

STATUS REPORT

DR Congo: status report

Edition of 2026-08-13 · 82 systems and instruments tracked, 9 of them not held

Compiled 2026-08-12 from the Data Landscapers source base, from [outputs/reports/COD/ledger.csv](#) (82 systems and instruments, 9 of them **Not held**). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

DR Congo's digital appropriations can be read directly from an enacted budget. The 2026 finance law gives the digital economy section [FC 81,698,223,741 of domestic credit and posts and telecommunications FC 53,840,917,417](#). Against that, the FY2025 chain closed with [FC 31,358,784,468 paid, 51.7% of the revised credit](#), and nothing had been published for the 2026 exercise seven months into the year.

The framework law is in force and its supervisory institution is not. The [Code du numérique was promulgated on 13 March 2023](#) with a third book governing personal data; the [authority required by its article 262 has still not been created](#), and no decree defining its organisation was found as at March 2026. A national identity platform meanwhile runs under a twenty-year exclusive concession, [launched on 13 June 2026 and valued at US\\$97.1m](#), with no enrolment figure published.

Physical build is measurable and behind. [7,000 km of the transformation project's fibre is deployed against a target of more than 18,500 km](#), tied to connecting 145 territories by 2030.

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
5G public consultation	IN DEVELOPMENT ↗	The regulator opened a public consultation on introducing 5G

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Africa Congo Internet Exchange	IMPLEMENTED ↗	A second presence added at a Kinshasa carrier-neutral facility, making it the country's first distributed exchange
Goma-Mombasa fibre route	IMPLEMENTED ↗	The route reported lit, linking Goma to Mombasa via Kampala
National digital transformation project fibre backbone	IN DEVELOPMENT ↗	Deployment reported to the 95th ordinary Council meeting 2026-08-03
Rural solar base-station joint venture	IN DEVELOPMENT ↗	The commitment restated as 2,000 new solar-powered base stations by 2031
Sovereign satellite programme	PLANNED ↗	The President received the promoter's representative, who said a bank had mobilised the estimated US\$400m
State telecommunications and postal operator	IMPLEMENTED, IN STRUCTURAL CRISIS ↗	A directorate-general communiqué on the recovery setting out finances against staff grievances

Data Storage

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Kinshasa carrier-neutral data centre	IMPLEMENTED ↗	Certified to information-security, continuity and payment-card standards
National data centre appropriation	PLANNED ↗	The enacted 2026 finance law carries FC 26,756,546,346 for national data-centre acquisition
Raxio Kinshasa data centre	IMPLEMENTED ↗	A contractor account of the delivered facility giving its build specification
Sovereign government cloud	PLANNED ↗	Named by the digital economy minister among the projects to be ordered and made executable

Energy

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Energy provision for digital infrastructure	NOT HELD	—

Technical Capacity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National technical-capacity base	NOT HELD	—

Cybersecurity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Child online-safety service	IMPLEMENTED ↗	An operator launched the service at a Kinshasa press conference
National cybersecurity agency	PLANNED ↗	Named as one of five bodies whose roles in the incident-notification chain must be clarified, explicitly without creating new institutions
Functioning national incident-response capability	NOT HELD	—

The backbone is the one infrastructure object with a delivered figure and a target. 7,000 km is deployed against more than 18,500 km, leaving 11,500 km over a 2030 horizon; the minister attributes the pace to budget constraints and a low disbursement rate on external financing. Around it, eastern DR Congo is tied into the East African terrestrial corridor and the internet exchange now operates as a distributed exchange across two carrier-neutral facilities, with no traffic or member figure held at any date.

Two announced programmes have not moved off the announcement. A rural joint venture's commitment to 2,000 solar base stations was restated with a 2031 date and carries no sites-built count; a sovereign satellite estimated at US\$400m has no contract, operator or launch date, and the claim that a bank has mobilised the funds is relayed by the presidency and uncorroborated.

Commercial data-centre capacity is specified: 400 racks over 1,542 square metres at 1.5 MW on US\$30m invested, with no utilisation figure. State capacity is an appropriation: the 2026 finance law carries FC 26,756,546,346 for national data-centre acquisition with no procurement or site on file.

