

## TWELVE-MONTH PROGRESS REPORT

# Egypt: progress report, 2025-08-01 to 2026-08-19

Edition of 2026-08-19-2 · 186 systems and instruments tracked, 54 of them not held

*Compiled 2026-08-19 from the Data Landscapers source base. Sections follow the status report. Each opens with a movement ledger comparing the position at the start and end of the period, which runs to the date of issue rather than to the last month's close.*

Of 186 systems and instruments on this place's ledger, 69 changed position between 2025-08-01 and 2026-08-19, 19 did not, 44 carry no stated baseline, and 54 are **Not held** at both ends.

Shape check, run before the comparison: 183 sources for this place in the window — 40 in the earlier half (2025-08 to 2026-02), 143 in the later (2026-03 to 2026-08). The earlier half of the window is thin: this is a shorter comparison wearing a longer label, and the movement below rests mostly on the later half.

**Movement values.** *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a measured position worsened. *Closed* — the programme ended. *No change* — the position at both ends is the same. *Baseline not held* — the base carries no position at the start of the period, so no movement can be stated. A value may carry a qualifying clause after a comma, as in *Advanced, slipped*.

## Summary of the period

Egypt's twelve months to 6 August 2026 were a year of instruments arriving rather than measurements moving. The Personal Data Protection Law was operationalised by Executive Regulations on 1 November 2025, more than five years after passage ([regulations summary](#)); a US\$3.5bn spectrum award doubled operator holdings ([award account](#)); and the government first published a count of its inter-agency exchange ([cabinet readout](#)).

That last figure needs reading carefully. The base carries no connection count for Egypt a year earlier, so 105 bodies is a first measurement rather than a year's achievement, and several positions here carry no stated baseline for the same reason. Where measurements exist at both ends, two moved: financial inclusion upward, and mobile download speeds downward.

## Connectivity

| SYSTEM OR INSTRUMENT                                             | AT 2025-08-01                                                                                                                           | AT 2026-08-19                                                                                                                                                                                                                                                                                         | MOVEMENT          |
|------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| 5G and aggregate mobile download speeds                          | 5G median 110.5 Mbps on launch day and 106.80 Mbps in month one; pre-launch 4G baseline 32.8 Mbps; combined 4G and 5G median 37.68 Mbps | 5G median about 89 Mbps at month six; combined 4G and 5G median 34.77 Mbps, below the pre-launch baseline, with 4G down 17%                                                                                                                                                                           | REGRESSED         |
| Active international submarine cable systems landing in Egypt    | 13 systems landing on the eastern coast with a stated plan to expand to 18 (2024-11-18, operator-reported)                              | About 15 active international systems, the largest concentration in Africa (2025-11)                                                                                                                                                                                                                  | ADVANCED          |
| Fixed broadband subscriptions                                    | 11.51 million (2024)                                                                                                                    | 12.60 million (November 2025), up from 12.50 million in October, annual growth 8.98%; mobile carried 75.44% of internet access against 72.97% a year earlier                                                                                                                                          | ADVANCED          |
| Starlink service in Egypt                                        | Advanced ministry negotiations reported 2025-06-18 with a possible launch during that year; no licence, no Egyptian entity              | Talks moved to a licensed local operator; no licence, no local entity, no service date, and the operator's own map listed Egypt as service date unknown in May 2026                                                                                                                                   | STALLED           |
| Upper 6 GHz mobile trial                                         | Did not exist                                                                                                                           | The incumbent, the regulator and a Chinese vendor ran a mobile base station and a data call over upper 6 GHz, reported at about 1.7 Gbps per user and stated by the operator as the first such trial in Egypt and Africa; the regulator frames the band as a capacity addition for high-traffic areas | ADVANCED          |
| 2Africa submarine cable, Egypt transit and Mediterranean segment | Mediterranean capacity in service since January 2025, with Egypt a transit hub rather than a terminal landing                           | Same; the system is stated at about 45,000 km across 33 or more countries, designed for up to 180 Tbps on main routes, with most segments expected complete by 2026 (consortium-reported)                                                                                                             | NO CHANGE         |
| 5G mobile service                                                | In service since June 2025, initial rollout focused on Cairo and Alexandria, on shared refarmed blocks of 20 MHz to 30 MHz of 2.6 GHz   | Same architecture; no coverage obligation, subscriber count or population-coverage figure is held for Egypt at 2026-08                                                                                                                                                                                | NO CHANGE         |
| AWS CloudFront edge location, Cairo                              | In operation since May 2024, with a vendor-stated latency reduction of up to about 30% for content delivered in Egypt                   | Same; no capacity expansion or additional presence is recorded                                                                                                                                                                                                                                        | NO CHANGE         |
| Mobile tower expansion programme                                 | The base carries no tower count or programme statement before February 2026                                                             | About 3,000 new towers planned in 2026 and more than 9,000 over three years, towers stated as doubled since 2019, against a target of 40,000 by 2028; more than US\$6bn invested in telecom infrastructure since 2019                                                                                 | BASELINE NOT HELD |
| Share of popular web content served from inside Egypt            | No prior reading is held                                                                                                                | 15% of popular web content served locally, the majority from European servers; Algeria 13%, South Africa 66%, United States 83%                                                                                                                                                                       | BASELINE NOT HELD |

