PROGRESS REPORT

# Access to services: progress report, October 2025 – October 2026

Edition of 2026-10-12 · compiled by Claude Opus from the documents in the Corpus repository

> *54 countries. Each row below is carried verbatim from that country's own progress report, which answers a fixed frame of indicators over the period; nothing is written here. A country not listed under an indicator has* **No evidence** *on it in its own report.*

CITIZEN FEEDBACK PORTALS · CITIZEN PARTICIPATION IN POLICY · GENDER EQUITY · INCLUSION OF PERSONS WITH DISABILITIES · INCLUSION OF REFUGEES AND IDPS

**Progress values.** *Movement* — some form of progress, however minor, has been recorded. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a reported position worsened. *Mixed* — the indicator's instruments moved in different directions in the period; the clause after the comma names which moved which way. *No change* — the repository holds a standing position and nothing in the period touched it. *No evidence* — the repository holds nothing on this indicator at all. A value may carry a qualifying clause after a comma, as in *Movement, regulations still pending*.

*The place reports do not share one window; the period above is the range they span.*

## Citizen feedback portals

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Algeria** | A complaints platform for economic operators went live on 11 August 2026, and an ombudsman videoconference reception is to pilot.<br><br>2026-08-11 - a platform went live for remote filing and tracking of economic operators' complaints on import and export procedures, without attending ministry offices, described by the trade ministry as the fifth digital platform it put into service in 2026. The minister inspected the platform offices on 15 August and ordered faster, continuously monitored processing; no processing time, backlog figure, complaint count or service standard is published, so the instruction to go faster is not measured against anything.<br>2026-08-09 - the ombudsman announced a videoconference citizen-reception service to pilot from September 2026, to ease access for citizens in remote areas and people with specific needs, with no site list, capacity, appointment rule or evaluation attached.<br>2026-08-31 - UNDP committed a grant to bring natural-language processing and automated deadline tracking into the ombudsman's handling of citizen requests; nothing on record shows it built. | MOVEMENT |
| **Angola** | The complaints book remains a physical book of 77 carbonless pages; the online channel sits on the public services portal under the consumer institute's mandate.<br><br>The instrument is clear about what it does and does not require. The 2016 decree makes a complaints book compulsory, reaching complaints against public administration bodies and concessionaires of public services, and its article 1(2) permits suppliers and the consumer institute to publish additional online instruments while the mandatory book itself remains physical, with 77 carbonless pages. There is no national electronic complaints book; the operative online channel is the citizen's complaints book on the public services portal, run under the consumer institute's mandate from this decree.<br>Financial services have their own route, with direct recourse to the central bank under the 2016 conduct-of-business notice. No volume of complaints made or resolved is published for either. | NO CHANGE |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Benin** | The national services portal carries suggestion and problem-reporting functions, a free police line opened, and a national living-environment platform launched.<br><br>The national public services portal itself includes citizen feedback functions — making a suggestion and reporting a problem.<br>2025-11-07 — a police call centre was inaugurated with a free line.<br>2026-01-29 — a national platform was launched to bring citizen voice into living-environment management.<br>Three channels exist and none of the three publishes how much feedback it receives or resolves. | MOVEMENT |
| **Botswana** | Botswana Speaks carries citizen messages to members of Parliament by web and phone, free of charge.<br><br>2026-01 — the platform lets citizens communicate with their members of Parliament on constituency and national issues, including Bills, free and through web and mobile.<br>2025-08-21 — the forensic audit public engagement platform, launched in August 2025, published its contact channels for public submissions.<br>2026-02-10 — 52 public services are fully available online with a further 179 in integration testing.<br>No submission or response figure is published for either platform. | MOVEMENT |
| **Burkina Faso** | Two channels opened within a week: a national citizen-petitions platform on 5 May 2026 and a security reporting application on 11 May with trackable follow-up.<br><br>2026-05-05 - a national digital citizen-petitions platform launched alongside the fuller public launch of the state services portal, whose own relaunch had come on 20 February 2026 with improved search, life-event guides and a full administrative directory. The portal itself now carries 1,672 information sheets, 95 procedures usable online and 183 public institutions.<br>2026-05-11 - the security ministry's application taking text, voice or call-based incident reports with trackable follow-up became operational, replacing untraceable telephone denunciations.<br>Traceability is the stated point of it.<br>No petition or report count, response duty, resolution rate or safeguard against malicious reporting is published for either. | MOVEMENT |
| **Burundi** | A harmonised national complaints strategy was validated during 2025 and digital reporting platforms for gender-based violence were presented in April 2026.<br><br>The regulator's free short code and physical suggestion boxes in operator agencies are the standing official feedback channel, and they are sectoral: telecoms consumers rather than a cross-government grievance route.<br>2026-02 — a harmonised national complaints-management strategy was drawn up and validated during 2025, alongside the ombudsman's 2025 caseload of 776 files analysed and treated.<br>2026-04-09 — a citizen-facing digital alert and case-management system for gender-based violence was presented, with an interventions-management system for the institutions involved.<br>It is the first citizen-facing reporting platform the repository holds for Burundi, and it is one subject: no general-purpose portal exists.<br>2026-10-08 - the presidency adopted a locally built messaging application as a channel for citizens' grievances, with no terms disclosed and no rule stated on control of the servers. | MOVEMENT |
| **Cameroon** | The one feedback channel is a public conciliator's online complaint form covering two regions. No nationwide portal exists.<br><br>The office of the public independent conciliator, created under the local authorities code and a 2020 decree and covering two regions only, runs an online complaint intake form. No complaint volume, response duty or resolution figure is published.<br>The municipal digitalisation programme is about presence, not feedback: its first phase covers site and portal infrastructure for communes rather than a dedicated channel, over 335 municipal portals developed and 145 authorities equipped.<br>Nothing national takes a citizen complaint about a public service and reports what happened to it. | NO CHANGE<br>a standing position the repository holds for the first time |
| **Cape Verde** | The earmark rose to CVE 74,050,000 for FY2026 across two sub-lines only, the citizen-space and one-stop-shop lines having disappeared.<br><br>The one-stop shop operated on an earmarked own-service-fee receipt of CVE 74,817,675 at the FY2024 proposed stage and was CVE 59,437,242 for FY2025 across four sub-lines including a citizen-space community line and a one-stop-shop implementation line.<br>For FY2026 it is CVE 74,050,000 across two sub-lines only, service quality and new technological infrastructure: the total rose while the two lines naming physical and one-stop-shop access disappeared. It is still named as a component of the state-modernisation programme, and no service-volume figure is held from any date. | MIXED<br>the one-stop-shop earmark rose for FY2026 while the two sub-lines naming physical and one-stop-shop access were dropped |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Central African Republic** | A unified digital portal was launched in December 2025; the only feedback channel with a count behind it is an agency's.<br><br>2025-12 - a unified digital portal was launched as a single point of access to government. No service count, transaction volume or feedback function is described for it.<br>The only channel on this ledger with a figure behind it is not the state's: a refugee operation's complaints and feedback system recording 535 complaints.<br>No government complaint channel, response-time commitment or resolution figure appears anywhere, so what a citizen can do with a grievance is not established. | MOVEMENT |
| **Chad** | The ombudsman launched a trilingual complaints website with case tracking in February 2026, beside the Presidency's own form.<br><br>The only standing channel the repository held was the Presidency's online suggestions form, addressed to the civil cabinet and resting on no enacting law or decree (form).<br>On 27 February 2026 the ombudsman launched a website taking citizen complaints online with case tracking, in French, English and Arabic; no case volume, budget or enabling instrument is stated (website).<br>The commitment behind them is the government's general policy declaration, which undertakes to put the citizen at the centre of law and policy making through digital innovation (declaration). | MOVEMENT |
| **Comoros** | A justice ministry contact form takes complaints; two programme grievance mechanisms are being stood up.<br><br>No government-wide feedback channel exists. What the repository holds is one ministry's form and two programmes' mechanisms.<br>The justice ministry's live contact form lets a citizen select a complaint as the object of a request, alongside administrative information, case follow-up and document access; no response time or case count is stated.<br>2026-03 - a national consultation of about sixty participants worked to operationalise a grievance redress mechanism under a food systems programme, with in-person, digital and formal channels and escalation to regional structures.<br>2026-03 - a water and sanitation programme plans a public feedback and grievance channel with a target of settling complaints within seventy-two hours, planned rather than delivered. | MOVEMENT |
| **Congo** | A channel for reporting irregularities is published. No volume of reports received or resolved is stated.<br><br>A published channel invites the reporting of irregularities.<br>It is the only citizen feedback route the repository holds for Congo. Nothing states how many reports it receives, how they are handled, or whether any has been resolved. | MOVEMENT |
| **Cote d'Ivoire** | A consumer grievance platform launched in July 2026 at FCFA 150 per report, and a telecoms complaints procedure was validated.<br><br>2026-07-30 - a consumer association launched an application and web platform at FCFA 150 per report, with eight stages from filing through mediation to published reports and sectoral dashboards. A consumer association rather than a regulator now holds the national grievance dataset, and charges for entry to it.<br>2026-08-13 to 14 - a procedure for handling consumer complaints on electronic communications was validated and sent to the regulator's council for adoption.<br>A financial-service rating pilot recorded 2,234 evaluations to 31 March 2026, 60% satisfactory and 40% unsatisfactory, with rollout stated for May 2026; nothing establishes that rollout happened. | MOVEMENT<br>the national grievance dataset now sits with a consumer association that charges for entry |
| **Djibouti** | A complaint-management portal is in service at the urban rehabilitation agency; its scope is that agency alone.<br><br>Nothing of the kind was on record when the period opened. The urban rehabilitation agency now operates a complaint-management portal that routes recovery and technical problems to named internal divisions.<br>That is one agency, not a government channel. No whole-of-government feedback mechanism, service-standard commitment or response-time figure is published, and no complaint volume for the portal itself appears on file.<br>The electronic official journal is the other public-facing service on record, and it publishes rather than receives. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **DR Congo** | The regulator set a binding complaint escalation path by communique of 22 July 2026: 30 working days with the operator, then referral.<br><br>2026-07-22 - a communique signed by the regulator's president set a binding escalation path: complain to the operator first and allow a maximum of 30 working days, then refer to the regulator by a free line, an online form or physical filing, with a reasoned opinion undertaken within 30 days.<br>The communique itself is not held; the regulator's site is script-rendered and exposes no document path. No complaint volume, opinion or enforcement outcome has been published since, and the tariff changes subscribers report in the east went unannounced without any complaint under the new path reaching the record. | MOVEMENT |
| **Egypt** | The complaints system handled about 229,000 cases in July 2026, while 2,600 appeals followed about 850,000 ration-card deletions.<br><br>2026-07 - the system handled about 229,000 complaints, requests and inquiries, 84% referred to the responsible authority, 14% closed and the rest under review, with governorates taking 17% of referrals and nine of them handling 74% of that share. Referral is not resolution: no outcome, resolution time or satisfaction measure sits behind the referred share.<br>Against that, about 850,000 ration cards were deleted under criteria strictly enforced from June 2026, with 2,600 appeals filed, about 0.3%, the ministry attributing the low rate to document hurdles - applicants must obtain proof from other agencies before an appeal can be assessed, and name collisions and stale entries require correction at the agency holding the original record.<br>2026-07 - data-update forms began to be accepted at 500 post offices on Friday afternoons and Saturday mornings alongside the online route, with a daily adjudication committee and results notified by text.<br>2026-H1 - the telecoms regulator logged 141,224 consumer complaints and a 97% operator response rate on escalated complaints, at an average 0.70 days; response is the operators' measure, not resolution. | MIXED<br>the unified complaints system handled about 229,000 cases in a single month while ration-card appeals ran at 0.3% of deletions and had to be reopened at post offices |
| **Equatorial Guinea** | No complaints channel exists; redress came by Vice-Presidential intervention in the one recorded case.<br><br>The state's citizen-facing digital layer is an administrative procedure tracker and the document services around it. Nothing in the repository offers a route to complain.<br>The one recorded remedy came from the top: the Vice-President found an unauthorised fee scheme and ordered a bank to repay 182m CFA to 12,000 customers in April 2026. | NO CHANGE |
| **Eritrea** | The state telecommunications provider runs a web complaint form for internet faults; no whole-of-government channel exists (complaint hub).<br><br>The sole state telecommunications provider operates a live web form for internet-connectivity, website-access and web-application problems, with telephone and email alternatives (complaint hub). It is the clearest operational digital feedback channel located, and it is narrowly sector-specific.<br>Nothing on the repository records a government complaint portal, a service-standards charter or a published response record, and there is no freedom of information law under which an unanswered complaint could be pursued (review contribution).<br>The repository holds no volume of complaints made or resolved. | NO CHANGE<br>a first statement of the position and the channel is one operator's, not government's |
| **Eswatini** | One public entity launched a feedback platform in June 2026; the only government-wide channel is a grievance mechanism committed in a draft project plan.<br><br>The housing board introduced a net promoter score platform taking feedback across its offices, digital channels and services (platform). It is one entity's own channel.<br>The Digital Eswatini project's stakeholder engagement plan commits to a multi-channel grievance redress mechanism including an online portal (plan); the plan is a draft and carries no portal address, complaint count or response standard.<br>The regulator adjudicates statutory complaints in the communications sector, which is a sectoral route rather than a service-delivery one.<br>31 of 419 government services are online. A feedback portal for a service that is not online has nothing to be a portal to. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Ethiopia** | A secure corruption reporting and case-tracking channel launched across the state holding company's portfolio (Adera).<br><br>Adera launched in January 2026 as a secure corruption reporting and case-tracking channel for the public and for employees across Ethiopian Investment Holdings' portfolio companies, with anonymity and report tracking (Adera).<br>The unified public service application was inaugurated in June 2026, described by the Prime Minister as bringing services from across institutions onto one platform, saving citizens' time and closing corruption gaps (inauguration).<br>Both are channels into the state rather than published feedback: the repository holds no complaint volumes, response times or resolution rates for either, so whether they function as feedback loops is not evidenced. | MOVEMENT |
| **Gabon** | The regulator reactivated a consumer short code on 20 August 2026 and set out a three-tier complaint route; administrations receive citizens through a reception and information service under a 2014 charter.<br><br>The standing arrangement is analogue: a reception and information service which registers users and passes their data to a studies and surveys service, under a 2014 reception charter.<br>2026-08-20 - the communications regulator reactivated a short code for consumer information and orientation after a period of unavailability, setting out a three-tier route — complaint to the operator first, then referral to the regulator, with quality incidents reported through an application — and presenting a standing exchange committee created by deliberation of 23 March 2026. A reactivation is the movement, which says what the position was before it.<br>2025-11 - a statistics project's grievance mechanism, explained at a provincial session, accepts complaints about enumerator conduct, property damage, construction nuisance and gender-based violence by project personnel, on a fixed 21-day handling deadline.<br>No national feedback portal exists, and no complaint volume or resolution figure is published for any of the three. | MOVEMENT |
| **Gambia** | The 148 line is sectoral; draft complaints regulations opened for comment in April 2026.<br><br>The toll-free line and its escalation flow handle utility complaints and are not a consolidated national feedback platform. Nothing else in the repository offers citizens a route into government services.<br>The draft complaints, investigations and consumer protection regulations were out for comment from 1 to 10 April 2026 and are not in force. The fact-check centre's public audit trail is the only other published feedback channel. | MOVEMENT |
