Governance

Strategies, plans and policies

- **Tinubu: We Have Moved Digital Free Zones Initiative To Implementation Stage** — ThisDay, 18 September 2026

NIGERIA

The president declared Nigeria's Digital Free Zones initiative moved to its implementation stage, with one zone licensed. The stated aim is that Nigerian technology and service companies raise global capital and serve international markets without incorporating or holding intellectual property abroad; the declaration came through an adviser's release and carries no zone count, investment figure or timetable. *Also under [Innovation ecosystem](#) and [Other GovTech and e-Gov](#).*

- **Togo Moves Single Business Tax Filing and Payments Online** — Togo First, 17 September 2026

TOGO

Togo's revenue office opened online filing and payment of the single business tax, the first time the declaration and payment steps have been available without a visit to a tax office. The six-step procedure runs from the taxpayer's identification number to a QR-coded receipt, is designed for a basic handset and connection, accepts three mobile money services, and targets artisans, traders and microenterprises on the flat-rate regime. *Also under [Other GovTech and e-Gov](#).*

- **Sierra Leone launches AI, deepfake campaign** — ITWeb Africa, 17 September 2026

SIERRA LEONE

Sierra Leone launched a national artificial-intelligence and deepfake awareness campaign in Freetown, planned in two phases across all 16 districts. It is led by the Directorate of Science, Technology and Innovation with the communications and information ministries, and funded through the World Bank's digital transformation project. *Also under [AI](#), [Literacy](#) and [Public debate and participation in policymaking](#).*

- **Gabon Launches Electronic Document Management Platform to Modernise Public Administration** — Tech Africa News, 17 September 2026

GABON

Gabon launched an electronic document management platform at the General Secretariat of the Government on 16 September, developed with the national digital infrastructure and frequencies agency. It lets administrations register, classify, search, share and preserve documents, reducing reliance on paper. *Also under [Other GovTech and e-Gov](#).*

- **Faciliter l'accès aux services administratifs et le paiement en ligne : La plateforme e-TPU de l'OTR lancée** — Togo-Presse, 17 September 2026

TOGO

Togo's revenue office launched its single business tax platform in Lome, automating declaration and assessment, tracking deadlines, securing payment and generating tax documents, available at any hour from a phone, tablet or computer. The finance minister directed the office to run a change-management plan so taxpayers who struggle with the technology are not cut out. *Also under [Other GovTech and e-Gov](#).*

- **Digital Democracy in Focus as Uganda Law Society Hosts Second Tech Fest** — Nile Post, 17 September 2026

UGANDA

Uganda's law society opened its second digital transformation festival on access to justice, innovation and ethical governance, with lawyers, judges and technologists calling for responsible adoption of digital tools, stronger cybersecurity and wider access to digital justice. The attorney general asked the society to send the festival's recommendations to the justice ministry. *Also under [Other GovTech and e-Gov](#) and [AI](#).*

- **CBE Governor discusses AI applications in central banks at AACB meetings** — Ahram Online, 17 September 2026

EGYPT

AFRICA

A high-level conference on artificial intelligence in central banking ran on the sidelines of the Association of African Central Banks' 48th annual meetings in Nairobi, covering AI in monetary policy and financial stability, in supervision and financial integrity, and in governance and risk management, with national readiness and regional cooperation on frameworks for responsible use. *Also under [AI](#), [Regional collaboration](#) and [Cybersecurity](#).*

- **Cape Town to write new rules for big data centre applications** — TechCentral, 17 September 2026

SOUTH AFRICA

Cape Town is drafting new development guidelines for large data-centre applications, its first public acknowledgement that the approvals process needs changing, and confirms that the hyperscale precinct rezoning it granted in July is suspended pending appeal. The operator named throughout the project says the site is a long-term land bank on which it has submitted no planning application. *Also under [Data Storage](#) and [Energy](#).*

- **Au Niger, l'expert en e gov Hamani Kargné prend les commandes du ministère des TIC** — wearetech.africa, 17 September 2026

NIGER

Niger's president appointed e-government specialist Hamani Kargne as minister of communication and new information technologies in a technical reshuffle on 15 September. He replaces Adjil Ali Salatou, in post for more than a year. *Also under [Other GovTech and e-Gov](#).*

