

STATUS REPORT

Equatorial Guinea: status report

Edition of 2026-08-13 · 61 systems and instruments tracked, 6 of them not held

Compiled 2026-08-12 from the Data Landscapers source base, from [outputs/reports/GNQ/ledger.csv](#) (61 systems and instruments, 6 of them **Not held**). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

Equatorial Guinea has no published national digital strategy on file. What it has instead is a set of individually dated builds — a civil-service management system, a Treasury Single Account, two government data centres out to tender — and a governance layer being made through corporate control of the state's own telecoms holdings rather than through instruments.

The legal position is the weakest part of the record. [Ley 7/2024](#) on social media and computer crime is in force and its text is not held; the agency it creates, ANCIC, has nothing on record establishing that it operates; the [reform of the 2005 telecoms law](#) went to tender in June 2025 with no award published; and the country [signed the Malabo Convention on 28 July 2026](#) without becoming a party. A [data protection law](#) has stood since 2016 without a functioning regulator.

A single figure gives the scale of the delivery problem. GITGE's own study of the ministries in July 2026 [put interoperability at about 15%, big data at about 21% and data analysis at about 10%](#) — the maturity floor every system on this page is being built onto.

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
ACE submarine cable landing	IMPLEMENTED ↗	GITGE hosted the 36th ACE operation and maintenance committee, May 2026
Ceiba-1 and Ceiba-2 submarine cables	IMPLEMENTED ↗	Ceiba-2 inaugurated in 2018, 400 km on the Malabo-Bata-Kribi route
Digital Terrestrial Television project	IN DEVELOPMENT ↗	Tender published for a technical diagnostic and regularisation, 29 July 2026
Gabon-Equatorial Guinea fibre, roaming and frequency accords	IMPLEMENTED ↗	Signed at Mongomo, November 2025
GETESA network modernisation	IN DEVELOPMENT ↗	Network contract signed with Huawei, 9 July 2026
July-December 2026 connectivity plan	PLANNED ↗	Semestral departmental plan presented to the Prime Minister, 15 July 2026
Medusa submarine cable connection	PLANNED ↗	Analysys Mason study of a landing at Bome or Bata
Nigeria-Equatorial Guinea subsea cable	PLANNED ↗	Subsea fibre agreement signed, February 2026
Starlink satellite internet service	IMPLEMENTED, OFFSHORE ONLY ↗	Temporary offshore authorisation signed at the Palacio del Pueblo, 28 July 2026
TELGESA, the second state operator	IN DEVELOPMENT ↗	Merger halted pending a full audit of GECOMSA, 22 July 2026

Data Storage

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Government primary and backup data centres	IN DEVELOPMENT ↗	PAMFP tender published for a Malabo primary and a Bata backup centre, June 2026
ZEEDE-GE digital economic zone at Djibloho	PLANNED ↗	Creation under evaluation by the telecommunications ministry, March 2026

Energy

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
SEGESA grid fibre-optic modernisation proposal	PLANNED ↗	Presented to the Vice-President's cabinet at Jefatura del Estado, Malabo, 21 May 2026
Power supply to network sites and data centres	NOT HELD	—

Technical Capacity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Data centre capacity in service	IMPLEMENTED ↗	Technical facilities described in GITGE's own factsheet, content dated internally to 2016-2017 despite a 2025-07 upload path

Cybersecurity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National Cybersecurity and Critical Infrastructure Agency (ANCIC)	PLANNED ↗	Created by Ley 7/2024; nothing on record establishing that it operates

International capacity runs through GITGE. [Ceiba-2](#), 400 km on the Malabo–Bata–Kribi route, has been in service since 2018 alongside Ceiba-1 and the ACE landing, for which GITGE [hosted the consortium's 36th operation and maintenance committee](#) in May 2026. Two additions are prospective: a [Medusa landing at Bome or Bata](#), put at EUR 20–60m for 2029–30 and driven by degradation on the existing ASD cable, and the [Nigeria agreement](#) of February 2026, which bundles a data centre and publishes no delivery date.

[GETESA's modernisation](#) — 5G, eSIM, public Wi-Fi and fibre reactivation — runs on a Huawei network contract signed on 9 July 2026, which the [independent press reads as a rescue](#) and criticises for opaque procurement. The second operator, TELGESA, is not yet constituted: the merger with Loita Group was [halted on 22 July 2026 pending a full audit of GECOMSA](#).

A temporary authorisation [signed on 28 July 2026](#) permits North American companies to use Starlink for offshore operations inside jurisdictional waters; extension to individual subscribers is [deferred on stated security grounds](#), with type-approval and the competences of company and regulator unresolved. The digital terrestrial television project is [under tender for a diagnostic and regularisation](#) of what has already been built.