| **Ghana** | The central services portal carries a live feedback function and a sectoral complaints portal launched in March 2026.<br><br>2026-05-30 - a ministerial statement establishes that the central digital-services portal is operational with a live feedback function and is being redesigned under the financed acceleration project into a citizen-centred one-stop shop, the redesign still at planning and stakeholder alignment.<br>2026-03-16 - the civil aviation authority launched a self-service digital feedback channel for air passengers, reachable from its website and from codes at airport terminals, with automated acknowledgement by email and text, replacing manual complaint channels.<br>Neither publishes a complaint volume, a response time or a resolution rate, so what these channels receive and what happens to it is not on the record. | MOVEMENT |
| **Guinea** | A civil-service housing registration platform opened in August 2026, its communique warning that payments made outside it engage no government responsibility.<br><br>The ministry directed officials to use the official platform alone to complete an interest survey and to read the eligibility conditions, warning that no registration, fee or intervention made outside the announced arrangement engages the government's responsibility (communique).<br>The warning is the notable part: it names the fraud the platform is meant to displace.<br>A national vehicle-attestation platform was contracted to two foreign suppliers in August 2025 with no service date published (vehicle platform). | MOVEMENT |
| **Guinea-Bissau** | A youth feedback platform launched on text message and messaging apps in October 2025.<br><br>The platform launched on 1 October 2025 with an international agency and a mobile operator is the repository's only citizen feedback channel for Guinea-Bissau, and it is youth-specific.<br>A second was piloted rather than launched: a civic input application in late 2025. No response or resolution figure is published for either. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Kenya** | Escalated consumer complaints to the regulator rose to 670 in the quarter to June 2026 from 362 two quarters earlier.<br><br>They were 563 in the prior quarter, with 548 or 82 per cent resolved (returns); data services drew 195 complaints against 44 for voice, data billing and charges was the largest single category at 75, and the regulator separately logged 19 data-breach complaints (returns).<br>These are escalated complaints only and no comparable series before October 2025 is held, so the rise measures escalation rather than dissatisfaction.<br>On the other side of the counter, a diaspora portal went live on the national platform for registration, missing-person and death reporting, crisis mapping and a 24-hour response centre, with no user or transaction figure held (diaspora portal). | REGRESSED |
| **Lesotho** | The crime-reporting app launched as a zero-rated feedback channel, alongside the standing contact centre.<br><br>2022-05-17 — the National Contact Centre opened as the citizen feedback mechanism.<br>2025-10-24 — the Ombudsman opened procurement for an electronic case management system to replace manual complaint recording.<br>2026-04-20 — the crime and violence reporting app launched nationally as a zero-rated channel.<br>None of the three publishes a volume, response time or resolution figure.<br>2026-08-26 - the communications authority published its 2026 consumer perception survey; the repository holds the notice, not the findings. | MOVEMENT |
| **Liberia** | A youth feedback platform was relaunched in August 2026 on an encrypted messaging channel, targeting at least 8,000 reporters.<br><br>It is run by two United Nations agencies with an embassy's support under a joint programme with government, letting young people answer polls on health, water and sanitation and other social issues with responses analysable by county (relaunch).<br>The channel is tied to a single mobile operator's cards, which bounds who can take part, and no baseline participation figure or publication rule for the results is stated. | MOVEMENT |
| **Libya** | The Raqib platform takes complaints and violation reports against about 750 state bodies.<br><br>The oversight authority launched the platform at a Tripoli anti-corruption event in December 2025.<br>It is live and its scope is stated: complaints and violation reports against about 750 reportable state bodies. No count of reports received or resolved is published, so its use cannot be measured from the record. | MOVEMENT |
| **Madagascar** | The anti-corruption bureau's anonymous reporting platform carried 242 reports in 2024, the only feedback channel held.<br><br>The tax directorate launched the Torohy platform on 9 October 2026 for the public to report corruption and related offences in the tax administration; the head of state asked for the same mechanism at customs and the treasury. The repository holds no count of reports.<br>The bureau's annual report records 242 reports received through its anonymous digital whistleblowing platform in 2024, alongside a named administrative-procedure digitalisation programme (report).<br>The national police launched a reporting and case-tracking platform for gender-based violence and missing persons in July 2026 (platform).<br>Both are reporting channels for specific harms. No general citizen feedback or grievance portal for public services, no service-level complaint mechanism and no resolution figure is held. | MOVEMENT |
| **Malawi** | A toll-free short code opened in February 2026 beside an app launched in August 2025.<br><br>The statutory anchor is thirty years old: the Ombudsman Act establishes the power to receive and investigate citizen complaints against government organs, and no caseload, resolution rate or digital channel of its own is on file for it.<br>2025-08 - the anti-corruption bureau launched a secure mobile application letting citizens report corruption by text, audio or image, with anonymity and case tracking.<br>2026-02 - government opened a toll-free national short code as a centralised line for corruption, poor service delivery and abuse of office.<br>Two channels in seven months and no published count of reports received, actioned or closed on either. A channel nobody reports on is indistinguishable from one nobody uses. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Mali** | A citizen participation project launched in August 2026, alongside a citizen application for reporting content.<br><br>Both instances in this window are about speech rather than service delivery. The government launched a citizen participation project in August 2026, described a few days later as digital participation, and a women-led team built an application for citizens to report and check content against disinformation.<br>No portal takes complaints about a public service, and no volume of feedback made or resolved is published. The context is a civic space assessment of December 2025 and prosecutions of speech before the cybercrime chamber, which is the other half of what a feedback channel means here. | MOVEMENT |
| **Mauritania** | The complaints platform handled 97 per cent of what it received in its first twelve months, on the minister's own account.<br><br>The platform was launched by the Prime Minister on 22 October 2024 to receive and handle citizens' complaints (launch), and the digital minister gave the twelve-month figure at the government spokesman's briefing (result).<br>Handled is the minister's own word, and no volume, category breakdown, resolution time or outcome is published beside the 97 per cent, so what it counts is not established. | MOVEMENT |
| **Mauritius** | The government superapp gained a reporting service in July 2026, beside a citizen support portal debated in 2025.<br><br>A citizen support portal was put to the National Assembly in July 2025 (debate).<br>The government superapp soft-launched in January 2026 (launch).<br>An artificial-intelligence-enabled water leakage reporting service was added to it in July 2026 (service). No case volume or resolution rate is published for either channel, so the repository holds the mechanisms and not their effect. | MOVEMENT |
| **Morocco** | The ombudsman opened 9,958 files in 2025, up more than a quarter, while a police reporting platform has taken 12,614 reports since June 2024.<br><br>The ombudsman's 2025 report gives 9,958 files opened, 1,653 settlement decisions, a mean 815 days to implement a recommendation and 774 days to close a file ending in one (report); the repository holds press accounts of the report rather than the report (report, account).<br>The police reporting platform launched in June 2024 and had taken 12,614 reports by the end of that year, with no later count held (platform). | MIXED<br>a police reporting platform in service against an ombudsman caseload up more than a quarter |
| **Mozambique** | A national procurement whistleblowing line was agreed in November 2025 and a personal-data breach reporting platform launched in January 2026; the standing municipal grievance portal is offline.<br><br>2026-01-28 — the ICT institute launched a platform for citizens to report personal-data breaches and misuse, with a published complaint-handling workflow.<br>2025-11-12 — the finance ministry and the prosecutor-general signed a memorandum establishing a national confidential reporting line for citizens, suppliers and public servants to report corruption in public procurement.<br>The standing channel is not working. The municipal development programme's grievance mechanism — an online form with tracking, a phone line and dedicated addresses — states on its own page that it is offline and read-only. Two new channels opened in the window and no complaint volume, response time or resolution rate is published for any of the three, so what reaches a decision cannot be stated. | MOVEMENT<br>two national reporting channels opened while the standing municipal portal is offline |
| **Namibia** | The Ombudsman takes complaints online into an electronic case system, and two regulators launched an artificial-intelligence complaint pilot in December 2025.<br><br>The Ombudsman's annual report for 2024 records intake by online submission, website form, electronic mail, short message and social media, feeding an electronic case management system (report).<br>The central bank and the communications regulator launched a pilot connecting over 2,000 banking, insurance, non-banking and telecommunications businesses into one multilingual complaint-resolution platform speaking Afrikaans, English, German and Oshiwambo (pilot).<br>The health ministry launched a standard operating procedure for complaints at public health facilities in June 2026 (procedure).<br>A free application takes public reports of infrastructure faults. No complaint volume or resolution rate is published for any of the four channels. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Niger** | Project-level complaint channels relaunched at Diffa in June 2026 and went online for a five-region programme; there is no national portal.<br><br>A resilience programme's online complaints form was live by 3 November 2025, covering information requests, beneficiary selection and exclusion, corruption allegations, environmental and social issues and staff conduct across 15 communes in five regions.<br>A governance project relaunched its regional complaints committee at Diffa on 23 June 2026, mutualised with an education project's committee, giving the population channels to raise complaints and suggestions on public health and education reforms.<br>The cross-cutting institutional route is the ombudsman instituted in August 2011. No single national digital citizen-feedback portal was located, and no volumes of complaints received through any of these channels are published. | MOVEMENT |
| **Nigeria** | Two new complaint channels opened in 2026: an electronic grievance platform inside the presidency and a tax ombud portal.<br><br>The presidency's service-compliance office launched a World Bank-backed electronic grievance management platform on 5 March 2026, a second channel alongside the portal it opened in 2025.<br>The tax ombud launched a website, call centre and case-management portal on 19 May 2026, with complaint tracking, for taxpayers specifically.<br>The 2025 citizens e-feedback portal is unchanged. No complaint volume, resolution rate or agency-coverage figure is published for any of the three, so what moved is the number of channels and not their use.<br>2026-10-01 - Anambra State launched a redesigned website carrying grievance and freedom-of-information channels and an open-government section. | MOVEMENT |
| **Rwanda** | A general-purpose citizen engagement platform was trial-launched in January 2026, and assembly reporting was routed through the electronic complaints system in June.<br><br>The development board announced a planned Business Obstacles Alert platform on 8 October 2026, for businesses to report and track obstacles in accessing public services after registration. No launch date is stated.<br>The local government and technology ministries trial-launched a general-purpose citizen engagement and feedback platform in January 2026 (launch).<br>Revised citizens' assembly guidelines in June formally route assembly reporting through the electronic citizen complaints system, adding a digital reporting mechanism to a local forum (guidelines).<br>Neither carries a caseload, response-time or resolution figure, and the sector plan's own assessment is that existing forums have not translated into influence over policy and budgeting (plan). | MOVEMENT |
| **Sao Tome and Principe** | A project grievance mechanism runs a green line and complaint boxes across every district, and a youth participation platform passed 12,000 users in June 2026.<br><br>The procurement agency publishes a grievance mechanism with a green line, a general complaints number, a general and per-project email address including one for the digital project, and named physical complaint boxes across all districts and the autonomous region in schools, health posts, district councils and community premises (mechanism).<br>It covers that agency's own projects rather than the administration as a whole, and no national integrated complaints portal or electronic complaints book was located (mechanism).<br>The youth platform marked five years in June 2026 with more than 12,000 young people connected, run by the youth institute with a United Nations agency, and launched a girls' channel described as a response to a request made by girls themselves (platform). | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Senegal** | The ombudsman published a quarterly caseload of 72 complaints, and a sectoral grievance mechanism opened for oil and gas.<br><br>The ombudsman's quarterly account for the fourth quarter of 2025 records 72 complaints received, 63 in treatment with the administrations concerned and 9 closed as private, before the courts or outside its competence, with land matters the largest subject at 23 — a published caseload for the national channel.<br>A multi-channel grievance mechanism for the oil and gas sector launched on 17 March 2026 — messaging application, e-mail, web form and physical boxes — with named principles of accessibility, confidentiality and personal-data protection; its scope is sectoral, not whole-of-government.<br>The standing legal channel is unchanged: any natural or legal person may bring a written complaint about a state administration, a local authority or a public-service body, free of charge and with no time limit, the institution's powers limited to recommendation, proposal and investigation with no coercive power.<br>2026-09-10 - the Council of Ministers directed the state digital company to build an information system to monitor and handle citizens' concerns, with no scope or date stated. | MOVEMENT |
| **Seychelles** | The committed e-engagement portal has not begun; what exists is per-consultation online comment forms.<br><br>The open government action plan's own background section states that the citizen e-engagement feedback portal commitment has not begun (plan).<br>In its place, individual consultations run their own digital routes: the environment ministry opened an online form and email channel for comment on the draft management plan for the country's largest marine park, with comments due 8 May 2026 (consultation).<br>So citizen feedback is collected per exercise by whoever is running it, and the standing channel the plan promised is the thing that has not been built. | MOVEMENT |
| **Sierra Leone** | No general portal: complaints run through the statutory Ombudsman and through project-level grievance mechanisms.<br><br>The Ombudsman Act 1997 is the standing national complaint mechanism, empowering investigation of any administrative act on written complaint by a person claiming injustice from maladministration, with maladministration defined to include failing to reply to correspondence and unreasonable delay; no digital channel appears in the Act (Act).<br>The digital integration project's stakeholder engagement plan sets out a toll-free hotline, SMS, e-mail, community grievance boxes at local council, direct reporting to safeguards specialists and walk-ins, with acknowledgement within two days and a grievance resolution committee meeting monthly (plan); the land administration project reports separately on its own mechanism (report).<br>Both are donor project mechanisms that end with the project. Nothing in the repository is a government service channel for feedback on services generally. | MOVEMENT |
| **Somalia** | A grievance mechanism manual published for the regional digital project sets a multi-level channel with hotline, messaging, email and suggestion boxes.<br><br>The manual establishes a formal grievance and feedback mechanism running from community through federal member state to ministry, combining digital and non-digital channels — hotline, messaging and text, email, suggestion boxes — aligned to the financier's stakeholder-engagement standard (manual).<br>It is project-scoped rather than a government-wide portal, and no caseload figure is published for it.<br>At municipal level a citizen-engagement platform launched in Baidoa in September 2025 (launch); no federal equivalent is held. | MOVEMENT |
| **South Africa** | A province launched a road-defect reporting application that routes each report to the responsible authority, and a municipality launched a service-request channel.<br><br>2026-03-04 — a road-defect reporting application launched, geolocating each report and routing it to the responsible road authority, issuing reference numbers and status updates to the reporter. The routing and the reference number are what distinguish it from a complaints inbox, and no volume figure is published.<br>2026-03-02 — a municipality launched a digital service-reporting channel letting residents log and track requests and receive municipal updates.<br>Both are sub-national. The national channel is older: the Presidential Hotline has run since September 2009 on the state IT agency's case-management platform and was under oversight review in September 2026. None of the three publishes a resolution rate, which is the measure that separates a reporting channel from a service. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|

