

STATUS REPORT

Congo: status report

Edition of 2026-08-13 · 81 systems and instruments tracked, 8 of them not held

Compiled 2026-08-12 from the Data Landscapers source base, from [outputs/reports/COG/ledger.csv](#) (81 systems and instruments, 8 of them **Not held**). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

The state's digital effort is concentrated in revenue collection, and there it is compulsory. Certified electronic invoicing has been [mandatory for every economic agent except the state, local authorities on public-service missions and diplomatic bodies since 1 July 2026](#), with no phase-in by firm size and no assisted route stated; an order of 22 May makes [all public revenue payable exclusively through one national platform, payment outside it void](#).

Against that, the institutions are thin. The data-protection commission was [installed on 22 January 2026 and has produced no decision, sanction, registration regime or guidance since](#); the country has had a [cybersecurity agency since 2019](#) and a [national strategy now out to tender](#), bids closing 2 September 2026.

The money is legible and the delivery is not: the sector vote is [FCFA 30,139,589,283 for 2026, up 30.5%](#), on 2025 execution of FCFA 3,158,525,582, and no audited figure exists for any year.

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Alternative submarine cable connection	PLANNED ↗	The regulator stated a connection to another cable could be operational within three weeks after weeks of outages
Digital transformation acceleration project	IN DEVELOPMENT ↗	A fifth steering-committee session adopted a balanced 2026 budget of FCFA 21,872,000,000

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National backbone transferred to the state operator	IMPLEMENTED ↗	A council of ministers decree contributing the first three phases in kind against a capital increase
Quality-of-service enforcement against the two mobile operators	IMPLEMENTED ↗	Formal notices served on both operators after drive tests in 20 interior localities, with a six-month deadline to the next campaign
Rural broadband site programme	IN DEVELOPMENT ↗	The ministry reported 20 of 76 built-and-equipped sites fully operational at a mid-term review
Universal access and service fund	IMPLEMENTED ↗	Appropriated at FCFA 1,000,000,000 for 2026 as a special treasury account

Data Storage

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National data centre	IMPLEMENTED, ASSERTED IN PASSING ONLY ↗	The minister cited the data centre's inauguration as accomplished at digital-regulation conferences
Regional data centre feasibility study	PLANNED ↗	A centre of excellence and a non-governmental body signed a protocol opening a feasibility study
Sovereign data-centre programme	PLANNED ↗	A ministerial adviser published a roadmap naming national data centres as one of nine structuring programmes

Energy

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Co-regulation accord on shared fibre and pylon infrastructure	PLANNED ↗	The regulator met operators on urban fibre and announced the imminent signature of an accord with the energy regulator

Technical Capacity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Regulator satellite regulatory capacity	IMPLEMENTED ↗	The regulator's network-services directorate completed specialist low-orbit training in France and met a satellite operator

Cybersecurity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Audit-provider qualification standard	IN DEVELOPMENT ↗	The agency validated the consolidated draft at a working session at its headquarters
National cybersecurity strategy	IN DEVELOPMENT, OUT TO TENDER ↗	The security agency launched an open international tender for a 24-month mission to draft the strategy, a national training plan and national conferences
National information systems security agency	IMPLEMENTED ↗	The 2026 finance law gives the agency a 10% share of a digital-hub charge and a 20% share of a transfers levy
National security operations centre and response team	PLANNED ↗	The roadmap names them as its sixth programme of nine
Security label in electronic-invoicing homologation	IMPLEMENTED ↗	A decree of 2026-03-31, published 2026-07-09, puts the security agency into joint homologation of every invoicing terminal, software and enterprise module
Agency annual report on the state of national cybersecurity	NOT HELD	—

Connectivity is externally financed and behind its own schedule. The transformation project adopted a [2026 budget of FCFA 21,872,000,000, inside a consolidated envelope of EUR 136.5m to a 2027 horizon](#) — the same annual figure two years running. Its rural build stands at [76 sites built and equipped, 20 fully operational and 56 in advanced stages](#), rated unsatisfactory at mid-term, with no updated count in ten months.

Coverage is where the position is worst. An industry report puts rural coverage at [33% for third-generation and 21% for fourth-generation service, with almost 80% of the rural population outside fourth-generation coverage and half outside any coverage](#), against about 86% national coverage. The same work puts [backhaul spectrum fees at about 5% of operators' total revenue against a sub-Saharan median of 0.5%](#), a premium falling hardest where fibre does not reach, with no regulatory response on file.

