

STATUS REPORT

Gabon: status report

Edition of 2026-08-13 • 102 systems and instruments tracked, 27 of them not held

Compiled 2026-08-12 from the Data Landscapers source base, from [outputs/reports/GAB/ledger.csv](#) (102 systems and instruments, 27 of them **Not held**). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

Gabon's first data centre certified to the third tier entered service at Nkok on 3 July 2026, with 92 racks over 3,000 square metres and 1 MW installed for XAF 8bn ([figures given at the inauguration](#)). A second facility of 160 racks, built by a state company and financed by the local banking sector, is due between end-November and early December 2026 ([ministerial site inspection](#)). Both are hosting capacity; neither publishes utilisation.

The electronic identity card has run since June 2024 and stands at 335,384 enrolments, 164,944 cards produced and 78,500 files classed as disputed ([the interior minister to the National Assembly, 2 June 2026](#)). The data-protection statute of 2023 prohibits biometric processing outright, and the derogation that would permit it is cross-referenced in the gazetted text to the article on children's data ([Loi n 025/2023](#)). No authorisation of the card's processing by the data-protection authority is on file.

Social media has been suspended since February 2026 under a decision of the broadcasting authority whose text the base does not hold and whose start date is inferred from a five-month count ([declaration of nine civil-society organisations, 11 July 2026](#)).

The World Bank operation intended to build the digital state had disbursed about US\$13.4m of US\$68.5m when the project record was read on 24 June 2026 ([project record](#)), past an original closing date of 30 June 2026 for which no closure record exists.

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Airtel Gabon technology-neutral fixed-network authorisation	IMPLEMENTED ↗	Cahier des charges signed with ARCEP, the first technology-neutral fixed authorisation in Gabon
ARCEP prohibition on Starlink sale, installation and use	IMPLEMENTED ↗	ARCEP communique, with nationwide enforcement controls announced
Central African Backbone additional financing	DISCONTINUED ↗	Closed, against US\$23m committed on 2016-06-29
GABIX (Gabon Internet Exchange Point)	IMPLEMENTED, RELAUNCH UNDER WAY ↗	National GABIX Reboot workshop opened, running to 2026-08-08
Gabon-Equatorial Guinea digital accords	IMPLEMENTED ↗	Three accords signed at Mongomo by the two digital-economy ministers
Moov Africa Gabon Telecom fibre-to-the-home programme	IMPLEMENTED ↗	Nine new localities announced for 2025, on top of eight opened in 2024

Data Storage

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
ACE Gabon Carrier Hotel Tier III data centre	IN DEVELOPMENT ↗	Ministerial site inspection, commissioning stated for end-November to early-December 2026
ANINF-Cybastion national data centre convention	PLANNED ↗	Convention signed before the President
ANINF-ST Digital framework memorandum	IMPLEMENTED ↗	Signed at ANINF headquarters, Libreville
Nkok national data centre (ST Digital Tier III)	IMPLEMENTED ↗	Inaugurated at the Nkok special economic zone

Energy

Cybersecurity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
ANINF-CNAMGS information-systems audit memorandum	IMPLEMENTED ↗	Memorandum of understanding signed
ANINF-MITRE national cybersecurity architecture	IN DEVELOPMENT ↗	Critical-asset mapping phase under way, after an earlier phase defined twelve priority sectors

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Interpol Operation Serengeti 2.0	DISCONTINUED ↗	Operation concluded after running June to August 2025 across eighteen African countries
National cybersecurity strategy	PLANNED ↗	Named as an objective of the second national Cybersecurity Forum
SecBOM security bill of material	IMPLEMENTED ↗	Launched by ANINF under the Presidency, a five-step method with quarterly revisions
SEEG cyberattack and systems recovery	IMPLEMENTED, RESTORATION CONTINUING AT REMAINING CENTRES ↗	Utility's 4 August progress briefing, network described as healthy and secured, with billing and payment restored in Libreville and seven interior centres
United States cybersecurity grant to ANINF	IMPLEMENTED ↗	US\$1,249,997 committed and US\$49,313 disbursed, against a planned end of 2025-12-22
National computer emergency response team and security operations centre	NOT HELD	—

Hosting is the part of the estate that moved. The Nkok facility is peered to the ACE and SAT-3/WACS submarine systems and draws about 22 per cent of its site energy from a photovoltaic plant, with water-free cooling and a dual 15 kV feed ([technical account](#)); the share is operator-stated rather than metered, and power usage effectiveness is not published. The operator states that about 95 per cent of data produced in Gabon was hosted abroad in 2026 — a claim by the party that built the alternative, which no independent measurement in the base tests.

