PROGRESS REPORT

MoUs and other agreements: progress report, October 2025 – October 2026

Edition of 2026-10-12 · compiled by Claude Opus from the documents in the Corpus repository

> *54 countries. Each row below is carried verbatim from that country's own progress report, which answers a fixed frame of indicators over the period; nothing is written here. A country not listed under an indicator has* **No evidence** *on it in its own report.*

Progress values. *Movement* — some form of progress, however minor, has been recorded. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a reported position worsened. *Mixed* — the indicator's instruments moved in different directions in the period; the clause after the comma names which moved which way. *No change* — the repository holds a standing position and nothing in the period touched it. *No evidence* — the repository holds nothing on this indicator at all. A value may carry a qualifying clause after a comma, as in *Movement, regulations still pending*.

The place reports do not share one window; the period above is the range they span.

Strategic relationships

COUNTRY	DEVELOPMENTS	PROGRESS
Algeria	Three cooperation tracks opened in the window: Tunisia and Niger, Oman and an investor-matching partnership. 2026-06 - a fourth joint technical commission with Tunisia met, following telecommunications cooperation with Niger in March 2026; no instrument text or value is held for either. 2026-07-26 - an Omani ministry and sovereign investment authority offered flexible partnerships across artificial intelligence, data centres, financial technology and space, with nothing concluded at the meeting. 2026-08-20 - a continental innovation-hub network was tied to a platform connecting North African companies to investors; no commitment value, deal target, fee structure or first cohort is published, so what it moves is a channel rather than capital.	MOVEMENT
Angola	The data-protection authority signed a mutual-assistance memorandum with a Lusophone counterpart in September 2025, its first bilateral with a non-African regulator. 2025-09-18 — at a global privacy assembly, the authority signed a bilateral memorandum providing mutual assistance and technical, regulatory and supervisory cooperation. No bilateral with any non-African regulator was held before it. A stated intention to conclude a similar arrangement elsewhere is unevidenced, and no activity under the memorandum has been reported since signature. It is the only regulator-to-regulator instrument on this ledger; every other agreement recorded for the country is with a vendor, a lender or a foreign government, and those are reported under geopolitics.	MOVEMENT
Benin	A university framework agreement with the innovation hub was renewed for five years in June 2026, and the Cotonou declaration was adopted in November 2025. 2025-11-18 — the Cotonou declaration was adopted. 2026-06-01 — the framework agreement between a French university and the government-backed innovation hub was renewed for five years, covering AI training, joint research and a planned innovation-management master's. Both are cooperation instruments rather than financed commitments.	MOVEMENT

COUNTRY	DEVELOPMENTS	PROGRESS
Botswana	An operator and the special economic zones authority signed a framework for connected utilities, smart security, digital platforms and connectivity, with no value stated. 2026-03-17 — a memorandum between a mobile operator and the special economic zones authority set a framework for connected utilities, smart security, digital platforms and connectivity inside the zones. No value is stated and the exact signature date is not published. It is the only operator-to-state framework on this ledger, and it is the one instrument here that ties connectivity to an industrial-policy vehicle rather than to a coverage target. No project, site or investment under it has been reported in the five months since.	MOVEMENT
Burkina Faso	The standing relationship is with one financier: the legislature unanimously ratified the credit agreement financing the five-year digital acceleration programme at CFAF 92,752,319,800, and a regional fund workshop followed in August 2026. 2024-06-12 - the legislature unanimously ratified the credit agreement with the international development association financing a five-year 2024-2028 digital programme costed at CFAF 92,752,319,800, with sixty-nine deputies voting and five components named. The appraisal behind it funds a national public-data interoperability platform alongside broadband connectivity, public-service digitalisation and skills, and the operation is now framed at about US$170m with national counterpart, funding coverage of 1,000 localities in 2026. 2026-08 - a second relationship is forming: a joint development-bank fund of 71 billion FCFA for digital modernisation of public administrations across the eight monetary-union states was presented to Burkinabe public administrations at a two-day workshop. The European relationship ran the other way: cooperation ended on 31 December 2024, the Commission recording that conditions for a medium-to-long-term framework are no longer met.	MOVEMENT
Burundi	A five-year health-sector memorandum with the United States commits US$156m and covers health-data management. 2026-02-09 — a five-year agreement with the United States committing US$156m to the health sector was signed, including health-data management. Nothing comparable existed before it and it is the largest single commitment on this ledger. What it does not carry is a data instrument. No data-sharing agreement under the memorandum has been published, so the terms on which health data would move between the two parties are not on the record — at a point when the country's data protection authority has not been constituted.	MOVEMENT
Cameroon	A three-year master service agreement with Ethio Telecom was signed on 5 December 2025 across four workstreams. 2025-12-05 - the state operator signed a three-year framework covering fintech support, architecture and deployment of a sovereign government cloud, network expansion consultancy and institutional digital culture, the visiting team concluding its work later that month. No fee, investment or cost-sharing figure attaches to the agreement, and no delivery is reported against the sovereign government cloud workstream - which is the workstream that would matter most, given that the state's own cloud policy has not moved since May 2025.	MOVEMENT
Cape Verde	The state operator signed a memorandum with Angola's public finance technology body in March 2026, and a tech-diplomacy protocol was signed. 2026-03-03 - a memorandum was signed in Praia by the operator's executive administrator and the Angolan body's director-general in the presence of Angola's ambassador, covering cybersecurity, data-centre management, audit and internal control, and customer service, the two bodies having been in contact since 2023 with no instrument on the record; it is reported again in an account of Angola's own reform. No value, duration or workplan is stated. 2026-03 - a protocol on membership was signed in Praia and a technology ambassador designated, described by the institute as the second such appointment in Africa; no fee, obligation or term is stated and the signature date is not given. The standing multilateral instrument is the UN cooperation framework for 2023-2027, with a 2028-2032 successor opened for discussion in September 2026.	MOVEMENT