New hosting capacity is prospective: the public-finance modernisation project [tendered a primary data centre in Malabo and a solar-powered backup in Bata](#) in June 2026, and a [digital economic zone at Djibloho](#) is under evaluation. The only capacity figure held is older: [GITGE's own factsheet](#) describes two technical facilities, in Bata and Malabo, each with two generators and ten nodes. Separately, the electricity utility [SEGESA proposed fibre-optic grid digitisation with Huawei](#) on 21 May 2026, with spare capacity to be leased to telecom operators; the Vice-President called it welcome but unproven, pending review.

Digital public infrastructure

Data Exchange

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
I-CEMAC border screening connection	IMPLEMENTED ↗	INTERPOL I-24/7 extended to ten sites including Malabo, Bata and Mongomeyen airports
National interoperability framework	PLANNED ↗	Named as absent by the World Bank digital economy diagnostic

Digital Identity and CRVS

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Digital identity ecosystem	PLANNED ↗	Recommended by the World Bank digital economy diagnostic; no digital ID in place
DIP biometric identity document	IMPLEMENTED ↗	National DIP tour reported 7,670 dossiers obtained and 7,275 processed

Digital Payments and Fintech

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
BANGE MOBILE GE	IMPLEMENTED ↗	Launched February 2026 with G-MAT Pay and a Visa prepaid card
Getesa Money	IMPLEMENTED ↗	Named in GETESA's modernisation plan, May 2026
Licensed mobile-money operator	PLANNED ↗	Named as absent by the World Bank digital economy diagnostic
National ATM and point-of-sale deployment plan	IN DEVELOPMENT ↗	Five commercial banks and the BEAC pressed to expand coverage, February 2026

Registries (population, land, address, etc.)

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Civil registry and vital statistics	IN DEVELOPMENT ↗	Hosted the African CRVS meeting at Sipopo, June 2025

Sectoral management information systems (HMIS, EMIS, etc.)

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
DHIS2 electronic logistics system for malaria commodities	IMPLEMENTED ↗	Deployed on Bioko Island under the BIMEP

Other GovTech and e-Gov

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
CNEDOGÉ document issuance service	IMPLEMENTED ↗	Two provincial offices opened with online appointment booking, 12 June 2026
Patente Tributaria Unica digital filing	IMPLEMENTED ↗	Annual tax licence moved online, January 2026
SIGF civil-service management system	IN DEVELOPMENT ↗	Steering committee convened with the supplier M2M Group, March 2026
SIGOB administrative-procedure tracker	IMPLEMENTED ↗	Launched from Bata by the Ministerio de la Funcion Publica y Reforma Administrativa, 17 June 2021
Treasury Single Account	IN DEVELOPMENT ↗	Five-phase roadmap adopted with production targeted for the first quarter of 2027

Digitalisation of sub-national government

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Municipal or district digital services	NOT HELD	—

National statistics

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Fifth population census and first agricultural census	IN DEVELOPMENT ↗	Validation workshop on the project document, 27-29 July 2026

The DIP is issued by CNEDOGE with the [most recent figures dating from the 2025 national tour](#) – 7,670 dossiers obtained and 7,275 processed – and the service was extended in June 2026 with [two provincial offices and online appointment booking](#). A digital identity system was [recommended by the World Bank in 2024](#) and does not exist; the civil registry behind it remains paper-based, and fraudulent birth certificates are an acknowledged control problem.

The [SIGF](#) is in implementation on an eighteen-month timeline with biometric attendance and automated payroll, supplied by M2M Group. The [Treasury Single Account](#) has completed a census of all state bank accounts and adopted a five-phase roadmap targeting production in the first quarter of 2027, to be built on the BEAC's own AMS/X and SINTAG systems. The annual tax licence [moved online](#) in January 2026. Against these, no national interoperability framework has been published, and the only cross-system exchange in operation is [INTERPOL's border screening](#) at ten sites. Predating this build, the [SIGOB](#) administrative-procedure tracker has let citizens follow a request online since 2021, with no usage figure published since launch.

[BANGE MOBILE GE](#) and Getesa Money are live without published user figures, no licensed mobile-money operator has been reported, and the national ATM and point-of-sale plan has [produced directives rather than a deployment count](#). The BEAC's own data puts the country at [0.41% of CEMAC payment volume](#) at end-2024, the smallest of the six member states.

The [fifth population census and a first agricultural census](#) are in preparation against a last count in 2015, with no enumeration date.

