

TWELVE-MONTH PROGRESS REPORT

Libya: progress report, 2025-08-01 to 2026-08-10

Edition of 2026-08-13 • 75 systems and instruments tracked, 11 of them not held

Compiled 2026-08-10 from the Data Landscapers source base. Sections follow the status report. Each opens with a movement ledger comparing the position at the start and end of the period, which runs to the date of issue rather than to the last month's close.

Of 75 systems and instruments on this place's ledger, 47 changed position between 2025-08-01 and 2026-08-10, 16 did not, 1 carry no stated baseline, and 11 are **Not held** at both ends.

Shape check, run before the comparison: 67 sources for this place in the window — 22 in the earlier half (2025-08 to 2026-02), 45 in the later (2026-03 to 2026-08). The two halves are comparable, so the comparison is made over the whole window.

Movement values. *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a measured position worsened. *Closed* — the programme ended. *No change* — the position at both ends is the same. *Baseline not held* — the base carries no position at the start of the period, so no movement can be stated. A value may carry a qualifying clause after a comma, as in *Advanced, slipped*.

Summary of the period

The payment layer and the register layer moved through the twelve months; the legal layer did not. Electronic transaction value went from [LD 136 billion for 2024 to LD 643 billion for the first seven months of 2026](#), and the real-time payroll went from launch, with the eastern government refusing to share employee banking data, to [about 1.7 million employees enrolled, 76%](#). Five payment instruments that did not exist in August 2025 are in service.

Registers followed: a Unified Tax System, a Unified Economic Number, an export window, a chambers-of-commerce system and an expatriate-worker database. Each was authorised with no data-protection law behind it, and that position is unchanged — none is in force, and the only commitment on file remains [the AI strategy's target of 2026](#).

What did not move: the telecoms licensing dispute, the civil registry's completion figure, the Unified Social Registry and the postal-addressing programme.

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
5G network	Did not exist	One operator live in central Tripoli, countrywide roll-out stated to follow	ADVANCED
ARABSAT and LTT satellite capacity agreement	Did not exist	Agreement announced; capacity on Arabsat-6A at 30.5 degrees east, no commercial terms	ADVANCED
Ghat to Tahala fibre link	In service	11 of 12 sites restored, 91.7%, most on VSAT backup	REGRESSED, LARGELY RESTORED
LPTIC and KBR infrastructure and 5G memorandum	Did not exist	MoU only	ADVANCED
LPTIC and Nokia 5G cooperation	Did not exist	Discussion only	ADVANCED
LTT and ZTE modernisation memorandum	Did not exist	Framework covering 4G/5G, e-wallet, e-commerce, CDN and terminals	ADVANCED
National IPv4 to IPv6 transition	None published	Operators convened; no timetable or target published	ADVANCED
National root servers	Did not exist	Operating in Almadar Aljadid data centres in Tripoli and Benghazi	ADVANCED
Huawei's authorisation to operate	Operating; suspended nationwide on 17 August 2025	Operating under a compliance undertaking to the GTI; scoping civil-service systems (2026-07)	NO CHANGE, SUSPENDED AND REINSTATED WITHIN THREE DAYS
Medusa submarine cable	Inaugurated at Misrata; Tripoli and Benghazi landings planned (2025-05)	Same; no landing or capacity figure published since	NO CHANGE

Cybersecurity

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Central Bank of Libya cyber incident	No disclosed incident	Systems isolated in June 2026 and a sample of bank data later published on a dark-web site	REGRESSED
Interior Ministry cybercrime caseload	135 cases and 188 devices seized in the first quarter of 2025	No figure published since the first quarter of 2025	NO CHANGE

5G entered service where nothing existed, [Almadar Aljadid launching in central Tripoli in January 2026](#). Ookla, measuring the four North African markets that launched earlier, [found three of them delivering a worse aggregate mobile experience six months in](#) – a dated measurement, cited rather than absorbed. Root servers came into service [in October 2025](#).

Four vendor agreements were added in the twelve months – [KBR](#), [ZTE](#), [Nokia](#) and [ARABSAT](#) – none of which states a value, a timetable or a coverage obligation. The movement is in the count of memoranda rather than in the network.

The southern network was cut and mostly recovered: floods severed the Ghat-Tahala fibre in May 2026 and [11 of 12 sites, 91.7%, were restored, most on VSAT backup](#).

Huawei ends the period where it began it. [Suspended nationwide on 17 August 2025 and reinstated on 20 August on a compliance undertaking](#), it was scoping a ministry's internal systems by July 2026. Nothing moved on data-centre capacity, on power supply to network sites, or on the 2019 Tripoli data centre, because nothing is held on any of them.