The backbone changed owner rather than performance. A decree [contributed the first three phases in kind at FCFA 143,878,429,945, raising the state operator's share capital to FCFA 157,297,453,418 and absorbing accumulated losses of just over FCFA 20bn, to prepare a listing](#). The regulator's enforcement file blames that backbone's outages for northern coverage failures, having [served formal notices on both mobile operators](#).

Hosting is asserted rather than evidenced. The national data centre was [reported at 95% complete with works suspended over an unpaid state tranche in October 2025](#), then [cited by the minister as inaugurated three months later](#); no opening date, capacity or operator is held.

Digital public infrastructure

Data Exchange

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
AfCFTA customs digitalisation concession	IMPLEMENTED ↗	A 20-year, US\$3.1bn concession signed at Abuja with Nigerian firm Bergmans Security Consultants and Supplies, via its subsidiary AfriTrade CMP, to digitalise customs procedures across 50 African countries
CEMAC interoperable QR-code standard	IMPLEMENTED ↗	The community standard launched at Douala under an April 2026 regulation
Inter-administration data exchange platform	PLANNED ↗	Named as one of three digital public infrastructure foundations in the published roadmap

Digital Identity and CRVS

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Secure digital identity framework and wallet	PLANNED ↗	Named among the roadmap's three digital public infrastructure foundations
Unique identification number biometric card	IMPLEMENTED ↗	Production of the biometric card relaunched

Digital Payments and Fintech

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
European remittance corridor	IMPLEMENTED ↗	An instant-transfer application launched on a remittances-as-a-service model

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Payment-aggregator licence	IMPLEMENTED ↗	A regulator licence secured for a unified interface across mobile operators, banks and microfinance institutions
Public-revenue payment platform	IMPLEMENTED, ROLL-OUT PARTIAL ↗	The platform went live for online payment of taxes, levies and customs duties after the pilot cohort completed
Treasury single account at the regional central bank	IN DEVELOPMENT ↗	The finance ministry stated the account was still being finalised on the day the payment platform went live

Registries (population, land, address, etc.)

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Integrated civil-status system	IN DEVELOPMENT, SOFTWARE VALIDATED AND DEPLOYMENT UNFUNDED ↗	A three-day final validation workshop closed with seventeen recommendations validated
National postal addressing	IN DEVELOPMENT, ADOPTED BY DECREE AND NOT DEPLOYED ↗	The minister recorded that the regulator has run the addressing project for two years and the ministry has not taken it up for deployment at the postal operator

Sectoral management information systems (HMIS, EMIS, etc.)

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Civil-service payroll platform	IMPLEMENTED, THREE FAILURE MODES MINUTED BY ITS OPERATOR ↗	A finance-ministry working session logged data security, recurrent unavailability and a malfunctioning payslip code
Forest-revenue information system taxation module	IMPLEMENTED ↗	The module launched, the first of the system's three functions to deploy
Public-transport insurance data platform	IMPLEMENTED, ADOPTION VOLUNTARY ↗	The platform launched in Brazzaville under the financial-institutions directorate

Other GovTech and e-Gov

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Certified electronic invoicing system	IMPLEMENTED, COMPULSORY ↗	Compulsory connection took effect for all economic agents three months after the enabling decree
Digital roadmap priority services	IN DEVELOPMENT ↗	The roadmap set out publicly in a signed opinion piece by the minister's adviser
Public-administration digitalisation task force	IMPLEMENTED, NO SESSION ON RECORD ↗	Gazetted 2026-08-06 as decree 2026-261 of 29 July 2026
Tax filing portal	IMPLEMENTED ↗	A user guide published fixing filing regimes, delegation and irreversible submission

Digitalisation of sub-national government

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Local-authority revenue dematerialisation platform	IN DEVELOPMENT, BUILD VALIDATED BUT NOT DEPLOYED ↗	A final validation workshop closed, stated to unlock operational deployment

National statistics

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Quarterly labour-market and informal-sector survey	IN DEVELOPMENT ↗	A regional labour statistician received by the employment minister as the survey entered its preparatory phase

Use of satellite data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Low-orbit satellite broadband regulation	IN DEVELOPMENT ↗	A regulator delegation completed low-orbit regulatory training in France and met a satellite operator

The public-revenue platform went live on 3 August 2026 on the national payments switch, reconciled in real time and routed to the treasury, with all taxpayers targeted by end-2026. The treasury single account intended to centralise those receipts was still being finalised on the day the platform launched. Certified invoicing runs alongside it under four orders fixing a four-stage homologation, ten-year invoice retention and real-time tax-directorate data access.