COUNTRY	DEVELOPMENTS	PROGRESS
Central African Republic	Three digital financial services accords were signed in November 2025, while a data-centre memorandum signed in January 2025 never advanced to contract. 2025-11-10 — three accords were signed: an institutional one with the finance ministry aligned to a development institution's 2030 strategy and the national plan, one with a commercial bank on its participation in digital services, and one with the incumbent mobile operator on building the capacity of its distributor network. No commitment sum is stated for any of the three. Against them, a data-centre memorandum signed in January 2025 has never advanced to contract, and at July 2026 there was still no contract, site or financing. It is one of five live proposals circling the same unbuilt national data centre, and a twelve-month absence of movement is the finding. The pattern is consistent across this ledger: agreements are signed at ceremonies, and the ones that convert are the ones with an implementing partner already in country. 2026-09-29 - the national internet and security unit signed a memorandum with a data-infrastructure and AI company for a national data centre, a security operations centre, a response team and a digital twin of the mining subsoil; no cost, financing, site or timetable is published.	MIXED three financial-sector accords signed while a data-centre memorandum stood dormant for a year
Chad	Talks on a digital infrastructure partnership were held with a regional incumbent operator at an international trade show, and nothing later is held. The talks took place in March 2026 (talks). Nothing later is held. It is one of six international engagements in this unit — with the United States, India, China, Azerbaijan, a regional operator and a continental bank — of which only the Chinese and continental-bank arrangements have produced signed instruments.	NO CHANGE
Comoros	A card and merchant partnership with a global payment network was announced across five markets including this one. 2025-11 - a partnership was announced covering virtual and physical cards plus merchant solutions through a group's wallet brands across five markets including the Comoros. It is the only source on this subject the repository holds for the country, and no Comoros launch date, volume or value is stated. 2025-06 - a protocol was signed at Moroni with the agriculture chambers, its objectives including a national digital agricultural register and building the chambers' digital capacity. The register is named as an objective with no build, timetable, financier or budget line on record, and no dated progress on the protocol is held.	MOVEMENT
Congo	An accord signed at Pointe-Noire covers energy and digital nexus projects and a feasibility study for a data centre attached to a gas plant. 2026-06 - an accord was signed at Pointe-Noire covering energy and digital nexus projects, a regional think tank, and a feasibility study for a regional data centre attached to a gas plant. No financing figure or timetable is stated. It is the only strategic relationship on this ledger that starts from power rather than from connectivity or money, which matters in a country where nothing at all quantifies energy cost or grid availability for digital infrastructure.	MOVEMENT
Cote d'Ivoire	Two commercial memoranda were signed in August 2026, one on digital public infrastructure and one on financial services. 2026-08-07, executed 2026-08-19 - a five-year memorandum between an Indian technology company, a continental investment council and an Ivorian mobile operator covering national fibre backbones, 4G and 5G, submarine cable landing stations, internet exchange points, telecom towers, and digital identity, national interoperability, e-government and digital payment platforms. It is known only from the company's regulatory filing; no financial commitment, country programme, project or site is named. 2026-08-04 - a protocole d'accord between a ride-hailing platform's Ivorian arm and a fifteen-market banking group, insurance first and fleet financing later, with the country stated as the pilot market. No amount, facility or timetable is stated by either party.	MOVEMENT