Digital public infrastructure

Digital Identity and CRVS

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Civil-registry fraud enforcement	No enforcement action on file	61 family records suspended and 225 national ID numbers and passports revoked (2026-01), 10 numbers cancelled at Al-Marj, forged-number trade reported continuing (2026-04)	ADVANCED
Biometric voter verification	Piloted in four municipalities (2024-08)	Piloted in four municipalities; no extension published	NO CHANGE
National ID Number	In force and gating state services	In force and gating state services	NO CHANGE
Project Intilaqa civil-registry matching	97% complete (2024-09)	97% complete; no later figure published	NO CHANGE

Digital Payments and Fintech

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
E-wallets for resident foreigners	Not permitted	Permitted on passport and residency, with daily transfer caps	ADVANCED
International Visa acceptance on local terminals	Did not exist	Foreign-currency Visa acceptance live on local POS	ADVANCED
LYPay QR-code acceptance	Did not exist	Banks directed to activate	ADVANCED
National Stand-In Processing Service	Did not exist	Continuity service for communications and banking disruption	ADVANCED
Petrol-station card acceptance	Did not exist	Jumhouria Bank OnePay Mini Pay live at petrol stations	ADVANCED
Ratibak Lahzi real-time payroll	Launched 2025-08-11; about 2m records collected, the eastern government refusing to share employee banking data	1.7m enrolled, 76%; July salaries executed through it; about 500,000 employees still outside	ADVANCED
SoftPOS	Did not exist	Launched; NFC phones accepted as card terminals	ADVANCED
LYPAY ONEPAY instant transfers	In service	In service; first published volumes are for 2025	NO CHANGE

Registries (population, land, address, etc.)

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Unified Economic Number	Did not exist	Authorised, with a National Council constituted; no timetable, budget or legal basis for the data linkage stated	ADVANCED
Unified national database of expatriate workers	Did not exist	Agreed with a dedicated platform; no authorising instrument, retention limit or oversight body named	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
National postal addressing	Phase one under way	Phase one under way; no completion figure published since	NO CHANGE
Unified Social Registry	Draft approved (2025-06)	Draft approved; no build, budget or timetable published since	NO CHANGE

Other GovTech and e-Gov

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Electronic Unified Export Window	Did not exist	354 companies registered and 190 products exported, 66% of orders to Tunisia; no pre-platform baseline published	ADVANCED
Libya Experts Forum registration platform	Did not exist	Ready for launch; data protection instructed but no statute or regulator named	ADVANCED
LY-GOVREP government reporting platform	Preliminary operation with 60 cabinet entities (2025-07)	Activated as the unified performance-monitoring tool for public entities	ADVANCED
One-Stop Shop for company registration	None published	Reactivation agreed under Law No. 23 of 2010; nothing on record delivered	ADVANCED, MARGINAL
Unified Digital System for Chambers of Commerce	Did not exist	Live; digital certificates of origin and chamber registration with a verification channel for customs	ADVANCED
Unified Tax System	Did not exist	Launched; further platforms stated for 2026	ADVANCED

Digitalisation of sub-national government

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
BaladiyaBOT municipal digital assistant	Did not exist	In development and piloting in one municipality	ADVANCED

National statistics

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Electronic-payment value	LD 136bn (2024)	LD 389bn (2025) and LD 643bn for 1 January to 31 July 2026	ADVANCED
POS terminal estate	150,205 terminals (2024)	170,149 terminals (February 2026); 2m transactions across 67,000 points in one day collapsed the system (2026-05)	ADVANCED
Banking-app subscribers	BASELINE NOT HELD	4.30m subscribers (February 2026); 200.7m transactions worth LD 313.6bn in 2025	Baseline not held

Use of satellite data

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
National earth-observation satellite	Did not exist	At design stage; no budget, timetable or launch partner stated	ADVANCED

The payment estate carries most of the period's movement. Terminals went from 150,205 in 2024 to 170,149 by February 2026, and transaction value from LD 136 billion for 2024 to LD 389 billion for 2025 and LD 643 billion for the first seven months of 2026. Five instruments that did not exist at the start of the window are in service at the end of it: QR acceptance on LYPay from March 2026, e-wallets for resident foreigners under Circular 9 of 2026, and

SoftPOS, international Visa acceptance and a National Stand-In Processing Service from June 2026. Petrol stations took their first card payments in January 2026. The estate also failed once: 2 million transactions across 67,000 points collapsed the system in May 2026.