## Data Storage

| SYSTEM OR INSTRUMENT                                 | AT 2025-08-01                                                                                                    | AT 2026-08-19                                                                                                               | MOVEMENT                                  |
|------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|-------------------------------------------|
| Telecom Egypt Regional Data Hub 2                    | Tier III design-certified, estimated IT load 4.6 MW against the first hub's 2.5 MW, completion expected end-2025 | Unchanged in the base; no held source states it entered service, and the stated end-2025 completion date has passed         | STALLED, ENTRY INTO SERVICE NOT CONFIRMED |
| East Cairo Logistics Park data-centre campus IT load | No prior reading is held                                                                                         | 25 MW operating with plans to expand to 45 MW                                                                               | BASELINE NOT HELD                         |
| Khazna Data Center Egypt expansion                   | No position is held at 2025-08-01                                                                                | An Egyptian expansion is named in the continental pipeline; no site, capacity, investment figure or date is given           | BASELINE NOT HELD                         |
| NTRA data-centre licensing regime                    | Licensing under the 2003 telecommunications law; the base holds no licence count or list at 2025-08-01           | Ten data-centre licences issued over the preceding two years, with the regulator stated to be continuing to expand issuance | BASELINE NOT HELD                         |

## Energy

| SYSTEM OR INSTRUMENT                             | AT 2025-08-01 | AT 2026-08-19                                                                                                                                                                                                                                                                         | MOVEMENT |
|--------------------------------------------------|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Renergy green hydrogen and solar project, El-Tor | Did not exist | About 127 sq km with 4 km of Red Sea frontage, EUR 5m of technical studies completed over two years, two phases targeting 160,000 then 400,000 tonnes a year of liquid green hydrogen wholly for export to Europe; put forward as the power source for the proposed Sinai data centre | ADVANCED |

## Cybersecurity

| SYSTEM OR INSTRUMENT                                 | AT 2025-08-01                                                                                          | AT 2026-08-19                                                                                                                                                                                                       | MOVEMENT          |
|------------------------------------------------------|--------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| ITU Global Cybersecurity Index standing              | 100% of index points on the 2023-2024 index, among the top 12 countries globally (reported 2025-02-18) | The same standing restated on 2026-06-10, among 12 states in the first tier at 100%                                                                                                                                 | NO CHANGE         |
| EG-CERT national computer emergency readiness centre | The base carries no dated position on the centre at 2025-08-01                                         | Operating under the telecommunications regulator, with capability development under way using AI techniques against cyber threats; no incident statistics, mandate document, budget or reporting obligation is held | BASELINE NOT HELD |

Egypt's spectrum position changed more in one transaction than in the preceding three decades: 410 MHz awarded to the four operators for US\$3.5bn in February 2026, doubling their holdings, under a National Spectrum Strategy whose period begins in 2026 ([award account](#)).

The service that spectrum was meant to carry went backwards on the only independent measurement available: the combined 4G and 5G median fell to 34.77 Mbps from a pre-launch baseline of 37.68 Mbps six months after the June 2025 launch ([measurement](#)). Egypt reformed 2.6 GHz rather than licensing dedicated mid-band and attached no coverage or quality obligation to the award.