COUNTRY	DEVELOPMENTS	PROGRESS
Djibouti	A tripartite fibre agreement with the Ethiopian and Sudanese operators was signed in February 2026; no sum is stated in it. The standing relationship on file is with a platform foundation: a memorandum signed on 9 December 2024 to deploy an open-source service platform, including a construction-permit system, with capacity-building and knowledge transfer. 2025-09-21 - an Ethiopian payments operator and a Djiboutian financial-services provider signed a partnership on cross-border payments, remittances and merchant services, witnessed by four ministers. 2026-02-04 - the three national operators signed the tripartite Horizon Fiber agreement. None of the three states a committed amount, so what any of them is worth is not established here.	MOVEMENT
DR Congo	The central bank signed a card-network memorandum on payments and inclusion, and the digital ministry signed one with a commercial bank. 2026-04 - the central bank governor and a card-network executive signed a memorandum on three pillars: technical capacity building, financial inclusion and literacy, and secure resilient payment systems, aligned to the bank's 2026-2030 plan. No monetary value is attached and the signing date is not given separately from the report date. 2026-08-13 - the digital economy ministry signed with a commercial bank on modernising financial services and accelerating banking inclusion, covering digital identity and artificial-intelligence integration under the 2019 national digital plan and the 2023 Digital Code, with no term, value or workplan published.	MOVEMENT
Egypt	The central bank signed a memorandum on a pan-African gold bank, and an outsourcing delivery centre memorandum was signed. 2025-12-30 - a memorandum with a continental lender put a pan-African gold bank at feasibility-study stage, to assess technical, commercial and regulatory requirements for siting it in a designated free zone with an internationally accredited refinery, secure vaulting and associated financial and trading services. 2026-07-06 - a memorandum with the information technology agency framed a regional outsourcing delivery centre serving Middle East and North Africa clients in consulting, risk management, cybersecurity, digital engineering, data analytics, artificial intelligence and business platforms, stated as creating more than 1,000 jobs over three years, with no investment sum, site or opening date. The central bank also presented its continental payment-system accession experience, currency-circulation system and institute training to Eswatini, with no instrument signed, and talks with the United Kingdom covered digital skills, artificial intelligence, cloud, data centres and financial technology with no agreement stated. A payments company signed an integration connecting its acceptance terminals with a point-of-sale software provider's system, targeting hospitality, retail chains and hypermarkets, with no sums, merchant counts or transaction volumes disclosed.	MOVEMENT
Equatorial Guinea	A Huawei electronic government memorandum of December 2025, followed by contract annexes and a network contract. The relationship that carries most of the estate is one vendor's. A memorandum to accelerate electronic government was signed in December 2025 with no financial terms disclosed; annexes to the surveillance contract closed in March 2026 adding plate recognition and 80 technicians to train in China; and the state operator signed a six-month network optimisation contract in July, value undisclosed. Others are proposals rather than agreements: a Nigerian company's submarine cable and data centre deal with no figures disclosed, and a sovereign artificial intelligence pitch at Davos.	MOVEMENT
Eritrea	A development bank mission in April 2026 reopened dialogue on a prospective financial-sector modernisation project (mission). A development bank delegation led by its East Africa director general met the senior adviser to the president and the finance minister in April 2026, with line-ministry discussions covering financial-sector modernisation and data systems, and both sides reviewing continued dialogue on a prospective project (mission). The standing umbrella instrument is the 2022-2026 cooperation framework with the United Nations development system, which seeks to expand access to health coverage, education, social protection, energy and digital connectivity (framework). That framework expires in 2026 and the repository holds no successor.	MOVEMENT