Legislation and regulation

- **SA should consider under-16 social media age restriction now** — The Citizen, 18 September 2026

SOUTH AFRICA

An opinion piece argues South Africa should consider an under-16 social-media age restriction rather than a ban, with the obligation resting on platforms as it does in Australia, and as part of a wider child-development and online-safety strategy rather than as a solution on its own. *Also under [Public debate and participation in policymaking](#).*

- **Mafab to give up its 5G spectrum as Nigeria starts a bigger clean-up** — TechCabal, 18 September 2026

NIGERIA

A Nigerian licensee is seeking to transfer its 2x20 MHz at 2.1 GHz and its 100 MHz block at 3.5 GHz to the largest operator, subject to regulatory approval. It paid US\$273.6 million for the 3.5 GHz lot at the December 2021 auction against a US\$197.4 million reserve, took a unified access licence in July 2022 and never reached commercial service; a wider review of underused spectrum is attributed to people familiar with the matter rather than to the regulator. *Also under [Connectivity](#).*

- [«الأعلى للإعلام» و«الاتصالات» يلزمان منصات التواصل بحماية الأطفال دون 15 عامًا](#) — Youm7, 17 September 2026

EGYPT

Egypt's media council and telecom regulator issued a joint decision obliging platforms to protect children under 15: no independent accounts for under-13s, an automatic and undisableable safe mode for those aged 13 to under 15, and age verification that resists circumvention while minimising the data collected for it. Platforms must review existing accounts that appear to belong to under-15s, offer a route to correct an age, and comply within three months. *Also under [Data protection](#).*

- [Technologie / Protection des données : le Togo accélère la mise en conformité de ses administrations](#) — Ahouévi Info, 17 September 2026

TOGO

Togo's data-protection authority briefed the heads of 33 ministries and public institutions on their obligations in processing, securing and protecting citizens' personal data, as part of making the 2019 data-protection law known across the administration. Focal points and certified data-protection correspondents are to be named. *Also under [Data protection](#).*

- [SESSION EXTRAORDINAIRE - Le texte sur la cybercriminalité absent de l'ordre du jour](#) — L'Express de Madagascar, 17 September 2026

MADAGASCAR

Madagascar's cybercrime bill was left off the agenda of the extraordinary session that opened on 17 September, which lists seventeen bills over twelve days; the companion bill on electronic communications and digital infrastructure is absent too. Both had their votes deferred to a later session in the closing hours of the previous extraordinary session, and an extraordinary session's agenda is set by presidential decree. *Also under [Cybersecurity](#) and [Public debate and participation in policymaking](#).*

- [Online content crackdown nets R16m in fines](#) — ITWeb South Africa, 17 September 2026

SOUTH AFRICA

South Africa's Film and Publication Board imposed R16.175 million in fines on distributors found non-compliant with the Films and Publications Act, most of the content distributed online. The board says its enforcement reaches distributors based abroad. *Also under [Public debate and participation in policymaking](#).*

- [Nigeria's data localisation deadline is testing its financial infrastructure](#) — TechCabal, 17 September 2026

NIGERIA

Nigeria's 1 January 2027 deadline for payment data localisation is pushing banks and fintechs to rethink how they store and secure customer and transaction data. The central bank frames the objective as local oversight of core financial records rather than separation from global providers, and the risks raised include offshore backups and several institutions concentrating on the same domestic facility. *Also under [Data protection](#) and [Digital Payments and Fintech](#).*

- [NCA awards 5G spectrum to Telecel Ghana](#) — MyJoyOnline / Joy Business, 17 September 2026

GHANA

Ghana's regulator awarded the second operator all three of the 2.3 GHz lots it applied for, of five made available, a week after the dominant operator took both 700 MHz lots. No licence fee or assignment date is reported. *Also under [Connectivity](#).*

- **Kiarie calls for stronger parliamentary oversight as Kenya accelerates AI adoption** — Kenya Broadcasting Corporation, 17 September 2026 KENYA

The chairman of Kenya's parliamentary communications, information and innovation committee called for stronger parliamentary oversight as the country accelerates artificial-intelligence adoption, arguing innovation must come with accountability, human-rights protection and safeguards for citizens. *Also under [AI](#) and [Public debate and participation in policymaking](#).*

