Governance

Strategies, plans and policies

Mozambique steps up AI drive — ITWeb Africa, 28 August 2026

MOZAMBIQUE

Mozambique's new artificial-intelligence association inaugurated its leadership in Maputo on 27 August 2026, three months after the country published a draft national AI strategy. The national ICT institute's board chairman described it as a technical platform meant to connect government, the private sector, academia, the technology community and civil society, and said a national data governance policy and strategy is under development. That policy is not yet published. *Also under [AI](#).*

Senegal-Gambia : la cooperation numerique se concretise autour de quatre priorites — wearetech.africa, 27 August 2026

SENEGAL

GAMBIA

Senegal and the Gambia moved their June 2026 telecommunications and digital-economy memorandum into implementation around four priorities — connectivity, cybersecurity, skills and digital transformation — with Senegal's minister travelling to Banjul to agree the first joint work, and the two regulators separately deepening cooperation on frequency coordination, service quality and cross-border roaming. The structural case is the Gambia's limited terrestrial fibre build and its dependence on a single submarine cable, with only limited terrestrial redundancy through Senegal. *Also under [Regional collaboration](#) and [Connectivity](#).*

Rwanda CMA Concludes Dubai VARA Study Tour to Strengthen Virtual Asset Regulation — Tech Africa News, 27 August 2026

RWANDA

Rwanda's Capital Market Authority concluded a two-day visit to Dubai's Virtual Assets Regulatory Authority as part of a study tour in the United Arab Emirates, on regulatory knowledge exchange around virtual assets and emerging technologies. It follows Rwanda gazetting its first dedicated virtual-asset legislation in May 2026, under which the authority is the primary licensing and supervisory body. *Also under [New investments](#) and [Gulf/UAE activities](#).*

NITDA Urges Public Institutions to Prioritise Homegrown Digital Solutions — TechAfrica News, 27 August 2026

NIGERIA

Nigeria's technology development agency reviewed 1,092 IT project proposals from 326 ministries, departments and agencies between July 2023 and July 2026, worth more than N4.24 trillion, and cleared 1,056 of them worth N3.84 trillion. Its director-general urged public institutions towards a Nigeria First approach in procurement so that public spending creates market for indigenous suppliers. The clearance criteria, and the basis on which 36 proposals were not cleared, are not published. *Also under [Domestic budget appropriations and expenditure](#).*

Kenya : les 47 comtes sommes de passer aux marches publics numeriques — wearetech.africa, 27 August 2026

KENYA

Kenya's National Treasury gave all 47 county governments until 30 September 2026 to finish integrating the electronic government procurement platform with the Integrated Financial Management Information System, so that tendering, award and contract monitoring connect to budget planning, spending and payment. The deadline lands on a rollout that has already slipped: a first phase launched in April 2025 for extension to all national and local administrations from 1 July 2025, against resistance from the Council of Governors over pace and service disruption, with more than 900 public entities migrated by February 2026. *Also under [Other GovTech and e-Gov](#) and [Digitalisation of sub-national government](#).*

En Afrique comme ailleurs, les Etats s'emparent de la protection des mineurs sur les reseaux sociaux — Agence Ecofin, 27 August 2026

GABON

NIGERIA

RWANDA

ZIMBABWE

African states are moving from a minimum age for opening a social media account towards duties on how platforms are built. Gabon's February 2026 ordinance fixes digital majority at 16 and obliges platforms to limit certain publication and interaction functions, disable contacts from unidentified users by default and provide age-verification mechanisms; Rwanda is preparing a restriction on under-16s, Nigeria is consulting on age limits, identity verification and platform liability, and Zimbabwe has adopted a policy covering cyber-harassment, sextortion and data protection. The African Union's 2024 child online safety policy already asks states to require protection by design and by default, and the constraint named here is enforcement rather than law. *Also under [Legislation and regulation](#) and [Data protection](#).*

Digital assets drive Rwanda-UAE deal — ITWeb Africa, 27 August 2026

RWANDA

Rwanda's Capital Market Authority is benchmarking its new virtual-asset framework against the United Arab Emirates' and the two regulators have begun work towards a memorandum of understanding, after a study tour that included Dubai's Virtual Assets Regulatory Authority. Rwanda gazetted its first dedicated legislation regulating virtual-asset businesses in May 2026, making the authority the primary licensing and supervisory body; the UAE side frames the cooperation as part of an initiative to expand regulatory partnerships with emerging markets across Africa. *Also under [New investments](#) and [Gulf/UAE activities](#).*

