

STATUS REPORT

Kenya: status report

Edition of 2026-08-13 · 147 systems and instruments tracked, 4 of them not held

Compiled 2026-08-11 from the Data Landscapers source base, from [outputs/reports/KEN/ledger.csv](#) (147 systems and instruments, 4 of them **Not held**). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

Kenya has a data-protection statute in force since 2019, a mobile-money rail that moved KES 41.68tn in the year to March 2026, an identity register the Interior Ministry reports as holding more than 42 million digitised records, and a government services platform carrying over 22,000 services. It has no adopted artificial-intelligence instrument, no national count of registered data controllers, and no cloud region in commercial service. The state's own digital spending fell for a second consecutive year, to [KSh 8.6bn for 2026/27](#) from KSh 16.3bn in 2024/25. The National AI Strategy 2025-2030 is costed at KSh 152bn over five years and [carries no dedicated allocation](#) in that budget. Service migration onto the eCitizen platform ran at [1,695 of a target 11,000](#) in the year to 31 March 2026, against 3,458 the year before.

Data-centre power tariff or grid-connection framework	NOT HELD	No instrument found

Technical Capacity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Broadcast Logger and CA Broadcast Monitoring Room	IMPLEMENTED ↗	Joint CA and KFCB user training concluded 2026-07-27
Kenya Advanced Institute of Science and Technology	IN DEVELOPMENT ↗	Korea Exim Bank operationalisation review, August 2026

Cybersecurity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Kenya Cyber Resilience Project	IMPLEMENTED ↗	Launched January 2026
National Cyber Security Agency	IMPLEMENTED ↗	Order gazetted as Legal Notice 89 on 2026-05-15
president.go.ke	IMPLEMENTED, TWICE BREACHED ↗	Defaced 2026-07-18, restored 2026-07-20

Satellite broadband reached 24,999 subscribers and 0.9% of the fixed market by March 2026, and the operator then [suspended new sign-ups across seven counties](#), with median download speeds down 26% year on year to 34.55 Mbps. Traffic across the London Internet Exchange's Nairobi and Mombasa points [rose twentyfold in a year to 330 Gbps](#) across 55 or more networks. Against the 100,000km national fibre target, the only delivered figures published are the regulator's universal-service slice: [2,193km under phase one and 1,173 last-mile sites](#) at 30 June 2025.

The US\$1bn Microsoft and G42 facility at Olkaria is stalled on commercial terms, not cancelled: no principal has announced a cancellation and no date is on the record. Kenya declined to guarantee annual uptake of the centre's capacity, including by neighbouring countries, and the ICT principal secretary said on 2026-05-12 that [the talks had not collapsed and the project was not failed or withdrawn](#). The campus broke ground on [2023-09-01 as a 60MW EcoCloud masterplan](#) at KenGen's Naivasha industrial park and was rescopeed to a [100MW first phase with a stated potential to 1GW](#) on the EcoCloud-G42 memorandum of 2024-03-08; at 1GW the draw would be [about a third of Kenya's roughly 3GW supply](#). Microsoft, G42 and KenGen have said nothing on the record. No data-centre tariff or gazetted large-load connection rule is held. Transaction-advisory documents of April 2026 put the Konza National Data Centre at [706 kW of certified capacity against an actual load of about 300 kW, with 100 of its 144 racks in use](#), hosting 145 of 451 government institutions; its expansion to 288 racks drew no appropriation at the 2026/27 budget and is being structured as a public-private partnership.

The National Cyber Security Agency Order was [gazetted as Legal Notice 89 on 2026-05-15](#), at a tabled establishment cost of about KSh 4bn. The presidency's own website was [defaced on 2026-07-18 with a 5 BTC ransom demand and restored on 2026-07-20](#), the second compromise inside twelve months; cause and attribution are undisclosed.

