

MONTHLY UPDATE

EU activities: monthly update, July 2026

Edition of 2026-08-28 · compiled by Claude Opus from the documents in the Corpus repository

6 places. Every block below is carried verbatim from that place's own monthly update, where it was written, sourced and checked; nothing is written here.

CONGO · KENYA · MALI · MOROCCO · NIGERIA · UGANDA

The place reports do not share one window; the period above is the range they span.

Congo

An exploratory session on 14 July opened a channel with a European member-state development bank under the [European gateway programme](#), with no commitment, sum or timetable named.

Kenya

A European data-adequacy decision was described as being in prospect, in [a development agency interview that mentions it in passing alongside cross-border identity work](#). No application, assessment stage or timetable is stated, and neither the European Commission nor the government has said anything on the record here.

Mali

There is [no dedicated European Union country programme for Mali for 2025 to 2027](#): the country is funded instead from the central-Sahel complex-settings allocation, with no digital or data-governance activity named in either tranche. No separate termination instrument for the previous programme has been found.

Morocco

Morocco holds [no European Union adequacy decision: the Commission's list names sixteen jurisdictions plus one international organisation, none of them in Africa](#). Neither source establishing this is tagged to Morocco, and no Morocco-tagged governance source the base holds mentions the European Union at all.

Nigeria

The European Union [committed EUR 820m to the digital sector](#) at the Abuja workshop that validated a national innovation hub standards framework, which would set one standard across the country's hubs. The envelope is stated at a workshop rather than in an instrument, the framework is validated rather than adopted, and neither carries a disbursement schedule or a hub count.

Uganda

A [technical-assistance tender](#) was published on 31 July, estimated at EUR 938,170 over thirty months from 15 [September](#), performed from the regional secretariat in Arusha, with designs to be tested against the universal safeguards framework and against local data-protection and localisation law. The same tender names an added national funding window for a sovereign digital public infrastructure loan package with the ICT ministry, for which no amount, instrument or date is stated.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