| **Sudan** | The cabinet opened a complaints and suggestions page on the government portal, and a humanitarian mechanism handled over 230,000 cases in 2025.<br><br>The ministry of cabinet affairs opened a dedicated complaints and suggestions page on the government portal as a direct channel for citizens, for immediate follow-up (announcement). No caseload or response figure is published for it.<br>The inter-agency mechanism — digital channels plus over 150 community champions, almost 20 of them with disabilities — received more than 230,000 feedback cases in 2025 with almost 90 per cent closed, and over 570 community reports covering the needs of more than 3 million people (chapter).<br>The same chapter records 57 per cent of consultation respondents not knowing how to submit feedback at all (chapter). | MOVEMENT |
| **Tanzania** | Using the national feedback system is a legal requirement for public bodies, and complaints can now be routed to named leaders.<br><br>Use of the national citizen-feedback system is a legal requirement for all public institutions, reachable by website, application and short code, with a first cohort of 105 trained feedback officers.<br>An upgrade announced in the President's Office hundred-day report lets citizens direct complaints to national, regional and district leaders through web, application, short code and text message.<br>A legal duty to operate the channel is on the record; no complaint volume, response time or resolution rate is, so whether the channel is answered cannot be told from what is published. | MOVEMENT |
| **Togo** | There is no single national complaints portal; the telecoms regulator's channels are the sector's mechanism and a new sanitation line opened in 2026.<br><br>The regulator takes complaints by free call centre, physical mail, e-mail, messaging apps, a web form, chat and callback, with the form naming the telecom and postal operators complainable against. It is the mechanism itself, not a description of one.<br>From 26 May 2026 it ran a nationwide mobile-user satisfaction survey covering call quality, coverage, internet connection, service availability and the handling of complaints, with results to feed operator performance assessment.<br>On 19 January 2026 the sanitation agency opened a dedicated messaging line for Greater Lome taking photographs, video and geolocation alongside its existing green line. Both are sector-specific and neither is national in scope. | MOVEMENT |
| **Tunisia** | A petition and feedback portal constituted by decree in 2019 got monthly training for public agents from September 2025.<br><br>A December 2019 decree constitutes the national citizen interaction system, letting users file petitions, proposals, notifications and guidance requests and track them online to an electronically signed reply, assigning processing to citizen-relations offices and central management to the head of government's citizen relations office.<br>The national school of administration opened a rolling monthly remote training programme for public agents on the portal from September 2025, implementing a major projects committee decision so that citizens can report difficulties with administrative services immediately.<br>No petition volume, response time or resolution rate has ever been published, so the portal's use cannot be told from its existence. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Uganda** | Six of nineteen service centres were operational at a readiness inspection, and the two accounts conflict on the early-2026 operational count.<br><br>Six of nineteen were operational at the inspection, and two accounts conflict on the early-2026 count (centres, construction).<br>A further centre began construction on a USh4bn contract at the postal service's premises, on a model cabinet approved in 2019 (centre).<br>Their throughput was made contingent on a backbone phase whose latest reported position is a 2023 loan approval, so the constraint on the one-stop centres sits outside the centre programme. | MOVEMENT |
| **Zambia** | Health charters linked facility accountability to the citizen support portal, and labour cases now reach districts with no office through it.<br><br>2025-01 — cabinet office launched the national citizen support portal.<br>2025-11 — national health service delivery charters formally linked facility-level accountability to the portal and to the anti-corruption commission's whistleblower system — a feedback channel gaining a service standard to be measured against, which is what turns a complaint box into accountability.<br>2026-08 — labour ministry staff were trained to handle labour cases through the portal, extending it to districts with no physical office. No case volume, resolution rate or response time for the portal is published, so its reach can be described and its performance cannot. | MOVEMENT |
| **Zimbabwe** | 409 free public wireless hotspots are deploying, and a digital centres programme is described as established nationwide offering free internet, equipment and literacy training.<br><br>The hotspot figure is ministry-reported (hotspots).<br>The digital centres are described as established nationwide with no count, location list or usage figure (centres, kits).<br>A presidential internet scheme is cited as the channel for satellite access with no site count published, and its start date is padded to 2025 because the source says only "earlier this year" (scheme). | MOVEMENT |

## Citizen participation in policy

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Algeria** | The finance ministry's budget reform programme lists citizen participation in budget policy; no consultation is recorded.<br><br>The ministry's page on the organic budget law reform programme explicitly lists citizen participation in the preparation of budget policies among its aims.<br>No consultation, submission count, published response or participation mechanism follows from it anywhere on this ledger.<br>The nearest working channel is a grievance one rather than a policy one: the ombudsman named digitisation of the citizen complaints register as a priority in May 2026, and the virtual citizen reception this ledger holds separately carries no volume figure. | NO CHANGE<br>a first stated position with no earlier account behind it |
| **Angola** | Two instruments opened or closed public consultation in the window, on digital government and on data protection.<br><br>2026-05-06 — public consultation opened on a digital government bill, framed expressly around ending the dispersion of sector rules since 1997 and keeping the digital law and the data-protection law in step, against a stated administrative reorganisation running to 2027. No draft text and no tabling date is held.<br>2026-06-17 — consultation closed on the data protection revision, due at the Council of Ministers and then parliament.<br>Consultation is happening and its effect is not visible: no source publishes who responded to either exercise, what was said, or what changed in a text as a result. Set against them, parliament rejected the one amendment that would have opened the citizen and electoral databases to parties and citizens, reported under data protection legislation. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Benin** | Budget transparency scores 77 out of 100 with 52 on participation, on a communal framework in place since 1999.<br><br>The communal organisation law of 1997, promulgated in January 1999, is the standing framework for participation at local level.<br>2026-06-18 — the Open Budget Survey 2025 scores Benin 77 on transparency and 52 on participation. Participation is the weakest of the survey's three scores and the only one this indicator turns on. | MOVEMENT |
| **Botswana** | The pre-budget consultation and constitutional court consultations both ran in the window, on top of the statutory local channel.<br><br>2012 — the Local Government Act establishes councils and, at Part XII, the district, urban, village and ward development committees that carry citizen participation into local planning.<br>2026-01-27 — the pre-budget consultation gathered stakeholders in Gaborone ahead of the 2026/27 budget.<br>2026-01-29 — trade unions and faith bodies were consulted on the proposed constitutional court, framed as giving vulnerable citizens a route to challenge unfair decisions.<br>No participation figure, and no record of how a submission changed a decision, is held. | MOVEMENT |
| **Burkina Faso** | A national digital citizen-petitions platform launched on 5 May 2026. No threshold, response duty or outcome is published.<br><br>The platform is the one standing participation channel the repository holds: a national digital citizen-petitions platform launched on 5 May 2026 by the digital transition ministry. Nothing states what number of signatures obliges a response, who must answer, or whether any petition has been answered.<br>Participation of the organised sort runs through consultations the state convenes: formal parliamentary hearings with the internet society chapter and the digital-sector federation during drafting of the information-systems security law, and an artificial-intelligence roadmap validated with the private sector, universities, research centres, civil society and the diaspora.<br>The regulator of public communication is meanwhile being folded into a merged authority whose consultation duties are not stated. | MOVEMENT |
| **Burundi** | An open online consultation ran on a donor partnership framework, and a data governance strategy was validated with public, private and civil-society actors.<br><br>The communal administration statute is the founding basis for participation: public plenary sessions of the communal council, meetings open to hill councils and associations, and consultative hill and quarter development committees.<br>2025-11-06 to 07 — a national validation workshop for the first data governance strategy followed a stakeholder engagement workshop that brought public, private and civil-society actors together to identify priorities.<br>2026-04-21 to 05-05 — an open online consultation on a donor partnership framework took views from civil-society organisations, non-governmental organisations, the private sector, academia and the media. It is the clearest instance in the window of an online consultation channel addressed to Burundians — and it was opened by an external body rather than by government. | MOVEMENT |
| **Cameroon** | The local authorities code requires councils to publish records, budgets, projects and plans on their own electronic site and establishes citizen proposals to communal and regional executives.<br><br>Two provisions carry it. Article 40(3) requires deliberative-body records, budgets, projects, performance reports and development plans to be published on the local authority's own electronic site. Articles 40 and 41, under a section on citizen participation in communal and regional action, establish the mechanism for citizen proposals to communal and regional executives. The capture covers 55 of 372 articles.<br>No compliance figure for the publication duty is published, and against it 48.6 per cent of councils in one region operate functional websites — so for at least half of them the duty cannot be met.<br>No count of proposals made under the participation mechanism, and no response to any, is on the record. The national forum that discusses digital policy issued no resolution or communique. | NO CHANGE<br>a standing position the repository holds for the first time |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Central African Republic** | Participation is not a channel on this repository. The centralised government portal delivers services, and the state is extending subscriber tracing.<br><br>Nothing on the repository describes a consultation, a comment procedure or a participatory forum on digital or data policy. What exists is delivery in one direction: a centralised government portal and a unified public services portal, with an operator contributing to accessible public digital services.<br>The one instance of a public body raising a policy question in the window came from a regulator rather than from citizens: the request for tighter identification against artificial-intelligence disinformation. Set against that, the state is extending tracing of citizens through mobile subscriber cards. | NO CHANGE |
| **Chad** | The data governance strategy consultations of May 2026 convened ministries, parliament, regulators, private sector, academia and civil society.<br><br>Chad is developing a national data governance strategy through stakeholder consultations held from 13 to 15 May 2026 and a validation workshop on 21 May, convening ministries, the National Assembly, regulators, the private sector, academia and civil society, with stated attention to women, youth and people with disabilities; the same record puts Chad's data-governance maturity self-assessment at 30.27 per cent (consultations).<br>The government's general policy declaration commits to an inclusive law- and policy-making mechanism and a citizen oversight mechanism through digital innovation (declaration).<br>Neither mechanism is established, and the consultations are the strategy's own process rather than a standing channel.<br>2026-10-07 - the ministry and the United Nations regional commission validated the national data governance strategy at a workshop in N'Djamena, on seven pillars. | MOVEMENT |
| **Comoros** | The data strategy was validated through multistakeholder engagement with ministries, universities, private sector and civil society.<br><br>2026-07 - the draft strategy was reviewed and collectively validated over two days with ministers, regulators, private sector, universities, researchers and development partners, after a capacity-building phase in May.<br>2026-08 - the strategy was validated as reflecting Comorians' own priorities, following multistakeholder engagement sessions across those same constituencies. The Council of Ministers had sponsored a working group for it in March.<br>The standing arrangement is narrower and is project governance: the digitalisation support project's steering committee seats government, the regulator, the university and civil-society organisations, and its design records consultations with civil society and local communities.<br>No standing national forum, consultation duty or published response exists on file. | MOVEMENT |
| **Congo** | A citizen watch of 75 observers reported the polling-day telecommunications shutdown at the March 2026 presidential election, the repository's only independent monitoring of it.<br><br>A Congolese association presented a citizen-monitoring report on the March 2026 presidential election in Brazzaville on 25 July 2026, built on 75 citizen observers deployed across several departments using field observation, interviews, social-media analysis and official documents. It named the polling-day telecommunications shutdown among its main findings, alongside difficulties with the reliability of the electoral rolls, questions over the equity of media coverage and the circulation of false information on social networks, while concluding the election was broadly calm (report).<br>The same association ran a third public session on social media and disinformation on 11 August 2026 at a francophone digital campus of the national university (session).<br>Both are civil-society work financed by a foreign embassy's media and information-integrity fund.<br>No official response to the shutdown finding is on the record, and no duration, scope or legal basis for the shutdown itself is published. | MOVEMENT |
| **Cote d'Ivoire** | Public consultations ran through Open Government Week in May 2026, under a 2024-2026 action plan whose institutional frame seats civil society and the private sector equally with the administration.<br><br>2026-05 — Open Government Week ran in-person public consultations, awareness visits and civil-society and private-sector activities under the theme of access to information, with a ministerial declaration on 23 May.<br>The fifth open-government action plan, for 2024-2026, carries twelve commitments and sits the administration in equal number with civil society and the private sector. No record shows a consultation changing a digital instrument. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Djibouti** | The third development plan went to consultations across the five regions after three weeks of thematic debates in the capital, each region required to file a validated contribution.<br><br>2025-08-06 - the plan's regional consultation at Dikhil formed part of consultations across the five regions from 5 to 14 August, after three weeks of thematic debates in Djibouti-Ville, each region required to produce a validated contribution report feeding the national plan.<br>2025-10-06 - co-design workshops brought producers, extension agents, community radios and associations into the design of digital agricultural advisory services, including their data-governance arrangements.<br>2025-12-06 - the draft land policy was reviewed at Tadjourah with regional authorities, covering access to land for women, youth and vulnerable groups.<br>Every one of these is a convened meeting. No standing or online participation channel exists on file. | MOVEMENT |