Bolt takes e-hailing compliance push to provinces — ITWeb South Africa, 27 August 2026

SOUTH AFRICA

An e-hailing platform took its compliance programme to South Africa's provinces, holding a North West regulatory engagement in Rustenburg on 18 August attended by more than 150 operators and a Western Cape transport dialogue in Cape Town on 21 August, at which the provincial mobility department's director of licensing and adjudication undertook to add e-hailing as a service option on the operating-licence application. The North West provincial regulatory entity put its pending operating-licence backlog at 3,000 to 5,000 applications. *Also under [Legislation and regulation](#), [Digital Identity and CRVS](#) and [ICT Industry](#).*

Bolt backs Mombasa County push to formalise 400 delivery riders with training and licences — TechCabal, 27 August 2026

KENYA

A ride-hailing platform and the Mombasa county government launched a programme to license 400 delivery riders through Kenya's Recognition of Prior Learning framework, the platform committing KES 1.5 million to it. Riders complete 21 days of accredited training at a certified driving school before the national transport and safety authority licenses them on demonstrated competency, and the platform will share trip and demand data with the

county for infrastructure planning including the siting of electric-vehicle charging points. A 2025 parliamentary report puts the sector at more than two million riders. *Also under [Training and skills](#), [Digitalisation of sub-national government](#) and [Access to services](#).*

Legislation and regulation

ARPC Dismantles Sixth SIM Box Fraud Network in Brazzaville — TechAfrica News, 28 August 2026

CONGO

The Republic of Congo's communications regulator dismantled a sixth SIM box fraud network of the year on 21 August in Brazzaville, seizing two 16-port SIM boxes and associated equipment, recovering 30 Ugandan numbers in fraudulent use, and arresting two people. It puts the network's loss at about FCFA 42m over two months on more than 422,000 diverted call minutes, on its own estimate. *Also under [Cybersecurity](#).*

Three companies now control nearly 70% of Nigeria's ISP market — TechCabal, 27 August 2026

NIGERIA

Regulator data released on 25 August put active licensed-ISP subscribers in Nigeria at 420,989 in June 2026, up 19.6% from 352,006 in December 2025, with three providers holding close to 70% of the market — Spectranet 111,384, Starlink 98,642 and FibreOne 56,486 — and points of presence up from 2,508 to 2,893. That whole market is 0.27% of the country's 156.4 million active internet subscriptions, and 126 of the 230 licensed ISPs are reported to have a single active subscriber. *Also under [Connectivity](#) and [ICT Industry](#).*

Safaricom and Kenya's ODPP Partner to Strengthen Cybercrime Prosecution Capacity — TechAfrica News, 27 August 2026

KENYA

Safaricom ran a three-day training with Kenya's Office of the Director of Public Prosecutions on cybercrime, financial technology, digital evidence and emerging technologies, pairing technical and prosecutorial expertise. No caseload, conviction or capacity figure accompanies it. *Also under [Cybersecurity](#).*

Consulta Pública do MINTTICS — Proposta de Lei sobre a Inteligência Artificial — Ministério das Telecomunicações, Tecnologias de Informação e Comunicação Social (MINTTICS), Angola, 27 August 2026

ANGOLA

Angola's telecommunications ministry consultation portal still carries the September 2025 draft Artificial Intelligence Bill, recording 18 contributions from companies, 18 from specialists and 5 from the general public as at 27 August 2026. The 20-page draft carries an explanatory memorandum and a comparative section reviewing artificial-intelligence regulation in the United States, the European Union, China, Japan, Canada and Brazil, and the national AI strategies of Egypt, Kenya, South Africa and Rwanda. *Also under [Public debate and participation in policymaking](#) and [AI](#).*

Data protection

Le Maroc dément toute intrusion dans ses bases de données de sécurité — APS (Agence de Presse Sénégalaise), 28 August 2026