COUNTRY	DEVELOPMENTS	PROGRESS
Eswatini	Digital transformation was named a priority area at a leaders' meeting with a bilateral partner in Taipei. The meeting's own date is not established and the report is dated August 2026 (meeting). No memorandum, workstream, value or timetable is named. Against a unit whose forward programme rests on one lender operation and one hyperscaler memorandum, a named priority area at a leaders' meeting is the whole of this bilateral relationship on the digital record.	MOVEMENT
Ethiopia	The 2025 creditor-committee memorandum moved into implementation, with a bilateral agreement and a bondholder agreement in principle (agreement). Ethiopia concluded a memorandum of understanding with its Official Creditor Committee under the G20 Common Framework on 2 July 2025, formalising a debt treatment worth over US$3.5bn to be implemented through bilateral agreements (memorandum). The first of those bilateral agreements was signed with Italy in Rome on 18 March 2026 (agreement). On 29 June 2026 Ethiopia reached agreement in principle with the ad hoc committee of holders of its US$1bn 2024 notes on restructuring terms (agreement). These are financial rather than digital instruments. The repository holds no memorandum tying this financing to the digital programme, so the relevance here is fiscal room rather than a digital commitment.	MOVEMENT
Gabon	A card-network accord of May 2025 and a development fund partnership of December 2025 are both signed with no terms, amount or deliverable published. The card-network accord was signed at a business forum in Abidjan on 12 and 13 May 2025 and reported second-hand, with one follow-up meeting on digitalising public services, tax collection, disbursement and secure digital identity (card partnership). The development fund partnership covers policy support on financial governance aligned to the national plan and the regional financial inclusion strategy, with no money figure, duration or deliverable on file (fund partnership). Twelve months with no further record on the first, and nothing since December 2025 on the second, is the finding.	NO CHANGE
Gambia	A US$50m broadband partnership signed in December 2025 is the largest instrument; three smaller memoranda followed. The state incumbent's own account puts the partnership at US$50m signed on 24 December 2025, with the backbone to rise from 40 to 800 Gbps and no completion date given. The rest are frameworks without figures: a digital public infrastructure memorandum with India signed in October 2024 with no funding or milestones; a Bahraini cybersecurity memorandum of January 2026 offering a free critical-infrastructure tier with no value or duration; and a mathematics and artificial intelligence memorandum with a regional institute signed on 10 December 2025 with no site or funding yet.	MOVEMENT
Ghana	A trade-facilitation country programme was renewed in August 2026, covering digital customs systems at a joint border post. The renewal continues trade-facilitation and continental free-trade readiness work, including digital customs systems at the Akanu-Noepe joint border post and support for more than 1,250 women and small-scale cross-border traders (renewal). No financing sum, term or workplan is stated, and the same border post is the subject of a regional interoperability dialogue recorded on a neighbouring ledger.	MOVEMENT
Guinea	An international card network opened talks with the finance ministry in April 2026 toward a central-bank memorandum. Nothing is signed on the record (talks). It is the only strategic commercial relationship in the repository that is not a construction contract or a donor credit, and no scope, value or timetable is published for it.	MOVEMENT
Guinea-Bissau	The eleventh review disbursed a further US$1.6m to US$1.7m, citing revenue administration digitalisation. The credit facility is the relationship that sets the reform agenda. The ninth and tenth reviews disbursed US$3.2m and extended the arrangement to December 2026, and the eleventh completed in June 2026 disbursing a further US$1.6m to US$1.7m. What it asks for is digital: the review confirms the revenue administration platform and a taxpayer census as reform actions. The digital programme itself is separate and larger, launched nationally at US$60m in August 2026.	MOVEMENT