The state operator's position is financial: on current finances it could theoretically pay salaries only every four months, which management says rigour has brought to every two to two and a half months. No incident-response capability, technical-capacity base or energy provision for digital infrastructure is held.

Digital public infrastructure

Data Exchange

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Data-sharing platform and government payment gateway	PLANNED ↗	Named as deliverables of the digital transformation project in the consultant tender
National electronic certification authority	PLANNED ↗	Named by the minister among the instruments to be articulated into the governance framework

Digital Identity and CRVS

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Biometric passport	IMPLEMENTED ↗	The price cut to US\$75 with a new supplier and online enrolment
RDC-PASS national digital identity platform	PILOTING ↗	A state launch ceremony in Kinshasa, with rollout to begin with technical audits and pilot testing
Second national identification and card issuance	IN DEVELOPMENT ↗	The identification office states operations are about to start, financed by a partnership because the 2026 finance law fell short

Digital Payments and Fintech

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Card-and-wallet interoperability service	IMPLEMENTED ↗	A card-network interoperability service launched for the country through a payments aggregator
Central bank de-dollarisation deadline	PLANNED ↗	The central bank set 9 April 2027 as the date from which no foreign-cash transaction of any amount is permitted

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Microfinance and cooperative digitalisation platform	IN DEVELOPMENT ↗	A partnership agreement signed in Kinshasa between a payments firm and two sector associations
Palm-vein biometric payment terminal	PILOTING ↗	The palm-vein payment technology launched in Kinshasa
Prepaid card partnership	PLANNED ↗	A card network and a domestic payments company announced physical and virtual prepaid card issuance
Stablecoin settlement of mobile-wallet top-ups	PILOTING ↗	A card-network executive confirmed on record a live use case settling wallet top-ups in stablecoins in the background

Registries (population, land, address, etc.)

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Business-creation single window	IMPLEMENTED, ONE SEGMENT ONLY ↗	A ministerial inspection at which the new portal and mobile application were presented
Single social register	PLANNED ↗	A draft decree creating and organising the register adopted at the 53rd Council of Ministers

Sectoral management information systems (HMIS, EMIS, etc.)

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Economic-inspection document authentication platform	PILOTING ↗	Technical training of ministry staff closed after a session running 9 to 24 June 2026
Facture normalisée (standardised VAT e-invoicing system)	IMPLEMENTED ↗	Fiscal clinics closed and immediate targeted sanctions ordered against non-compliant taxpayers and DGI staff, 2026-08-06
Higher-education portal and national digital library	IMPLEMENTED ↗	The portal and a first national digital library went live under external financing
Public-enterprise digitalisation plan 2026-2028	PLANNED ↗	A dissemination seminar for public managers opened in Kinshasa with digitalisation as the plan's backbone

Other GovTech and e-Gov

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Digital government platform	PLANNED, TARGET MISSED ↗	A March 2026 target passed with neither launch nor delay announced
National e-government strategy 2025-2030	IN DEVELOPMENT ↗	Named in the digital-infrastructure tender, with its master plan and governance framework as the consultant's deliverables

Digitalisation of sub-national government

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Airport levy electronic payment, Kinshasa province	PLANNED ↗	The provincial finance minister made electronic payment of the levy official from July
Kinshasa drone surveillance and citizen-reporting application	IMPLEMENTED ↗	A drone and citizen-reporting deployment reported, operated through a private company

National statistics

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Digital sector strategic barometer	PLANNED ↗	Creation announced after the working session of 2026-08-06
Second general population and housing census	IN DEVELOPMENT ↗	The planning minister announced recruitment of mapping agents and fixed general enumeration for July 2027

Use of satellite data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Use of satellite or earth-observation data in public administration	NOT HELD	—

Identity is being built twice, in parallel, on different legal bases. The [RDC-PASS platform launched on 13 June 2026](#) under a [twenty-year exclusive know-your-customer concession](#), valued at US\$97.1m with US\$2.6m raised by the [concessionaire](#) for initial rollout. Separately the identification office states [operations are about to start on a second national identification, financed by a partnership because the 2026 finance law fell short](#) — the appropriation for national identification acquisition is [FC 20,654,178](#), a figure that cross-foots exactly against its group total. The last national identification was in 1984. A [bill setting one legal frame for identification data was tabled on 12 June 2026](#) and nothing on file connects it to the concession.