MOROCCO

Morocco denied any intrusion into its security information systems or databases after a hacking group published what it presented as the names, identification numbers and dates of birth of 70,000 police and intelligence personnel. The national security and territorial surveillance directorates placed the records instead in databases run by insurance companies and social and health cover bodies. No insurer or cover body has answered, and no regulator has ruled on the provenance. *Also under [Cybersecurity](#).*

UN Treaty Body Database - Ratification status for Guinea-Bissau — Office of the United Nations High Commissioner for Human Rights (OHCHR), 27 August 2026

GUINEA-BISSAU

The UN treaty body database record for Guinea-Bissau, which sets out which human-rights instruments the country has ratified and which it has not. It is a reference position rather than a development, and it is the baseline any claim about the country's data-protection and privacy obligations has to be read against. *Also under [Access to services](#).*

Questões sobre Protecção de Dados — Agência de Protecção de Dados — Agência de Protecção de Dados (APD), Angola, 27 August 2026

ANGOLA

Angola's data protection agency published a questions page setting out the reach of the data protection law — automated and partly automated processing, and manual processing of personal data held in files, by controllers established in the country and outside it where Angolan law applies by force of international law — together with the fee schedule approved by Presidential Decree 60/21 of 10 March 2021. *Also under [Regional collaboration](#) and [Data Exchange](#).*

Maroc: les donnees de 70 000 agents de la police et du renseignement publiees apres une nouvelle cyberattaque — RFI, 27 August 2026

MOROCCO

A hacker group said on 24 August that it had published the personal data of 70,000 Moroccan police and intelligence agents, a leak former members of the intelligence services judge at least partly authentic and which discloses details not previously public, including the date of birth of the head of the police and internal intelligence. Whether it is a new breach is contested — a Moroccan outlet calls it an assemblage of data compromised in earlier hacks — and Moroccan media have covered it only marginally. *Also under [Cybersecurity](#).*

After FIJ's Investigation, Ebi's Illegal Data Market Shuts Down but NDPC Retains Him as Licensee — Foundation for Investigative Journalism, 27 August 2026

NIGERIA

An underground market trading Nigerian national identity and bank verification numbers shut down after an investigation named its operator, with two linked technical services taken offline and a private messaging community closed. The data-protection commission continues to hold the operator as a registered licensee. *Also under [Digital Identity and CRVS](#).*

Affaire Jabaroot : le pôle DGSN-DGST dément toute intrusion dans ses systèmes — TelQuel, 27 August 2026

MOROCCO

Morocco's national security and territorial surveillance directorates categorically denied any intrusion into their information systems or security databases after a group published what it presented as records of 70,000 police and intelligence personnel on 24 August. They said the data was old material downloaded from databases run by insurance companies and social and health cover bodies, and warned against doctored photographs and falsified documents circulating as security material. *Also under [Cybersecurity](#).*

[African Union and World Bank to Launch Integrating Africa: From Threads to Hubs](#) — African Union, 28 August 2026

The African Union, the World Bank and UNECA announced the launch of Integrating Africa: From Threads to Hubs, a publication on how deeper regional integration could raise intra-African trade and support industrialisation, at the AU headquarters and online on 28 August. The advisory carries no findings. *Also under [Data Exchange](#).*

[Why Connecting Landlocked Africa Requires More Than Building National Fibre Networks](#) — Tech Africa News, 27 August 2026

The ITU puts internet use across Africa's 16 landlocked developing countries at 25% in 2024 against 68% globally, while 86% of their population is covered by a mobile broadband signal — a gap between availability and use it attributes to affordability and to insufficient international connectivity infrastructure. Landlocked states cannot reach a submarine cable directly, so their international capacity rests on terrestrial routes and commercial arrangements crossing neighbours, which is the part a national fibre build does not settle. *Also under [Connectivity](#) and [Access to services](#).*

[Smart Africa urged to become a distribution engine for African technology companies](#) — TechReviewAfrica, 27 August 2026

The founder of ARED Group argued that Smart Africa should use its relationships with ministers, regulators and policymakers to become a commercial distribution route for African technology companies expanding across borders, questioning why comparable structures exist for global technology firms embedded in the alliance but not for African innovators.