Rural fibre advanced steadily: from 856 of 1,450 phase-one Decent Life villages at end-2024 to more than 1,250 by 30 June 2026, about five million lines ([operator account](#)). Fixed broadband subscriptions rose from 11.51 million to 12.60 million.

Data-centre policy arrived without data-centre figures: a national strategy went from not existing to under preparation ([strategy account](#)) and ten licences were issued over two years ([licence account](#)), while no capacity figure in megawatts entered the record.

## Digital public infrastructure

### Data Exchange

| SYSTEM OR INSTRUMENT                                   | AT 2025-08-01                                                                                               | AT 2026-08-19                                                                                                                                                                                                                                                                         | MOVEMENT          |
|--------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Digital treasury of reusable verified documents</b> | The base carries no position at 2025-08-01                                                                  | An operating model set and applied to a number of government services for gradual expansion, its first output the registration certificate as a verified reusable digital document consumed by the shop-licensing service, implementing the once-only principle                       | ADVANCED          |
| <b>Digital trust services, e-signature and e-seal</b>  | The base carries no position at 2025-08-01                                                                  | E-signature and e-seal live and integrated with digital identity, with remote e-signature stated as expanding across government services and the digital post box system stated as being finalised                                                                                    | BASELINE NOT HELD |
| <b>Government digital switch</b>                       | The base carries no connection count, architecture statement or lawful basis for the exchange at 2025-08-01 | 105 government bodies connected and 100 national databases linked for secure inter-agency exchange, named alongside unified digital identity, the Digital Egypt platform, the digital treasury, digital trust services and the digital post box as the enablers of the transformation | BASELINE NOT HELD |

| <b>Electronic birth and death registration</b> | The base carries no statement on electronic civil registration coverage at 2025-08-01 | The health ministry and associated bodies are stated to have taken electronic registration of births and deaths nationwide, credited with faster and more accurate demographic monitoring                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | <b>BASELINE NOT HELD</b> |
| <b>Mobile line registration regime</b>         | The base carries no position on mobile line registration at 2025-08-01                | The regulator is tightening subscriber-registration rules and expanding mandatory facial verification at enrolment through its know-your-customer system, linked to the civil registry, and is advancing a unified national digital-identity project alongside. On 10 August 2026 it referred all four mobile operators to the Public Prosecution over lines registered without customers' knowledge, ordered them to halt new activations on corporate registration systems, contact every existing corporate-line holder to re-register in person by a deadline with unclaimed lines cancelled, and accelerate biometric verification in their applications, warning that non-compliance would cost them sale and activation rights. Public take-up of the regulator's own line-checking service reached 5 million registrations in a week, roughly doubling its user base to about 12 million. Verification at enrolment does not prevent a line being handed on afterwards, which is the gap the case exposed | <b>BASELINE NOT HELD</b> |

|---------------------------------------------------------------------------|--------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| Egypt-Japan water, artificial intelligence and satellite-data cooperation | The base carries no position at 2025-08-01 | Memorandum with Japan's land and agriculture ministries covering technical missions, joint research and the application of AI and digital models to monitoring water structures and reducing flood risk; Egypt intends to use Japan's satellite rainfall product to monitor rainfall across Nile basin states and improve hydrological forecasting | BASELINE NOT HELD |

Most of Egypt's digital public infrastructure entered the wiki's record during this period rather than moving within it. The digital switch, the digital treasury, digital trust services, the investment-licensing platform, the state-land platform and the 2027 census design all have no stated position at the period's start ([cabinet readout](#)). The 105 connected bodies and 100 linked databases are a first measurement, not a year's movement.

Where both ends can be stated, the movement is real. Services on the national platform rose from about 170 in 2024 to 242, with 73 made exclusive to digital channels ([ministerial briefing](#)), and registered users from 8.1 million to 10.7 million. The instant payment network went from 12.5 million users and EGP 2.9tn in calendar 2024 to 16 million users and EGP 4.2tn in the year to June 2025 ([central bank figures](#)) – while pricing of the national retail rail returned, because the free-use position had rested on a renewable board decision rather than an instrument.