- **Instant payments outpace Central Africa's anti-money laundering controls** — Institute for Security Studies (ISS Africa), 17 September 2026 CENTRAL AFRICA

An analysis sets the pan-African settlement rail against Central Africa's exchange and anti-money-laundering rules: the rail settles in seconds where the rules expect documentary checks before a transfer, and fewer than 13 per cent of adults in the zone hold an account. The supervisory model and the instrument are not on the same clock. *Also under [Digital Payments and Fintech](#) and [Regional collaboration](#).*

- **InfoReg unpacks regulatory complexities posed by AI** — ITWeb South Africa, 17 September 2026

SOUTH AFRICA

South Africa's Information Regulator says artificial intelligence, automated decision-making and biometric systems have produced compliance questions its founding laws did not anticipate, naming consent, retention, transparency and the absence of a national artificial-intelligence policy. Its chairperson said the regulator is not convinced privacy by default or personal information impact assessments are being practised. *Also under [Data protection](#) and [AI](#).*

- **Governo prepara lei para regular IA na educação** — Integrity Magazine, 17 September 2026

MOZAMBIQUE

Mozambique's education ministry says its law regulating the use of artificial intelligence in education is almost ready and will reach the Council of Ministers before the end of 2026, covering every institution from primary schooling to higher education with all of them consulted. The text is still being drafted and is not published. *Also under [AI](#).*

- **EU KIDS Act: helping children navigate a safer online world** — European Commission, 17 September 2026

The European Commission proposed a KIDS Act introducing age-based access to social media across the European Union, barring under-13s from social media services while leaving child-friendly video-sharing available. It would apply to online services used by minors, including video-sharing platforms, online games and artificial-intelligence companions and chatbots. *Also under [EU activities](#) and [Digital Identity and CRVS](#).*

- **Content creators in Tanzania face media rules as role in news grows** — The Citizen, 17 September 2026

TANZANIA

Tanzania's journalists accreditation board said content creators doing journalistic work fall under the Media Services Act, so that none may report news or conduct interviews without accreditation, which requires at least a diploma. The board also said a creator doing journalism must register their platform with the communications regulator as a media outlet. *Also under [Public debate and participation in policymaking](#).*

- **Cameroon TRB Updates Telecom Operators Directory to Strengthen Transparency** — Tech Africa News, 17 September 2026 CAMEROON

Cameroon's telecommunications regulator gave operators until 30 September 2026 to file identification forms for a public directory that is to separate licensed and compliant providers from unlicensed ones. Nothing is yet published and no publication date for the directory itself is stated. *Also under [Connectivity](#).*

- **Cameroon tightens grip on telecoms** — ITWeb Africa, 17 September 2026

CAMEROON

Cameroon's Telecommunications Regulatory Board is compiling a public directory of licensed operators and has told every operator to complete an identification form on its website. The board says the directory will let consumers verify which companies are licensed, expose fraudulent operators and help agencies identify legitimate players. *Also under [Connectivity](#).*

Data protection

- **Third-party cyber breaches rock SA firms** — ITWeb South Africa, 17 September 2026

SOUTH AFRICA

Four South African financial and telecommunications names disclosed customer-data exposure that began at third-party suppliers rather than in their own systems, and a separate supplier breach is said to have compromised information held for about 45 insurers. One financial services group suspended data sharing with its screening supplier and reinstated the service only after forensic sign-off and credential replacement. *Also under [Cybersecurity](#).*

- **The passport, the database and the State: Who controls digital Zimbabwe?** — This is Africa, 17 September 2026

ZIMBABWE

A commentary follows a passport scan at Harare's airport into the systems behind it, asking what the e-passport chip discloses, where the data is held, who secures it and who built the infrastructure. It traces the build-own-operate-transfer arrangement behind the passport, the earlier supplier, the national data centre opened in 2021 and the regulator's role. *Also under [Digital Identity and CRVS](#), [Public debate and participation in policymaking](#) and [Data Storage](#).*

- **Stakeholders Move to Strengthen Broadband, Internet Connectivity for Seamless Electoral Process** — ThisDay, 17 September 2026

NIGERIA

At a Lagos e-government summit on election management, speakers pressed for stronger broadband and connectivity before the 2027 general elections, naming the absence of last-mile broadband at polling units as the constraint rather than the technology itself. The data-protection commission's representative spoke to securing the electoral commission's voter data. *Also under [Connectivity](#), [Other GovTech and e-Gov](#) and [Public debate and participation in policymaking](#).*