[Police investigating possible forgery at AFRINIC election](#) — The Register, 27 August 2026

Mauritius police confirmed that two alleged forgery cases arising from AFRINIC's annulled June 2025 board election remain under investigation by the Central CID. The registry has never stated its reasons for the annulment, and the irregularities were reported by South Africa's ISP association: a proxy vote cast under a power of attorney the resource holder says it never gave, and a recorded power of attorney missing from the file. The registry also published a consultation update in which its bylaws committee said it will not recommend a dispute resolution clause and is considering options around the board's power to terminate members.

[Kenya and Tanzania Deepen Regulatory Cooperation on Satellite Communications](#) — TechAfrica News, 27 August 2026

KENYA

TANZANIA

Tanzania's communications regulator made a two-day benchmarking visit to its Kenyan counterpart to exchange practice in regulating satellite communications. Nothing was signed and nothing issued. *Also under [Connectivity](#).*

[Consultancy for the Development of COMESA Digital Information Knowledge & Collaboration Platform](#) — COMESA, 27 August 2026

The COMESA secretariat invited technical and financial proposals from eligible firms to develop a Digital Information Knowledge and Collaboration Platform, under contract reference CS/CC/06/(846-2026), with the minimum technical requirements in annexed terms of reference. No budget, timetable or scope beyond the title is published. *Also under [Other GovTech](#) and [e-Gov](#).*

Kenya Regulator Strengthens Spectrum Management Capacity With Radio Monitoring Training — TechAfrica

News, 27 August 2026

KENYA

The Communications Authority of Kenya completed training for its technical officers on operating its Spectrum Monitoring Sub-System, covering interference detection and direction finding, under the maintenance contract awarded to Rohde & Schwarz in 2025. The regulator has published no spectrum audit. Also under [Training and skills](#).

ISO - INIQ - National Institute of Quality Infrastructure — International Organization for Standardization (ISO), 27 August 2026

ANGOLA

Angola's national quality-infrastructure institute is listed by the International Organization for Standardization as a correspondent member, the category for bodies that follow the organisation's work without a vote on technical committees.

ISO - DSNPQ - Direction de Service de Normalisation et Promotion de la Qualité (Guinée-Bissau member organization record) — International Organization for Standardization (ISO), 27 August 2026

GUINEA-BISSAU

The ISO membership record for Guinea-Bissau's national standards body, held in the trade ministry. It records no technical-committee liaisons at all, which is the measure of how far the country participates in setting the standards its digital sector will be held to.

Confessing to a computer: The hidden danger of AI in vulnerable spaces — TechCabal, 27 August 2026

KENYA

A column argues that accuracy benchmarks are the wrong test for artificial-intelligence systems entering life-or-death decisions in Africa, citing global models misreading Nairobi's altitude and giving harmful clinical advice in Kenyan trials. It opens on the reconstructed chat logs of a woman who died by suicide after months of using a chatbot as a therapist, and its claim is that present standards do not measure the failures that matter where users are most exposed. Also under [AI](#) and [Research institutions](#).

Public debate and participation in policymaking

IMANI's Sitsofe Mensah Warns Funding Gap Could Derail AU AI Targets — The Vaultz News, 27 August 2026

A policy analyst at Ghana's IMANI Centre put African governments' committed public capital for the AU Continental AI Strategy at about US\$150m against an implementation cost the strategy itself prices between US\$250bn and US\$500bn, and an ambition to add US\$1.5 trillion to Africa's GDP by 2030. He also set the strategy's assumption of cross-border data flows against the Malabo Convention's data-localisation obligations, and noted that indigenous African languages make up under 0.02% of web content the models would train on. *Also under [AI](#).*

Government urged to pick up pieces as UNCDF's 6-year digital inclusion program ends — Pulse Uganda, 27 August 2026

UGANDA

The UNCDF's six-year digital inclusion programme closed in Uganda, with district officials and implementers urging the government to take over the systems it built before they collapse. Its stated results since 2019 include more than 3.4 million people registered for supported digital services, over a million active users and more than 21,000 digital agents recruited, concentrated in northern Uganda and West Nile. *Also under [Access to services](#) and [Digital Payments and Fintech](#).*

Digital future will depend on who controls the technology — The Guardian Nigeria, 27 August 2026