| **DR Congo** | Two civil-society platforms launched in 2026 — an anonymous oversight platform for extractive revenue on 22 January and a citizen barometer on 9 July. Neither is run by the state.<br><br>2026-01-22 - three non-governmental organisations launched an anonymous citizen-oversight platform for monitoring the use of extractive-sector revenue on social projects, providing citizen reporting and dialogue with public authorities.<br>2026-07-09 - a research institute launched a citizen barometer tracking government commitments and their implementation.<br>The state's own participation duty sits in a 2022 decree fixing the rules for budget-policy formulation, discipline and transparency across central government, provinces and decentralised entities; the capture reaches its first eight articles only, so any citizen-involvement provision in it is not confirmed.<br>A standing consultation mechanism for the digital sector was agreed with an industry network after a tariff dispute, with no constituting text, membership or meeting schedule stated. | MOVEMENT |
| **Egypt** | An electronic participation index of 0.5890 ranks 74 of 193; the one published mechanism is a regulator consultation framework.<br><br>The measured position is an electronic participation index of 0.5890, ranked 74 of 193 in the 2024 survey, against an electronic government development index of 0.6699 and rank 95 - participation scoring better than delivery, which is unusual.<br>The only published mechanism behind it is the telecom regulator's framework for public consultations, with no consultation recorded under it.<br>What operates on any volume is grievance rather than participation: 195,000 complaints, appeals, requests and enquiries in September 2025. | NO CHANGE<br>a first stated position with no earlier account behind it |
| **Equatorial Guinea** | The consultation body created by decree in 2021 had its composition deferred and has not been recorded meeting.<br><br>The decree adopting the national development strategy creates an observatory and defers deciding who sits on it. Nothing since records it constituted.<br>The participation that has happened is by invitation to single events: a national artificial intelligence forum drawing ministry, university and international research participants in May 2026, and an interministerial task force on paying digital creators formed in April. | NO CHANGE |
| **Eritrea** | Participation happens where the government convenes it, as in a geodesign workshop on water. Independent discussion is absent.<br><br>There is convened participation: a geodesign workshop in the capital brought non-governmental contributors into a planning exercise, and the development programme's annual report describes consultation on the national development plan.<br>And there is no forum outside that. A press-freedom index places the country last of 180 for a third consecutive year, and a commission of inquiry found a surveillance system used to instil fear and keep control. No independent publication, permitted civil-society body or public forum argues digital or data policy. Participation here means being invited, and nothing in the window changed who does the inviting. | NO CHANGE |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Eswatini** | Budget consultations took the national budget process to the regions in 2025, run in response to a 2023 national forum resolution.<br><br>The finance minister opened an annual round of regional consultations taking the budget process to citizens, in response to a resolution of the 2023 national forum (consultations).<br>That forum is the constitutional route by which citizens petition: Parliament's own record at the state opening describes it as the standing citizen forum (Parliament).<br>The Prime Minister presented a proposed thirty-year national plan to members of parliament in August 2025 with a call to consult their constituencies (presentation).<br>None of the three produces a document on this repository: no attendance figure, no submission count, no constituency report, and no trace of any of it in the estimates. | MOVEMENT |
| **Ethiopia** | A national dialogue conference of around 4,000 participants concluded in August 2026, deliberating eight national agenda items (conclusion).<br><br>The Ethiopian National Dialogue Conference ran from 15 July to 22 August 2026 with around 4,000 participants deliberating eight national agenda items, and submitted its recommendations to the National Dialogue Commission (conclusion).<br>The World Bank ran stakeholder consultations on its 2027-2036 country partnership framework across government, development partners, the private sector, civil society and regional governments, with an online window in May 2026 (consultations).<br>The standing basis is constitutional: citizens have the right to participate in public affairs directly or through elected representatives, and government has a duty to promote participation in forming national development policies (constitution).<br>The repository holds participation events, not their effect: nothing records which recommendations were adopted. | MOVEMENT |
| **Gabon** | The constitution establishes the right to take part in the management of public affairs and access to administrative documents; the body to carry it is at draft ordinance.<br><br>The constitution founds the common life on pluralist and participatory democracy, establishes the citizen's right to take part in the management of public affairs directly or through elected representatives alongside the right of access to administrative information and documents, and provides for local consultation in its decentralisation title.<br>2026-02-26 - the council of ministers deliberated a draft ordinance creating a national commission for democracy and citizen participation, successor to an earlier council, with a data-collecting observatory attached. It is at draft.<br>What participation looks like in practice is one consultation: the planning ministry published the provisional national development plan online and invited citizens, civil society, the private sector, young people, women and the diaspora to submit observations before it is finalised. No count of submissions, and no response to them, is published. | MOVEMENT |
| **Gambia** | Seven draft instruments went out for public comment in April 2026 under published guidelines.<br><br>The consultation notice of April 2026 is the clearest single act of participation in the window: seven drafts open at once, under guidelines the regulator published alongside them.<br>The national policy handbook mandates participatory, evidence-based policymaking as the standing rule, and validation workshops carried it in practice for telecom pricing tools in November 2025 and a draft e-commerce policy in September 2025. The Communications Bill went the other way: second reading raised unresolved surveillance-oversight concerns. | MOVEMENT |
| **Ghana** | District assembly meetings are to be broadcast live nationwide, with no start date given.<br><br>2026-09-15 — district assembly meetings are to be broadcast live nationwide; no start date is given.<br>The partners named are the civic education commission and the state broadcaster, with 51 vehicles to be bought for them. No broadcast schedule, channel or budget is published. | MOVEMENT |
| **Guinea-Bissau** | A youth dialogue closed with policy recommendations weeks before platforms were blocked nationwide.<br><br>Structured participation was running: a youth leadership dialogue closed with policy recommendations in October 2025, and the peacebuilding fund's progress report covers ten projects from electoral law to digital-media training.<br>The channel narrowed a month later: radio shutdowns and a nationwide block on four major platforms after the November 2025 takeover, followed by a law against false online information in May 2026. | REGRESSED |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Kenya** | A riders' association petition on borrower data and vehicle tracking was committed to the Public Petitions Committee in August 2026.<br><br>It alleges that an asset financier breaches data-protection law in its collection, processing, storage and sharing of borrowers' personal data and in the tracking devices fitted to financed motorcycles (petition).<br>No finding, regulator action or company response is held. It is the repository's clearest instance of a constituency reaching a digital-rights question through Parliament rather than through the regulator. | MOVEMENT |
| **Lesotho** | A public survey of digital services experience opened in August 2026 covering access, usability, trust and skills gaps.<br><br>The survey opened on 9 August 2026, run by the ministry with the United Nations development programme as part of a donor-backed digital readiness assessment, and covers online applications, digital payments and health and education platforms (survey).<br>No closing date, sample target or commitment to publish the results is stated, so the repository records that citizens were asked and not that the answers will be seen. | MOVEMENT |
| **Liberia** | The 2010 Act grounds participation; a November 2025 consultation brought non-state actors into data-policy drafting.<br><br>The Freedom of Information Act defines documents to include electronic records, allows requests by electronic mail, obliges every public authority to maintain a publication scheme in soft copy, and constitutes the Independent Information Commissioner on which the online request platform was later built.<br>A two-day multi-stakeholder consultation on 13-14 November 2025 brought civil society, academia, the private sector, development partners and the media into drafting the National Data Policy. The independent review of the 2024-2026 open government plan rates the electronic procurement rollout and the beneficial-ownership registry its strongest commitments. | NO CHANGE |
| **Libya** | A consultative forum of about 120 members, 35 per cent women, with no binding power.<br><br>The United Nations mission's own account is candid about the limit: about 120 members, 35 per cent of them women, and no binding power over any decision.<br>Other participation is issue-specific and did move: stakeholders neared consensus on a missing-persons draft law at a March 2026 meeting, and the information authority opened community consultations for the seventh national human development report, including a session dedicated to women. | MOVEMENT |
| **Madagascar** | The Refondation implementation programme of November 2025 commits to digitising the electoral roll and to a digital governance mechanism.<br><br>A decree of June 2015 established the local consultation structure for decentralised territorial collectivities, the standing statutory participation mechanism (decree).<br>The state policy implementation programme signed in November 2025 commits to accelerating digital transformation of the state through a national digitalisation policy and an inter-institutional mechanism piloted from the prime minister's office, and to digitising the electoral roll and computerising the electoral commission's process (programme).<br>No digital participation platform, consultation portal or published response to a consultation is held. The commitments are to digitise an electoral process rather than to open one. | MOVEMENT |
| **Malawi** | Parliament and civil society launched a structured platform on 18 March 2026, replacing fragmented engagement.<br><br>The right is constitutional: authority derives from the people at section 6, and section 40 carries political rights to participate in and influence government policy. No implementing instrument attaches to it.<br>2026-03 - a civil-society coalition put district-level budget-tracking evidence to parliamentary committees to lobby on education financing, which is participation carrying its own data.<br>2026-03 - Parliament and civil-society organisations met formally for the first time on 18 March, launching a structured platform.<br>What the repository cannot show is any of it changing a text: no submission, response or amendment traceable to a consultation appears on the record. | MOVEMENT |
| **Mali** | A project on digital tools and citizen participation reached the stage of capitalising on what it has achieved (report).<br><br>A project on digital tools and citizen participation reached the stage of capitalising on what it has achieved (report). No participation figure is stated. No participant count, submission volume or policy outcome is published for it. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Mauritania** | Technical assistance for a citizen participation platform was provisionally awarded in May 2026, against an e-participation policy still held as a 2023 draft.<br><br>The draft policy was proposed by a UN regional commission in December 2023, benchmarked against Tunisia, Morocco and Denmark and carrying a vision, strategic objectives and an assessment of the country's e-participation (policy).<br>The assistance was provisionally awarded under the regional digital integration programme (award).<br>A provisional award is not a contract: no supplier, value, scope or delivery date is published, and the policy carries no adoption instrument. | MOVEMENT |
| **Mauritius** | Two consultations opened inside four months: national consultations on a 2050 vision and online pre-budget consultations.<br><br>Periodic reporting to the regional human rights commission is the standing record of participation (report).<br>National consultations on a 2050 vision were launched in December 2025 (launch).<br>Pre-budget consultations for 2026-2027 were opened online in March 2026 (consultations). No account of a consultation changing a published position is held, and no submission count is published for either. | MOVEMENT |
| **Morocco** | An online proxy-voting platform for citizens resident abroad opened in August 2026 for the September legislative elections.<br><br>The platform runs from 24 August 2026 until noon on 22 September under organic law 27.11: the voter abroad names a proxy registered on a domestic electoral roll, certifies the mandate personally, then downloads and sends the mandate on to the proxy (platform).<br>Polling-station notifications are delivered over the same period, and the ministry stressed that the notification is not required to vote, the national identity card remaining the only accepted proof of identity at the polling station. | MOVEMENT |
| **Mozambique** | The five-year government programme commits to citizen and non-state participation in policy, and a national dialogue opened public consultation in September 2025 with ten working groups drawing partly on a public call.<br><br>2025-09-10 — the Presidency launched the national and diaspora public-consultation phase of an Inclusive National Dialogue, with a technical commission including civil-society members and ten working groups, drawing partly on a public call, covering district, provincial, central and diaspora levels — the widest-reach participation channel opened in the window.<br>2026-03-04 — the social security institute opened a nationwide consultation across all provinces, to 27 March, on revising the compulsory social security regulation, consulting workers, employers, unions, pensioners, academia and civil society against a recorded base of more than 2.8 million worker-beneficiaries and about 42,000 pensioners.<br>The commitment behind both is Programme 4.1.3 of the government's five-year programme, on democracy and participation. What the repository does not hold is any account of what a consultation changed: no submission count, response or published outcome for either exercise. | MOVEMENT |
| **Namibia** | An electronic identity awareness campaign is running region by region in local languages, with a youth ambassadors programme promoting take-up.<br><br>The campaign opened in the capital region and its Omaheke leg ran across all seven constituencies in late July and early August 2026, run by home affairs with a development agency and the regulator, with a brand ambassador running sessions in local languages (campaign, conference, preparation).<br>A youth ambassadors programme uses young people to promote take-up and civic participation; participant numbers, cost, duration and any enrolment effect are not stated, and the funding agency's own account is the only source (ambassadors). | MOVEMENT |