- **Protection des données : la CDP et la DAF s'unissent pour sécuriser les données d'identité des Sénégalais** — PressAfrik, 17 September 2026

SENEGAL

Senegal's data protection commission and the state file-automation directorate have finished work on interoperability between the civil registry and public-service identification systems. Two strategic options are now before the authorities for a decision. *Also under [Digital Identity and CRVS](#) and [Data Exchange](#).*

- **NITA-U moves to replace paper-based land verification with digital checks** — New Vision, 17 September 2026

UGANDA

Uganda's IT authority is building a digital signature and document-authentication service on the national authentication platform, binding a signature cryptographically to the holder's national identification number so land sale agreements, transfer forms and consent letters can be signed digitally. The integration platform is to carry real-time verification to the registration authority, so a lands office checks the register rather than a photocopied card; forged signatures in land transactions are the stated first target. *Also under [Digital Identity and CRVS](#) and [Other GovTech and e-Gov](#).*

- **EDPA takes data protection services closer to Emaswati** — Eswatini Positive News, 17 September 2026

ESWATINI

Eswatini's Data Protection Authority is setting up information desks in major towns to give the public and businesses guidance on data-protection rights, responsibilities and registration. It began the outreach after finding that about eight in ten visitors to its trade fair stand had limited knowledge of the Data Protection Act. *Also under [Literacy](#) and [Public debate and participation in policymaking](#).*

- **Connexion Internet à Kinshasa : les consommateurs à bout, les opérateurs interpellés, l'ARPTC sous pression** — Forum des As, 17 September 2026

DRC

Internet subscribers in Kinshasa report slow speeds, frequent interruptions and difficulty reaching online services across all four mobile operators, against the packages they pay for. The regulator is being called on to act. *Also under [Connectivity](#) and [Access to services](#).*

- **\\"We felt like part of the Basotho\\": Census gives LGBTIQ+ community a place in national data** — Public Eye, 17 September 2026

LESOTHO

Lesotho's 2026 census asked questions recognising gender identity and sexuality for the first time, after the statistics bureau brought an advocacy organisation into the first consultation. The round had a reference night of 11 April, employed more than 8,000 temporary field staff and has finished enumeration with mop-up still running in Maseru; advocates welcomed the inclusion while warning that the answers need explicit privacy and confidentiality safeguards. *Also under [National statistics](#) and [Access to services](#).*

Regional collaboration

- **Togo Plans New Portal to Link SMEs With Banks and Microfinance Firms** — Togo First, 18 September 2026

TOGO

Togo's credit information bureau presented a portal on which small businesses will submit financing requests that banks and microfinance institutions review directly, guiding applicants through the documents a complete loan file needs. It is to launch by the end of 2026 with development-finance support, and Togo was chosen as the pilot country because of existing public programmes to strengthen small-business financing. *Also under [Other GovTech](#) and [e-Gov](#).*

- **The Arusha Mandate: Why Nigeria Must Lead Africa's AI Examination Revolution** — ThisDay, 18 September 2026 NIGERIA

The registrar of Nigeria's National Examinations Council was elected vice-president of the Association for Educational Assessment in Africa at its 42nd conference in Arusha, and Abuja will host the 2027 meeting. The piece argues that this puts Nigeria in a position to shape how African examinations are run as AI enters assessment. *Also under AI, Public debate and participation in policymaking and Research institutions.*

- **Nigeria's digital identity system strengthening access to Africa's digital economy – Akume** — Blueprint Newspapers Limited, 18 September 2026 NIGERIA

The Secretary to the Government of the Federation told the National Day of Identity that Nigeria's digital identity infrastructure is now a trusted foundation for banking, telecommunications, social protection and cross-border trade. He credited the National Identity Management Commission Act 2026 with giving it a stronger legal footing and making the commission the country's root certification authority for identity, citing no enrolment figure. *Also under Digital Identity and CRVS.*

- **ECOWAS Biometric Card Will Ease Travel, Enhance Free Trade in Member States, Say IOM, NIS, ECOWAS** — ThisDay, 18 September 2026 NIGERIA