NIGERIA

Technology and business leaders in Nigeria argued that access to technology is no longer the binding constraint and that control of the infrastructure, data and technology businesses depend on is the harder question. The argument was made at the launch of a technology survey and a national database forum. *Also under [Data Storage and Innovation ecosystem](#).*

SA data centre operators push back amid sustainability probe — ITWeb South Africa, 28 August 2026

SOUTH AFRICA

South Africa's major data-centre operators answered the Human Rights Commission's inquiry into the sector's electricity, water, land and environmental footprint by defending their consumption on renewable-energy and resource-management programmes, one stating science-based climate targets and full clean-energy coverage locally. The commission has published no finding, and no independent measurement of the sector's draw is on record either way. *Also under [Energy](#).*

Microsoft names East Africa lead — ITWeb Africa, 28 August 2026

KENYA

Microsoft filled its East Africa country lead post, vacant since January 2026, with a Nairobi-based executive who has been with the company since 2012 and most recently ran customer success for East and West Africa. The outlet frames the appointment against the company preparing to bring East Africa's first Azure cloud region and a geothermal-powered data centre online; that framing carries no date, and the base's dated record of the Kenyan build stalling on power capacity stands. *Also under [ICT Industry](#).*

Econet targets Zim enterprise cloud market — ITWeb Africa, 28 August 2026

ZIMBABWE

Econet Wireless says it has fully migrated its operations, mobile money and telecommunications infrastructure included, off on-premise computing and private data centres onto Google Cloud, and intends to sell cloud services on to Zimbabwean enterprises next. No migration date, workload split, contract term or data-residency arrangement is published, and nothing on record states a regulator's position on the country's mobile money platform running on infrastructure sited elsewhere. *Also under [Digital Payments and Fintech](#).*

Stratos Lab, ECOBLOX and Digital Parks Africa Launch Africa's Most Powerful AI Cloud — Tech Africa News, 27 August 2026 SOUTH AFRICA

Three partners announced a 7.2 EFLOPS deployment they describe as Africa's most powerful AI cloud, running on more than 50 NVIDIA B300 HGX servers carrying over 400 GPUs in carrier-neutral Tier-3+ colocation in South Africa. The pitch is residency: keeping African training and inference workloads, and the data behind them, on the continent. The performance figure is the partners' own and no independent benchmark, customer or price is published. *Also under [AI](#) and [ICT Industry](#).*

MTN targets 150MW of AI data centre capacity in Nigeria and South Africa with Tarek Al Ashram's UAE-based investment platform — Capacity, 27 August 2026 SOUTH AFRICA NIGERIA

MTN's half-year results to 30 June 2026 disclosed that MTN Digital Infrastructure had, after the reporting period, entered a strategic partnership with a UAE-based data-centre investment platform; the partner is Dubai-based Gulf Data Hub founder Tarek Al Ashram, and the venture's first phase targets 150MW of AI data-centre capacity across Nigeria and South Africa. *Also under [AI](#) and [Gulf/UAE activities](#).*

MTN Group advances Africa's AI-ready digital infrastructure ecosystem through strategic partnership — MTN Group, 27 August 2026 SOUTH AFRICA NIGERIA

MTN's formal announcement of the Africa Data Hub Holding partnership named its UAE backer for the first time: Tarek Al Ashram, founder of the Dubai colocation operator Gulf Data Hub. MTN Digital Infrastructure will develop AI-ready data-centre capacity through the joint vehicle with an initial focus on South Africa and Nigeria, with the group's connectivity business a shareholder supplying open-access connectivity; its half-year results booklet of 24 August had named the vehicle but not the partner behind it. *Also under [AI](#) and [Gulf/UAE activities](#).*

Master Power Technologies and Digital Parks Africa join IBTC DC Academy as key ecosystem partners — Data Centres Africa, 27 August 2026 SOUTH AFRICA

Two South African firms joined a data-centre operations academy as industry partners and are sponsoring a full candidate cohort for its 2026 intake, the first to fund a whole cohort. One opens a newly launched Midrand OEM training facility and the other a live operational data centre to supply the practical component of a graduate-to-employment pipeline, which its sponsor frames as a recruitment expense rather than a training one. *Also under [Training and skills](#) and [ICT Industry](#).*

MTN Uganda and EBus Xpress Launch Electric, Cashless Bus Route in Kira — TechAfrica News, 28 August 2026

UGANDA

MTN Uganda and EBus Xpress launched an electric bus route in Kira Municipality carrying cashless fare collection, attended by the ministers for science and technology and for Kampala. No fleet size, fare, ridership or payment instrument is published; it is the first instance in the base of public-transport fares being digitised in Uganda.