COUNTRY	DEVELOPMENTS	PROGRESS
Kenya	A European digital partnership committed KSh 15.3bn including EUR 37m to a submarine cable, and a justice-innovation memorandum was signed in August 2026. The partnership's instrument type, disbursement schedule and implementing channel are not established (partnership). The judiciary signed a memorandum with a Netherlands justice-innovation institute at the Supreme Court, with an intergovernmental development-law organisation and the Netherlands embassy participating, building on the country's access-to-justice blueprint; no value, term or deliverable is stated (memorandum).	MOVEMENT
Lesotho	Smart Africa, the African Union and the German Embassy were named as supporters of the data blueprint work, with no programme document or amount held. The three were named as supporters at the first blueprint workshop in July 2026 (workshop). No terms of reference, programme document or amount is held for any of them, so the repository records three named backers and nothing that any of them is committed to.	MOVEMENT
Liberia	The Cybaston five-year framework is the standing vendor relationship; three further partnerships were signed in the window. The master service framework signed 23 September 2024 covers undersea capacity of up to 1 Tbps, a data centre for consolidated e-government services, e-visa, e-tax and e-tourism, a security operations centre and an incident response team, with handover to the ministry in September 2029. Added since: a UNDP and operator memorandum of 5 November 2025 on digital skills, innovation hubs and inclusion beyond Monrovia, with no value stated; a five-year United States memorandum of 9 December 2025 committing US$124,418,400, with integrated digital health information systems named as one funded line; and Liberia's first Digital Village in Lofa County with Huawei, for which no signed instrument, value or duration is published.	MOVEMENT
Libya	Talks with the People's Bank of China point to a financing relationship, including yuan-denominated panda bonds for reconstruction; no agreement is held. A newspaper account of August 2026 reports that talks between the Central Bank of Libya and the People's Bank of China cover both accession to China's payment network and an intention to issue yuan-denominated panda bonds to help fund post-conflict reconstruction (account). No signed agreement, issue size or timetable is stated, and no central-bank statement is held, so the relationship rests on a single report.	MOVEMENT
Madagascar	The core digital governance relationship closed in June 2026; two new cooperation agreements were signed in its place. The financing agreement of October 2020 committed a USD 140,000,000 credit for the digital governance and identity project, the country's principal digital relationship (agreement); the project passed on its institutions in June 2026 (closure). A revenue authority cooperation agreement made Madagascar the fifth country to take Rwanda's electronic billing machine system, with no sum stated (agreement). Five memoranda were signed with Egypt in July 2026, one covering artificial intelligence and digital transformation, with no amount or named activity (memoranda).	MOVEMENT
Malawi	A proposed US$180m four-year vendor investment plan is built round a one-stop government platform and a network linking all 28 districts, with no agreement made public. The roadmap was presented to the vendor in China in June 2026: a one-stop digital government platform covering passport applications, business registration and tax payments, and a high-speed network linking all twenty-eight districts with ring protection against cable failures (plan, account). Funding structure, implementation timeline and any agreements reached have not been made public, and the repository holds no signed instrument, only the ministry's account of a meeting (status).	MOVEMENT
Mali	Mali took its digital agenda to the regional alliance's ministers and to an international mobile congress in the window. The relationships that matter here are regional and they are being worked. Mali took part in the continental digital alliance's presence at the international mobile congress in March 2026 and in the Sahel confederation's digital ministers' meeting in July, alongside a standing frequency coordination agreement. The financing relationships are older and narrower: a Chinese export credit loan for the national digital programme ratified in 2018 and a Gulf operator's connectivity commitment. The European multiannual programme is discontinued.	MOVEMENT

