transfer it](#), on terms not published and not yet ratified.

No data-protection statute governs any of it. The Personal Information Act has been [before the legislature since June 2025](#), and there is no data-protection authority.

What did get built is payments. The central bank's [interoperable instant payment system launched on 16 December 2025 in 73 business days](#), and the two mobile-money networks are no longer separate.

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
5G network services	PLANNED ↗	Stated as planned by the LTA chairman, January 2026
Domestic fibre-optic backbone extension	IN DEVELOPMENT ↗	Extension from Buchanan toward Rivercess, Sinoe, Maryland, Grand Gedeh and Nimba reported under way

Tier III+ data centre at Buchanan	IN DEVELOPMENT ↗	Stated as under development in the National Data Governance Policy, March 2026

Cybersecurity

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Cybercrime Act 2025	IN DEVELOPMENT, PASSED BY THE LEGISLATURE, AWAITING PRESIDENTIAL SIGNATURE ↗	Still unsigned by President Boakai as of Senator Moye's public statement, 1 July 2026
Cybersecurity Regulations (LTA-REG-0013-2026)	IMPLEMENTED ↗	Made by the LTA under the Telecommunications Act 2007, 13 January 2026, effective from the day of publication
House investigation into the 2026 data breach	IN DEVELOPMENT ↗	Investigation ordered by the House, February 2026
National Cybersecurity Act	PLANNED ↗	Scheduled for Q3 2025 by the cybersecurity strategy action plan
National Cybersecurity Council	PLANNED ↗	Scheduled for Q4 2024 by the cybersecurity strategy action plan, operational basis set for Q1 2025
National Cybersecurity Strategy 2025-2029	IMPLEMENTED, ADOPTION OF THE PUBLISHED TEXT NOT ESTABLISHED ↗	Published by the Ministry of Posts and Telecommunications, cover dated July 2024

International capacity rests on one cable and two unbuilt alternatives: a [second landing at Buchanan, with partial funding stated as sourced and investors still being sought](#), and a [regional agreement of June 2026 to commercialise spare fibre on the TRANSCO CLSG grid](#), with no operator, tariff or date attached. Domestic extension is reported rather than measured — the backbone [has reached Loguatu, with private firms extending it toward the south-east](#) — with no kilometre figure or completion date published. A national data centre and 5G service are [stated plans without site, cost or timetable](#), and the ministry's data governance policy records a [Tier III+ facility under development at Buchanan for sovereign hosting of the national identity register and revenue authority data](#).

Starcell's licence and spectrum were [revoked with immediate effect on 22 July 2026](#) after six years without operating and a 90-day suspension, leaving the duopoly in place. The telecoms traffic monitoring concession is [suspended and under a corruption complaint at the Anti-Corruption Commission, with a joint legislative committee recommending renegotiation rather than cancellation and operator funds in escrow of undisclosed amount](#), on which no evidence has been produced and no findings made.

The ministry's [National Cybersecurity Strategy 2025-2029, cover-dated July 2024](#) sets dated deliverables, among them a National Cybersecurity Council by Q4 2024 and a primary National Cybersecurity Act by Q3 2025; neither is held, and the published file's running headers read as a draft rather than an adopted text. The Cybercrime Act 2025 was [invoked when the House ordered an investigation into an alleged breach of about 2m citizens' data](#) across the revenue, electricity and insurance bodies in February 2026, an order that also recorded the absence of a national cybersecurity strategy, while the ministry's own [data governance policy of March 2026 records the Act as adopted by the Senate in November 2025 but not yet in force](#). The two accounts have not been reconciled, and no findings have been published.

Unlike the Act, a regulator-made instrument is already in force: the LTA's [Cybersecurity Regulations \(LTA-REG-0013-2026\)](#), [made 13 January 2026](#), require providers to store personal data primarily inside Liberia, stand up a Cybersecurity Unit within a year, notify the LTA of breaches within 24 hours and customers within 72, and file tested incident-response plans; penalties are revenue-linked but apply only from a year after the effective date. The regulator publishes it only as an image-only scan, and the s.10.6 penalty ladder is unreadable in either copy held.