Payments are the most active layer and the least measured. A [card-and-wallet interoperability service](#) is live and now carries a [stablecoin settlement of wallet top-ups](#), which runs against the central bank's own deadline of [9 April 2027, from which no foreign-cash transaction of any amount is permitted](#). Account numbers cannot be stated: the base carries [24m, 29m, 30m and 35m across sources](#), none reconcilable and no central-bank series published.

Government platforms are specified on paper. The [digital government platform missed a first-quarter 2026 target with neither launch nor delay announced](#); the e-government strategy dated 2025 to 2030 has its master plan and interoperability framework still to be defined by a consultant not yet appointed. Where delivery exists it is narrow: [sole-trader attestations issue in under 48 hours while full online company creation is not possible](#).

Tax administration is the sector's most enforced digitisation. The [standardised VAT e-invoicing system, mandatory since 1 December 2025, has closed its transitional "fiscal clinics"](#), and the finance minister has ordered immediate [targeted sanctions against non-compliant taxpayers and against DGI staff who validate deductions without a normalised invoice](#); quarterly VAT mobilisation has risen from a CFC 280–290bn average to CFC 340bn, which the minister called still "very largely below potential".

Governance and regulation

Legislation and regulation

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Bill on the identification of natural persons	IN DEVELOPMENT ↗	Tabled at the National Assembly bureau 2026-06-12
Code du numérique	IMPLEMENTED ↗	Promulgated 2023-03-13

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National data protection authority	PLANNED ↗	No decree defining its organisation and functioning found

Public debate and participation in policymaking

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Permanent state-industry consultation framework for the digital sector	PLANNED ↗	Agreed at a working session between the digital economy minister and the sector network 2026-08-06

EU activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
EU digital governance or regulatory cooperation	NOT HELD	—

Open data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Bill on access to information and transparency in public life	IN DEVELOPMENT ↗	Declared admissible by the National Assembly 2026-03-27 and referred to a joint commission with ten days to report
National open-data policy or portal	NOT HELD	—

The [Code du numérique](#) has been in force since [March 2023](#); the data protection authority it requires is [still not created](#), the minister saying in March 2026 that structuring a professional network precedes its creation. That network is live and is not a supervisory authority with sanctioning powers.

Two bills sit in opposite directions. A [bill on access to information](#) was declared admissible on [27 March 2026](#) and referred to a joint commission with ten days to report, with no commission report four months past that deadline. In the other direction, an information note to the Council of Ministers proposes a [classification regime of four levels with access limited to cleared agents](#).

An [interministerial order pricing digital-sector duties](#) took effect on signature on [20 July 2026](#). The finance ministry announced a stay of its application [decided on the evening of 1 August 2026](#); after a working session on 6 August the sector network reported the minister's position that [the order was never suspended and remains fully applicable](#). Neither position rests on a published government text, and that session agreed a permanent state-industry consultation framework. The ministry's own [8 August statement then confirmed that registered "entreprenant" start-ups are fully exempt under Digital Code Article 384](#), not merely subject to the US\$100 line reported earlier; no gazetted order or amending text is published.

The sectoral digital economy policy 2026-2030 was [validated by government on 4 August 2026](#) and referred to the [Council of Ministers](#); the text is not published and its costing cannot be checked.

Network loss in conflict-held eastern territories is recorded as [war damage and fuel-access failure rather than any ordered restriction](#), with mobile money the first casualty in each outage. Baraka and Fizi have been [cut off for months amid operations against Twiraneho/AFC-M23 forces near Épupu](#), and humanitarian NGOs' Starlink kits, the last backup channel, were seized on the Baraka mayor's order. No data governance strategy, open-data policy or European Union instrument is held.