Identity multiplied without being counted. Three biometric channels launched inside the period, and no enrolment figure exists for any of them, nor any identity-specific governing instrument. One position regressed and one reopened: the title-based property register for a Sohag survey section was deferred by a year to July 2027 ([gazette account](#)), and ration-card grievance forms were reopened at 500 post offices alongside the online route.

## Governance and regulation

### Legislation and regulation

|---------------------------------------------------|------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| <b>World Bank GovTech Maturity Index position</b> | 69th globally with a maturity score of 0.751 on the 2022 index; Group B at 0.649 in 2020 | 22nd globally with a score of 0.911 in the top band on the 2025 index, a rise of 47 places, with core government systems 0.916, digital service delivery 0.962, citizen engagement 0.896 and enablers 0.869                    | <b>ADVANCED</b>          |
| <b>National Open Data Policy</b>                  | The base carries no statement of the policy's existence or content at 2025-08-01         | The minister named the launch of the open data policy among the policies and legislation supporting digital transformation; no date of adoption, text, issuing instrument, dataset inventory or national portal is established | <b>BASELINE NOT HELD</b> |

The defining governance movement of the period is that a statute in force since 2020 was finally made operable. Executive Regulations were issued on 1 November 2025, establishing the approvals model, a licence for each cross-border transfer, registered data-protection officers and breach notification within 72 hours ([regulations summary](#)). Enforcement runs from 1 November 2026, and ten compliance guidelines followed in early 2026.

What did not change is enforcement. At the start of the period the only award on record was a February 2025 judgment grounding liability in tort precisely because the regulations were pending ([judgment note](#)); at the end it is still the only one.

Several instruments went from nothing to a stated intention. Cabinet agreed on 29 July 2026 to review the social-media statutes and raise penalties, after the ICT minister disclosed a regulator unit already acting on artificial-intelligence-manipulated media ([cabinet account](#)). A national data-centre strategy and a national quantum strategy both entered preparation. One instrument did not move at all: the Property ID Law, approved by the House in April 2025, still has no decree naming its overseeing authority, no executive regulations and no commencement date fifteen months later.

| India-Egypt technology cooperation | The base held no source at all on India-Egypt technology cooperation at 2025-08-01 | The two industry ministers agreed a joint study of priority sectors for industrial and investment integration, to be prepared by Egyptian authorities with Invest India and covering market needs, value chains, joint manufacturing, incentives and tariff and non-tariff barriers, with financial technology among the named priority sectors; they discussed linking the two countries' payment systems and settling bilateral trade in local currencies, and Egypt proposed an Egyptian-Indian industrial integration platform matching companies on joint production, component exchange and supplier development | <div>BASELINE NOT HELD</div> |

Egypt's artificial intelligence institutions were added around a strategy that itself did not change. The second edition of the National AI Strategy has been in force since early 2025; within the period a responsible-AI centre was established inside the ICT ministry, the national council was widened to cover quantum computing and began preparing a quantum strategy, and an Arabic large language model attributed to an applied innovation centre entered the record. The strategy text is not held at either end.

Egypt's regional position advanced furthest: it hosted the Arab ministerial session that created the AI and emerging technologies committee in January 2026 and was elected on 31 July to chair two of its six working groups ([election account](#)).

The outsourcing sector converted commitments into buildings: a memorandum signed with the state in January 2025 became an inaugurated regional headquarters and generative-AI centre in New Cairo on 28 July 2026 ([inauguration account](#)). Handset production rose from 3 million units in 2024 to 10 million by end-2025. The Startup Charter announced in December 2025 with an EGP 50bn financing initiative has produced no launch, appropriation or disbursement ([charter account](#)).

| <b>Digital financial literacy barrier to mobile money</b> | No Egyptian digital-literacy measure is on file at 2025-08-01 | Among Egyptians aware of mobile money but holding no account, not knowing how to use the service affects 21% of women and 15% of men | BASELINE NOT HELD |