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Digitalisation of county and city administration	NOT HELD	—

Use of satellite data

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Earth observation or geospatial data programme	NOT HELD	—

The identity system is the country's central digital dependency and its least settled. Enrolment is mandatory under [Executive Order 147](#), which makes the identification number the primary credential for banking, health, education and telecoms, and SIM registration was [tied to it by a regulator-registry memorandum with a July 2025 deadline](#); no compliance figure has been published since. The register itself is to pass to a concessionaire: OSD International is to [finance enrolment of all about 5.3m people in 18 months, operate the system and transfer it back](#), a structure a Liberian Observer editorial [describes as outsourcing the digital spine of the state](#). Selection and terms are not published and legislative ratification is outstanding. The enrolment push is funded by the [US\\$30m World Bank GREAT project](#).

Payments are the layer that works. The [instant payment system runs across both mobile-money networks](#), on a published fee schedule of [1.0% of value up to US\\$2,000 and a flat US\\$25 above it](#), which is regressive above about US\$2,500. A [national electronic payment switch is provided for and undated](#).

Government systems are being coordinated from the centre for the first time. [Executive Order 163 created a whole-of-government office for standards, interoperability, technical clearance of ICT investments and baseline cybersecurity, with 12 months to draft an institutionalising law](#); the interoperability framework it provides for is not held. Two platforms are in service: [e-procurement, with more than 1,200 vendors registered and more than](#)

US\$400,000 in revenue generated but no contract value, tender count or bidder numbers published, and the Civil Service Agency's fingerprint-verified purchasing platform, live since December 2025 with 5,000 enrolled across 16 entities.

Open data

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Publication of the telecoms regulator's own revenue	NOT HELD	—

The [Personal Information Act](#) reached a [House committee](#) in June 2025 and is [unpassed](#); Liberia is an ECOWAS data-protection signatory with no national data authority. The ministry's [National Data Governance Policy](#) of March 2026 designates the [Independent Information Commission](#) as data regulator rather than creating a new body, a mandate that takes effect only under the unenacted Act, and [prescribes ratification of the Malabo Convention and an adequacy-or-explicit-consent rule for personal data leaving the country](#). The only privacy penalty on record came through telecom regulation: Orange Liberia was [fined LRD 4m](#) in June 2026 for [issuing a subscriber's SIM to a third party](#).

The regulator [set out a split of infrastructure and service licences, tower-sharing rules, the country's first satellite regulations, an IMEI regime and repatriation of the .lr domain](#) in July 2026; none of it is published as an instrument.

The ministry's [Digital Liberia strategy for 2025-2029](#) sets eight priority areas across four pillars with no costing or delivery schedule. The African Development Bank's [country strategy for 2026-2031](#) cut its sectors from four to three and carries no digital lending line.

The regulator's chairman [declined to disclose the Authority's revenue, saying he reports to the President](#), while the Legislature, the General Auditing Commission and the Anti-Corruption Commission hold statutory claims on it. Liberia [recovered its vote at the African Telecommunications Union](#) in July 2026 when [US\\$361,151.36 of arrears dating to 1982 were waived](#).

Gulf/UAE activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Gulf state digital investment in Liberia	NOT HELD	—

Artificial intelligence entered the national agenda from outside government. The President's Youth Advisory Council put it to him at a town hall and he [accepted it in principle, conditioned on applications in agriculture, transport and commerce, with no policy, institution, budget line or date attached](#). The first working system is private: a law library's [CJ Lewis chatbot over Supreme Court opinions from 1861 to 2026, launched on 31 July 2026 with OHCHR support](#), on a corpus that is a private compilation rather than an official publication of Liberian law, and with no accuracy figure, model or vendor named.

The domestic technology sector is thin and partner-supported. UNDP runs the [UNIPOD innovation hub under its Timbuktoo platform](#) with no commitment amount disclosed, and the national startup competition was [won by a Monrovia cybersecurity firm pitching domestic data custody](#), whose projections and skills findings are its own. The only industrial application on the ledger is a [non-exclusive smart-ports memorandum with HAROPA PORT covering all four seaports, with no amount, date or named system](#).

