

## PROGRESS REPORT

# Algeria: progress report, September 2025 – September 2026

Edition of 2026-09-01 · 117 systems and instruments tracked

GOVERNANCE · FINANCE · ICT INFRASTRUCTURE · DPI · DIGITALISATION · TECHNOLOGY · CAPACITY ·  
INCLUSION · DATA · GEOPOLITICS · WHERE THE RECORD IS THIN

This report asks the same set of questions of every country. The rows below are a fixed frame of indicators, one row each, chosen in advance and covering all thirty-eight subjects the base tracks — so what appears here is decided by the frame and not by whichever records happened to accumulate. Each row says what happened on that indicator during the period, with every claim linked to the source it rests on.

Where a row reads *No evidence*, the base holds nothing on that indicator. **That is a statement about this base, not about the country** — it does not mean nothing exists, only that nothing has been collected here yet. The rows that carry evidence say what it is; the rows that do not are left to speak for themselves.

*The period is 2025-09-01 to 2026-09-01.*

**Progress values.** *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a reported position worsened. *Mixed* — the indicator's instruments moved in different directions in the period; the clause after the comma names which moved which way. *No change* — the base holds a standing position and nothing in the period touched it. *No evidence* — the base holds nothing on this indicator at all. A value may carry a qualifying clause after a comma, as in *Advanced, regulations still pending*.

## Governance

| TOPIC                          | INDICATOR                                        | DEVELOPMENTS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | PROGRESS    |
|--------------------------------|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| Strategies, plans and policies | <b>Digital transformation strategy</b>           | <p>The 2030 strategy's targets are unchanged, and the high commission seated a scientific committee in October 2025.</p> <p>The strategy was published in May 2025 targeting all public services online by 2030, 500,000 information and communication technology jobs and a fifth of national output from the digital economy</p> <p>, announced the day before</p> <p>. Its targets did not move in the window.</p> <p>2025-10-23 - the high commission for digitalisation, created by decree in 2023, seated a fifteen-member scientific and technical committee, three of them from the diaspora</p> <p>. It had been operating without one.</p> <p>No delivery figure against any of the three targets is published, so what has been added is a governance organ rather than a measured position.</p> | ADVANCED    |
| Strategies, plans and policies | <b>ICT strategy</b>                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | NO EVIDENCE |

| Strategies, plans and policies | <b>Data interoperability framework / roadmap</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | NO EVIDENCE |

| TOPIC                          | INDICATOR                         | DEVELOPMENTS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | PROGRESS  |
|--------------------------------|-----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Strategies, plans and policies | <b>AI strategy</b>                | <p>A joint interministerial roadmap to deploy artificial intelligence across public services was agreed in August 2026; the strategy text is still unpublished.</p> <p>The strategy was adopted by the national artificial-intelligence council in December 2024 on six pillars, and its deployment plan was reviewed by government on 25 May 2026 ahead of a Council of Ministers adoption that is not recorded as having happened</p> <p>.</p> <p>2026-08-05 - a first interministerial meeting fixed five priorities: sovereign open-source government models, national high-performance computing, specialised training and university curricula, a national research centre with specialised units, and administrative and public data processed and hosted in national data centres, and created a follow-up commission</p> <p>, the roadmap being fixed by the higher-education minister and the deployment agreed jointly</p> <p>. The underlying research and innovation strategy was drawn up by 150 national and diaspora experts</p> <p>.</p> <p>No budget, dates or implementing institutions are stated, and the strategy itself is still not published.</p> | ADVANCED  |
| Strategies, plans and policies | <b>Data localisation policies</b> | <p>In-country data localisation has been in force since September 2024, and no global hyperscaler operates in-country.</p> <p>Localisation has been in force since September 2024, with no global hyperscaler operating in-country</p> <p>, and the position is restated in an analysis of digital-sovereignty policy</p> <p>. The instrument imposing it is not itself held.</p> <p>Nothing moved in the window, but what sits on top of it did: a national data centre entered service, a sovereign cloud launched on it, and the data-protection authority ruled that publishing images through platforms reachable from outside the country is a transfer of data abroad. Localisation is therefore the single policy on this ledger with the most instruments now resting on it and the least documentation of its own.</p>                                                                                                                                                                                                                                                                                                                                           | NO CHANGE |

| TOPIC                          | INDICATOR                          | DEVELOPMENTS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | PROGRESS    |

| Data Exchange | <b>National data exchange system</b> | <p>The President gave a one-month deadline on 12 July 2026 for cross-sector interconnection through the national data centre; no completion is reported.</p> <p>The interoperability system is created by article 10 of the data-governance decree as the exclusive channel for inter-agency data exchange, on a network kept physically separate from the internet, its obligations starting only when the two reference documents required by article 8 are published . Those were not traced as at 20 July 2026 .</p> <p>2026-07-12 - the President gave a one-month deadline for cross-sector interconnection through the national data centre, and no completion has been reported against it , the decree being presented as the technical base for it .</p> <p>A deadline set against obligations that have not commenced is the position: the instrument exists, the reference documents that would start it do not.</p> | ADVANCED |

| Digital divides    | <b>Bridging of digital divides</b>            | <p>A <a href="#">universal-service programme</a> reached 1,400 low-density areas in its first phase, with no target, budget or completion date.</p> <p>The programme's position was not held at the window's opening. By May 2026 it had reached 1,400 areas in a first phase, with no target, budget or completion date stated, against 76.9% internet penetration and 10.9m people offline in 2025</p> <p>.</p> <p>The offline figure is a third-party compilation rather than an official series, and no rural coverage, affordability or usage-gap measure is published by the regulator or the ministry. So the country can state how many areas a programme reached and not how many people remain outside it, except on someone else's number.</p> | ADVANCED    |

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