Ratibak Lahzi is the single largest movement. It began the window newly launched, with about 2 million records collected and the eastern government refusing to share employee banking data with Tripoli; it ends it carrying about 1.7 million employees, 76% of a 2.2 million denominator fixed at project start, with July salaries executed through it. About 500,000 employees are still outside it and no breakdown of who they are has been published.

Registers were authorised through the window and delivery figures exist for one of them. The Unified Tax System launched in December 2025, the chambers-of-commerce system in March 2026, and the export window reported LD 79.5 million by July 2026, 66% of its orders going to Tunisia. The Unified Economic Number was authorised in July 2026 with no timetable, budget or legal basis stated for the database linkage it is to run on. LY-GOVREP went from preliminary operation with 60 cabinet entities to activation.

Two identity positions did not move: Project Intilaqa's 97% is still a September 2024 figure, and the Unified Social Registry has been draft-approved since June 2025. Enforcement did move: 225 national ID numbers and passports revoked in January 2026, 10 more cancelled at Al-Marj, and the forged-number trade reported still running in April 2026.

Governance and regulation

Legislation and regulation

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Comprehensive cybersecurity law	None published	In drafting on the eastern legislative track	ADVANCED
E-payment mandate for state revenue collection	Did not exist	Treasuries and collecting agencies must accept electronic payment	ADVANCED
Law No. 22 of 2010 on telecommunications	In force; sole licensing power asserted by the GTI	In force; licensing jurisdiction contested between the GTI and the eastern ministry	NO CHANGE

Strategies, plans and policies

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Government Data Governance Policies	None published	Presented as a vision; no adopted instrument published	ADVANCED
National digital transformation plan of the Ministry of Civil Service	Did not exist	In preparation; no timetable, budget, lead agency or published document	ADVANCED
National Telecommunications and Informatics Strategy 2023-2027	In force	In force	NO CHANGE

Regional collaboration

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Candidacy for the ITU Council	Did not exist	Declared and canvassed bilaterally	ADVANCED
Chair of the Arab working group on AI Data and Digital Infrastructure	Did not exist	Libya holds the chair	ADVANCED
OZON unified telecoms licence	Granted by the eastern ministry and treated as void by the GTI	Granted by the eastern ministry and treated as void by the GTI	NO CHANGE

Standards

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Prohibition on card-payment surcharges	Did not exist	Prohibited and enforceable; spreads of up to 20% reported before it	ADVANCED

Data protection

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Tax Police	Not active	Activated for oversight and compliance	ADVANCED
Data-protection law	None in force	None in force; targeted for 2026 by the AI strategy	NO CHANGE

Open data

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
GIA Open Data Platform	In operation; no dataset count published (2025-07)	Indicators covering 91 datasets	ADVANCED
National Committee for the Information for All Programme	Did not exist	Constituted under the GIA with a proposed roadmap taken	ADVANCED

The licensing dispute did not move. [Law No. 22 of 2010](#) remains in force, Tripoli continues to read it as reserving all licensing to itself, and [the OZON licence](#) granted under it by the eastern ministry remains outstanding and treated as void.

No data-protection law was enacted. The instrument that commits to one was [published in October 2025](#), so the commitment and the vacuum both sit inside this window; a [cybersecurity law](#) entered drafting on the eastern track [in July 2026](#).

What was created was administrative rather than statutory: [a National Committee for the Information for All Programme](#) under [Decision No. \(50\) of 2026](#), an [open-data platform](#) whose published dataset count went from unstated to 91, a [decree](#) requiring state revenue collectors to accept electronic payment, and a [prohibition on card-payment surcharges](#) after complaints of spreads reaching 20%.

Libya also took two external positions it did not hold a year ago: [the chair of an Arab working group on AI Data and Digital Infrastructure](#) and [a declared candidacy for the ITU Council](#).

Artificial intelligence and the technology sector

AI

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
National Strategy for Artificial Intelligence 2025-2030	None published	Published; a 2026-2030 successor is reported adopted but is not held	ADVANCED

ICT Industry

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Bank digital-service build-outs with foreign vendors	Did not exist	Tadamon Bank with JMR Infotech and Seraj Islamic Bank with Network International	ADVANCED
AI Itissan Al-Jadeed biometric passport contract in Niger	Contract won (2025-06)	Contract won; no delivery milestone published since	NO CHANGE

Innovation ecosystem

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
LIBIGPT generative-AI system	Did not exist	Launched as the first domestic generative-AI system	ADVANCED

India activities

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Libya and India cooperation on AI and quantum skills	Did not exist	Agreed; no programme document or numbers published	ADVANCED

Libya's whole AI position was created inside the window. The [National Strategy for Artificial Intelligence 2025-2030](#) was published in October 2025 and [LIBIGPT](#) launched two days before it. Neither has a successor document on file: a 2026-2030 strategy is reported adopted and is not held, and the AI Ethics Charter named alongside it is not held either.

