

MONTHLY UPDATE

Eritrea: monthly update, August – September 2026

Edition of 2026-09-01 • 1 systems and instruments tracked

Developments summarised from sources published between the beginning of last month and today.

SUMMARY OF THE MONTH • TECHNOLOGY

Summary of the month

One development falls in the month, in a base whose Eritrean reporting is limited to the information ministry's own outlet and a diaspora one. On 15 August the ministry [interviewed Shambko Apps Group, a self-organised software collective that has released five Tigrinya-language mobile applications](#) built to the national curriculum, with a stated plan to extend them to Eritrea's eight other national languages. It is the first non-state software effort the base holds for the country, and the account is the state broadcaster's own.

Technology

Innovation ecosystem

On 15 August the Ministry of Information [interviewed Shambko Apps Group, a self-organised software collective that has released five Tigrinya-language mobile applications](#) — literacy, puzzle, cultural-heritage and arithmetic tools built to the national curriculum — and set out a plan to extend them to Eritrea's eight other national languages. It is the first non-state software effort the base holds for Eritrea. No download count, distribution channel or funding source is stated, and the account is the state broadcaster's own.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