At a Lagos media workshop the migration organisation, Nigeria's immigration service and the ECOWAS Commission set out the case for the regional biometric identity card, presenting it as the instrument of the free movement protocol and as conferring the right to live and trade in any member state. The card is put at N35,000 to acquire, a figure another account of the same workshop gives as N35,500. *Also under Digital Identity and CRVS.*

- **CBE Governor Hassan Abdalla Joins High-Level AI Conference in Nairobi** — Sada Elbalad (see.news), 18 September 2026 KENYA EGYPT

Governors of more than forty African central banks met in Nairobi for a conference on artificial intelligence in central banking, covering its use in monetary policy and financial stability, in supervision and financial integrity, and in governance and risk management. *Also under AI.*

- **Annual Meetings - Nairobi 2026** — AACB, 18 September 2026 KENYA AFRICA

The Association of African Central Banks held its 48th annual meetings in Nairobi from 13 to 18 September, hosted by the Central Bank of Kenya alongside its sixtieth-anniversary events and an AI conference. The published programme names the technical committee, bureau and assembly sittings and the member banks attending each. *Also under AI.*

- **South Korea, Africa pledge deeper AI partnership to accelerate continent's digital transformation** — African Development Bank Group, 17 September 2026 AFRICA

At a press conference alongside the African Development Bank's president in Seoul, South Korea's deputy prime minister said Korea would deepen its partnership with Africa by expanding cooperation in artificial intelligence and digital technologies. The bank put AI's potential at up to US\$1 trillion of African GDP by 2035. *Also under AI.*

- **PAPSS payments grew 1,000% in a year, and Kenya is now on the network** — tech-ish, 17 September 2026 KENYA AFRICA

Payments across the pan-African settlement network are reported to have grown about tenfold over the year while the average payment fell to about a fifth of its level a year earlier — many small transfers in place of a few large ones. Kenya's national switch is the first of its kind piloted for termination on the network. *Also under Digital Payments and Fintech.*

- **Numérisation des services publics : le Mozambique renforce sa coopération avec le Brésil** — wearetech.africa, 17 September 2026 MOZAMBIQUE

Mozambique and Brazil signed a memorandum in Maputo on 14 September to accelerate the digitalisation of public services, between Mozambique's finance ministry and Brazil's ministry of management and innovation in public services. Digital sovereignty, cybersecurity and solutions modelled on Brazilian practice are named among its strands. *Also under [Other GovTech and e-Gov](#).*
- **Korea, African Development Bank sign deal to launch joint AI Hub to support Africa** — African Development Bank Group, 17 September 2026 AFRICA

The African Development Bank and the Republic of Korea signed a letter of intent in Seoul to establish a joint hub for artificial intelligence, to support responsible development, adoption and financing of AI across the continent. It was signed on the sidelines of the eighth Korea-Africa ministerial conference; no capitalisation, host or start date is published. *Also under [AI](#) and [MoUs and other agreements](#).*
- **ECOWAS urged to finalise regional AI election framework** — The Guardian Nigeria, 17 September 2026 WEST AFRICA

The communique of a youth democracy conference in Dakar urged ECOWAS to finalise and operationalise a regional framework for the use of artificial intelligence by election management bodies, citing deepfakes and disinformation as risks to electoral integrity. It also asks member states to invest in digital civic education and the bloc to use diplomatic channels against internet and social-media restrictions during elections, and endorses a youth election-observers network anchored to ECOWAS. *Also under [AI](#) and [Public debate and participation in policymaking](#).*
- **ECOWAS steps up citizen biometric identity push for seamless cross-border travel** — Tribune Online, 17 September 2026 NIGERIA WEST AFRICA

At a Lagos workshop on the regional biometric identity card, Nigeria's immigration service said the card serves the same purpose as the regional passport within the subregion, is renewable every five years, costs N35,500 and is applied for online with a single physical visit for biometric capture. The ECOWAS Commission framed it as harmonising identification and addressing cross-border crime and irregular migration. *Also under [Digital Identity and CRVS](#).*
- **East Africa CEO & Investment Forum 2026 calls for faster regional integration, investment and deal conversion** — East African Business Council (EABC), 17 September 2026 EAST AFRICA