|---|---|---|
| **Niger** | The decentralisation consultation body was revived in November 2025 after three years, alongside the transition's own consultative council.<br><br>The national decentralisation consultation framework met on 27 November 2025 after three years of inactivity, bringing the state, local authorities, traditional chieftaincy, civil society, non-governmental organisations and communities together to review reforms and propose further transfer of competences and resources to communes.<br>The transition's consultative council opened its second 2025 session on 16 December 2025, examining draft ordinances on land tenure, agricultural orientation and public holidays alongside government communications on the five-year programme.<br>The statutory framework is the 2010 local government code, which provides for public information duties, public debate on local budgets and programmes and consultation of residents.<br>Both bodies are appointed rather than elected, and no digital consultation channel is on file. | MOVEMENT |
| **Nigeria** | A fourth open government action plan was published in April 2026 days before the third was reported as failing its budget commitments.<br><br>The plan published on 17 April 2026 is a youth-shaped twelve-commitment framework covering digital governance and citizen participation.<br>The National Assembly declared an Open Week on 15 July 2026, a legislative-branch engagement event distinct from the executive-led plan.<br>Against those, the independent reporting mechanism's final report of 28 April 2026 names the open-budget commitments among those that did not achieve their intended results, and records co-creation concentrated in Abuja and Lagos, with logistics costs and accessibility barriers limiting it elsewhere. The new plan carries no successor budget-participation commitment the repository can point to.<br>2026-09-28 - the National Assembly's library trust fund said it is building a Bills Tracker, a legislative app and electronic repositories, and will translate federal laws into Hausa, Yoruba and Igbo; no launch date is stated. | MIXED<br>the 2023-2025 plan's budget commitments failed while a fourth action plan and a parliamentary open week arrived |
| **Rwanda** | The twentieth national dialogue resolved that performance contracts should better reflect citizens' concerns — the government's own account of a gap it names.<br><br>The sector strategic plan states in its own self-assessment that existing dialogue forums have not yet translated into effective influence over policy and budgeting (plan).<br>The national dialogue convened 5 and 6 February 2026 resolved that performance contracts should better reflect citizens' concerns (resolutions) — a resolution that answers the plan's own criticism.<br>Assembly frequency doubled and reporting moved onto the electronic complaints system in June (guidelines). Whether any of it changes a budget line is not something the repository can show. | MOVEMENT |
| **Sao Tome and Principe** | Two districts turned resident-identified priorities into completed works in six and a half months through pilot participatory budgeting exercises.<br><br>The pilots paved a stretch of road in one district and built a new water capture and distribution system with a decanting process in another, with communities taking part at every stage from problem identification to choosing solutions and delivering the investments (pilots).<br>The project was run by two civil-society organisations with the two district councils, supported by a Portuguese municipality and European funding (pilots). The publisher is the partner municipality rather than a national body, and the source describes pilot experiences rather than a national system.<br>The regulator's two public consultations are the only other participation route held (consultation), and neither records what it changed. | MOVEMENT |
| **Senegal** | Four draft reform laws went to public comment in April 2026, while the 2023-2025 plan's participation commitments saw limited implementation.<br><br>The Presidency placed four finalised draft laws on a public digital platform and invited political actors and civil society to take them up, the same platform launched in May 2025 as the state's channel for citizen contributions to national dialogue, open to citizens in Senegal and the diaspora.<br>The Presidency also opened the first cycle of consultations of a national dialogue day it states is now a fixture of the republican agenda; that first cycle consulted six former prime ministers, not the public, and names no platform, timetable or published output.<br>Against those, the independent results report finds that while the co-creation process met the minimum participation requirements, six of the eight commitments — including those on budget transparency, access to public services, citizen participation and open local governance — saw limited implementation and no early results, blocked by coordination, ownership and funding problems. | MIXED<br>a public draft-legislation channel and an institutionalised dialogue against six of eight open-government commitments that saw no early results |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Seychelles** | Public support for access to government information was measured in a survey round fielded in 2025 and published in August 2026.<br><br>It is the only measure of public opinion on information access in this ledger (support).<br>It arrives in the same dispatch as the media-freedom perception measure and the report of the broadcasting amendment, so a single external survey is carrying the whole of this unit's civic-participation record. | MOVEMENT |
| **Sierra Leone** | The Local Government Act 2022 requires consultation and open council meetings, and the data protection Bill was taken round the country before validation.<br><br>The Act requires ministries to consult, obliges councillors to consult their electorate, opens council and ward committee meetings to the public and establishes ward committees whose resident members are elected at public meetings (Act).<br>Nationwide consultations on the data protection and access to information Bill began in September 2025 (start) and concluded in Bo later that month (conclusion). Budget preparation ran its own bilateral discussions from September 2025 (budget).<br>No consultation report, submission count or record of what changed as a result is published for any of them. | MOVEMENT |
| **Somalia** | A national budget consultation drew 308 in-person and up to 1,700 online participants in October 2025, with recorded questions and agreed follow-up.<br><br>The finance ministry's three-day consultation in Mogadishu ran sessions for federal and member-state government, civil society and marginalised groups, and the private sector and academia, with recorded questions and answers and agreed follow-up actions feeding the 2026 budget (report).<br>The regulator's April 2026 review of the draft cybersecurity framework brought in government, private sector, education, civil society and technical experts (consultation).<br>Both are government-convened. The one instance of independent initiation is a civil-society advocacy position issued in July 2026 (position). | MOVEMENT |
| **South Africa** | A civil-society platform tracking parliament's attendance, bills, committees and ministerial answers passed to a monitoring group as its EU-funded phase closed.<br><br>2026-08-10 — a climate justice coalition submitted concerns to the human rights commission calling for a halt on data-centre developments pending transparent public participation, citing strain on scarce water, land and electricity. No participation process, commission response or moratorium is on record.<br>The route it took is the finding. There is no statutory participation step for these approvals to attach to, so the objection was lodged with a rights body rather than a planning or energy regulator, and it arrived alongside the commission's own call for submissions. Participation happening through a human rights complaint is a description of what the ordinary process does not provide.<br>The ParliMeter platform tracks MP attendance, the progress of bills, committee meetings, questions to ministers and parliament's performance against democratic-parliament indicators; on 9 September 2026 custodianship passed to the Parliamentary Monitoring Group as the EU co-funded phase closed. No funding for the next phase or usage figure is published, and no government-run participation channel is held. | NO CHANGE |
| **South Sudan** | The state's own human rights commission rated the country weak on transparency and participation and very weak on accountability, with access to public information limited.<br><br>Officials of the national human rights commission told a Juba panel on 2 September 2026 that the government treats civil society organisations as enemies or political opponents, rated the country weak on transparency and participation and very weak on accountability, and said access to public information remained limited with civil society given little opportunity to take part in government processes including preparation of the national budget (panel).<br>Participants said the revenue authority, which is required to publish revenue-collection information, has not consistently done so, and that the body responsible for access to information lacks the staff and capacity to enforce the law (panel).<br>No index, methodology or dated measurement sits behind the weak and very weak ratings, and the assessment is the state speaking about itself. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Sudan** | A messaging-app consultation platform with over 9,000 subscribers ran a ceasefire round, and a response plan drew on 3,429 community members.<br><br>The platform, built on a messaging chatbot and a deliberation tool, ran a consultation round in October 2025 gathering citizen input on ceasefire negotiations among communities inside the country and in the diaspora; the operator states it is voluntary and not statistically representative, and complements rather than replaces in-person dialogue (report).<br>A consultation process between August and October 2025 engaged 3,429 community members and 145 community-based organisations, including women-led organisations and organisations of persons with disabilities, across all 18 states, to inform a response plan (chapter).<br>Both are humanitarian. The closest governmental instrument is an engagement outcome in a country team report (report). | MOVEMENT |
| **Tanzania** | Village assemblies, councils and ward development committees are the statutory machinery; nothing digital attaches to them.<br><br>The founding local government statute, in its 2023 consolidated edition, establishes village assemblies, village councils and ward development committees — the statutory machinery through which citizens take part in local decisions.<br>Nothing on the record connects that machinery to a digital channel: no online consultation, no published participation rate and no meeting record. The national feedback system is a complaints route rather than a policy one, and no instrument requires consultation before a policy or a draft law is adopted. | NO CHANGE |
| **Togo** | One ministry publishes a suggestions procedure; no general right to comment on draft laws or decrees was located.<br><br>The procedure on the national service portal lets any person aged 18 or over, resident in Togo or in the diaspora, submit suggestions to improve security services, administrative procedures and civil protection free of charge, with a stated examination and decision step. It is the mechanism itself; the page carries no publication date.<br>Scope is one ministry. This run found no general national procedure giving citizens a right to comment on every draft law or decree, the constitutional consultation route running through the economic and social council instead.<br>The standing multistakeholder route for digital policy specifically is the internet governance forum, annual since 2010. | NO CHANGE |
| **Tunisia** | Consultation on draft policy and legislation is required by a 2018 decree, and no consultation report or annual evaluation is published.<br><br>The 2018 decree requires consultation before adoption of public policies including draft legislation and regulation where they could directly affect stakeholders' vital interests, routes consultation on draft laws and decrees through the national legal-information portal, sets notice periods of 15 and 5 days and minimum durations of 30 and 20 days for the two tracks, and requires a published consultation report attached before adoption.<br>The mechanism is on the record and its use is not. Neither the per-consultation report nor the annual evaluation the decree itself requires is held for any year, and no count of consultations run or of responses received appears anywhere in this repository. | NO CHANGE |
| **Uganda** | A client charter committing to service timelines, feedback and complaint handling was launched in February 2026; no complaint or resolution figure is published against it.<br><br>2026-02 - the ICT ministry launched a client charter setting out service delivery timelines, feedback and complaint handling for digital services, framed round how long a service takes and whether anyone responds.<br>2026-06 - the IT authority issued its own client charter and service delivery standards alongside its strategic plan, which sets public satisfaction with e-government services to rise from 22.2 per cent to 35 per cent by FY2029/30.<br>Consultation happened where a strategy needed it: the artificial-intelligence strategy ran nationwide stakeholder engagements, and a draft National Data Strategy is being developed with civil society and the private sector.<br>No complaint volume, resolution rate or performance report against either charter is published, so whether participation changes anything is not something this repository can say. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Zambia** | More than 11,860 citizen submissions were handed to the President and became an enacted constitutional amendment.<br><br>The 2016 constitutional amendment provides for citizen petition and public involvement in the legislative process.<br>2025-12-02 — more than 11,860 citizen submissions to the constitutional reform process were formally handed to the President, converting a nationwide consultation into a policymaking input.<br>2025-12-18 — a constitutional amendment was enacted creating a mixed-member proportional representation system with reserved National Assembly and council seats for women, youths and persons with disabilities. Consultation reaching enactment inside a month is the rarest sequence on this frame; what is not published is which of the submissions the amendment reflects. | MOVEMENT |
| **Zimbabwe** | A citizen scoring platform launched in June 2026 lets residents rate local-authority service delivery, and the AI strategy records a three-city consultation.<br><br>An artificial-intelligence platform through which citizens rate and flag local-authority service delivery was launched by the President on 18 June 2026, built by a Zimbabwean startup incubated at a state technology institute (platform).<br>The artificial-intelligence strategy names a national multi-stakeholder consultation held in Harare on 28 August 2025 and in Bulawayo and Masvingo on 9 and 11 September 2025, whose interrogation and validation of an earlier draft produced the final text (strategy).<br>Parliament's own record shows the standing scrutiny machinery in operation, the legal committee reporting non-adverse certificates on the statutory instruments gazetted that month (record).<br>No participation, submission or usage count is held for any of the three. | MOVEMENT |