Governance and regulation

Legislation and regulation

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Ley 7/2024 on social media and computer crime	IMPLEMENTED ↗	Enacted 23 December 2024
Reform of Ley 7/2005 General de Telecomunicaciones	IN DEVELOPMENT ↗	International tender opened for a firm to draft a new law, June 2025
Reform of the Ley de Prensa y Medios Audiovisuales (1997)	IN DEVELOPMENT ↗	Information Minister presented the reform bill to the Chamber of Deputies, 6 August 2026, referred to the Public Works and Communication committee

Strategies, plans and policies

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
ADIGE digital agenda	IN DEVELOPMENT ↗	The digital agenda the World Bank diagnostic assesses against
Consolidated July-December 2026 action plan	PLANNED ↗	Adopted by the second extraordinary directive council, 31 July 2026, and not yet financed
Governance of state-participation companies	IMPLEMENTED ↗	Directorships filled by competitive interview with six-month provisional appointments
Plan Nacional de Desarrollo 2035	IMPLEMENTED ↗	The framework the World Bank Country Economic Memorandum assesses
Recovery of the .GQ country-code domain	PLANNED ↗	A Comision Nacional de Negociacion named in the July-December 2026 plan
National digital strategy	NOT HELD	—

Regional collaboration

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Lusophone Africa data governance process	IN DEVELOPMENT ↗	Second Lusophone Africa Data Governance Workshop, Luanda, 15-17 June 2026
Malabo Convention on Cyber Security and Personal Data Protection	IN DEVELOPMENT, SIGNED NOT RATIFIED ↗	Signed at Addis Ababa, 28 July 2026

Standards

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Published quality-of-service or interoperability standards	IMPLEMENTED ↗	OM Num. 4/2018 gazetted 22 August 2018, confirmed via ORTEL's own legislacion index

Data protection

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Data protection law and supervisory authority	ENACTED, NO SUPERVISORY AUTHORITY CONSTITUTED ↗	Gazetted 22 July 2016, in force twenty days later

Open data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
EITI reporting	IN DEVELOPMENT ↗	Data collection for the 2024 report opened at Malabo, 30 July 2026
National open data portal	NOT HELD	—

Ley 7/2024 of 23 December 2024 regulates social media, computer crime and cybercrime — under-14s may not join social networks without parental consent, personal data may not be published without express written consent, and identity usurpation through false profiles is criminalised — and the full text is not held. It creates ANCIC under the Presidency, and nothing on record shows that agency operating. A quality-of-service regulation, [OM Núm. 4/2018](#), has stood since 22 August 2018, confirmed only by title and date on ORTEL's own index. The government has also proposed [replacing the 1997 Ley de Prensa y Medios Audiovisuales](#), for the first time bringing digital media and cable television within its scope alongside copyright and related-rights provisions aligned with the Berne Convention and the Bangui Agreement; the bill is with parliament's Public Works and Communication committee, with no adoption date or text published.

Treaty position: the Chamber of Deputies [voted on 25 March 2026 to authorise ratification](#) of the Malabo Convention, and the African Union's own register recorded no signature at all as of 2 February 2026. The signature followed on 28 July 2026. The country is a signatory and not a party to the convention adopted in, and named after, its own former capital.

The July–December 2026 [consolidated action plan](#) carries 35 strategic objectives under three national priorities, one of them restoring sovereignty over the national digital space including the .GQ domain, which a national commission is to recover from an unnamed foreign operator; the plan is adopted and not yet financed, and the

document is not published. Alongside it, [directorships at state-participation entities](#) are now filled by competitive interview on six-month provisional terms, and supervising officeholders have been ordered off the boards they oversee.

Open data amounts to one process. [EITI data collection for the 2024 report](#) opened at Malabo on 30 July 2026 as the last outstanding measure before validation of the IMF Staff-Monitored Programme. No open-data portal or policy is held.

Artificial intelligence and the technology sector

AI

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Director-General for Artificial Intelligence	IMPLEMENTED ↗	In post within the transport and telecommunications ministry
National artificial intelligence strategy or policy	IN DEVELOPMENT ↗	Anteproyecto drafting session addressed splitting ANIAD's functions, 27 August 2025
State Secretariat for Artificial Intelligence	IMPLEMENTED ↗	Óscar Ondo Ngomo took possession 7 July 2026, appointed by Decreto 61/2026 of 23 June 2026

ICT Industry

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
AVANTE digital transformation forum	IMPLEMENTED ↗	Convened at the Hotel Anda China, Malabo, 22 July 2026
GITGE, the state telecoms infrastructure operator	IMPLEMENTED ↗	Handover to a new director-general and deputy, 7 August 2026

China activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
China technology cooperation roadmap	IMPLEMENTED ↗	Roadmap to make the country a Central African technology hub

A State Secretariat for Artificial Intelligence, [held since 23 August 2024 and passed to Óscar Ondo Ngomo on 7 July 2026](#), sits within the Ministry of Transport, Telecommunications and Civil Aviation alongside an existing [director-general for artificial intelligence](#). A draft [Ley de Inteligencia Artificial](#) proposing an autonomous ANIAD authority is in preparation under the ministry, with no enactment date published.