The East African science and technology commission and the German state of Hessen launched a cooperation through the regional AI alliance at an investment forum in Nairobi, for skills development, innovation and business; no sum, instrument or duration was stated. The forum also launched a regional trade and investment climate report and an investment projects catalogue, and ran a digital economy, telecommunications and fintech track. *Also under [AI](#) and [MoUs and other agreements](#).*
- **CRASA and LINK Centre sign MoU** — LINK Centre - University of the Witwatersrand, 17 September 2026 SOUTH AFRICA SOUTHERN AFRICA

The Southern African communications regulators' association and a university research centre signed a memorandum on regulatory capacity building, applied research and policy development, covering professional development programmes, short courses, masterclasses, policy dialogues and research across the ICT, postal, audio-visual, digital media and digitally enabled sectors. Activities are expressly subject to institutional processes, funding and separate project agreements. *Also under [Training and skills](#) and [MoUs and other agreements](#).*

- **Chad and Nigeria Advance Digital Cooperation on Fibre Connectivity and AI** — Tech Africa News, 17 September 2026 CHAD NIGERIA

Chad and Nigeria agreed to strengthen cooperation in telecommunications, digital transformation and artificial intelligence after ministerial talks in N'Djamena on 16 September. Regional fibre-optic connectivity through the BRIDGE project, government service digitalisation and research were named as the areas of collaboration. Also under [Connectivity and AI](#).

- **Central Africa: Instant Payments Outpace Central Africa's Anti-Money Laundering Controls** — Institute for Security Studies (Tshwane/Pretoria), via allAfrica.com, 17 September 2026 CENTRAL AFRICA

A think-tank analysis sets Central Africa's instant-payment rail against the zone's exchange and anti-money-laundering rules: settlement takes seconds where the rules expect documentary checks before a transfer, and fewer than 13 per cent of adults hold an account. Also under [Digital Payments and Fintech](#) and [Public debate and participation in policymaking](#).

- **Africa: How Ecowas Biometric Card Will Ease Travel for Member States' Citizens Across West Africa - Officials** — Premium Times (Abuja), via allAfrica.com, 17 September 2026 NIGERIA WEST AFRICA

Officials said at a Lagos workshop that seven ECOWAS member states — Senegal, Guinea-Bissau, Ghana, Benin, The Gambia, Sierra Leone and Nigeria — have deployed the regional biometric identity card, which is intended to replace the handwritten regional travel certificate. The chip carries the issuing authority's digital signature over the stored identity data, so any alteration breaks the trust chain at border authentication; member states committed in April to work towards mutual acceptance at borders by December. Also under [Digital Identity and CRVS](#).

- **Africa CDC To Harmonise Behavioural Intelligence** — LEADERSHIP Newspapers, 17 September 2026 AFRICA

The continental health agency, with member states and technical partners, has validated a framework, a strategy, a digital and data architecture and a roadmap for harmonising behavioural intelligence and infodemic management, at a five-day workshop in Mombasa. None of the four documents is published. Also under [Sectoral management information systems and Standards](#).

- **Économie /Qualité des données de crédit, la Côte d'Ivoire mobilise les acteurs financiers pour renforcer le dispositif BIC-UEMOA** — Abidjan.net, 17 September 2026 CÔTE D'IVOIRE

Consultative meetings on the quality of Cote d'Ivoire's credit bureau data carried a dated diagnostic from the meeting's own terms of reference: 67.88 per cent of contracts not updated against a union average of 46.20 per cent on data as at 10 June 2026, at 77.64 per cent in banking, 56.59 among decentralised financial systems and 28.77 for financial institutions. The country holds 40.96 per cent of the union's active contracts and accounts for 60.17 per cent of its non-updated ones. Also under [Data Exchange and Digital Payments and Fintech](#).