## Gender equity

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Angola** | The 2013 gender policy treats access to information as a sector of special relevance and requires sex-disaggregated statistics for monitoring.<br><br>The framing instrument is a decade old and directly on point. The national policy for gender equality and equity, approved by presidential decree in December 2013, treats access to information and communication as a sector of special relevance, records that women's capacity to access information remains low, and requires sex-disaggregated statistics for monitoring.<br>Nothing in the window measures against it. The regulator's connectivity indicators are not disaggregated by sex, and neither is the bancarisation position. The one register that does collect disaggregated data is the single social register, and it publishes none of it. | NO CHANGE |
| **Benin** | The gender-equality council was established by decree in 2013 and a women's entrepreneurship and access-to-finance project was announced in November 2025.<br><br>The national council for gender equality was established by decree in February 2013.<br>2025-11-26 — the government announced a women's entrepreneurship and access-to-finance project with World Bank support.<br>Neither publishes a digital gender gap: no sex-disaggregated figure for connectivity, device ownership or service use appears on this ledger. | MOVEMENT |
| **Botswana** | A four-pillar gender-responsive violence prevention programme launched in June 2026, with one-stop centres being established.<br><br>2026-03-24 — one-stop service centres are being established to bring medical, legal, counselling and psychosocial support for survivors of gender-based violence under one roof, addressing the gap between reporting and support.<br>2026-06-10 — a joint government and United Nations gender-responsive prevention and response programme was launched on a four-pillar framework.<br>The Department of Gender Affairs is secretariat to the National Gender Commission. No prevalence, caseload or centre-count figure is published. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Burkina Faso** | The only gender-and-digital instrument on the repository ended in 2025 with no evaluation, outturn or beneficiary count.<br><br>A EUR 2.25m grant programme for girls and women in digital ran from 2021 to 2025 and is recorded closed, with no evaluation, outturn or beneficiary count in the repository. It is the only gender-and-digital finance instrument held for the country, and it has ended without a published result.<br>What remains is a training line: 169 young women trained in digital trades in 2025, inside a general skilling programme rather than under any gender instrument.<br>No access, usage or ownership figure is disaggregated by gender anywhere on this ledger — the urban and rural access gap reported under digital divides is explicitly not broken down that way — so the closure removes the only dedicated instrument from a field with no measurement. | REGRESSED |
| **Burundi** | A national survey is the standing sex-disaggregated measure of access to financial and digital services; digital platforms against gender-based violence were built.<br><br>The national financial inclusion survey is the standing sex-disaggregated measure of access to financial and digital financial services in Burundi, and the only recurring gender-disaggregated series the repository holds on this subject.<br>2026-04-09 — the responsible ministry and a UN agency presented digital platforms built under a national gender-based-violence observatory project: a citizen-facing alert and case-management system through which victims report and are referred for assistance, plus an interventions-management system for the institutions involved, funded by the European Union.<br>What is absent is any sex-disaggregated measure of digital access itself — of device ownership, internet use or digital skills — so gender equity is read here through financial services and through a violence-reporting tool rather than through the technology. | MOVEMENT |
| **Cameroon** | A EUR 3m gender-divide project remains active with no dated progress, output or Cameroon-side figure recorded in the window.<br><br>The project is recorded active with EUR 3m committed for 2023 to 2026, and the position is identical at both ends of the window: no dated progress, output or Cameroon-side figure.<br>It is the only finance record in the tracked non-state set classified to any inclusion subject. The repository holds no sex-disaggregated access, usage or ownership figure for Cameroon at all, so a project running to 2026 on closing a gender divide has no measurement of that divide to be read against. | NO CHANGE |
| **Cape Verde** | The country's own figures are that women are 37 per cent of ICT workers, 20 per cent of engineering and technology researchers and 8 per cent of tertiary STEM graduates. No later measurement is held.<br><br>The appraisal document is the only measurement the repository carries: women are 37 per cent of information and communications technology workers, 20 per cent of engineering and technology researchers and 8 per cent of tertiary science and technology graduates, and the project set sex-disaggregated indicators for mobile broadband users, youth certified in digital skills and women-led digital firms, with a target of at least 50 per cent female completion of the state operator's web labs against 36 per cent actual in 2019. It is six years old and nothing has updated it.<br>2026-01-15 - memoranda were signed bringing a bank for young people and women into operation alongside two other financing instruments, inside a package of almost EUR 12 million.<br>2026-03 - the digital week's training container was installed and inaugurated at a secondary school on Brava with about fifteen high-performance computers and two permanent monitors, mounted by a Cabo Verdean startup and aimed by the digital economy minister's own statement at training programmes for the island's young people and women.<br>Both are measures without a measured gap behind them: no participation, completion or employment figure disaggregated by sex has been published since 2020. | MOVEMENT |
| **Central African Republic** | The national review report is the authoritative statement of the digital gender divide, against 4.1% of men and 1.5% of women holding technology competences.<br><br>The national review report of September 2024 is the most authoritative recent statement of the gender dimension of the digital divide.<br>The measured gap beneath it is the household survey's: 4.1% of men and 1.5% of women hold the technology competences it tests - a ratio of nearly three to one on a base so low that both figures are close to zero.<br>No programme, target or obligation addressing it appears on this ledger, and no later measurement exists to say whether it has moved. | NO CHANGE<br>a first stated position with no earlier account behind it |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Chad** | The only quantified gender commitment is a project target of at least 25,000 women and girls trained.<br><br>The digital transformation project financed at 92.2 million dollars targets about 40,000 direct digital-training beneficiaries including at least 25,000 women and girls and 2,000 people with disabilities, alongside broadband access for over four and a half million rural people (project). No sex-disaggregated figure for internet use, mobile ownership or ICT employment in Chad is held, and nothing reports progress against the target. What can be established is what was promised, not what has been delivered. | NO CHANGE |
| **Comoros** | A women-entrepreneur training programme is named as a 2025 milestone in a group's own strategy communication.<br><br>The programme is named as training of women entrepreneurs across the country, with no participant count, budget or start date. It is company-reported through a byline-light press wire and the group's own announcement is not held.<br>Nothing earlier exists to compare it against, so no direction can be stated. The repository holds no sex-disaggregated figure for phone ownership, internet use, account holding or training completion for this country, and the one quantified gender target on file is the share of trainees the technology park states it will reach. | NO CHANGE<br>a first mention with no participant count, budget or start date |
| **Congo** | Six innovation projects were awarded under a women-in-digital programme, and a women's innovation and empowerment forum was held.<br><br>The state reform strategic plan for 2025 to 2029 is the standing framework.<br>2026-03-30 — six innovation projects were awarded under a women-in-digital academy programme.<br>2026-06-22 — a women's innovation and empowerment forum was held.<br>No sex-disaggregated figure for connectivity, device ownership or service use appears at either end.<br>2026-09-11 — the women's consultative council signed a partnership with a Brazzaville training centre to train selected women students in digital trades for six months; no cohort size is given. | MOVEMENT |
| **Cote d'Ivoire** | The only sex-disaggregated measurement is 2017 fieldwork showing a 34-point ownership gap; new programmes state women's targets instead.<br><br>The regulator's Panorama, deposited with the ITU in May 2019 on 2017 fieldwork of 2,892 households, found 81.38% of men against 47.19% of women owning a mobile phone, a 34-point gap, and usage of 85.27% for men against 58.67% for women. Nothing sex-disaggregated has been published since, so the only measurement of the gap is nine years old.<br>What moved instead is programme design. The small-enterprise guarantee windows state attention to women's entrepreneurship, and access to the new digital-fabrication laboratory is stated to target 50% women. Neither carries a baseline or a reported outcome, so neither is measurable against the gap. | MIXED<br>two programmes state women's targets while the only measurement of the access gap is nine years old |
| **Djibouti** | Two training programmes in the period target women explicitly; no gender-disaggregated access figure is published.<br><br>2025-11-24 - the skills programme was launched to train more than 3,000 young people and women by 2029 through a coding campus, regional digital houses and support to business institutions, funded at EUR 7m over four years.<br>2026-05 - a regional call opened gender-sensitive digital-trade training in mobile money, electronic commerce, digital marketing and financial literacy to women and youth enterprises, with women given application priority.<br>Both are commitments to train. | COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **DR Congo** | An operator foundation certified 49 women after a nine-month digital skills and entrepreneurship programme on 9 July 2026. No sex-disaggregated connectivity or usage figure is published.<br><br>2026-07-09 - the certification ceremony in the capital, with participants also in one eastern city, marked 49 women completing a nine-month digital skills and entrepreneurship programme, attended by the gender, family and children minister. It is the only dated gender-focused digital programme outcome in the window.<br>The national project that would move the number states its objective as increasing inclusive access to and use of the internet, without a sex-disaggregated target under it.<br>Forty-nine women is what the repository can count. No gender-disaggregated connectivity or usage figure exists at any date, so neither the gap nor the effect of any programme on it can be stated. | MOVEMENT |
| **Egypt** | Women's financial inclusion reached 72.5% against 19.1% in 2016, and a second accelerator cohort of twelve women-led startups opened.<br><br>Financial inclusion overall went from 76.3% of adults at June 2025 to 79% at end-June 2026, 56.4 million people holding active accounts of a 71.4 million eligible population counting bank accounts, postal accounts, mobile wallets and prepaid cards, with women at 72.5% against 19.1% in 2016 and ages 15 to 35 at 58% against 36.3% in 2020; a second national financial inclusion strategy for 2026-2030 is in development.<br>2026-08-24 - a second accelerator cohort opened with twelve women-led startups and USD 35,000 in equity-free grants split between three at the end; the first edition's outcome is not on file.<br>Against the inclusion gains, the only literacy measure held shows the knowledge barrier to mobile money falling harder on women than on men.<br>Of the 57.01m operator wallets counted in the first half of 2026, about 67% are registered to men and 33% to women, on the telecom regulator's report. | MOVEMENT |
| **Equatorial Guinea** | No sex-disaggregated digital figure is published; the national yearbook carries none.<br><br>The eighth national statistical yearbook publishes civil service headcount, online visas and debt, and no connectivity or digital-skills figure by sex.<br>Nor do the programmes count it: the artificial intelligence and robotics scheme targets 1,000 young people and 400 trainers and the trainer cohort selected 50 from 466 applicants, neither with a sex breakdown. The absence is the finding. | NO CHANGE |
| **Eritrea** | A quarter of the engineering college's 297 graduates were women, and a June 2026 consultancy requires gender-disaggregated analysis.<br><br>The window produced one count and one commitment to counting. The engineering college's commencement reported 297 graduates with 25 per cent of them women. The education ministry's consultancy request requires analysis of teacher deployment and attrition by gender and location, naming weak gender disaggregation as one of the faults it is answering.<br>Behind both sits a register that already disaggregates: the welfare ministry's vulnerability database collects gender-segregated data. What none of this reaches is access itself. No sex-disaggregated figure for phone ownership, internet use or account holding is published for the country at any date. | MOVEMENT<br>in what is measured rather than in access |
| **Eswatini** | Fifty women from government institutions formed the first cohort of a digital academy in July 2026; no gendered access figure is held.<br><br>The country was the African pilot for a women's digital academy, with a first cohort of fifty women drawn from government institutions (academy).<br>The digital readiness assessment places the country at the systematic stage across all six pillars and records a 60 per cent digital-skills gap among government staff (assessment).<br>The FinTech Strategy 2025-2030 commits to new digital financial products for underserved groups by 2028 (strategy).<br>Account ownership stands at 63 per cent, led by mobile money (survey), and is not published split by sex. Neither is internet use, device ownership or digital skill: the repository holds a diagnosis, a cohort of fifty and no measurement.<br>2026-10-07 - the regional alliance opened a workshop to pilot gender impact assessment tools for digital policy, with Eswatini and The Gambia as pilot countries. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Ethiopia** | The rural mobile-internet gender gap is put at 81%, against 29% in urban areas.<br><br>The gap between men's and women's mobile internet use is reported at 81% in rural areas against 29% urban (gender gap).<br>No earlier figure is held, so the level is on the record and the direction is not, and nothing is held on what is being done about it: no target, no programme and no gender-disaggregated figure for identity enrolment, account ownership or device access.<br>2026-09-03 - the corridor programme put training against formalisation rather than connectivity: forty women traders took export-readiness training at Bishoftu on 30 and 31 July 2026 under a EUR 32m European programme, covering formalisation, product standards, export documentation and customs procedure, against a stated 94% of the traders concerned operating unlicensed. That 94% is the programme's characterisation of its own target group, not a national measure. | NO CHANGE<br>a first measurement with no earlier figure behind it |
| **Gabon** | 63.7% of women against 72.4% of men held a financial account in 2024.<br><br>The World Bank's Gabon country factsheet, data as of 2 April 2026, puts accounts at a financial institution at 63.7% of women against 72.4% of men, and use of a mobile phone or the internet to pay bills at 35.4% of women against 40.9% of men, both for 2024; it also records 25.5% of parliamentary seats and 27.6% of ministerial positions held by women.<br>It is the first gender-gap series the repository holds for Gabon, so the level is stated and the direction is not. No national gender-and-ICT survey or results framework reporting against a target is held. | NO CHANGE<br>a first measurement with no earlier figure behind it |
| **Gambia** | A 2025-2034 gender policy replaces one that expired in 2020, and a women's digital-economy project launched in October 2025.<br><br>The policy succeeds an instrument that lapsed in 2020, so the country ran five years without one.<br>The digital-specific action is a project launched in October 2025 to give women-owned small firms digital skills and business capacity. Measurement arrived separately: a gender data dashboard for The Gambia published in April 2026, and connectivity and financial inclusion microdata released in October 2025. No sex-disaggregated internet-use figure is published by the statistics office.<br>2026-10-07 - the regional alliance opened a workshop to pilot gender impact assessment tools for digital policy, with Eswatini and The Gambia as pilot countries. | MOVEMENT |
| **Ghana** | A women's business bundle passed 54,000 subscribers against a 20,000 target for 2028, on a base where women are 14 per cent less likely to use mobile for business.<br><br>The bundle launched in April 2025 for women business owners and had more than 54,000 female subscribers by May 2026 (bundle).<br>The same industry research finds women micro-entrepreneurs 14 per cent less likely than men to use a mobile phone for business and 17 per cent less likely to use one across three or more business use cases, naming affordability of data, low perceived value, weak skills and confidence, and limited access to internet-enabled handsets as the barriers (research).<br>A long-running girls' programme has reached about 18,000 girls and 1,800 teachers since 2012 on a two-week residential model, and added an artificial-intelligence module as its largest curriculum expansion after a vendor agreed free training for 3,000 girls (girls programme); the 18,000 is cumulative rather than annual, and no start date, cohort or delivery report has followed in five months (girls programme). | MIXED<br>a business bundle beat its target while the measured gap in business use of mobile persists |
| **Guinea** | The clearest published sex-disaggregated figures are a survey's: men out-own women on mobile phones 96 per cent to 86 per cent and on computers 11 per cent to 7 per cent.<br><br>The dispatch also gives bank accounts at 13 per cent for men against 8 per cent for women, sets these against a female literacy rate of 22 per cent versus 43.6 per cent for men, and records that 57 per cent of women have no formal education against 43 per cent of men — which is the mechanism behind the access gap rather than a separate finding.<br>Fieldwork was face-to-face in August 2022 and the publisher is a survey organisation rather than the national statistics office, and the questions measure personal ownership rather than internet use.<br>No national sex-disaggregated internet-use series is published, and no country-specific mobile gender gap estimate was located, so regional figures must not be read as this country's. | NO CHANGE<br>a standing position the repository holds for the first time |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Guinea-Bissau** | Women hold 49 per cent of the legal rights men hold and 22 per cent have an account.<br><br>The gender data landscape published in April 2026 is the first sex-disaggregated evidence the repository holds for Guinea-Bissau: women hold 49 per cent of the legal rights men hold, and only 22 per cent have a bank or mobile money account.<br>The training response is small and counted: 50 women completed a seven-day digital security and financial literacy trainer course in July 2026, and more than 260 women traders received regional biometric cards at the border in March. | NO CHANGE<br>a first count with no earlier figure behind it |
| **Kenya** | Internet use runs at 37.8 per cent of men against 32.2 per cent of women, with rural mobile ownership at 48.6 per cent against 64.6 urban.<br><br>Urban internet penetration is 56.5 per cent against 25 per cent rural, and more than 42 per cent of women micro-entrepreneurs who own a device use it mainly for personal communication rather than business (figures); the figures are attributed to the statistics bureau and the regulator but cited in a training write-up rather than taken from a published release (figures).<br>A women's digital accelerator opened trainer-of-trainers cohorts in the capital on 19 August 2026 for a first 100 women instructors and in a second county on 24 to 26 August, against a goal of 15,000 women trained across three counties by 2028 (second county); participants are certified after a post-training evaluation, and the organisers state that funding partners scaled back support after aid cuts, forcing a reduction in the project's original scope (second county, first cohort). | MIXED<br>a training accelerator opened its second county while the measured gaps in use and ownership persist |
| **Lesotho** | A dedicated women in digital forum was held in April 2026, and internet use differed by 5.1 points between men and women in 2023.<br><br>2024-12-30 — the National Digital Policy is the overarching statement.<br>2025-11-20 — the minister described a community inclusion model whose digital ambassador approach targets women.<br>2026-04-20 — a dedicated women in digital forum ran on the Commonwealth digital roadshow.<br>No sex-disaggregated figure for digital skills is held.<br>2023 — the regulator's household survey found internet use of 59.9% among men and 54.8% among women, a 5.1-point gap, with mobile phone ownership 0.6 points apart. | MOVEMENT<br>with a small measured gender gap in internet use |