Identity is the least documented layer. The unique identification number is the authentication key for the public-revenue platform and mandatory for eight economic and five administrative formalities; production of its biometric card was relaunched in October 2025 after a halt whose date and cause are not on file, and no national coverage figure exists. A secure digital identity framework and wallet has been named twice in twelve months with no legal instrument or pilot.

The integrated civil-status system has three modules validated and no funding decision on file; postal addressing is adopted by decree and still held at the regulator, untransferred to the postal operator; and a local-authority revenue platform is validated with no deployment recorded.

The ministry that runs the civil-service payroll platform has minuted data security problems, recurrent unavailability and a malfunctioning payslip code, with no remediation date. An inter-administration data exchange platform is a named roadmap foundation with no design or timetable.

AfCFTA's secretariat contracted a Nigerian firm to digitalise customs procedures across 50 African countries under a 20-year, US\$3.1bn concession signed 5 August 2026 at Abuja; the country-by-country rollout is not yet published.

A decree gazetted on 6 August 2026 creates a public-administration digitalisation task force under the Prime Minister, with four organs and interoperability of public information systems as a standing objective; its strategic committee's first listed task is to audit the level of digitisation across the administration. No session is on record.

Governance and regulation

Legislation and regulation

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Certified electronic invoicing decree	IMPLEMENTED ↗	Signed 2026-03-31, gazetted 2026-07-09 and compulsory for every economic agent from 2026-07-01
Electronic-invoicing implementing orders	IMPLEMENTED ↗	Four orders signed 2026-07-09 and gazetted 2026-07-16
Public-revenue payment order	IMPLEMENTED ↗	Signed 2026-05-22 and gazetted 2026-06-11, with a 60-day conformity window
Tax on newly imported SIM-capable terminals	IMPLEMENTED ↗	Instituted by the 2026 finance law and in force from 2026-06-01
Electronic-communications framework law of 2009	NOT HELD	—

Strategies, plans and policies

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National artificial intelligence strategy	IN DEVELOPMENT ↗	Drafting launched with external support and a technical committee seated 2026-05-06
National data governance strategy	IN DEVELOPMENT ↗	Consultations and capacity-building held at Brazzaville from 2 to 9 June 2026 under a continental data-governance initiative
National digital strategy 2030	IN DEVELOPMENT ↗	Completed with external support and under general-secretariat review awaiting adoption by presidential decree

Regional collaboration

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Bilateral ICT cooperation memorandum with Namibia	PLANNED ↗	Approved by the counterparty's cabinet and its minister authorised to sign; not signed

Data protection

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Loi n. 29-2019 on personal data protection	IMPLEMENTED ↗	Promulgated 2019-10-10
National personal data protection commission	IMPLEMENTED ↗	Members appointed by decree of 2025-12-31 and the inaugural session held 2026-01-22

Public debate and participation in policymaking

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Public debate on data governance and digital rights	NOT HELD	—

Open data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National open-data portal or dataset-release policy	NOT HELD	—

Fiscal instruments are the only ones being made: a [tax on newly imported SIM-capable terminals has been in force since 1 June 2026](#), earmarked for connectivity and infrastructure, with no rate or yield published.

Data protection is constituted and inactive. [Loi n° 29-2019 is in force, its institutional framework completed by a decree of 31 December 2025](#), and the commission's members were appointed and officers elected with powers to advise, warn and sanction. Nothing states whether controllers must register or notify, what fees or deadlines apply, or whether any enforcement has occurred.

The policy layer is a stack of unadopted documents: a [2030 digital strategy finalised and awaiting a presidential decree](#); a [data governance strategy at landscape-assessment stage](#); an [AI strategy whose technical committee has eleven deliverables and a budget of FCFA 150m to 200m still to be secured](#); and a [ministry roadmap of five ambitions and nine programmes reaching the record through a signed opinion piece rather than an adopted instrument](#).

