MONTHLY UPDATE

MoUs and other agreements: monthly update, September – October 2026

Edition of 2026-10-12 · compiled by Claude Opus from the documents in the Corpus repository

> *8 places. Every block below is carried verbatim from that place's own monthly update, where it was written, sourced and checked; nothing is written here.*

CENTRAL AFRICAN REPUBLIC · DR CONGO · MOROCCO · MOZAMBIQUE · NIGER · NIGERIA · RWANDA · TANZANIA

The place reports do not share one window; the period above is the range they span.

Central African Republic

After President Touadéra met the founder of the data-infrastructure and AI company AMINI at the UN General Assembly, the national internet and security unit signed a cooperation memorandum with the company providing for a national data centre, a security operations centre, a national computer emergency response team and a digital twin of the mining subsoil, reported on 29 September. No cost, financing, site, timetable or data-hosting terms are published.

DR Congo

An Algerian state electronics firm and its consortium signed a protocol, reported on 4 September, for the digital and payments programme of the Kinshasa expansion project: digital equipment, electronic payment systems, skills transfer and a technology centre. No value is published.

Morocco

The digital transition ministry and a critical digital-infrastructure supplier signed a memorandum in Rabat on developing digital infrastructure, cloud computing and artificial intelligence. No value, deliverable or date is published, so what is held is an intention.

Mozambique

The finance ministry and Brazil's public services management ministry formalised a memorandum on exchanging experience and training staff in public procurement, payroll management, digital transformation and administrative modernisation. No value, deliverable or date accompanies it.

Niger

The Algerian state operator signed conventions in Niamey on 8 September for a skills centre and donated transmission equipment for a 100 Gbps Ngezam-Agadez link on the national backbone; no value is stated.

Nigeria

The one memorandum signed in the window is domestic: the technology development agency and the national chambers of commerce signed an agreement on small-business digital adoption on the sidelines of GITEX Nigeria, covering a shared enterprise platform, capacity building and the national digital conference, with no sum or deliverable attached.

The central bank signed a memorandum of understanding in Singapore with the Global Finance & Technology Network, setting a framework for cooperation between the two countries' financial-innovation sectors. The signing date is not stated.

Rwanda

The ICT ministry signed a memorandum with a chip-design company to build local semiconductor design skills, reported on 22 September; no signature date, value or target is published.

On 23 September, at the UN General Assembly, the ICT ministry signed a digital transformation memorandum with Jordan's digital economy ministry, with Jordan's government super-app offered as the model for public services. It covers AI, digital identity, data protection and payments and sets up a joint technical committee to meet quarterly; no sum, timetable or joint project is named.

Tanzania

A Korean track was pressed at the Korea-Africa economic cooperation ministerial, where the finance minister agreed to accelerate delivery of a stated US$2.5bn Korean commitment covering transport infrastructure, technology, culture, industry and health, and a university partnership was pressed on artificial intelligence, digital skills, research and technology entrepreneurship. Neither carries a signed instrument, a digital allocation or a date.