Use of satellite data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National earth-observation data programme	NOT HELD	No Kenyan instrument on file

The Interior Ministry reports [more than 42 million identity records digitised](#) in 2025/26. A High Court ruling of March 2026 [recognised a registered phone number as a personal digital identifier](#), barred recycling dormant numbers without consent, and gave the Attorney-General six months to legislate; that window closes about September 2026 and no framework is on file.

eCitizen carries [more than 22,000 services from over 100 agencies](#) and collects KSh 600m a day, while the Auditor-General alleges KSh 9.4bn was irregularly routed to private entities. A teachers' union reported members [turned away and billed in cash](#) when health-claims authorisation failed; the Authority answered that the Digital Health Agency runs the system on its behalf. The [Digital Health \(Data Exchange Component\) Regulations 2025](#) designate the exchange's shared registries as critical information infrastructure and make access to them fee-bearing; the Health Cabinet Secretary stated on 2026-08-04 that the [charge is 2% of each transaction, capped at KSh 5,000](#), a

rate the gazetted Third Schedule omits. The health ministry's enterprise-system tender [makes financial, tax, insurance, pensions, payroll, laboratory and identity interfaces day-one mandatory](#), the clearest written interoperability requirement on file.

The State Department for ICT reported [588 committed Digital Hub sites](#) on 2026-08-06, against a target of one in every ward. The national DPI roadmap is still unpublished; GIZ [tendered technical assistance on 2026-07-31 to develop a bankable Kenyan digital public infrastructure project](#), with offers closing 2026-09-01.

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National data marketplace	PLANNED ↗	Provided for in the draft Data Governance Policy

Virtual assets acquired a statute commenced on 2025-11-04 and [regulations gazetted as Legal Notice 134 on 2026-07-22](#), setting paid-up capital by licence class from KES 300m for stablecoin issuance to nil for investment advisers; every existing operator must license afresh by 2026-11-04, and the regulators [had not announced the application process as at 2026-08-07](#). The state's proposed data marketplace would [license anonymised platform and statistics-office datasets](#), targeting more than 1,000 datasets over five years at up to KSh 396m, pricing method deferred.

The [Kenya Cloud Policy \(2025\) Implementation Guidelines](#), cover-dated June 2026, grade providers into four accreditation classes and give state organs 24 months to migrate non-exempted systems; [accreditation applications opened on 2026-08-06](#) before the Cloud Adoption Committee that decides them had been constituted.

Data Protection Services received [KSh 917.3m in the 2026/27 original estimates](#), its first separately visible appropriation. Of 224 betting and gaming firms, [15 were fully registered](#) and 185 were given 40 days in May 2026 to register or lose their licences. The Office reaches artificial intelligence through transfer rules. Its [36-page draft Guidance Note on Artificial Intelligence](#) of July 2026 requires a lawful transfer basis and a documented adequacy

assessment before personal data leaves Kenya for AI processing, registration of every entity deploying AI on Kenyan data subjects' data, and an impact assessment before any high-risk deployment; two sibling drafts cover [emerging technologies](#) and [privacy-enhancing technologies](#). Neither states a transition period or commencement, and comments close 2026-08-17. The [US-Kenya health Cooperation Framework](#) of 2025-12-04 carries US\$175,000,000 for health data systems inside US\$1,631,470,000 of planned United States support, with audit information subject to Kenyan law and the Data Protection Commissioner's concurrence.

India activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Kenya-India-Italy sovereign AI partnership	PLANNED ↗	Trilateral launched at the India AI Impact Summit

Kenya's artificial-intelligence position rests on a draft, a bill and a strategy without money. The [draft AI and Other Emerging Technologies Policy](#) runs to 226 pages, was open for comment from 2026-07-21 to 2026-08-04, and asserts [effects-based jurisdiction over any entity outside Kenya](#) whose AI outputs have direct and foreseeable effects in the country while leaving "high risk" undefined and stating no penalties. Its labour chapter sets minimum standards for content moderators, data annotators and evaluators — pay transparency, psychosocial support, grievance procedures — binding on international firms operating through outsourcing partners, [against a reported wage range of US\\$1.46 to US\\$3.74 an hour](#) for Kenyan moderators. A separate Artificial Intelligence Bill sits before the Senate on a different legislative track, and the National AI Strategy is costed at [KSh 152bn over five years with no dedicated budget allocation](#).