The consultancy [AVANTE](#), backed by the national development agency ANDGE, brought public institutions, banks and technology firms together in Malabo on 22 July 2026 with artificial intelligence, electronic payments and public-administration reform as its three axes.

A [China cooperation roadmap](#) aims to make the country a Central African technology hub, with INSTTIC training and a cybersecurity and AI forum at Djibloho named under it; no delivery or disbursement figure is on record.

Inclusion and capacity

Digital divides

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Measured gap between Bioko and the mainland	NOT HELD	—

Literacy

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Digital literacy programme or measurement	NOT HELD	—

Training and skills

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
INSTTIC training with Chinese universities	IMPLEMENTED ↗	More than 200 students under the China cooperation roadmap
UNDP Digital Fitness programme	IMPLEMENTED ↗	Multisectoral officials trained in digital transformation and cybersecurity, August 2025

Research institutions

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Research on public-administration data systems	IMPLEMENTED ↗	Doctoral findings on big data, interoperability and digital identity presented at the AVANTE forum

The Chinese-financed [Video Surveillance Project](#) (2019) has no delivery, siting or oversight arrangement on record; financing detail for the sector is under Finance, below.

The [UNDP Digital Fitness programme](#) trained multisectoral officials in August 2025 with no later cohort on record, and [INSTTIC training](#) with Chinese universities runs at more than 200 students. National research on public-administration data systems appears once, as [doctoral findings presented at the AVANTE forum](#) arguing that structural gaps and elapsed time, not technology, are the constraint.

Access is measured only by a reference study, cited and not absorbed here: [DataReportal's Digital 2026](#) put mobile connections at 45.4% of population and internet penetration at 60.4% in November 2025. Nothing national measures digital literacy or the gap between Bioko and the mainland.

Finance

New investments

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
China Development Bank loan for the Video Surveillance Project	IMPLEMENTED ↗	US\$70.3m loan for the Video Surveillance Project
China Eximbank credit for the CEIBA-2 cable	IMPLEMENTED ↗	US\$402m buyer's credit for the CEIBA-2 submarine cable

The two instruments above are the only committed external capital on record, both Chinese and both predating the current build. Domestically, the [FY2026 state budget](#) gives the Ministry of Transport, Telecommunications and AI Systems (Section 51) CFA 5,802,246 thousand, down 23% on the prior year and 0.4% of the CFA 1,294,282m total, including CFA 140,000 thousand for the Escuela de Telecomunicaciones Djibloho; no separate digital-transformation line is broken out.

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Power supply to network sites and data centres	An operator, utility or regulator statement quantifying outage exposure or backup provision for telecommunications sites and the planned Malabo and Bata data centres.	not yet probed
Municipal or district digital services	A named municipal or provincial digital service, one-stop desk or local e-government platform, with a location and a start date.	not yet probed
National digital strategy	A published national digital or digital-transformation strategy for Equatorial Guinea, or an official statement that the ADIGE agenda and the Plan Nacional de Desarrollo 2035 stand in its place.	not yet probed
National open data portal	A government open-data portal or published open-data policy, or an official statement that none exists. The EITI reporting process is the only open-data commitment on the record.	not yet probed
Digital literacy programme or measurement	A named national digital-literacy programme with a participant count, or any survey measuring digital skills in Equatorial Guinea.	not yet probed
Measured gap between Bioko and the mainland	Any figure comparing connectivity, device ownership or service use between Bioko and the mainland, or by gender, from INEGE, ORTEL or an operator.	not yet probed

Most of these absences share one cause: access rather than inactivity. The government's news outlet is cookie-walled and serves no body or publication date to automated retrieval, so developments known only by their existence — a Huawei e-government memorandum, an e-government law, the full text of Ley 7/2024, a unique person and entity identification code — have no source of record and need a hand-clip.

The rest are absences of a different kind: no power-supply figure for network sites, no municipal digital service, no national digital strategy, no open-data portal, no literacy measurement and no measured Bioko-mainland gap.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