COUNTRY	DEVELOPMENTS	PROGRESS
Mauritania	Five memoranda were signed with Oman in July 2026, after a US$50 million digital financing commitment in April. The window added two relationships and reactivated a third. A business forum with Oman in July 2026 produced five memoranda on digitisation, preceded by a ministerial meeting with the Omani delegation. The Islamic development bank committed US$50 million to digital financing in April 2026. The standing bilateral relationships are regional: a digital cooperation memorandum with Senegal signed in January 2025, and an agreement with Morocco on digital transformation of justice in October 2025. The electoral commission's memorandum with the European Union is the fourth.	MOVEMENT
Mauritius	The India relationship deepened with new agreements in April 2026 and a tax treaty ratification approved in July. New agreements were signed with India in April 2026 (agreements), and Cabinet approved ratification of the double taxation avoidance agreement in July (Cabinet). Domestically, the financial-sector agencies re-signed an amended memorandum of cooperation in March 2026 to strengthen coordination (memorandum). The digital content of the India agreements is not itemised in the account held; what is dated is the relationship, not a named digital activity under it.	MOVEMENT
Morocco	Three vendor frameworks are on file and none carries a sum: with Orange on artificial intelligence, on a private 5G laboratory, and with Vodafone Business. The ministry signed with Orange in Casablanca on 4 June 2026 at a second artificial-intelligence summit, advancing the institutes programme with no sum attached (memorandum). A vendor agreed to supply a private 5G platform for an operator laboratory at an April 2026 exhibition, with a catalogue targeting smart logistics, utilities and energy (agreement, exhibition). A memorandum with Vodafone Business signed in April 2025 for smart-city and energy-management solutions has had no delivery, expansion or sum reported since (framework). 2026-09-15 — a memorandum was signed with a critical digital-infrastructure supplier on digital infrastructure, cloud computing and artificial intelligence. No value, deliverable or date is published.	MOVEMENT
Mozambique	A new five-year World Bank partnership framework was endorsed in January 2026 and five financing memoranda worth about US$455m were signed under it in June. 2026-01-22 — the World Bank Group's board endorsed a Country Partnership Framework for FY26-31 with an indicative US$2.5bn of mobilisation, superseding the FY23-27 framework. It is the formal five-year engagement and financing frame the rest sits inside. 2026-06-09 — the finance minister and a World Bank delegation signed five memoranda worth about US$455m covering agriculture, education, social protection, minerals and water and sanitation, the first package under that framework. 2026-03-17 — a memorandum with Brazil's development bank was signed to support structuring a new Mozambique Development Bank, alongside related bilateral cooperation agreements. None of the three names a digital allocation, so what reaches this sector cannot be read off the totals. 2026-09-14 — the finance ministry and Brazil's public services management ministry signed a memorandum on exchanging experience and training staff in procurement, payroll management and digital transformation; no value, deliverable or date is published.	MOVEMENT
Namibia	Three memoranda in fifteen months: a five-year United Nations partnership with the largest operator, a tripartite cable agreement, and a regulator-business one. Eleven United Nations entities and the largest mobile operator signed a five-year partnership in May 2025 to accelerate digital inclusion; no commitment figure is stated (partnership). The state fixed operator, its Angolan counterpart and a satellite and cable company signed a master service agreement in June 2026 for the regional submarine system, integrating the existing subsea cable (agreement). The communications regulator and the chamber of commerce signed a three-year memorandum in July 2026 (memorandum), and the regulator holds separate memoranda with the statistics agency and a regional electricity distributor. Only the cable agreement carries a deliverable on this repository — an initial dedicated 1.0 Tbps. The rest are frameworks.	MOVEMENT

COUNTRY	DEVELOPMENTS	PROGRESS
Niger	A package of bilateral accords with Algeria was signed in March 2026, following a fibre interconnection protocol with Chad. The two ministers signed a protocol in June 2025 updating and implementing the cross-border trans-Saharan fibre interconnection with Chad, instructing the two national operators to open technical and commercial talks. The second session of the joint commission with Algeria closed on 24 March 2026 with the two prime ministers signing accords and memoranda spanning health, transport, environment, foreign affairs, higher education, petroleum, energy, youth, communication and trade; the communiqué itemises no stand-alone digital or data-governance instrument within the package. No text of either instrument is held, and no implementation milestone against them is on file. 2026-09-08 - the Algerian state operator signed conventions for a skills centre and donated equipment for a 100 Gbps Agadez fibre link.	MOVEMENT
Nigeria	A EUR 45 million tranche completed an EUR 820 million European digital package, and a bilateral digitalisation memorandum was signed with Finland. 2026-10-09 — the central bank signed a memorandum with a Singapore-based finance and technology network on cooperation between the two countries' financial-innovation sectors; no programme or funding is attached. The tranche signed on 9 December 2025 completes an EUR 820 million digital economy package supporting a 90,000-kilometre fibre backbone, digital public services and skills — the largest single strategic digital relationship the repository holds. A memorandum with Finland signed at Abuja on 23 March 2026 covers digital government, digital public infrastructure, cybersecurity, innovation support and capacity building. There is still no single umbrella instrument: the finance ministry's international economic relations department is the administrative home, and publishes no list of relationships or financing volumes. 2026-09-08 - a domestic memorandum: the technology development agency and the national chambers of commerce signed an agreement on small-business digital adoption, a shared enterprise platform and the national digital conference. No sum or deliverable is attached. 2026-09-15 — the technology agency and the chambers of commerce signed their small-business digital memorandum; no sum or term is stated.	MOVEMENT
Rwanda	A capital-markets registrar-services memorandum was signed in August 2026 with no term or value published, and the head of state co-chairs a global artificial-intelligence commission. The registrar-services memorandum was signed in August 2026; no term, value or workplan is published and no investor-data protection provision is reported (memorandum). The head of state was confirmed as co-chair of a global commission in July 2026, and no national work programme or output is attached to the seat (commission). A bilateral artificial-intelligence memorandum with a North African state was signed at a United Nations summit in July 2026 and its text is not held (bilateral). A semiconductor design skills memorandum between the ICT ministry and a chip-design company was reported in September 2026, with no signature date, value or target published. 2026-09-23 - a digital transformation memorandum with Jordan was signed at the UN General Assembly, covering digital public services, AI, digital identity, data protection and payments, with a joint technical committee to meet quarterly; no sum, timetable or joint project is named.	MOVEMENT
Sao Tome and Principe	The bilateral relationship with China was elevated to a strategic partnership in September 2024, announced by the two heads of government in Beijing. The Chinese foreign ministry, as one of the two parties, records that the prime minister met the president in Beijing during a summit and an official visit on 5 September 2024, and that the two leaders announced the elevation of the relationship to a strategic partnership (communique). No financial terms, sums or sectoral annexes are stated in the signing party's own release, and no implementing instrument has followed it into the repository. The one other strategic-scale instrument recorded for this country is a citizenship-fund contract stated only by a consulate (contract). Both are announcements of intent whose content the repository cannot read.	MOVEMENT
Senegal	A memorandum with a United Nations development programme was signed with the digital ministry, with no value, duration, workplan or deliverables and the text not held. The memorandum was signed in April 2026 (memorandum). Nothing about it is published beyond the signature. The same programme separately funds an equipment tender for a parliamentary system, which is the only concrete activity the repository can attach to the relationship.	MOVEMENT