Local interconnection has restarted. The national internet exchange point carried two members and about 80 Mbps of local traffic, unchanged since 2019, until the two large mobile operators reconnected on 13 May 2026 and traffic passed 250 Mbps ([relaunch account](#)); a national workshop with the Internet Society and AFRINIC ran from 3 to 8 August 2026 ([opening](#)). The member count after the relaunch has not been published.

Backbone reach is stated at 2,000 km of fibre, with 88 per cent forest cover named as the limit on extending it ([satellite seminar](#)) — a ministerial figure given at a seminar rather than a regulator or operator return. Satellite service is prohibited: the regulator declared in October 2025 that the low-earth-orbit operator holds no authorisation and that sale, installation and use are illegal ([communiqué](#)), and no seizure, fine or prosecution has followed on the record.

Cybersecurity is institutionally thin. The asset-inventory method launched in June 2025 is designed to feed a national security operations centre and incident response team ([the method](#)) that no source establishes exists, and architecture work with an external partner has defined twelve priority sectors without a completion date, cost or instrument ([account](#)). No national cybersecurity strategy is published. A sabotage attack on the state water and power utility SEEG collapsed about 95 per cent of its information systems on the night of 14-15 June 2026, taking down the prepaid-meter top-up platform; by its 4 August progress briefing the utility described its network as healthy and secured, with billing and payment restored in Libreville and seven interior centres and restoration continuing elsewhere ([SEEG's progress briefing](#)). The account is the utility's own; no forensic, criminal or damage-cost finding is on record and the attackers are described only as unidentified.

Digital public infrastructure

Data Exchange

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
CEMAC interoperable QR-code standard	IMPLEMENTED ↗	Launched at Douala under Reglement N 02/26/CEMAC/UMAC/CORENOFI of 8 April 2026
Central bank accession to the Pan-African Payment and Settlement System	IN DEVELOPMENT ↗	Accession announced, with member-state banks to be connected by end-2026
Government interoperability platform	IN DEVELOPMENT ↗	The World Bank indicator for five government entities securely exchanging data stands at a zero baseline

Digital Identity and CRVS

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Carte Nationale d'Identite Electronique	IMPLEMENTED ↗	First public coverage figures given to the National Assembly
Electoral-roll verification platform	IMPLEMENTED ↗	Published by ANINF for the 2025 electoral cycle

Tourist electronic visa platform	IMPLEMENTED ↗	Developed in 2025, with a trade familiarisation session held on 2026-07-31

Digitalisation of sub-national government

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
ANINF provincial office network	IMPLEMENTED ↗	First provincial office inaugurated at Franceville
Libreville municipal revenue-digitalisation system	IMPLEMENTED ↗	The mayor stated the city already operates its own system, developed with the Treasury

National statistics

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Second census of economically weak Gabonese	PLANNED ↗	Interministerial committee fixed the terms, with fieldwork from September 2026
National statistical office output	NOT HELD	—
Recensement general de la population et de l'habitat	NOT HELD	—

The electronic identity card stands at 335,384 enrolments, with 92,614 files in processing and 78,500 disputed at 2 June 2026 ([the minister's answer](#)), and the figures rest on press accounts of a spoken reply rather than a published return. The digital identity system and the biometric register of natural persons have been in implementation workshops since June 2025 with nothing operating ([the three projects](#)). Who supplies the card was settled by reconcile on 2026-08-09: IN Groupe's own annual review lists [an identity card and passport in Gabon](#) among its delivered solutions, and the DGDl is the issuing authority that enrolls and personalises in-house at Oloumi, as it does for the passport — two layers, not two suppliers. The Thales attribution carried by December 2023 reporting was a plan and is confirmed neither by Thales nor by any award; the Semlex contract was broken in 2015. **No Gabonese procurement notice, award publication or gazette entry for any of this exists on the public record as searched on 2026-08-09**, and none is held: the supplier is established by the supplier's own publication, not by the state's.