Deployment is running ahead of the rules that would govern it. A constitutional petition filed on 2026-04-23 alleges that automated M-PESA decisioning and the operator's chatbot [offer no guaranteed route to a human agent, no disclosure of decision logic and algorithmic discrimination in credit scoring](#); respondents had not filed at publication. Venture funding fell sharply: Kenyan startups raised [US\\$126m in the first half of 2026, third in Africa and the weakest half since early 2021](#), against US\$1.04bn across 2025. No held source states Kenya's installed AI compute capacity at any date.

Vote 1122, State Department for ICT and the Digital Economy	IMPLEMENTED ↗	FY2026/27 original estimates of KSh 12,763.8m

The digital thematic allocation fell to [KSh 8.6bn for 2026/27](#) from KSh 12.7bn and KSh 16.3bn in the two preceding years, and KSh 4.3bn of it — half the thematic — is the World Bank's Digital Economy Acceleration Project, which had [disbursed US\\$33.93m of a US\\$390m commitment](#) at a portal reading of 2026-06-24.

State funding for the Hustler Fund fell from KSh 20bn at launch to [KSh 300m in the year to June 2026](#).

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
CA spectrum-interference audit, direct-to-cell	a published CA determination or gazette notice would settle it; probed 2026-08-05, no CA determination or gazette notice on interference published; trade reporting only	2026-08-05
Data-centre power tariff or grid-connection framework	a published EPRA or Kenya Power data-centre tariff, or a gazetted large-load connection rule, would settle it; probed 2026-08-05, EPRA tariffs and open-access regulations carry no data-centre category and no large-load connection rule	2026-08-05
National earth-observation data programme	a Kenya Space Agency strategy or national earth-observation data policy would settle it; every satellite-data source the place holds is continental or vendor-side; probed 2026-08-05, KSA Strategic Plan 2023-2027 located; the EO Data Sharing Framework 2026 itself is a landing page only	2026-08-05
Registered data controllers and processors	the ODPC register or its annual report would settle it; probed 2026-08-05, the statutory register is public and live; a total needs pagination traversal, not a single fetch	2026-08-05
Installed AI compute capacity	no held source states Kenya's installed GPU or accelerator capacity; a ministry or regulator inventory would settle it; probed 2026-08-05, no ministry or regulator inventory exists; the nearest official statement is a Konza transaction document giving 0.7MW IT capacity, 144 racks and no dedicated GPU clusters; on ingest the Konza transaction document proved to be dated 2026-04-13, not 2020, so its 0.7MW / 144-rack / no-GPU-cluster statement is current rather than historical	2026-08-05
Ajira Digital Programme	the state's other flagship digital-work programme is effectively absent from the base; probed 2026-08-05, no official programme report retrievable and ajiradigital.go.ke renders only a broken interface; an SSRN case study is the only first-hand document reached	2026-08-05

No Communications Authority determination on the direct-to-cell spectrum-interference review has appeared since it opened in March 2026. No data-centre power tariff or gazetted large-load connection rule exists, and no earth-observation data programme is on file. No inventory states Kenya's installed AI compute capacity. The data-protection register is public but paginated, so no national total for registered controllers and processors is established, and no official report on the Ajira Digital Programme has been published at any date.

ABOUT THIS DOCUMENT

EDITION	2026-08-13
CURRENT EDITION	https://corpus.data-landscapers.com/reports/KEN/KEN-status.html
THIS FILE	https://corpus.data-landscapers.com/reports/KEN/KEN-status-2026-08-13.pdf
DERIVED FROM	Data Landscapers source base, commit <code>b4366dac0370</code>

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