COUNTRY	DEVELOPMENTS	PROGRESS
Seychelles	A neighbouring operator announced cross-border payment capabilities with a domestic fintech partner. The announcement is a single paragraph in an otherwise foreign-focused keynote (announcement). No agreement, value, timetable or regulatory approval is named. It is one of three cross-border payment intentions in this unit — the others being a continental interface memorandum and the domestic fintech's own platform — and none has a completed corridor on record.	MOVEMENT
Sierra Leone	Five bilateral instruments in fifteen months - Nigeria, the United States, the United Arab Emirates, and standing frames with India and the European Union. A digital transformation cooperation framework with Nigeria was signed in November 2025 (communique); a US$129 million health cooperation memorandum with the United States on 22 December 2025, with a stated protection of data sovereignty (memorandum); and a Comprehensive Economic Partnership Agreement with the United Arab Emirates on 2 February 2026, naming artificial intelligence first among priority sectors (agreement). The standing frames are the European Union's Multi-Annual Indicative Programme 2021-2027 (programme) and India's tele-education and training relationship (brief). Only two name a digital deliverable. The rest name digital cooperation as a sector and leave the instrument to a later agreement that is not in the repository.	MOVEMENT
Somalia	Three partnerships were struck or stood up: a framework with the ITU, an AI and space agreement with Saudi Arabia and a memorandum with Türkiye's regulator. The framework cooperation agreement signed in Manama in November 2023 covers communication development, digital policy and regulation, digital skills, connectivity infrastructure and trust in digital services (announcement). In September 2025 the regulator agreed with Saudi Arabia's commission to develop a framework for cooperation on regulating artificial intelligence and space technology (agreement). In February 2026 it signed a bilateral memorandum in Ankara covering satellite regulation, cybersecurity, spectrum, broadband, network resilience and regulatory capacity (memorandum). All three are regulator-to-regulator. None carries a value.	MOVEMENT
South Africa	Eleven institutions were named as joint partners in the national data exchange pilot at its launch, the only multi-party arrangement on this ledger. 2025-10-03 — eleven institutions were named as joint partners in the national data exchange pilot at its launch. Nothing comparable existed on this ledger before it. No memorandum text, term or financial commitment is published for any of the eleven, so what is established is that the arrangement exists and who is in it, not what any party has undertaken to do. It matters because the exchange it supports has no statute, reported under legislation: a set of institutional relationships is currently doing the work a legal framework would otherwise do.	MOVEMENT
South Sudan	The revenue authority signed a third customs cooperation memorandum with Uganda's, and the legislature ratified the general cooperation agreement with Saudi Arabia. 2026-09-16 - the revenue authority signed a third customs cooperation memorandum with Uganda's, covering customs modernisation, digital interoperability and transit, with no systems link or timetable published. 2026-08-19 - the legislature ratified the general cooperation agreement with Saudi Arabia signed in 2022, after rejecting it in May 2026. 2026-08-31 - the government held exploratory talks with a Chinese equipment vendor in Hangzhou, with no agreement signed. No memorandum with a technology supplier is on record.	MOVEMENT
Sudan	The clearest priced relationship the repository holds is a USD 15 million satellite-broadband partnership signed in January 2023 with a Sudanese operator. The six-year agreement was signed on 23 January 2023 and announced a week later, providing satellite broadband capacity explicitly linked to digital-transformation goals, e-government programmes and banking-sector revitalisation (announcement). The counterparty is a Sudanese telecommunications operator, not the government, so it is a commercial relationship rather than a state one. Nothing inside the window supersedes it. The card-processing agreement signed in January 2026 is the nearest recent equivalent and is narrower in scope (agreement).	NO CHANGE