| **Liberia** | 36.74 per cent of 3,035 operator training beneficiaries were women, against 3 women among 41 machine-learning graduates.<br><br>The largest counted throughput is an operator's: 3,035 beneficiaries across 44 sessions in 2025 with a footprint in all 15 counties and 36.74 per cent female participation. It is a training count, not evidence of placement.<br>At the advanced end the picture reverses: 3 women among the 41 machine learning bootcamp graduates and 18 women graduating in Python, out of 204 trained in foundational artificial intelligence. The regional digital project sets a forward target of about 30,000 officials trained at 40 per cent women.<br>2026-09-23 - the gender ministry agreed with Cybastion to build women's technology and business hubs with childcare in Monrovia and four other towns, training through the Cisco Networking Academy; no cost, timetable or participant target is stated. | MIXED<br>strong participation in operator training against three women among 41 bootcamp graduates |
| **Libya** | An eleven-point gender gap in account ownership against 74 per cent of women using the internet.<br><br>The central bank's financial inclusion strategy puts the gender gap in account ownership at eleven points and access to mobile or internet banking at 14 per cent overall.<br>Connectivity is not what stands in the way: the household survey puts 92 per cent of women use mobile phones and 74 per cent use the internet. The international agency series leaves every Libyan gender indicator unreported, so the survey is the only sex-disaggregated evidence the repository holds. | NO CHANGE |
| **Madagascar** | The statistics office published its first dedicated gender statistics compendium in February 2026, alongside national survey results.<br><br>The compendium is the office's first dedicated gender statistics product, aligned to the national gender equality policy for 2025 to 2035 (compendium).<br>Results of the seventh multiple indicator cluster survey were released in February 2026 from fieldwork across 19,785 households (release), a United Nations account putting the sample at about 21,000 households with a 99 per cent response rate covering 43 indicators across 11 goals (account).<br>The two household counts are stated on different bases and are not reconciled. No gender-disaggregated figure for digital access is quoted in either capture. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Malawi** | The High Court enforced the Gender Equality Act in October 2025, ordering the health minister to amend guidelines.<br><br>The statute has been in force since 1 April 2014, prohibiting sex discrimination and harmful practices, setting a 40 to 60 per cent sex-balance requirement in the public service and guaranteeing sexual and reproductive health rights. No compliance figure against the sex-balance requirement is published anywhere on file.<br>2025-10 - the High Court held that denying a raped thirteen-year-old access to lawful termination breached her rights under the Act, ordered the health minister to amend post-abortion-care guidelines, and found the human rights commission in breach of its enforcement duties. It is the first enforcement of the Act on this record.<br>2026-05 - a nationwide campaign vaccinated more than 2.27 million adolescent girls at 91 per cent coverage in a single week, which is delivery at a scale no digital service here approaches. | MOVEMENT |
| **Mali** | A women's digital-training target of 70 per cent by 2032 was set inside the November 2025 operator loan, with no interim figure published.<br><br>The target was set as a condition of the development-bank loan rather than by the state (target). No interim figure, baseline or sex-disaggregated measure of access, ownership or use is published for the country, so the only gender commitment in the repository sits in a private financing agreement and has no measurement behind it. | MOVEMENT |
| **Mauritania** | Two ministers awarded the prizes of a women-led artificial-intelligence start-up challenge in April 2026, framed as the move from training to entrepreneurship.<br><br>The window's event is a completed step rather than an announcement. On 23 April 2026 the digital transformation minister and the social action, childhood and family minister jointly marked the international girls in technology day under the theme of artificial intelligence and development, and awarded the prizes of a national challenge for women-led artificial-intelligence and digital-innovation start-ups, run by the ministry's innovation directorate with the telecommunications union and German cooperation. The minister framed it as the move from training to entrepreneurship. No count of winners or beneficiaries is given.<br>What it is not measured against is any sex-disaggregated figure. The 2025 financial inclusion and connectivity survey is the nearest source, and no gender gap in phone ownership, internet use or account holding is published for the country. | MOVEMENT |
| **Mauritius** | No gender-disaggregated digital measure is held; the 2026-2027 budget annex carries the statistics office's independence and no such indicator.<br><br>The budget annex of June 2026 carries the independence of the statistics office (annex). Household ICT penetration is published without a gender split (indicators), and the 2025 ICT release does not carry one either (release).<br>No national gender policy text reached the repository. The absence is dated and searched: what would settle it is a gender-disaggregated access or usage figure, or the policy's own text. | NO CHANGE<br>a searched absence with no disaggregated measure found |
| **Morocco** | An insurance technology and inclusion programme targets about 200,000 new insurance users of whom at least 100,000 are to be women.<br><br>The activity was reported at pipeline stage in April 2026, committing XDR 371,714.70, about US$508,015 at the provisional annual average rate, over 2026 to 2028 and executed by the insurance supervisor (activity); total cost is US$680,000, of which US$510,000 is grant and US$170,000 counterpart (activity).<br>It is the only gender target in the repository's digital record for the country, and it is a target rather than an outturn: no sex-disaggregated measure of access, use or ownership is held.<br>2026-09-27 - the insurance-technology programme was launched with the supervisor, US$680,000 to early 2027. | MOVEMENT |
| **Mozambique** | EUR 28m was signed with a stated focus on women in the digital economy, while the credit gap widened from 31-59 to 34-66 per cent.<br><br>The agreement was signed in June 2026 within a four-agreement package of EUR 178m, with the recipient organisation unspecified and no disbursement recorded (agreement).<br>Access to credit ran at 31 per cent of women against 59 per cent of men in 2024 and 34 against 66 in 2025, so the gap widened over the same year in which women's mobile money holding rose 24 per cent (gap). The account gap narrowed and the credit gap did not, which is the distinction a headline inclusion figure would lose. | MIXED<br>EUR 28m signed for women's participation while the gender gap in credit widened |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Namibia** | The third national gender policy carries a communications theme, and a women in technology initiative launched in May 2026; no gendered access figure is published.<br><br>The current national gender instrument, approved by Cabinet in October 2023, carries a dedicated thematic area on gender, media, information and communication (policy).<br>A women in technology initiative launched at an industry congress in May 2026 alongside a talent programme targeting 200 women engineers (initiative).<br>A global financial inclusion study catalogued for the country in January 2026 carries sex-disaggregated indicators for mobile phone ownership, internet use and digital financial services from 2024 fieldwork (study); the catalogue entry is held rather than the microdata, so no figure reaches this repository.<br>Financial inclusion overall stands at 86 per cent (inclusion). The data to split it by sex exists and is not on the record here. | MOVEMENT |
| **Niger** | A third women, peace and security action plan is under validation with a dedicated directorate created, on a gender policy dating from 2017.<br><br>The responsible minister reported in June 2026 the creation of a dedicated national directorate, a third action plan for 2026 to 2030 under validation, and results of 630 awareness sessions, 307 women-led mediations and 2,340 family conflicts resolved, alongside a free hotline referral mechanism for survivors of gender-based violence.<br>The Council of Ministers of 22 October 2025 adopted the decree requiring public administrations, public enterprises and state-subsidised bodies to buy locally, the instrument partner reporting links to gender-responsive procurement prioritising women processors and entrepreneurs.<br>The standing framework is the 2017 national gender policy, which covers access to social services including community multimedia centres. No sex-disaggregated figure for digital access is published.<br>2026-08-28 - a mobile operator's foundation trained 500 women in agri-food processing and pottery at Zinder in business management and digital financial tools; no follow-up figure is published. | MOVEMENT |
| **Nigeria** | A digital self-care platform went live for university students, routing to free contraceptives through the state health supply chain with discreet delivery.<br><br>The platform is live for students at one university and routes to free contraceptives via the state health ministry and an agency supply chain, with discreet delivery and pharmacist support, and expansion to other campuses planned (platform).<br>No user count, uptake figure or data-protection arrangement for reproductive-health requests is published, which is the sensitive-category question the country's own Act would reach. | MOVEMENT |
| **Rwanda** | A financing strategy for women entrepreneurs targets USD 75 million by 2029, and a bank memorandum targets over 10,000 women.<br><br>The revised national gender policy of February 2021 is the operative instrument, covering equal access to education, health and social protection (policy).<br>A financing strategy published in June 2026 sets a mobilisation target of USD 75 million by 2029 for women entrepreneurs (strategy) — a target, not a committed sum, which is why no deal record stands behind it.<br>A memorandum signed in October 2025 targets over 10,000 women for financial and digital inclusion, including 3,000 entrepreneurs and 1,000 cross-border traders (memorandum).<br>2026-09-27 - the central bank closed its Gendana Konti campaign, begun in 2023 when 72% of women with phones held mobile money against 81% of men, reporting 615,000 women brought into mobile financial services against a target of 150,000. No later figure for the gap is published. | MOVEMENT |
| **Sao Tome and Principe** | The national gender-violence response protocol was revised to include digital violence, and the 2025 activism campaign was themed on digital violence against women and girls.<br><br>The validation seminar for the response, protection and justice protocol was held in September 2025 with more than 80 participants, led by the justice ministry with the public prosecutor, a domestic-violence body and a United Nations agency; the source states the guide innovates by including terminology on digital violence and concepts relating to the LGBTQI+ public (seminar).<br>The activism campaign opened in November 2025 under a theme on ending digital violence against all women and girls, with the source stating that numerous cases of abuse and rights violations in digital spaces have been recorded (campaign).<br>The financial inclusion series is the one place a gender gap is measured and narrowing: the women's index rose to 0.34 from 0.18 and the banking gap fell to 4.8 points from 20 (survey). | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Senegal** | An agreement to train 200 young women entrepreneurs was signed with the regulator in November 2025, on a strategy that sets no digital indicator.<br><br>The agreement signed at an international conference commits a project with the telecommunications regulator to train 200 young women entrepreneurs to use digital solutions to improve their business, presented as a model to be replicated in other francophone least developed countries; no value, duration, start date or workplan is stated.<br>A delivered programme carries a measured split: 560 participants trained across seven centres from July to September 2025 in five-day cohorts, of whom 50 per cent were female, in computer basics, digital awareness and introductory artificial intelligence; the implementer is a non-governmental organisation with donor support, and no Senegalese state body is named as a party.<br>The standing instrument is silent on this: the 2016-2026 gender strategy provides the national frame for sex-disaggregated data and gender-responsive budgeting but sets no quantitative indicator on digital or information-technology access. | MOVEMENT |
| **Seychelles** | The 2012 National Gender Policy requires mainstreaming including women's access to ICT; a girls-in-space programme began in 2026.<br><br>The policy, adopted in January 2012, requires gender mainstreaming across policy including the promotion of women's access to information and communication technology and new communications technologies (policy).<br>In August 2026 Seychelles joined a girls-in-space mission training participants in satellite, CubeSat and geospatial data skills, and the address referenced a science, technology, innovation and AI department established in the education ministry earlier that year (mission).<br>Fourteen years after the policy, no sex-disaggregated figure for internet use, ICT employment or computing enrolment in Seychelles is held. | MOVEMENT |
| **Sierra Leone** | Gender-responsive budgeting widened from five ministries to ten for FY2026, under the Gender Equality and Women's Empowerment Act 2022.<br><br>The FY2026 Gender Budget Statement records that the partnership began in FY2024 with five pilot ministries and that guidelines under the first budget call circular covered ten pilot bodies for FY2026; gender units or focal persons are designated across 28 ministries, departments and agencies but not yet fully functional (statement).<br>The statutory basis is the Gender Equality and Women's Empowerment Act 2022, which institutionalised the approach (Act), and a gender accountability framework was validated in February 2026 (framework).<br>Nothing in the budgeting frame reaches digital services. No sex-disaggregated figure for phone ownership, internet use or identity registration is published in the repository. | MOVEMENT |
| **Somalia** | Women's share of business and identity registrations rose from 21 to 31 per cent between 2024 and 2025, against a study finding education and wealth dominate internet access.<br><br>A study of 12,408 Somali women finds wealth and secondary education raise the odds of internet access roughly fourteen and fifteen times, that textual literacy is negatively associated with internet use, and that nomadic women show higher financial-inclusion odds through mobile money (study).<br>Women's share of business and identity registrations rose from 21 per cent in 2024 to 31 per cent in 2025 as the registration system expanded into second-tier cities and rural areas (feature).<br>The ministry ran a girls-in-technology forum in April 2026 with the national telecommunications institute (release). | MOVEMENT |
| **South Africa** | The gender equality commission announced a national study on women's participation in the digital economy, aimed at policy recommendations to close the access gap.<br><br>2026-03-19 — a national study on digital gender transformation was announced by the gender equality commission, on women's participation in the digital economy and aimed at producing gender-responsive policy recommendations to close the digital access gap. Nothing of the kind existed on this ledger before it.<br>The standing instrument beside it is a framework on gender-responsive planning, budgeting, monitoring, evaluation and auditing, which is a budgeting method rather than a digital measure.<br>No sex-disaggregated access, use or skills figure appears anywhere on this ledger, so the study would be measuring something the country has never published. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **South Sudan** | A 35 per cent quota and a gender policy stand above two bills that have not passed; two projects launched in the period.<br><br>The government's own review confirms the National Gender Policy, records the anti-gender-based-violence and family law bills as both introduced in 2023 and still bills, and states a 35 per cent quota for women in government under the revitalised peace agreement (review).<br>Two peacebuilding fund initiatives launched with the government in July 2026 reaching more than 8,000 women and young people, 2,100 of them women and girls, with leadership, livelihoods, digital empowerment and community dialogue (initiatives), and a regional project launched in Torit in August 2026 linking women's economic empowerment to land rights and governance (project).<br>No sex-disaggregated figure for phone ownership, internet use or identity registration is published anywhere in the repository. | MOVEMENT |
| **Sudan** | A study found about 10 per cent of women phone owners use them for business, and a programme enrolled 221 women and displaced people in July 2026.<br><br>The Kassala study identifies practical digital skills, affordability, electricity and connectivity reliability, trust and safety, and institutional intermediaries as what actually stops use, beyond device access, finding only around 10 per cent of women who own phones use them for business (brief).<br>A programme launched on 8 July 2026 enrolled 221 conflict-affected women and internally displaced people in a free three-phase entrepreneurship and digital-entrepreneurship course, delivered in two languages through a mobile-first platform with offline access, running to February 2027 (programme).<br>The regulator runs an annual girls-in-ICT programme (statement). No national gender-digital-access dataset exists. | MOVEMENT |
| **Tanzania** | A digital transformation centre for rights and gender equity carries a EUR 3,000,000 commitment for 2024 to 2027 — the only commitment in the whole finance base tagged to digital divides.<br><br>It is recorded in the compiled finance layer on a year-padded date, with no disbursement, outturn or beneficiary count held (centre).<br>That it is the only such commitment in the finance base is the finding, in a unit whose only measurement of online gendered violence is a civil-society researcher's own study. | NO CHANGE |
| **Togo** | An offline-capable platform for reporting gender-based violence and routing victims to the nearest care point was piloted (pilot).<br><br>An offline-capable platform for reporting gender-based violence and routing victims to the nearest care point was piloted (pilot). It is a pilot; no case volume or coverage is stated. | MOVEMENT |
| **Tunisia** | A national digital marketplace for women's products launched in August 2026, with postal payment and delivery behind it.<br><br>The family and women's ministry launched a national digital marketplace for women's and girls' products in August 2026, with payment and delivery agreements with the postal service and a partnership with the handicrafts office, giving home-based craftswomen direct access to national markets.<br>On the census series, internet use among literate people aged 10 and over runs slightly higher for women than men, 77.4 against 75.8 per cent, while the urban-rural gap is 20 points.<br>No seller count or transaction volume for the marketplace is held, and no gender-disaggregated measure of digital skills, device ownership or online payment appears anywhere in this repository. | MOVEMENT |
| **Uganda** | A EUR 2,250,000 girls and women digital programme ran 2021 to 2025 and its stated period has elapsed — the only gender-and-digital-skills commitment in the tracked non-state set.<br><br>The commitment is recorded for 2021 to 2025 and the period has elapsed (programme).<br>The same agency's follow-on programme runs 2026 to 2028 and is tendering a women-in-tech community platform with chapters in Kampala and Kabale, with no budget stated. A diversity study of female startup co-founders is the only other gender measure in this ledger, and it holds no prior national figure to compare against. | NO CHANGE |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Zambia** | A constitutional amendment reserved National Assembly and council seats for women, over a cross-sector gender status report.<br><br>The fifth cross-sector gender status report covers governance, poverty, education, health, employment, land and gender-based violence — the standing official measurement.<br>2025-12-18 — a constitutional amendment created a mixed-member proportional system with reserved National Assembly and council seats for women, the most consequential equity instrument on this ledger and one whose effect is testable at the next election.<br>2026-04 — specified sexual offences were made non-bailable. What the repository does not hold is any sex-disaggregated measure of digital access — of device ownership, internet use or digital skills — so gender equity here is read through representation and law rather than through technology. | MOVEMENT |
| **Zimbabwe** | A national gender policy is in force and a digital skills hub for rural women was launched in October 2025; no gendered digital-access figure is held.<br><br>The current national gender policy is grounded in sections 17 and 52(2) of the Constitution and names the Data Protection Act as the instrument addressing gender-based violence in digital spaces (policy).<br>The women's affairs ministry launched a digital empowerment initiative in Harare in October 2025 to equip rural women with technology skills for agriculture, business and enterprise (hub).<br>At the artificial-intelligence strategy's launch the United Nations resident coordinator called for gender-responsive and inclusive design and for diverse, high-quality datasets to confront bias and exclusion (launch).<br>Where a gendered figure does exist it is in education rather than access: 152 of the 192 recipients of laptops under a technical and vocational bursary in July 2026 were women (laptops). No sex-disaggregated internet, device or skills figure is published. | MOVEMENT |