The domestic payment scheme launched in December 2025 with more than 1,000 codes deployed ([launch](#) [communiqué](#)) and became the pilot for the regional standard now in force. The regional switch carried 20.3m transactions worth FCFA 863bn across 153 participants in 2025 ([2025 figures](#)). Of 1,101,434 card transactions in June 2026, 62.41 per cent were cash withdrawals against 24.61 per cent terminal payments ([bank association figures](#)).

Inside government, the public finance system entered service in January 2026 connected to the Treasury ([launch](#)). An internal platform for secure messaging, meeting management and confidential document exchange between civil servants was presented to the Vice-President on 3 August 2026, built with a Gabonese start-up, with the state holding the source code at no cost and no contract, cost or timetable stated ([presentation](#)). The layer between systems is absent: the indicator for government entities securely exchanging data stands at zero ([report](#)).

Governance and regulation

Legislation and regulation

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Five implementing texts on the digitalisation of teaching	IN DEVELOPMENT, TECHNICALLY VALIDATED NOT ADOPTED ↗	Validated by consensus at the closing of the Libreville national workshop and forwarded to the competent authorities
Legal framework for the national digital identity system	IN DEVELOPMENT ↗	Named as the two texts on which the framework rests
Loi n 027/2023 on cybersecurity and cybercrime	IMPLEMENTED, TEXT NOT HELD ↗	Published in the Journal officiel n 218 bis of 15 July 2023, the same issue as the data-protection statute
Ordonnance n 0006/PR/2025 on digitalisation and electronic government	IMPLEMENTED, GAZETTED TEXT NOT HELD ↗	Signed by the President and published in the Journal officiel of 7 September 2025
Ordonnance of 8 April 2026 on the regulation of digital platforms	IMPLEMENTED, TEXT NOT HELD ↗	Recorded as in force by a civil-society advocacy report presented on 2026-07-25
Social-media regulation bill	IN DEVELOPMENT, REPORTED AWAITING PROMULGATION ↗	A civil-society declaration states that a bill exists and awaits promulgation

Strategies, plans and policies

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National satellite and space strategy	IN DEVELOPMENT ↗	Eleven recommendations adopted at the closing of the Libreville seminar
National digital strategy document	NOT HELD	—

Regional collaboration

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Candidacy for International Telecommunication Union governance bodies	IN DEVELOPMENT ↗	Reviewed at the ministry's final technical committee of the administrative year
Position under the African Union Convention on Cyber Security and Personal Data Protection	NOT HELD	—

Standards

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Standardised custody registers	IN DEVELOPMENT ↗	National roundtable at Libreville on 18 and 19 February 2025, at which a standardised model was presented

Data protection

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Autorite de protection des donnees a caractere personnel	IMPLEMENTED ↗	Announced pre-commissioning compliance clearance for the national data centre after several months of accompaniment
Biometric prohibition and its derogation route	IMPLEMENTED, WITH A DEFECT IN THE OPERATIVE TEXT ↗	Article 75 sets an outright prohibition and article 76 mis-cross-references its derogation to the article on children's data
Data-protection funding levy	IMPLEMENTED ↗	Created by article 40 bis of ordonnance n 00002/PR/2020 at 1,000 FCFA per person per year, split 40 per cent to the state and 60 per cent to the authority
Loi n 025/2023 on the protection of personal data	IMPLEMENTED ↗	Published in the Journal officiel n 218 bis of 15 July 2023, with article 219 setting no grace period
Authority's authorisation for biometric identity-card processing	NOT HELD	—

Public debate and participation in policymaking

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Haute Autorite de la Communication decision n 0002/HAC/2026 suspending social media	IMPLEMENTED ↗	In force until further notice, with no lifting date given as at 2026-07-17