- **US, China security experts propose nuclear-style safeguards for AI risks** — Reuters, 17 September 2026

American and Chinese security experts have proposed nuclear-style safeguards against artificial-intelligence risks, including red lines around nuclear command systems, keeping military decisions in human hands, and an incident hotline between the two governments. The recommendations precede planned bilateral talks on artificial intelligence. *Also under [US / hyperscaler activities](#), [China activities](#) and [AI](#).*

- **South Sudan Advances Satellite Connectivity Agenda at African Telecom Meeting** — TechAfrica News, 17 September 2026

SOUTH SUDAN

AFRICA

South Sudan's National Communication Authority took part in the third African preparatory meeting for the 2027 World Radiocommunication Conference, held in Tunisia. Non-geostationary satellite systems and direct-to-device connectivity were among the items African regulators worked on for common regional positions. *Also under [Use of satellite data](#) and [Connectivity](#).*

- **Qualite des donnees du Bic : Le gouvernement veut renforcer la fiabilite des rapports de credit** — Fraternite Matin, 17 September 2026

CÔTE D'IVOIRE

Cote d'Ivoire's finance ministry opened consultative meetings on the quality and completeness of the credit bureau's data, naming late transmission by banks, decentralised financial systems and large billers as the defect degrading credit reports. The ministry put non-updated contracts at 67.88 per cent against a union average of 46.20; the bureau's own operator gave about 45 per cent against a regional 30, undated and spoken. *Also under [Data Exchange](#) and [Digital Payments and Fintech](#).*

- **Building trust into the next generation of digital services** — International Telecommunication Union, 17 September 2026

GLOBAL

The ITU and the World Bank set out the trust problem created by artificial-intelligence agents acting for people in public services: a registry, licensing authority or lender needs to know whether an agent is genuinely authorised by the applicant. They argue identity and authorisation infrastructure has to be built for agents, not only for people. *Also under [Digital Identity and CRVS](#) and [AI](#).*

- **African Delegations Demand Common Ground In Tunis Ahead Of 2027 World Radiocommunication Conference** — Cyber Era, 17 September 2026

TUNISIA

AFRICA

African governments and regulators opened four days of talks in Tunis to build common positions on the radio frequencies used by mobile, satellite and other wireless services, ahead of the 2027 World Radiocommunication Conference. Broadband capacity, rural connectivity and future communications technologies are the focus. *Also under [Connectivity](#) and [Use of satellite data](#).*

Public debate and participation in policymaking

- **Somalia's Digital Iron Curtain: Who Is Making Critics Disappear?** — WardheerNews, 18 September 2026

SOMALIA

Somali journalists and political figures had Facebook accounts suspended, removed, or falsely marked as belonging to the dead, including the pages of two regional presidents and a journalist with more than a million followers. The account disruptions are documented; responsibility for them is not, and the piece states plainly that no evidence establishes who ordered or carried them out, calling for an independent investigation.

- **Nyakera calls for parallel tallying systems to guard 2027 vote** — The Standard, 17 September 2026 KENYA

A party official called for a parallel tallying system at the 2027 general election to check results transmitted through the official electoral system, saying interference during transmission is to be expected. *Also under [Other GovTech and e-Gov](#).*
- **Never Again Rwanda calls for stronger powers at cell level, more decentralised services** — The New Times, 17 September 2026 RWANDA

A civil-society organisation called for stronger powers at cell level and more decentralised services, putting 44 per cent of 522 public services as decentralised. The local government ministry is stated to be digitalising local government services and reviewing the capacity of the cell, the lowest administrative level. *Also under [Digitalisation of sub-national government](#) and [Other GovTech and e-Gov](#).*
- **Namibian universities urged to build local technology skills** — The Namibian, 17 September 2026 NAMIBIA

An academic argues that Namibian universities, researchers and agencies should build local expertise in satellite data, crop monitoring and digital mapping to reduce long-term dependence on foreign providers, and that procurement should be judged on skills, ownership, data access and dependence rather than on cost and performance alone. *Also under [Use of satellite data](#) and [Training and skills](#).*
- **L'IA, de l'urgence d'un usage responsable** — Sidwaya, 17 September 2026 BURKINA FASO

A state daily's editorial reads the US-China contest over semiconductors, models and digital infrastructure as a geopolitical rather than purely technological rivalry, and argues for verifying what AI systems produce, building an AI culture and protecting data. *Also under [AI, US / hyperscaler activities](#) and [China activities](#).*
- **Le Faso Digital 2026 : La 2e édition se tiendra du 17 au 24 octobre avec le Rwanda comme invité d'honneur** — leFaso.net, 17 September 2026 BURKINA FASO

Burkina Faso's national digital event returns for a second edition from 17 to 24 October, wholly online and with Rwanda as guest of honour. Its innovation competition had taken 95 entries by 16 September. *Also under [Innovation ecosystem](#) and [Digital divides](#).*