## Training and skills

| SYSTEM OR INSTRUMENT                                    | AT 2025-08-01                                                                                                                                                                                   | AT 2026-08-19                                                                                                                                                                                                                                                              | MOVEMENT |
|---------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <b>AI Capacity Building Initiative for Universities</b> | Running since 2022 under a ministry agreement with a technology vendor, with three rounds completed and no cumulative figure published at 2025-08-01                                            | Fourth round trained 1,090 students from 10 public, national and private universities producing 445 projects, plus a renewable-energy hackathon of 105 students in 21 teams; cumulative since 2022 reported as 2,710 students and 763 projects                             | ADVANCED |
| <b>Cybersecurity SuperHero Academy</b>                  | Two editions delivered, whose combined intake the national telecommunications institute states the third edition's target roughly matches; the base carries no dates or intake figures for them | Third edition targeting more than 6,000 trainees across 17 governorates in three age-banded stages from age 8 upward, delivered through institute premises and innovation centres, with the national emergency readiness centre, the regulator and two technology partners | ADVANCED |

| SYSTEM OR INSTRUMENT                          | AT 2025-08-01                                                                                                   | AT 2026-08-19                                                          | MOVEMENT  |
|-----------------------------------------------|-----------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|-----------|
| <b>ICT trainees under ministry programmes</b> | 400,000 ICT trainees in 2023/24, alongside about 250,000 STEM graduates a year and more than 20 innovation hubs | The same 2023/24 figure; no fresher national training total is on file | NO CHANGE |

Financial inclusion moved and credit access did not. Inclusion rose from 76.3% of adults at June 2025 to 77.6% at end-2025 ([central bank](#)). Against that, about 16.7 million adults still had no formal access to credit or other banking services at June 2025, and no fresher measure exists ([lender account](#)).

The acceptance and identity infrastructure widened: debit cards rose from 26.4 million to 29.1 million and point-of-sale terminals from 228,000 to [about 275,000](#), a national digital financial identity app launched in November 2025 enabling remote account opening at 37 banks, and contactless acceptance on ordinary smartphones moved from a capped pilot to a launched service. The national card scheme is the exception, its most recent count remaining 43.5 million from end-2024.

A unified government services card entered a [Port Said pilot reaching 41,500 ration-card households](#).

Training rose where it is counted by programme and stalled where it is counted nationally: the university artificial-intelligence initiative added 1,090 students in its fourth round ([round account](#)), while the most recent national ICT training total remains 400,000 trainees for 2023/24.

| <b>Central bank cooperation with Eswatini</b>                              | The base carries no dated position on the relationship at 2025-08-01, though prior cooperation on capital standards, financial inclusion, small-business finance and climate-related risk is described | Eswatini seeking to draw on Egypt's continental payment-system accession experience, with Egypt also offering its currency-circulation system, its currency printing house and banking institute training programmes                                                                                                                           | BASELINE NOT HELD |

## Domestic budget appropriations and expenditure

| SYSTEM OR INSTRUMENT                | AT 2025-08-01 | AT 2026-08-19                                                                                                                                                                                                      | MOVEMENT          |
|-------------------------------------|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>ICT sector public investment</b> | Not held      | EGP 13bn of public investment allocated to the communications and information technology sector in the 2025/26 plan, against plan targets of US\$8.5bn in annual digital exports of which US\$6bn from outsourcing | BASELINE NOT HELD |

State investment in the sector is stated only in dollars by ministers, at more than US\$6bn since 2019 ([ministry account](#)), and no Egyptian budget document supports any appropriation figure in this report.