EU activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
European Union digital cooperation instrument	NOT HELD	—

Open data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Open government data portal or policy	NOT HELD	—

The data-protection framework is in force and unenforced against the state. Loi n 025/2023 was published on 15 July 2023 and binds from publication, article 219 giving no compliance grace period ([the gazetted law](#)). Article 75 prohibits biometric processing outright, and article 76, which sets the derogation route, cross-references the article on children's data — a defect in the operative text rather than a reading of it. The authority created by article 7 has two dated acts on record: supervised destruction of unsuccessful bidders' files in January 2026 ([account](#)) and pre-commissioning compliance for the national data centre in June 2026 ([account](#)). It publishes no register of authorisations, declarations or sanctions.

Electronic government has a legal basis and no published text. An ordinance published on 7 September 2025 mandates digitisation, compulsory interconnection between administrations and a national-preference clause in digital public procurement ([account](#)); the base holds two secondary accounts and no article text or gazette reference. A second ordinance, of 8 April 2026, regulates digital platforms and is known only through a civil-society advocacy report that recommends revising it ([the report](#)).

The suspension of social media has run about five months. The Presidency describes it as temporary and conservatory; nine organisations describe it as unconstitutional and beyond the authority's remit and demand abrogation ([their declaration](#)). Both accounts are on the record, and the base holds neither the decision nor its date.

Two instruments are moving. Five implementing texts on the digitalisation of teaching were validated by consensus and forwarded to the competent authorities, not adopted ([workshop close](#)); eleven recommendations on satellite and space communications were adopted, with an integrated national strategy recommended rather than drafted ([seminar close](#)).

Artificial intelligence and the technology sector

India activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Indian digital or technology cooperation instrument	NOT HELD	—

Gulf/UAE activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Gulf-state digital or technology cooperation instrument	NOT HELD	—

The national open-innovation programme launched on 14 July 2026 addresses a population its organisers put at 150 to 200 start-ups, and offers finance, technology, labelling and market access ([launch](#)). Two accords were signed the same day: one with a state guarantee company on credit guarantees, one with an equipment supplier on smart rooms and training in networks, cybersecurity, artificial intelligence and software development ([account of both](#)). Neither carries a ceiling, coverage ratio, eligibility test, trainee target, cost or duration. The final set for 4 August 2026 was postponed on 6 August 2026, the ministry citing start-up concerns about the organisation of the first edition and giving no revised date ([ministry statement](#)). The labelling criteria are unheld, which leaves unstated how the ministry chooses the firms it labels.

The only instrument in the base whose stated subject is artificial intelligence is a protocol with Morocco on exchanging expertise and on capacity-building for digital skills, signed at an exhibition in April 2026 with no budget, term or named programme ([account](#)). Gabon has no published national artificial-intelligence strategy, no named deployed system and no compute figure for either data centre. The digital economy minister has argued in his own commentary that the greater risk is joining the technology too early rather than missing it, and named a forthcoming start-up and digital enterprise act as the sequencing instrument — an instrument no Gabonese primary source in the base names.

Inclusion and capacity

Digital divides

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Gender digital divide	NOT HELD	—
Rural and urban internet access split	NOT HELD	—
Universal service fund	NOT HELD	—

Access to services

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Basic computing and internet certificate for education	PLANNED ↗	Draft decree on its issuance validated at the national workshop
Named national digital-literacy programme	NOT HELD	—

Training and skills

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Cybastion training commitment	IMPLEMENTED ↗	Cisco Networking Academy CCST training under way at Libreville's American Corner, reported 2026-08-11
Connected schools programme	NOT HELD	—
Public digital-training institutions under the ministry	NOT HELD	—

Research institutions

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Gabon Statistical Development Project	DISCONTINUED ↗	Closed, against US\$50m committed in 2017
Named national research funding for digital technology or artificial intelligence	NOT HELD	—

Social protection has a register at first-deliverable stage. Technical work on the unified social register closed in August 2025, and the first deliverable was presented on 29 July 2026 alongside a commitment to full digitalisation of non-contributory social protection under the 2026-2030 development plan ([presentation](#)). No beneficiary count, coverage figure or platform is published, and the state's own source uses three different names for it. A second census of economically weak Gabonese runs fieldwork from September 2026 for the stated reason that the existing social file is not reliable enough to target protection ([terms fixed 21 July 2026](#)) — a government self-diagnosis, and the sharpest statement on registry quality the base holds.