Research institutions

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Domestic digital research capacity	NOT HELD	—

The World Bank signed [US\\$125m of agreements in June 2026](#), of which [US\\$50m](#) is for broadband, cybersecurity, digital governance and digital payments, detailed in Finance below. Domestically, the [Youth Entrepreneurship Investment Bank](#) is put at almost [US\\$18m](#), with a coordinator recruited and a board being constituted and no disbursement stated.

The base is narrow: DataReportal put [internet users](#) at 1.84m, 32.4% of the population, with about 3.8m offline in [January 2025](#), with no later national figure published; financial access is wider, at [52% account ownership](#) and more than 11m wallets.

Capacity work is donor-run at every level: schools connected [under a programme reported](#) at about 90 of 156 sites with no funder or completion date; the Ministry of Education's [digital learning platform](#) and radio service for Grades 1 to 3, [launched 6 January 2026](#); UNDP's announced [master's programme in artificial intelligence with the University of Liberia](#) and its [first of three media and information literacy sessions](#) for 19 young leaders on 31 July 2026 on Canadian funding, with no budget disclosed.

Finance

New investments

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
America First Global Health Strategy health data systems funding	PLANNED ↗	Memorandum of understanding signed 9 December 2025
WARDIP2 financing for Liberia	IMPLEMENTED ↗	US\$125m of World Bank agreements signed at Mount Coffee, 8 June 2026, of which US\$50m is WARDIP2
Youth Entrepreneurship Investment Bank	IN DEVELOPMENT ↗	Put at almost US\$18m by the finance minister, with a national coordinator recruited, July 2026

External finance is the largest channel funding digital and health-data systems. The World Bank's [US\\$125m of agreements signed at Mount Coffee on 8 June 2026](#) include [US\\$50m](#) for WARDIP2's broadband, cybersecurity, digital governance and digital payments components. The United States' [America First Global Health Strategy memorandum, signed 9 December 2025](#), plans [US\\$26,133,684](#) of the wider [US\\$124,418,400](#) in US support for [Liberia's health data systems](#) — electronic medical records, a laboratory information system, disease surveillance and DHIS2 — against [US\\$50,725,704](#) of Liberian financing. [The signed text commits Liberia to an open-source electronic medical record reaching 100% of public facilities by 2030](#) and gives the United States audit access to up to 5% of

health facilities; a data-sharing arrangement is still to be negotiated, expected to run ten years, but the memorandum carries no specimen-sharing or personal-data clause. Its text was published in March 2026, then withdrawn, and is the subject of a federal freedom-of-information suit filed 2 April 2026. Domestically, the Youth Entrepreneurship Investment Bank is put at almost US\$18m, with a coordinator recruited and a board being constituted; no disbursement is stated.

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Publication of the telecoms regulator's own revenue	The Authority's licensing fees, spectrum charges, regulatory levies and numbering receipts, or an audited account of them from the General Auditing Commission.	not yet probed
Earth observation or geospatial data programme	A national geospatial or earth-observation programme document, or an agency mandate covering satellite data.	not yet probed
Digitalisation of county and city administration	A county or municipal digital plan, a local service platform, or an administration report on digital service delivery.	not yet probed
Domestic digital research capacity	A university research programme, a published national research output, or an institutional mandate for digital research.	not yet probed
European Union digital cooperation with Liberia	A Global Gateway or EU delegation announcement, a financing agreement, or a programme document naming Liberia.	not yet probed
Indian digital cooperation with Liberia	A bilateral memorandum, a line-of-credit agreement, or an India Stack or ITEC programme document naming Liberia.	not yet probed
Gulf state digital investment in Liberia	An investment agreement, data-centre or connectivity commitment from a Gulf sovereign fund or operator.	not yet probed
Interoperability framework between government registers	The enterprise standards and interoperability rules Executive Order 163 provides for, or a data-sharing instrument between agencies.	not yet probed

Eight rows carry no reliable statement of position. Six are subjects the base holds nothing on for Liberia: geospatial and earth-observation programmes, county and city digitalisation, domestic digital research capacity, and European Union, Indian and Gulf state cooperation. Two are documents the record points at without holding: the interoperability framework Executive Order 163 provides for, and any account of the telecoms regulator's own revenue.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