## Where the record is thin

| SYSTEM OR INSTRUMENT                                                                | WHAT WOULD SETTLE IT                                                                                                                                                                                                                                            | LAST PROBED    |
|-------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| National Cybersecurity Strategy, second and third editions, as documents            | The published strategy text or the Supreme Cybersecurity Council decision adopting it, with an issue date and edition number                                                                                                                                    | not yet probed |
| National emergency readiness centre incident and advisory record                    | An annual report or regulator incident statistics giving reported incidents, sectors affected and response times for 2025 or 2026                                                                                                                               | not yet probed |
| Critical information infrastructure protection regulation                           | A regulator or cabinet instrument designating critical information infrastructure and setting security obligations on its operators, including the data centres now being licensed                                                                              | not yet probed |
| Submarine cable protection regime for Egyptian waters                               | An Egyptian instrument on cable protection zones, anchoring restrictions or repair-vessel access; the analysis the wiki holds is Africa-wide and names none for Egypt                                                                                           | not yet probed |
| Egypt's internet exchange points                                                    | A regulator or exchange-registry entry naming Egypt's exchange points, their members and peak traffic; nothing in the base names one, which sits oddly against the 15% content-locality reading                                                                 | not yet probed |
| 2Africa Egyptian landing stations and ready-for-service dates                       | The consortium's landing-station list or the incumbent's segment announcements naming the Egyptian Mediterranean and Red Sea landings                                                                                                                           | not yet probed |
| National broadband plan and any universal service obligation or fund                | The published national broadband plan or the regulator instrument establishing a universal service fund, with coverage targets and a financing line                                                                                                             | not yet probed |
| 5G coverage and subscriber base                                                     | A regulator quarterly bulletin giving 5G population coverage, base-station count and subscribers; the equivalent is held for Morocco and Tunisia in the same source and absent for Egypt                                                                        | not yet probed |
| Egypt's total operational data-centre capacity in MW                                | A market report or regulator licence register giving installed and pipeline IT load by facility                                                                                                                                                                 | not yet probed |
| Government data centres, location, operator and capacity                            | A ministry or cabinet statement enumerating the state's own data centres; the base repeatedly refers to government data-centre projects and giant data centres without naming or siting one                                                                     | not yet probed |
| Regional Data Hub 2 entry into service                                              | An operator press release or annual report confirming commissioning, Tier III constructed-facility certification, and delivered IT load                                                                                                                         | not yet probed |
| Power supply arrangements for Egypt's operating data centres                        | A grid connection agreement, tariff schedule or power purchase agreement for any licensed Egyptian data centre; the base holds nothing beyond the Sinai green-power proposal                                                                                    | not yet probed |
| Data-centre energy and water consumption reporting                                  | A licence condition or operator sustainability report giving power usage effectiveness, annual energy draw or cooling-water use for an Egyptian facility                                                                                                        | not yet probed |
| National high-performance computing or public GPU capacity                          | A ministry or applied innovation centre statement giving the compute on which the Arabic large language model was trained and is served, with location and ownership                                                                                            | not yet probed |
| National digital identity enrolment count                                           | A ministry or interior ministry registration figure for the digital identity app, the interior biometric platform or the central bank identity app; three biometric identity channels launched inside the window and the base holds no enrolment number for any | not yet probed |
| Governing instrument for digital identity and biometric processing                  | A decree or law establishing the national digital identity system and its biometric processing basis; the data-protection law and its regulations are held, but no identity-specific instrument is                                                              | not yet probed |
| Register of bodies connected to the government digital switch, and its lawful basis | A ministry or cabinet decree establishing the switch, or a published register of the 105 connected bodies and 100 linked databases; only a cabinet readout of ministry-reported counts is held                                                                  | not yet probed |