From war zones to Kenya's markets: How an ex-soldier built a \$1bn lender — TechCabal, 28 August 2026

KENYA

A profile of a Kenyan lender to micro and small businesses, founded in 2013 on the premise that unsecured working capital repaid on time is itself the credit record a trader without collateral or accounts cannot otherwise produce. It said in June 2026 that it had disbursed more than \$1bn across over seven million loans at a repayment rate of about 95 per cent, with an algorithmic underwriting engine sizing each subsequent loan from repayment behaviour. The figures are the company's own. *Also under [Innovation ecosystem](#).*

Avec Flexee Pay, le Tunisien Mohamed Badri initie les jeunes à la gestion financière — wearetech.africa, 28 August 2026

TUNISIA

A Tunisian fintech launched in 2025 offers 12- to 25-year-olds a payments and budgeting app that needs neither a bank account nor a physical card: users receive money, track spending and pay by QR code or contactless at partner merchants, with a savings feature, cashback and an AI coach giving personalised advice. Parents keep oversight through their own space, scheduling transfers and watching transactions in real time. The product is still in launch phase ahead of app-store release; no user figure is published. *Also under [Literacy](#).*

Kagwe Pushes Digital IDs for Cows, Goats and Sheep to Fight Livestock Theft — ynews.digital, 27 August 2026

KENYA

Kenya's agriculture and livestock cabinet secretary is championing a nationwide rollout of an Animal Identification and Traceability System giving every head of livestock a unique identity and a lifetime record of origin, ownership, health, vaccination and movement, tagged by ear tag and microchip against a central platform readable by veterinarians, abattoirs and traders. The stated purposes are livestock management, theft, disease surveillance, food safety and market access; no operator, legal basis, budget or start date is on record. *Also under [Rural digital data capture](#).*

Other GovTech and e-Gov

SITA prioritises exec placements as it looks to revival — ITWeb South Africa, 28 August 2026

SOUTH AFRICA

The State Information Technology Agency told Parliament's portfolio committee it is finalising recruitment to key executive posts, after the Public Service Commission's investigation of government IT procurement over 2020 to 2025 named leadership gaps as a root cause of instability. The commission found 86% of managing-director roles held on an acting or interim basis, board tenures too short for continuity, and irregular expenditure above R2bn across four audited years. The agency carries more than 100 departments and public entities, and some are looking elsewhere.

Morocco and India to Establish Joint Commission on AI and Language Technologies — Tech Africa News, 28 August 2026

MOROCCO

Morocco and India agreed in Rabat on 24 August 2026 to set up a joint commission on artificial intelligence and language technologies, opening on systems that handle multiple languages, variants and dialects in dealings between citizens and the administration, and on cooperation around the JAZARI Institutes. The agreement follows the two ministers' February 2026 meeting in New Delhi. The commission is agreed rather than constituted: no instrument, terms of reference, budget or standing-up date is stated. *Also under [AI](#) and [India activities](#).*

Ghana Ministry of Finance Adopts Eskwai in First Team-Wide Government Legal AI Deployment — Tech Africa News, 27 August 2026

GHANA

Ghana's finance ministry adopted a legal artificial-intelligence platform across its legal directorate, reported as the first team-wide deployment of legal AI inside a government institution in the country. The directorate will use it for legal research and advisory work; no contract value or evaluation is published. *Also under [AI](#).*

CS Kabogo Unveils AI Platform to Transform ICT Ministry Operations — Kenyans.co.ke, 27 August 2026

KENYA

Kenya's ICT cabinet secretary put up a platform, hosted on his own official website, intended as a single entry point routing citizens to the agency or service responsible for a given digital programme. Its developers say it will launch once the underlying information, routing systems and review safeguards are in place, so it is not yet answering questions; no operator, data source, budget or accountability route is stated for a public-information service sited outside a government domain. *Also under [AI](#).*