The technology sector itself did not move. [AI Itissan Al-Jadeed's Niger contract](#), won in June 2025, has published no delivery milestone since, and the [two bank digital-service build-outs](#) reported in April 2026 rest on the vendors' own accounts.

Inclusion and capacity

Access to services

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Cash withdrawal limits at bank branches	Note recall of 2025 deepening the cash shortage	LD 3,000 per customer, and LD 4,000 in the south, from 9 August 2026	REGRESSED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Access for holders of administrative numbers	Protests over exclusion from services gated on the national number (2025-06)	No published resolution	NO CHANGE

Training and skills

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
IsDB cybersecurity and AI-risk training for central bank officials	Did not exist	Run once; participant numbers, curriculum and standard unstated	ADVANCED
Professional master's institute in AI and cybersecurity	Did not exist	Launched by the Ministry of Planning with UNDP	ADVANCED
UNDP and GIA data-systems partnership	Memorandum signed (2025-07)	Memorandum in force; the Seventh National Human Development Report in preparation (2026-02)	NO CHANGE

Research institutions

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-10	MOVEMENT
Higher-education and research cloud platform	Did not exist	Approved and described by the authority as built on Microsoft 365	ADVANCED

Training capacity was added three times in the window, each time by an outside body: the AI and cybersecurity master's institute with UNDP in November 2025, cooperation with India on AI and quantum skills in February 2026, and the Islamic Development Bank's programme for central bank officials in July 2026. The research authority's higher-education cloud platform, approved in August 2026, is described by the authority as built on Microsoft 365.

Access moved the other way. Holders of administrative numbers protested exclusion from national-number-gated services in June 2025 and no resolution has been published. The note recall that opened the cash shortage was followed, on 5 August 2026, by branch withdrawal limits of LD 3,000, and LD 4,000 in the south.

Finance

The base holds no finance rows for Libya with a position at either end of this window.

(narrative not yet written)

Where the record is thin

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Trans-Sahara and Tatweer Tripoli data centre	Any statement, contract, opening report or capacity figure after 2019 establishing whether the Huawei FusionModule1000A facility announced for Tripoli in early 2020 was ever deployed.	2026-08-10
National data-centre capacity	A published figure for installed or contracted data-centre capacity in Libya, from an operator, GACI or a colocation provider.	2026-08-10
Power supply to networks and data centres	An operator, GECOL or GACI statement quantifying outage exposure or backup provision for telecommunications sites and data centres.	2026-08-10

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
LY-DNID national digital identity	The GIA's own account of LY-DNID — the Level-2 pilot of 2025-11-20 or the Level-3 biometric eKYC work with the central bank of 2026-04-19 — with a description of what the system is and who it enrolls.	2026-08-10
LY-NDEX national data exchange	The GIA's own account of LY-NDEX, with its legal basis, the entities connected to it and the basis of the figure of more than 300m transactions a year.	2026-08-10
Rural digital service programme	A named programme, budget line or coverage obligation addressing digital services outside the coastal cities, from GACI, the Ministry of Local Government or an operator.	2026-08-10
National Cloud Computing Policy	The text or an official summary of the National Cloud Computing Policy proposed with ESCWA, and its adoption status.	2026-08-10
Access-to-information statute	A gazetted Libyan access-to-information law or decree, or an official statement that none is in force.	2026-08-10
AI Ethics Charter	The text of the AI Ethics Charter referred to on the GIA's news index, with its adoption date and legal standing.	2026-08-10
Digital-literacy programme	A named national digital-literacy or digital-skills programme with enrolment or completion figures, from the Ministry of Education, the Ministry of Labour or GACI.	2026-08-10
Public budget allocation to digital government	A Libyan budget or expenditure statement carrying an identifiable appropriation for communications, informatics or digital transformation.	2026-08-10

Eleven rows carry no position at either end. Five are subjects the base holds nothing on for Libya — data-centre capacity, power supply to network sites, rural digital services, digital literacy, and any budget appropriation for digital government — so they are absences in the record before they are absences in the country. The rest name systems and instruments the state refers to and the base has not captured, several of them under dated headlines on the General Information Authority's own site.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