Artificial intelligence and the technology sector

AI

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
AI-assisted business-plan platform	IMPLEMENTED ↗	Launched in Kinshasa by a state guarantee fund, built by a domestic firm
Congolese academy of artificial intelligence	PLANNED ↗	Named as a provision of the AI strategy at the national digital plan's drafting launch
Lingala language data collection for AI	IN DEVELOPMENT ↗	Launched alongside the digital code campaign 2026-08-06
National artificial intelligence strategy	IN DEVELOPMENT, VALIDATED AND AWAITING ADOPTION ↗	Presented and validated by government at a Kinshasa ceremony 2026-08-04

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Student artificial-intelligence facility	PLANNED ↗	Announced alongside the operationalisation of the US\$500m partner tranche

ICT Industry

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Local-content subcontracting enforcement in telecoms	IN DEVELOPMENT ↗	A first working session agreeing a harmonised reading of the texts and joint inspection teams

Innovation ecosystem

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Startup Act implementing decrees	IN DEVELOPMENT ↗	A government communiqué of 2026-08-03 confirms the implementing texts remain in preparation

US / hyperscaler activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Digital infrastructure and cybersecurity partnership	PLANNED ↗	A strategic partnership signed on the margins of the spring meetings in Washington
Payments-modernisation claim in a United States federal court	IN DEVELOPMENT ↗	A fintech filed against the state and senior officials over the collapsed banking and payments modernisation project

China activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Congo River fibre-optic memorandum	PLANNED ↗	A memorandum signed with a Chinese supplier for a 2,100 km route
Police cooperation accord	IMPLEMENTED ↗	Signed in Beijing by the interior vice-premier and China's public-security minister

India activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
India-DR Congo digital or technology engagement	NOT HELD	—

The national AI strategy was [technically validated over 23 to 27 July 2026](#), then [validated by government on 4 August 2026 and referred to the Council of Ministers](#); the text is not published and no adoption date is established. Its four pillars run from governance, ethics and regulation to industrialisation and value creation. Officials have said on the record that bodies already acting across digital, research, data, cybersecurity and regulation have [roles not yet sufficiently articulated in a common steering architecture](#).

[AI was used to mark the 2024-25 state examination](#), with no scope, vendor, model, accuracy or human-oversight detail held; a state guarantee fund runs a [live AI-assisted business-plan platform](#) with no usage figures or data-protection arrangement stated.

Four draft decrees adopted in May 2025 to operationalise the fiscal, customs and exchange advantages of the 2022 ordinance-law remain in preparation, so no exemption regime for startups or digital small businesses is in force.

A Chinese supplier memorandum covers about 2,100 km along the Congo River at a stated US\$1.5bn, with more than US\$400m required for the first phase and no financing close; a United States partnership covers data centres, connectivity, cybersecurity, financial technology and artificial intelligence with no value or milestones. A claim in a United States federal court seeks up to US\$400m over a collapsed payments-modernisation project; the government calls the signed documents a non-binding memorandum, and no ruling is held.

Inclusion and capacity

Digital divides

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Universal service fund pilot sites	PILOTING ↗	Subsidy conventions signed with Airtel, Orange, Vodacom and Africell for a first tranche of 40 localities, targeting about 258,000 people, 8 August 2026

Access to services

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Rural civil-servant payroll	IN DEVELOPMENT ↗	A state bank and the payroll monitoring committee settled technical and organisational terms at a Kinshasa working session

Literacy

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National digital code awareness campaign	IMPLEMENTED ↗	Launched in Kinshasa 2026-08-06
National policy on information technology in education and training	IMPLEMENTED ↗	Adopted by the 92nd Council of Ministers on the education minister's presentation

Training and skills

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Employment and skills platform	IMPLEMENTED ↗	The employment office launched a portal and mobile application built with external technical and financial support
National digital plan human-capital targets	PLANNED ↗	Plan details published setting numeric training targets under the human-capital pillar

Research institutions

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Domestic public funding for digital and AI research	NOT HELD	—

The universal service fund has moved from an instrument civil society described as unavailable to a first funded national tranche. The [first pilot connectivity sites were launched in Kongo Central](#) with a community digital-learning centre attached, and the fund then [signed subsidy conventions with Airtel, Orange, Vodacom and Africell covering a first tranche of 40 localities, targeting about 258,000 people](#), against a diagnostic finding nearly 3,000 uncovered localities holding about 4.3m people. A second phase of 300 sites is planned, with a 2030 target of 3,000 localities, 16m people and 100 digital community centres. No per-locality budget or fund appropriation figure is held.

Financial inclusion is stated once and without a trajectory: [about 58% against 25 to 30% bank-account penetration](#), the gap attributed to mobile-money use without a bank account. No earlier dated rate is held.