| SYSTEM OR INSTRUMENT                                                                         | WHAT WOULD SETTLE IT                                                                                                                                                                                                                                                                                      | LAST PROBED    |
|----------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>Relationship between the ministry's digital post box and the postal service's product</b> | A ministry statement naming the digital post box product, or the postal service protocol text; the ministry reported its own digital post box as being finalised on 2026-07-19 and a national-ID-linked postbox appeared as operating on 2026-08-05, and nothing states whether these are the same system | not yet probed |
| <b>National land registration coverage</b>                                                   | A real estate publicity department or justice ministry figure for registered against unregistered properties, or a count of survey sections converted to the title register                                                                                                                               | not yet probed |
| <b>Commercial register size and digitisation state</b>                                       | A supply ministry or investment authority figure for registered establishments; the base records nine commercial-registry services made exclusive to the platform from 2026-01-01 but no register size or digitisation coverage                                                                           | not yet probed |
| <b>Universal Health Insurance system enrolment and digital architecture</b>                  | An insurance authority enrolment or governorate-rollout figure; the base holds a policy note proposing automatic enrolment and a note that the national digital health strategy is anchored on the insurance architecture, but no operating position                                                      | not yet probed |
| <b>Education management information system</b>                                               | A Ministry of Education statement or system name; education appears only as one of nine priority sectors and as an area receiving new services, with no named system                                                                                                                                      | not yet probed |
| <b>National card scheme current issuance</b>                                                 | A central bank figure for national scheme cards issued after end-2024; 43.5m at end-2024 is the newest count held, repeated in two November 2025 accounts of the same address                                                                                                                             | not yet probed |
| <b>Central bank national payment system statistics</b>                                       | A payment systems annual or quarterly report giving mobile money and switch transaction volumes and values; the base carries only inclusion rates quoted second-hand                                                                                                                                      | not yet probed |
| <b>Governorate-level service platforms and local-government information systems</b>          | A local development ministry statement on governorate digital service centres or a local-government information system; the base holds the shop-licensing platform and nothing on governorate-level systems as such                                                                                       | not yet probed |
| <b>Statistics agency release programme and publication calendar</b>                          | The agency's published release calendar or its statistical yearbook for 2025 or 2026; the base holds no agency output at all beyond the census-planning readout                                                                                                                                           | not yet probed |
| <b>Egypt's own earth-observation and satellite programme</b>                                 | An Egyptian Space Agency statement or satellite mission record; the section's only satellite content is Egypt's intended use of a Japanese rainfall product                                                                                                                                               | not yet probed |
| <b>Rural digital service uptake, as distinct from rural connectivity</b>                     | A figure for platform transactions or service-centre usage originating in Decent Life villages; the base holds fibre-line and village counts but nothing on whether rural households use the digital services those lines carry                                                                           | not yet probed |
| <b>Data-protection regulator enforcement and licensing record</b>                            | An annual report or published decisions register giving decisions issued, fines imposed, officers registered and cross-border-transfer licences granted since 2025-11-01                                                                                                                                  | not yet probed |
| <b>Executive Regulations 816 of 2025, the instrument itself</b>                              | The Official Gazette text of the decree; the base holds only two law-firm summaries of it                                                                                                                                                                                                                 | not yet probed |
| <b>Cybercrime Law 175 of 2018 and its enforcement record</b>                                 | The Official Gazette text with any amendments, plus prosecution or conviction statistics; the base names the law repeatedly but holds no text and no enforcement record                                                                                                                                   | not yet probed |
| <b>Telecommunication Regulation Law 10 of 2003</b>                                           | The Official Gazette text as amended; the base knows it only through the recital in the regulator's satellite framework and a second-hand reference to one article                                                                                                                                        | not yet probed |
| <b>Egypt's position on the AU Malabo Convention</b>                                          | The AU depositary's ratification list, or an Egyptian instrument of ratification or accession; nothing states whether Egypt has signed, ratified or acceded                                                                                                                                               | not yet probed |
| <b>EU-Egypt digital cooperation instrument</b>                                               | The text of any EU-Egypt digital chapter, Global Gateway package allocation or European Commission adequacy assessment naming Egypt; the base holds nothing on Egypt's digital relationship with the EU as an institution                                                                                 | not yet probed |
| <b>Egyptian national open-data portal</b>                                                    | The portal's own landing page with a dataset count and a licence statement, or the text of the open data policy the ICT minister referred to on 2025-12-21                                                                                                                                                | not yet probed |
| <b>Public consultation on the data-protection Executive Regulations</b>                      | A regulator or ministry consultation record - a draft published for comment, submissions received, or a response document; the base holds no evidence the Regulations were consulted on before issue                                                                                                      | not yet probed |
| <b>National Artificial Intelligence Strategy, second edition, the document</b>               | The published strategy text giving the six pillars' content, targets, budget and delivery milestones now known only from ministerial summaries                                                                                                                                                            | not yet probed |
| <b>Egypt's AI-specific statute or regulation</b>                                             | A published bill or Official Gazette instrument; nothing establishes any AI-specific law, only the data-protection law and a cabinet-agreed legislative review of 2026-07-29                                                                                                                              | not yet probed |