Madagascar's National Identity Day, institutionalised by a 2024 decree, carried a high-level conference of more than 150 people preparing the 2027-2036 civil-registration decade. Phase II of the biometric enrolment operation was launched on the second day under the World Bank's digital connectivity project, with no target or coverage figure given for it. *Also under [Registries](#).*
- **Why your NIDA number is more than just a numeral** — The Citizen, 17 September 2026 TANZANIA
Tanzania is piloting registration of children from birth in three districts, and 2,027,103 finished identity cards remain uncollected.
- **Unclaimed IDs law in offing** — Daily News (Tanzania), 17 September 2026 TANZANIA
Tanzania's Prime Minister told the registration authority to put a legally backed reminder-and-penalty mechanism into law for processed identity cards left uncollected, saying the state cannot keep absorbing the cost of printing cards that are then abandoned. He also directed deeper integration with employment, social-service and economic institutions, and put more than 132bn/- to the authority's development projects for 2026/27, including 31 registration offices. *Also under [Registries](#) and [Access to services](#).*
- **RDC : le projet d'identification numérique RDC-Pass entre dans sa phase opérationnelle** — wearetech.africa, 17 September 2026 DRC
The Democratic Republic of Congo's RDC-Pass digital identity project entered its first implementation phase three months after launch, with training for 50 registration agents opening in Kinshasa on 15 September. The identifier is intended to work across several administrations and reduce the number of separate identification systems. *Also under [Other GovTech](#) and [e-Gov](#).*
- **HESLGB adopts biometric verification linked to NRB** — Malawi24, 17 September 2026 MALAWI
Malawi's higher education loans and grants board has moved loan-contract bonding onto a paperless process in which students present the national identity card and scan fingerprints on a device linked to the registration bureau's database, which matches the details before bonding completes. The board's stated reason is cost; the 2026/2027 exercise began on 7 September and has so far covered campuses of three universities. *Also under [Other GovTech](#) and [e-Gov](#).*
- **Digitalisation du foncier : le groupe ivoirien SNEDAI propose son expertise au Gabon** — GabonReview, 17 September 2026 GABON
Gabon's housing and cadastre ministry signed a protocol of agreement with an Ivorian group on digitalising land and cadastral procedures, and the group presented its offer to the vice-presidents of the Republic and of the government two days later. The group frames the work as better mapping and parcel identification feeding a more structured land database, fewer disputes and a wider tax base; no contract, sum or delivery date is published. *Also under [Registries](#) and [Other GovTech](#) and [e-Gov](#).*
- **Digital gap challenges Nzika ID rollout** — Malawi24, 17 September 2026 MALAWI

Malawi's ICT minister put smartphone ownership at 33 per cent and basic internet skills at 12.5 per cent, saying the gaps could hinder adoption of the digital identity wallet launched the same week in Lilongwe. He called for collaboration between the private sector, civil society and academia to close them. *Also under [Digital divides](#).*

Djibouti's state operator certified 35 of its engineers in artificial intelligence at a ceremony presided over by the communications minister, who cited the national AI readiness assessment run on UNESCO's methodology: it credits engaged digital transformation, strategic infrastructure and a nascent academic base while finding room to improve on skills, governance and research. He called for closer ties between the operator, the university and research centres. *Also under [Training and skills](#).*
- **China Pitches Its AI Model as A Template Rwanda Can Build On** — KT Press, 17 September 2026 RWANDA
At the launch of a Chinese enterprises' corporate responsibility report and a workshop's first AI class in Kigali, a Huawei architect set out a three-tier model of sovereign AI for Rwanda, arguing that a country must build a base model locally, on its own data and by its own engineers, before industry models and citizen-facing applications follow. The Chinese ambassador said Chinese enterprises are expected to comply with the laws of both states. *Also under [China activities](#).*
- **A global AI safety strategy depends on U.S.-China cooperation. They each see the other as the problem** — PBS NewsHour / Associated Press, 17 September 2026
An agency report reads the prospects for a global approach to AI safety as dependent on US-China cooperation, with each treating the other's strategy as the problem, ahead of a Washington meeting at which AI governance is expected on the agenda. *Also under [US / hyperscaler activities](#) and [China activities](#).*