One thousand young people were to be trained free of charge under a data-centre convention of June 2025; thirteen months on, no cohort, curriculum or start date is on record.

Finance

New investments

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Digital Gabon Project	IMPLEMENTED ↗	US\$13,419,063 disbursed of US\$68.5m on the project portal, retrieved 2026-06-24
eGabon project	IMPLEMENTED, IN CLOSURE ↗	World Bank mission reviewed the closure phase
Guarantee for Airtel Mobile Money Gabon	DISCONTINUED ↗	Guarantee period ended and the record closed

MoUs and other agreements

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Huawei smart-cities memorandum	PLANNED ↗	Commitment recorded for 2024, with the deal at pipeline status and no disbursement
Partnership with the United Nations Capital Development Fund	IMPLEMENTED, NO WORK PROGRAMME OR AMOUNT PUBLISHED ↗	Partnership announced

Visa partnership	IMPLEMENTED, NO TERMS PUBLISHED ↗	Delegation received by the vice-president at Libreville

Domestic budget appropriations and expenditure

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Ministry of Digital Economy annual appropriation	PLANNED, PRESENTED AND NOT ENACTED ON THE RECORD ↗	Presented to the National Transition Assembly
Enacted digital appropriation for 2026	NOT HELD	—

Financing is announced and rarely drawn. The digital economy ministry's appropriation was presented at XAF 82bn for 2026 against XAF 32bn for 2025, an increase of 156.2 per cent ([presentation to the National Transition Assembly](#)); the base holds no enacted finance law. The World Bank operation had disbursed 1.92 per cent, US\$1.3m of US\$68.5m, at the last published implementation report ([report](#)), and the ministry put the rate at 7 per cent of FCFA 44bn in February 2026, up from 3 per cent, saying a great deal of money had not been used for digitalisation ([steering committee](#)). A financial-inclusion partnership signed in December 2025 carries no amount, duration or deliverable ([account](#)).

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
National computer emergency response team and security operations centre	The ANINF or ministerial act creating a national incident response team, or an ANINF activity report stating whether the centre and team that SecBOM is designed to feed are in operation	not yet probed
Grid supply position for data-centre load	A national utility or energy ministry supply statement, or the two facilities' grid-connection agreements, establishing available and firm capacity against the more than 2 MW of Tier III load committed by end-2026	not yet probed
Information and communications technology workforce measure	An ANINF or ministry workforce return, or enrolment data from the training institutions named at the technical committee of 2026-07-31, giving a countable figure for Gabonese technical capacity	not yet probed
Recensement general de la population et de l'habitat	The census report or a statistics office release giving the enumeration date, published population and dissemination status; the base knows the census exists only because the 2026 social census plans to reuse its data	not yet probed
National statistical office output	Any dated release, statistical yearbook or dataset from the national statistics office; the section currently rests entirely on central-bank and bank-association figures	not yet probed
National platform for the payment and collection of public revenue	The decree, operator contract or launch communique naming the platform announced at the ministerial session of 2026-01-13, which has produced nothing since	not yet probed
Electronic invoicing mandate	The tax instruction or finance-law article setting the mandate date, taxpayer thresholds and platform, announced at the same session of 2026-01-13	not yet probed
Authority's authorisation for biometric identity-card processing	A published deliberation or authorisation of the data-protection authority under article 76, or a register of authorisations listing it; the identity-card programme has run three years and article 219 gave no grace period	not yet probed
Position under the African Union Convention on Cyber Security and Personal Data Protection	The African Union list of signatures, ratifications and accessions, or a Gabonese ratification law and its instrument of deposit	not yet probed
Open government data portal or policy	A national open-data portal, a published open-data policy or directive, or a dataset catalogue; the base holds no Gabonese source on this subject at all	not yet probed
European Union digital cooperation instrument	A Global Gateway country package, a bilateral digital cooperation agreement or a Team Europe initiative document; the base carries no Gabonese source on this subject at all	not yet probed
National digital strategy document	The named strategy text or the digital chapter of the national development and growth plan for 2026-2030, with its adoption date and horizon; the base holds programme labels and budget lines but no strategy document	not yet probed
National artificial-intelligence strategy or policy	A published national strategy, policy, ethics framework or roadmap, or a ministerial statement that none is planned; the only artefact the wiki holds from Gabon on the subject is the minister's own commentary arguing against an early strategy	not yet probed
Deployed artificial-intelligence system or use-case register	Any named operational system in Gabonese government or industry, or a ministry inventory of them; the base names artificial intelligence only as a category in curricula, a data-centre room and workshop agendas	not yet probed
Artificial-intelligence compute capacity	A processor count, accelerated-compute figure or dedicated power allocation for either Tier III facility; both are described as capable of it and neither has a compute figure on file	not yet probed
Start-up labelling criteria and register	The labelling criteria document and the list of firms labelled under Kimba Connect; the label makes the ministry the arbiter of which firms count as credible counterparties, and nothing on its criteria, committee or a single labelled firm is held	not yet probed
Digital sector economic weight	A national accounts series, ministry statistical annex or regulator market report giving the sector's share of gross domestic product, firm count or employment; the base holds penetration figures and an organisers' estimate of start-up numbers, and nothing measured	not yet probed
Indian digital or technology cooperation instrument	Any memorandum, line of credit, training-programme participation or Indian supplier contract naming Gabon; the base returns no source at this intersection	not yet probed
Gulf-state digital or technology cooperation instrument	Any investment, data-centre agreement or sovereign-fund commitment naming Gabon; the base returns no source at this intersection	not yet probed