| SYSTEM OR INSTRUMENT                                                                                  | WHAT WOULD SETTLE IT                                                                                                                                                                                                                 | LAST PROBED    |
|-------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>Egyptian Charter for Responsible AI (2023)</b>                                                     | The charter text itself; the base carries only the minister's one-line reference to its 2023 issuance                                                                                                                                | not yet probed |
| <b>Applied Innovation Centre</b>                                                                      | A founding instrument, budget line or annual report; the centre is named in three sources as the developer of the Arabic model but has no establishment date, mandate or funding on file                                             | not yet probed |
| <b>Artificial intelligence contribution to Egyptian GDP</b>                                           | The study behind the widely quoted figure of about US\$42.7bn or 7.7% of GDP by 2030; no source on file establishes it, and the entity page expressly declines to carry it                                                           | not yet probed |
| <b>Gulf-state technology investment in Egypt</b>                                                      | Any source at all; the wiki holds zero Egypt sources on this subject, so no UAE, Saudi or Qatari technology or data-centre commitment can be stated, dated or sized                                                                  | not yet probed |
| <b>State appropriation for digital transformation and for the ICT ministry</b>                        | The finance ministry's published FY2026/2027 budget chapters for the communications ministry, or the ICT chapter of the Economic and Social Development Plan; there is no budget archive for Egypt and the plan document is not held | not yet probed |
| <b>Economic and Social Development Plan FY2026/2027</b>                                               | The plan document from the planning ministry or as laid before Parliament; the wiki records at 2026-08-04 that it is not held and that the ministry site serves no plan document                                                     | not yet probed |
| <b>Startup Charter EGP 50bn financing initiative, appropriation and disbursement</b>                  | The cabinet decision or finance law establishing the fund, and the managing body's first disbursement report                                                                                                                         | not yet probed |
| <b>Applied Innovation Centre research programme and model documentation</b>                           | The centre's own published research output, budget or model card; nothing at all is held on research capacity for Egypt                                                                                                              | not yet probed |
| <b>National research and development spending on artificial intelligence and digital technologies</b> | A statistics agency or higher education ministry expenditure series, or the National AI Strategy's own budget annex                                                                                                                  | not yet probed |
| <b>Compute access for Egyptian researchers</b>                                                        | A dated statement from the AI-factory operator or the Egyptian state on the Egyptian site's siting, capacity and access terms; the base records only that Egypt is one of five planned sites                                         | not yet probed |
| <b>Enrolment and graduate numbers for the named national training programmes</b>                      | Ministry or IT industry agency annual reports giving per-programme intake and completion figures; the base names the vehicles at 2026-07-21 but carries no numbers                                                                   | not yet probed |
| <b>Internet use as a share of population</b>                                                          | Regulator or ministry monthly ICT indicators, or an ITU country profile; no source in the base carries an Egyptian internet-penetration figure with a citable URL                                                                    | not yet probed |
| <b>Universal service fund or universal service obligation</b>                                         | The regulator's annual report or the universal-service provisions of the telecommunications law and any levy accounts; no source names such a fund                                                                                   | not yet probed |
| <b>Postal service digital services and post-office digitisation</b>                                   | A national postal authority progress report; the base holds only 2024 figures of 27 digital services and about 3,000 post offices digitised, with no update                                                                          | not yet probed |
| <b>Gender gap in internet and mobile-internet use</b>                                                 | An industry association gender-gap country table or a statistics agency ICT household survey for Egypt; only the mobile-money literacy split is held                                                                                 | not yet probed |
| <b>Affordability of connectivity relative to income</b>                                               | An affordability alliance or ITU affordability series for Egypt; the base records rising consumer complaints about internet prices at December 2025 but no price or income measure                                                   | not yet probed |

The period's most consequential absence is fiscal: no state appropriation for digital transformation or for the ICT ministry is held, and the FY2026/2027 development plan is not held, so nothing here can state what Egypt commits in its own money.

Research capacity is the second: nothing at all is held on national research and development spending, on the applied innovation centre's output, or on compute access for Egyptian researchers, even though the state's own Arabic language model is attributed to that centre.

Two silences bear directly on the report's strongest claims. No register of the 105 bodies connected to the government digital switch exists and no lawful basis for the sharing is published ([cabinet readout](#)); and no enrolment count exists for any of the three biometric identity channels launched inside the period. Gulf and Indian technology engagement returns no source at all.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