Enforcement stops short of outcomes: the regulator gave the operators [two further months to complete subscriber identification after finding cards sold pre-activated in twelve named towns](#), and the deadline expired around end-2025 with no compliance result or sanction on file.

Artificial intelligence and the technology sector

AI

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
African artificial intelligence research centre	IMPLEMENTED ↗	The centre joined an international alliance, with foreign financing for its third and fourth phases under negotiation
Digital and AI regulation conferences	IMPLEMENTED ↗	Five days of conferences at Brazzaville closing with agreed priorities
Research-centre training platform	PILOTING ↗	The platform presented to the minister ahead of official launch

ICT Industry

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Regional digital transit-hub bid	IN DEVELOPMENT ↗	A state-operator delegation held meetings in the neighbouring capital on interconnection, wholesale capacity trading and international roaming
State operator quality certification	IMPLEMENTED ↗	An international standard issued to the state operator, the first telecommunications operator in the country to hold it

Innovation ecosystem

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Obstetric digital reference project	PILOTING ↗	Launched under the health minister's patronage from one integrated health centre
Ride-hailing and delivery platform entry	IMPLEMENTED ↗	Operations began in Brazzaville, funded from a US\$30m round of equity and debt
Startup labelling regime	IMPLEMENTED ↗	A council of ministers adopted decrees fixing the label's withdrawal procedure and the labelling commission's powers and composition

US / hyperscaler activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
United States technology presence	NOT HELD	—

China activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Joint artificial-intelligence laboratory	PLANNED ↗	Announced at an international industrial forum as a component of the research centre
Private telecom network at an oil field	IN DEVELOPMENT ↗	A five-year contract announced for an operator to design and deploy a private network at a Kouilou field
Satellite navigation on the ocean railway	PLANNED ↗	A Chinese delegation received at the launch of railway rehabilitation works, with integration of satellite navigation and communications discussed

India activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Indian technology presence	NOT HELD	—

Gulf/UAE activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Gulf-state technology presence	NOT HELD	—

Artificial intelligence is a research centre and a committee. The [African AI research centre](#), created by law in May 2024 and built with a Chinese counterpart, has joined an international alliance, with Russian financing for its third and fourth phases under validation through a debt conversion; no research output, staff count or budget is held. Its training platform holds about 3,000 free online courses against a 10,000-youth target and has published no enrolment figure in fourteen months.

The technology sector is small and its evidence is corporate. The [state operator holds an international quality standard](#), the [first Congolese operator to do so](#), and states an ambition to lead regional digital transit on which [no interconnection agreement or capacity contract is on file](#). The [startup labelling regime](#) adopted in July 2025 has [no commission sitting or label awarded](#) recorded since.

External technology relationships run to China and Russia and stop at announcement: a [joint AI laboratory with no source recording it built, staffed or operating](#); [satellite navigation on the ocean railway at discussion stage](#); a [five-year contract for a private telecom network at an oil field](#) with no record of the network in service. Nothing is held on United States, Indian or Gulf-state presence.

Inclusion and capacity

Access to services

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Universal fund site and multimedia-centre programme	IMPLEMENTED ↗	Two towns connected to the national telecommunications grid and inaugurated

Literacy

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National digital-literacy programme	NOT HELD	—

Training and skills

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Development-programme cybersecurity course	PILOTING ↗	A cybersecurity expert presented to the minister in Brazzaville
National cybersecurity training plan	IN DEVELOPMENT, OUT TO TENDER ↗	An open international tender issued with bids closing 2026-09-02
Project digital-skills target	IN DEVELOPMENT ↗	The target restated in the 2026 work programme

Research institutions

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National AI strategy technical committee	IN DEVELOPMENT ↗	An inaugural meeting of the technical committee with a six-month mandate

Universal service is funded at a fixed figure and reports in inaugurations. The fund carries [FCFA 1,000,000,000 for 2026, spent entirely as transfers](#), flat for three consecutive fiscal years, against a three-year record of 200 sites connected and 2025 targets whose achievement is not established. What is reported is [two further towns connected in January 2026](#).

Skills are targets without outturns. The transformation project has carried the same [1,200-young-people training target for two years with no trained figure published](#); a [national cybersecurity training plan is being procured with the strategy under a 24-month donor-financed mission](#). No national digital-literacy programme, target or measured rate is held anywhere in the base.