COUNTRY	DEVELOPMENTS	PROGRESS
Tanzania	Three bilateral cooperation tracks were opened in one week with no signed instrument, and a digital economy memorandum was signed with a Chinese vendor. Cooperation frameworks with three states were agreed at an international summit, memoranda proposed and none signed; no signed instrument, amount or timetable is held for any of the three (tracks, frontier). The vendor memorandum was signed in Shanghai by the ministry's permanent secretary and witnessed by the minister; no commitment amount, term or financing structure is stated in the ministry's own release, and device manufacture is placed inside a vendor memorandum rather than an industrial policy (memorandum). Putting domestic device manufacture inside a supplier agreement rather than a policy instrument is the substantive point. 2026-09-12 — a Korean track was pressed at the KOAFEC ministerial, the minister agreeing to accelerate a stated US$2.5bn commitment and to deepen a university partnership on AI and digital skills. Neither is signed, allocated or dated.	MOVEMENT
Togo	An indicative cooperation programme with Luxembourg for 2026-2031 was signed in a three-accord package carrying EUR 78,550,000, including a cybersecurity programme. The programme was signed at the capital alongside two other accords; the euro is the announcing currency, the dollar figure in circulation is a publisher's rounding rather than a dated conversion, and the two accounts date the signing a day apart (programme, accords, record). The cybersecurity component's digital and cyber share of the package is not separately quantified (cyber, agreement). A card and merchant partnership with a global payment network names the country among five markets; it is company-announced through a press wire and the principals' own release is not held (card).	MOVEMENT
Tunisia	Telecommunications cooperation with a neighbour was announced, and minutes were signed for a triangular startup programme with Japan serving other African states. The bilateral cooperation was announced in June 2026 with no instrument, value or workstream stated (cooperation). The triangular programme's minutes were signed in July 2026; the country's own startup framework is the curriculum, so what it exports is a policy design rather than a technology (programme).	MOVEMENT
Uganda	Cooperation talks were held with a neighbouring state operator, with no scope, value or timetable stated. A delegation visited in August 2026 (talks). Talks only. It is the sole bilateral commercial engagement in this ledger that is not with a Chinese, Gulf or European counterparty, each of which is recorded separately.	NO CHANGE
Zambia	Four memoranda were signed — digital identity with a neighbour, a government compact with the payments association, a bilateral between two external organisations, and a card partnership — and none publishes a value. The identity memorandum was reported signed with the signing date not established, and no value, duration or workplan is stated (identity). The payments compact followed a State House meeting with no document, value or target published (compact). The third is a bilateral between two external organisations coordinating their support to government, with no value, duration or termination terms disclosed and the text unpublished (coordination, rollout); the card partnership reports no value, volume commitment or launch product (card).	MOVEMENT
Zimbabwe	A cross-border fibre public-private partnership switched on its first phase, and aviation and border-security digitisation talks were held at State House. The partnership is an equal-investment arrangement with the state operator retaining operational control (partnership, highway). The border-security talks produced no instrument, value, scope or data-protection provision for systems that would process traveller data (talks). A state operator keeping operational control in an equal-investment partnership is an unusual structure in this frame and is recorded as such.	MOVEMENT