Training targets exist without enrolments. The national digital plan sets [250,000 young people to be trained in artificial intelligence, cybersecurity and programming, at least 3,000 in advanced digital skills and about 1,000 teachers, all to 2030](#); no source establishes a single enrolment against any of them, and no domestic public funding for digital or AI research exists in the base. The largest single training cohort held is [41 certificates awarded in November 2025](#).

Finance

New investments

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Eastcastle Debt II (IFC debt facility)	PLANNED ↗	Reported at pipeline/identification stage 2026-07-16
Tower operator investment convention	IMPLEMENTED ↗	An investment convention of more than US\$100m signed with the investment-promotion agency
Tower platform senior facility	IMPLEMENTED ↗	A development fund committed US\$32.8m into an upsized US\$179m senior secured facility

MoUs and other agreements

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Central bank card-network memorandum	IMPLEMENTED ↗	A memorandum signed in Kinshasa by the central bank governor and a card-network executive

Domestic budget appropriations and expenditure

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Digital economy section appropriation	IMPLEMENTED ↗	The 2026 finance law enacted, renaming the section and fixing its domestic credits
National identification system appropriation	IMPLEMENTED ↗	Appropriated inside the digital section's domestic investment group
Posts and telecommunications section appropriation	IMPLEMENTED ↗	The 2026 finance law enacted, stripping new technologies from the section title and fixing its domestic credits

The digital economy section's domestic appropriation is [FC 81,698,223,741 for FY2026, up 34.8% on FY2025 but 6.2% below FY2024](#); on the export's own conversion the line has fallen in dollars. No FY2026 execution has been published and no audited outturn is obtainable at section grain. The national identification system and posts-and-telecommunications sections were also fixed inside the same 2026 finance law, both renamed or stripped of their old technology framing at enactment.

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Functioning national incident-response capability	a founding instrument for a computer emergency response team, an incident report or advisory, or an international cybersecurity assessment for the country	not yet probed
National technical-capacity base	a named compute or high-performance computing facility, a national technical or testing institution with a dated status, or a skills-for-infrastructure programme with enrolment figures	not yet probed
Energy provision for digital infrastructure	a utility-operator power agreement, a dated telecom-site electrification programme with site counts, or a data-centre power-purchase arrangement	not yet probed
National data governance strategy	the strategy document or the decree adopting it	not yet probed
National open-data policy or portal	a decree creating an open-data portal, a statistics-institute microdata release policy, or the access-to-information bill once adopted	not yet probed
EU digital governance or regulatory cooperation	the EU financing agreement or gateway package document, or an EU delegation statement on digital regulation, data adequacy or governance support	not yet probed
Use of satellite or earth-observation data in public administration	a statistics-institute, planning-ministry, land-administration or agriculture-ministry statement naming an earth-observation data source or a satellite-imagery procurement	not yet probed
India-DR Congo digital or technology engagement	an India-DR Congo memorandum, line of credit, training placement or Indian supplier contract naming the country	not yet probed
FY2026 budget execution	the budget ministry's monthly or quarterly execution statements for the 2026 exercise	not yet probed
Audited outturn for the digital sections	the audit court's general report or the settlement law for FY2024, at section grain	not yet probed
Gender-disaggregated connectivity or usage	a mobile-industry gender-gap country cut, or a statistics-institute or central-bank survey with sex-disaggregated tables	not yet probed
National digital literacy rate or skills baseline	an international digital-skills indicator for the country, a household survey module, or the sectoral policy's baseline annexe	not yet probed
Domestic public funding for digital and AI research	a finance-law section or programme line for scientific research, or the AI strategy's costed roadmap	not yet probed

Nine instrument rows carry no reliable statement, and they cluster where the state would have to publish something about itself. The data governance strategy is the sharpest of them: the minister named it on 29 July 2026 as an instrument the state already holds, and no text or adoption date is on file.

Two sit in the finance layer and bear on every figure above: no FY2026 budget execution and no audited outturn at section grain. Two measures — a digital literacy rate and any gender-disaggregated connectivity figure — are absent from the base. Each row is in [gaps.csv](#) with what would settle it; none has yet been probed.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