Finance

New investments

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Digital acceleration project	IMPLEMENTED ↗	A 2026 work programme adopted after an October 2025 mid-term review
European phase of the transformation project	IMPLEMENTED ↗	The first named procurement launched under the European bank limb
Mobility platform series B round	IMPLEMENTED ↗	A country launch following the raise
National data centre financing	IN DEVELOPMENT, WORKS SUSPENDED ↗	The contractor suspended works for an unreleased state counterpart tranche
Research-centre phases three and four financing	IN DEVELOPMENT ↗	All documentation submitted, awaiting final technical and administrative validation before disbursement

MoUs and other agreements

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Energy and digital nexus protocol	IMPLEMENTED ↗	An accord signed at Pointe-Noire

Domestic budget appropriations and expenditure

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Posts, telecommunications and digital economy programme vote	IMPLEMENTED ↗	Appropriated in the 2026 finance law
Public-finance information systems special account	IMPLEMENTED ↗	Appropriated unchanged in the 2026 finance law
Rectifying finance law 2026	IMPLEMENTED, ADOPTED BUT NOT GAZETTED ↗	Adopted unanimously and unamended by both chambers
Treasury banking-function special account	IMPLEMENTED ↗	Appropriated in the 2026 finance law

The domestic vote rose and the spending did not follow. The sector programme is [FCFA 30,139,589,283 for 2026 against FCFA 23,348,037,007 revised for 2025](#), while 2025 execution was FCFA 3,158,525,582 – 13.5% of the revised figure, on a numerator excluding personnel. The [treasury banking-function account more than doubled to FCFA 5,968,000,000](#) while the [dedicated public-finance information-systems account stayed flat at FCFA 3,500,000,000](#). No audited outturn exists for any digital line: the settlement-law series ends at exercise 2020.

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Agency annual report on the state of national cybersecurity	any single published annual report, or a board deliberation showing the statutory obligation waived	not yet probed
National cybersecurity and ICT workforce stock	the national training plan now out to tender, an agency or regulator annual report, or an international index country profile with workforce data	not yet probed
Energy cost and reliability for digital infrastructure	the industry report's underlying cost tables, a regulator cost-of-service study, or the gas-plant data-centre feasibility study output	not yet probed

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Registration, notification and enforcement regime	the 2019 data-protection law itself, the December 2025 appointing decree, or any commission deliberation, guidance note or fee schedule	not yet probed
Electronic-communications framework law of 2009	the 2009 law's number and gazette text, and any bill or ordinance revising it	not yet probed
National open-data portal or dataset-release policy	an open-data portal or its founding instrument, the statistics institute's dissemination policy, or a transparency-code provision obliging machine-readable publication	not yet probed
Public debate on data governance and digital rights	any held Congolese civil-society, academic, parliamentary or press argument about data governance or digital rights as such	not yet probed
United States technology presence	a US company, agency or fund instrument naming Congo-Brazzaville	not yet probed
Indian technology presence	an Indian line of credit, export-bank facility, information-technology services contract or capacity programme naming Congo-Brazzaville	not yet probed
Gulf-state technology presence	a Gulf sovereign-fund or telecom investment, data-centre commitment or memorandum naming Congo-Brazzaville	not yet probed
Audited outturn for any digital line	a settlement law later than exercise 2020, with its annexed tables reproduced	not yet probed
National digital-literacy programme	a national digital-literacy programme document, a fund or project training outturn broken out by literacy rather than skills, or a published digital-literacy rate	not yet probed

The [security agency's statutes oblige its director-general to publish an annual report on the state of national cybersecurity before 30 June of the following year](#); none is on file for any year. The electronic-communications framework law of 2009, diagnosed by an industry report as a brake on the sector, reaches the base with no number, title or text. No open-data portal or dataset-release policy exists.

United States, Indian and Gulf-state technology presence return nothing, nor does any Congolese public argument about data governance or digital rights, nor a national digital-literacy programme.

Four measures matter for reading this report: no registration, notification or enforcement regime under the data-protection law; no cybersecurity or ICT workforce stock; no energy cost or reliability figure for digital infrastructure; and no audited outturn for any digital line. Each row is in [gaps.csv](#) with what would settle it; none has yet been probed.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