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Universal service fund	The regulator or ministerial instrument creating the fund, its levy base, its disbursements and its coverage targets; the record holds only a statement that universal-service initiatives run with the regulator	not yet probed
Named national digital-literacy programme	The national strategy for the digitalisation of teaching, or a ministerial programme document with a cohort target; digital literacy is named as a budget axis with no programme behind it	not yet probed
Public digital-training institutions under the ministry	The ministry's organisation decree listing the institutions under its supervision, or an annual report from any one of them	not yet probed
Connected schools programme	The Huawei memorandum of 2025-12-23, or a supplier or ministry statement giving the school count, the equipment supplied and the expansion terms; the programme is named only as one to be expanded	not yet probed
Gender digital divide	A published gender-gap figure for Gabon, or the Digital Gabon results framework reporting an actual against its target of 50,000 female beneficiaries, still at a zero baseline	not yet probed
Rural and urban internet access split	A regulator quarterly observatory with provincial coverage, or a census digital-access module; only the national urban population share is held	not yet probed
Enacted digital appropriation for 2026	The finance law for 2026 as gazetted, showing the ministry's voted line against the XAF 82bn presented in October 2025	not yet probed
Named national research funding for digital technology or artificial intelligence	A research council or higher-education ministry programme document or budget line; the only capacity finance the base holds closed in 2023	not yet probed

Twenty-eight of this ledger's rows carry no reliable statement of status. Where they cluster is itself the finding.

The heaviest cluster is artificial intelligence and the technology sector, with seven unheld rows: no national strategy, no named deployed system, no compute figure, no labelling register, no measured sector weight, and no Indian or Gulf instrument of any kind. The second is inclusion and capacity, where the universal service fund, a named digital-literacy programme, the institutions the ministry supervises, the connected-schools programme, the gender divide, the rural and urban access split, the enacted appropriation and any named research funding are all absent.

Three unheld rows bear directly on positions this report does state. The authority's authorisation for biometric identity processing would settle whether a three-year-old programme operates lawfully under a statute that prohibits it by default. The national incident response team and security operations centre are the stated destination of an inventory method already in force. And the grid supply position is unestablished against the hosting load committed by the end of 2026.

Each row is named in `gaps.csv` with the document, dataset or statement that would close it.

ABOUT THIS DOCUMENT

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