## Inclusion of persons with disabilities

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Algeria** | A 2025 statute requires accessibility of public services, spaces and communications, and assessment was reorganised.<br><br>2025-02-20 - the overarching disability-inclusion statute requires accessibility of public services, spaces and information and communications.<br>2026-04-05 - decrees reorganised disability assessment: a 15-day maximum decision period, 48-hour notification, home visits where the person cannot travel, and a national appeal commission.<br>The statute's accessibility requirement covers communications, and no accessibility standard for public digital services, no conformity test and no compliance measure follows from it on the record. | MOVEMENT |
| **Angola** | The 2016 accessibility law is in force unamended, setting general norms for people with disability or reduced mobility.<br><br>The statute stands and nothing has been added to it. The 2016 accessibility law sets general norms, conditions and criteria for people with disability or reduced mobility and remains in force unamended.<br>What the repository does not hold is any digital application of it: no accessibility standard for a public website or service, no assistive technology provision, and no disability disaggregation in the connectivity or financial inclusion figures. The single social register launched in July 2026 is the system that would carry such data, and its validations are described as biometric, facial-recognition, georeferencing and documentary rather than as capturing disability status. | NO CHANGE |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Benin** | The identity agency handed over 1,422 equal-opportunity cards for persons with disabilities in September 2026, and a targeting platform had its parameters defined in January 2026 but is not built.<br><br>2026-01-27 — a workshop defined the parameters for a targeting platform, run by the national employment agency with a disability organisation.<br>2026-09-18 — the identification agency ANIP handed 1,422 equal-opportunity cards to the social-action ministry, after 4,718 distributed in 2024 and 2025, with about 4,000 applications registered for 2026. The card carries the rights in health, education, employment and transport that Loi 2017-06 attaches to disability status, and the medical certificate needed to obtain it is the step both the ministry and the disability federation named as the obstacle.<br>No accessibility standard for public digital services, and no count of disabled users reached by any digital service, appears in the repository. | MOVEMENT |
| **Botswana** | Core Parts of the Persons With Disability Act were commenced and disability defined by regulation in December 2025.<br><br>2025-12-04 — two statutory instruments were gazetted, one defining who qualifies as a person with a disability and one commencing specified Parts of the Act.<br>The repository holds nothing on accessibility of digital public services, assistive technology provision, or whether the commenced Parts carry duties on the systems this report covers. The instrument is in force and its reach into digital service delivery is not on the record. | MOVEMENT |
| **Burkina Faso** | The 2010 disability statute's article 39 guarantees access to public communication and online services; a project scaling accessible digital learning to 48 visually impaired pupils and 34 teachers launched in August 2025.<br><br>The statute is the legal basis: the foundational disability-rights law whose article 39 expressly guarantees persons with disabilities the right to access public communication services and online services. Sixteen years on, no accessibility standard, audit or compliance figure under it is held.<br>2025-08 - a project launched targeting 48 visually impaired pupils and 34 teachers with accessible digital content, tablets and digital-library access, scaling up a 2023-2024 pilot, run by an international disability organisation with the national association for the blind.<br>Forty-eight pupils is the whole of the measured provision. No national count of people with disabilities reached by any digital service is published, and the state's own platforms carry no stated accessibility conformance.<br>2026-09-11 — an association course trained 70 visually impaired pupils and students in computing, who then lack computers to practise on. | MOVEMENT |
| **Burundi** | The state's initial report to the disability rights committee sets out the statute, the policy, the national committee and the gaps in access to information technology.<br><br>Burundi's initial report under the disability rights convention is the state's own comprehensive statement of position: ratification, the 2018 statute promoting and protecting the rights of persons with disabilities, the 2020-2024 national policy, the national committee, assistive devices, census data, and the absence of data on the use of information and communication technology by persons with disabilities.<br>It is a baseline and it is the state's own account, submitted nine years after it was due. Nothing else in the repository measures digital accessibility: no website accessibility standard, no assistive-technology provision figure and no disaggregated access measure is held, so the position can be described and not tracked.<br>An accessibility index puts a number on it: 17.5 out of 100 in 2020, 117th of 137 countries and 25th in the region, up from 15 out of 100 and 97th of 121 in 2018, with no policy recorded in any of its ten areas - web, television, mobile telephony, e-books, internet availability, inclusive education technology, employment technology, e-government, assistive technologies and accessible procurement. Its latest data year is 2020, so it predates the state's own report and cannot be read against it. | NO CHANGE<br>an index unmoved on policy against a state report that states the gaps |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Cameroon** | The 2010 statute guarantees access to information and communication technologies at article 32; an accessible digital library for 500 print-disabled learners was planned for January 2026.<br><br>The statute is the legal basis: article 32 covers access to information and communication technologies and article 33 the accessibility of public and private buildings open to the public. It is implemented by a decree of 26 July 2018 whose text could not be captured, the official page serving only site navigation. Sixteen years on, no accessibility standard, audit or compliance figure under either is held.<br>2025-12 - a civil-society pilot with two international partners was planned to launch by January 2026, serving 500 print-disabled learners with converted electronic books and audiobooks, hosted at a regional inclusive education resource centre and grounded in the country's 2021 ratification of the treaty on access to published works. No launch confirmation is held.<br>The state's own instrument is a card rather than a service: the national disability card carries income-tax and salary-tax exemption under the 2026 finance law. | MOVEMENT |
| **Cape Verde** | A disability inclusion strategy for 2024-2030 was approved on 11 November 2024, its accessibility axis costed at 6 per cent of the plan's budget.<br><br>The resolution approves the strategy as the operative national instrument, over a population the 2021 census records as 47,021 people with a disability, 10.9 per cent of the total.<br>Its fifth axis covers physical, communication and technological accessibility and sets out digital public-service accessibility, auditing of websites and applications and assistive-technology measures, costed at 206,500 thousand escudos, 6 per cent of the plan's budget.<br>Two years on, no audit, no compliance figure and no implementation report against that axis is held, so the strategy is what the repository has and delivery under it is not testable. | NO CHANGE<br>a standing position the repository holds for the first time |
| **Central African Republic** | An international study-period report states the position on access for persons with disabilities; nothing national is held.<br><br>An international study-period report covering 2018 to 2021 states the position on access to telecommunications and technology services for persons with disabilities and others with specific needs.<br>Nothing later exists, and no national measure, obligation, accessibility standard or programme appears anywhere on this ledger. The country's own disability rights report is separately on the repository without a digital dimension.<br>So the position is a five-year-old external assessment and no domestic instrument to check it against. | NO CHANGE<br>a first stated position with no earlier account behind it |
| **Chad** | 400 disabled traders were enrolled with an identity-linked QR document in July 2026, free of charge.<br><br>From 27 July 2026 the social action ministry and the identity agency began enrolling 400 people with disabilities — 115 visual, 285 physical — trading on the road between the capital and the Cameroonian border, issuing free of charge a secure document tied to the national identification number with a QR code for authentication by customs and police, plus a badge and vest (enrolment).<br>In May 2026 a three-month vocational programme for people with disabilities in the capital carried an informatics module among three (programme).<br>The standing commitment is a project target of 2,000 people with disabilities among 40,000 training beneficiaries (project). No accessibility standard applies to any Chadian digital service. | MOVEMENT |
| **Comoros** | The 2014 disability law is formally in force and largely unimplemented: the high authority it creates was never set up.<br><br>The law's own text is now on file: forty-nine articles adopted on 22 December 2014 and ratified by decree in May 2015, providing an equality-of-opportunity card at article 3 and a high authority at article 45.<br>A joint civil-society submission to the forty-sixth periodic review describes it as formally in force and largely unimplemented: the high authority was never constituted, the card is not applied, and the law lacks the accessibility and reasonable-accommodation provisions of the 2006 convention.<br>2026-04 - a roadmap to implement the review's recommendations was launched at Fomboni with civil society and technical partners, ahead of the next review in 2029.<br>Nothing in the law or the roadmap addresses digital accessibility. | NO CHANGE<br>a law in force for eleven years with its principal machinery never constituted |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Congo** | A statute on the rights of persons living with disability was promulgated in August 2025, and a digital inclusion portal was run with the national disability union.<br><br>2025-08-14 — a statute on the rights of persons living with disability was promulgated.<br>2025-12-18 — a digital inclusion portal for persons with disabilities was run with the national union.<br>A statute and one portal. No accessibility standard for public digital services, and no count of disabled users reached, is recorded. | MOVEMENT |
| **Cote d'Ivoire** | The disabled people's coordination and the incumbent operator signed a digital inclusion partnership at Abobo on 4 September 2026, with a first office-skills course under way.<br><br>The national coordination of disabled people's associations and the incumbent operator signed a partnership at Abobo Sogefiha providing training in digital tools toward autonomy and employment, with a first office-skills course begun at the coordination's headquarters, refurbished and equipped under the initiative (partnership).<br>It lands against 40.7 per cent of Ivorians actually online, 52.7 per cent in urban areas against 24.6 per cent rural (partnership).<br>It is an operator foundation's programme rather than a public one. No participant number, duration or funding figure is stated, and the repository holds no state instrument on digital accessibility against which to read it. | MOVEMENT |
| **Djibouti** | A skills project trained about 1,500 people on pathways prioritising persons with disabilities, among other groups.<br><br>2026-04-20 - the skills development project reports about 1,500 people trained in logistics, construction, energy, hospitality, big data, cybersecurity and other sectors, described as inclusive by design with training pathways prioritising women, refugees and persons with disabilities and adapted support alongside.<br>That is the whole of the record. No number of participants with disabilities is given, no accessibility standard for public digital services is on file, and no assistive-technology provision or accessibility audit of any government platform appears anywhere in the repository. | MOVEMENT |
| **DR Congo** | The 2022 organic statute is in force over a population its own memorandum puts at 13.7 per cent; two donor builds reach it — a rehabilitation worker application and an offline-first identity model.<br><br>The statute implements the constitutional right of persons with disabilities to protective measures and the State's duty to promote their presence in national, provincial and local institutions, on a six-title structure, its explanatory memorandum carrying a national disability prevalence estimate of 13.7 per cent. The articles reported to require accessible public information, communication and technology sit beyond the captured text, so the accessibility duty itself is not established from the repository.<br>2025-11 - a mobile application piloted in one eastern province equips community-based rehabilitation workers with disability-assessment and client-management tools.<br>2026-07-07 - an offline-first system using text-menu access and phonetic verification rather than smartphones, broadband or biometric scans was presented as a model for identity and social-protection payments to persons with disabilities, backed by a coalition including the telecommunications ministry, the ministry delegated to persons with disabilities and the national solidarity fund. It is a forum presentation of a model, not evidence of national deployment. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Egypt** | Two binding accessibility regimes cover banking and mobile e-wallets; government web accessibility reaches two ministries' sites.<br><br>Financial services are the one area with mandatory rules, both issued before the window. The central bank obliges banks to run digital corners with sign-language video access, screen-reader compatibility, Braille forms and Braille keypads on cash machines, and reports more than 9,300 bank employees trained in sign language and disability customer care. No usage figure is published.<br>The telecom regulator, with the central bank, instructed mobile operators to make e-wallet services usable by people with disabilities, requiring sign language interpreters at outlets, contracts in Braille, and voice dictation and screen reader support in their applications. No compliance audit is on record.<br>Government web accessibility is spreading site by site: an accessibility toolbar was published on the ICT ministry's pages by its academy for persons with disabilities, whose mandate is to propagate the standards, and 2026-09-17 - the transport ministry added text-to-speech, a sign-language interpreter, dyslexia fonts and keyboard navigation to its site with the same academy, saying its authorities and companies will follow.<br>No deadline, list of bound entities or audit route is stated: binding rules where a financial regulator writes them, voluntary adoption elsewhere.<br>2026-09-26 - an ICT-sector disability-inclusion playbook was launched with 14 companies. | MOVEMENT |
| **Equatorial Guinea** | The state's own review names no disability statute, only a 2022 national agenda.<br><br>The national report to the human rights council's periodic review is the state's own account, and it names no disability statute — a 2022 national agenda is the whole of the framework it cites.<br>With no statute there is no accessibility duty to attach to public digital services, and nothing in the repository records disability-disaggregated access data or an accessibility standard for any Equatoguinean platform. | NO CHANGE |
| **Eritrea** | A policy revised in 2021, convention accession in December 2024 and a social protection plan to 2026, with a register behind them.<br><br>The framework is documented in the government's own periodic report: a national policy for persons with disabilities revised in 2021 with a translation in 2023, accession to the disability rights convention on 20 December 2024, and a national social protection policy and strategic plan for 2022 to 2026. The register behind it is the labour and welfare ministry's vulnerability database, collecting gender-segregated data on persons with disabilities.<br>Nothing in it reaches digital access. No accessibility standard governs a public website or service, no assistive-technology provision is described, and the external committee's July 2026 observations assess the framework without recording a change to it. | NO CHANGE |
| **Eswatini** | The country launched its first costed disability plan in July 2026, and 13 assistive devices were handed to schools in June.<br><br>The Persons with Disabilities Act of 2018 establishes the national advisory council and a right of access to information and communications technology (Act).<br>Eight years later the first costed national plan of action for 2026-2028 was launched with United Nations cultural-organisation support, as the funded implementation roadmap for that Act (plan); no budget figure for it is held.<br>The communications regulator's universal access fund handed 474 smartphones for vulnerable citizens and 13 specialised assistive devices, including screen and braille readers, to the education ministry for learners with visual impairments (handover).<br>Disability indicators were integrated into the education management information system in November 2025, which is the first step towards counting the learners the devices are for. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Ethiopia** | Two national disability inclusion guidelines were disseminated, moving from policy development to mandated implementation (guideline).<br><br>The national guideline for inclusion of persons with disabilities in skill development and employment was officially disseminated in February 2026, developed with the labour and skills ministry after a one-year review and moving from policy development to implementation across technical training and the labour market (guideline).<br>A disability inclusion guideline for food security was launched at a national dissemination workshop in August 2025 and handed over to the women and social affairs ministry, the urban and infrastructure ministry and disability associations (workshop).<br>The statutory basis is Ethiopia's ratification of the Convention on the Rights of Persons with Disabilities in 2010 (ratification).<br>Neither guideline addresses digital access, and the repository holds nothing on accessibility requirements for public digital services.<br>2026-09-01 — an operator foundation and the national federation of disability associations signed a three-year memorandum framing collaboration on digital inclusion, accessible technology, inclusive education, economic empowerment, healthcare and rights advocacy (memorandum). It is the first private-sector instrument on this indicator; the two guidelines before it were state ones, and no target, budget or beneficiary count is attached to any of the three. | MOVEMENT |
| **Gambia** | A monitoring framework for the 2021 Act was validated in February 2026, five years after enactment.<br><br>The Persons with Disabilities Act 2021 enacts the rights framework and an advisory council; the printing held here leaves the commencement date blank.<br>Oversight arrived in February 2026, when the human rights commission validated a monitoring framework for its implementation. Digital access specifically is visible only as a donation: 15 screen-reader-equipped computers to the school for the blind in October 2025. No disability-disaggregated access data is published. | MOVEMENT |
| **Ghana** | An exposure draft directive on financial inclusion for persons with disabilities has been outstanding since October 2024, and two assistive devices are in pilot.<br><br>The devices are smart glasses and an ultrasonic obstacle detector, developed from a prototype that came out of a 2024 hackathon (pilot).<br>The devices were the only disability-specific digital provision the repository held until September 2026, and no accessibility standard, procurement requirement or service-design rule applies to any government platform on the record.<br>One accessibility rule has been drafted and not issued. The central bank published an exposure draft directive for banks, specialised deposit-taking institutions, finance houses, non-bank financial institutions and payment service providers, setting minimum requirements for a disability policy, accessibility, non-discrimination and staff training in October 2024. Two years on, nothing on file states whether it was issued, so the financial sector is the only one for which an accessibility standard has even been written.<br>2026-09-23 - university researchers presented a working model that translates Ghanaian Sign Language to text and audio and back for doctor-patient consultations; no hospital deployment is reported.<br>2026-09-24 - a continental hub for AI and disability inclusion, hosted at the same university, was launched with a network for discovering disability datasets and a first-year inventory of them across Africa. Neither is a government provision. | MIXED<br>a sector accessibility directive drafted two years ago has not been issued while the provision on file is research-led |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Guinea** | Two movements, neither of them a government service: a regional assistive-devices programme phase with USD 300,000 committed and a civil-society platform's accessibility upgrade.<br><br>2026-06-25 - a regional commission mission and a two-day workshop set implementation terms for the third phase of an assistive-devices programme covering three countries with USD 300,000 committed, in which the national federation of persons with disabilities lists specialised tablets alongside prostheses, wheelchairs, adapted tricycles, hearing aids and white canes as the technologies without which access to education and autonomy is compromised. The commission's own officer named data as what is missing: persons with disabilities remain too often invisible in statistics and public policy.<br>2026-07-16 - a bloggers' association launched an accessibility upgrade to its youth platform, adding subtitling, national sign language, audio description, high contrast and zoom, with 24 audiovisual contents produced in French and local languages, designed with an association for deaf young people and then tested with the intended users, alongside a free certifying course. No accessibility conformance is stated for any public digital service, and no device count or delivery schedule is given for the programme.<br>2026-09-10 — the statistics institute agreed to assess using census data to identify persons with disabilities toward a planned disability card, the first government instrument on record here; no timetable is given. | MOVEMENT |
| **Guinea-Bissau** | An agency delivered mobility and computing equipment to the national disability federation for data advocacy.<br><br>The delivery of February 2026 — wheelchairs, crutches and a computing kit to the national disability federation for data advocacy — is the only disability-related digital record the repository holds for Guinea-Bissau.<br>No disability statute, accessibility standard or disability-disaggregated access figure appears anywhere in the file. | MOVEMENT |
| **Kenya** | The 2025 disability statute is in force setting no artificial-intelligence accessibility standards and no enforcement mechanism.<br><br>The gap is named in an academic analysis rather than by the regulator (analysis).<br>It matters against what this ledger records elsewhere: automated decisioning is running on the country's largest payments rail, three draft guidance notes read the data statute onto the technology, and none of them carries an accessibility requirement.<br>2026-09-22 - Nakuru County put services for persons with disabilities onto a case management platform.<br>2026-09-24 - a pan-African disability data network for AI was launched in Nairobi, with Maseno University among its partners.<br>2026-10-08 - the social development directorate drafted a second Inclusive Data Charter action plan for 2026 to 2030, widening the first plan's disability focus to gender, children and older persons. | NO CHANGE |
| **Lesotho** | An accessible digital library and insight centre was announced in March 2026, under a statute in force since 2021.<br><br>2021-03-12 — the Persons with Disability Equity Act establishes the advisory council and accessible-communication duties.<br>2025-10-15 — the UN resident coordinator called for accessible technology investment at the country's first disability accessibility conference.<br>2026-03-16 — a memorandum with the incumbent operator announced a 4G-enabled digital library and insight centre carrying assistive technologies.<br>Five years after the Act, the repository holds no accessibility standard for public digital services and no compliance assessment against the statute's communication duties. | MOVEMENT |
| **Liberia** | A 2026-2030 commission plan proposes a research and data department; the first treaty review closed in May 2026.<br><br>The published statistical baseline is the 2022 census thematic report, which puts functional-difficulty prevalence at 534,316 people, disaggregated by sex, age, residence and county. It is a statistical output, not an administrative register, and no national disability register has been shown to exist.<br>The National Commission on Disabilities launched a 2026-2030 plan proposing a research and data management department, a sign language and braille education department and a monitoring framework. The treaty body concluded Liberia's first review in May 2026, recording that no replies to the list of issues were submitted and that the state did not attend the dialogue despite saying it would. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Libya** | The digital accessibility policy moved from plan to mandatory compliance in February 2026.<br><br>2026-10-10 — the social affairs ministry and the minister of state for digital economy launched an initiative whose second track is the digital empowerment of persons with disabilities; no budget, numbers or timetable are stated.<br>The statutory frame is old and analogue: the 1987 disability law imposes shelter, access and financial-aid duties and carries no digital-accessibility mandate.<br>The information authority launched the implementation path of the national digital accessibility policy with regional commission support in February 2026, moving it from plan to compulsory compliance. Market provision is thin and specific: an operator halved data pricing on a line restricted to certified deaf and hard-of-hearing users. | MOVEMENT |
| **Madagascar** | The governing instrument is a 1998 law that predates digital service delivery and carries no accessibility duty.<br><br>The law on persons with disabilities was promulgated in February 1998 after adoption by the National Assembly in December 1997 (law).<br>The seventh multiple indicator cluster survey, released in 2026, carries the sustainable development indicator framework under which disability disaggregation would be reported (survey).<br>What the repository does not hold is any accessibility standard for public digital services, any assistive-technology programme, or any disaggregated figure for digital access by disability. The 1998 law is the whole of the legal position. | NO CHANGE |
| **Malawi** | A national policy launched in August 2025 and the 2026-27 budget put 2.0 billion kwacha behind it.<br><br>The statute commenced on 5 April 2024 by Government Notice 18 of 2024; no implementing regulation, accessibility standard or digital-accessibility requirement under it is on file.<br>2025-08 - a national disability policy was launched to replace the 2006 policy and run to 2030, aligned to the disability rights convention.<br>2026-02 - the budget statement allocated 2.0 billion kwacha to the disability trust fund, 250 million of it as direct grants, and removed taxes on supportive devices including adapted vehicles, prosthetic limbs and hearing aids.<br>2026-08 - a digital-skills programme at the school of government is taught by master trainers who are themselves visually impaired, the constituency teaching rather than being spoken for. | MOVEMENT |
| **Mali** | Law 2018-027 on the rights of persons living with a disability is the frame, and the statistics institute has a 2026-2029 plan to build disability information into national surveys.<br><br>The law's text is held from the official journal (law).<br>The institute's action plan would integrate information needs on people living with disability into large-scale national studies (plan).<br>Nothing on the record addresses digital accessibility of public services, which is the question this indicator asks; what is on file is a right in law and a plan to measure the population it covers. | NO CHANGE |
| **Mauritania** | The 2006 ordinance on the promotion and protection of persons with disabilities is the frame, and its implementing decrees are outstanding.<br><br>The national human rights commission's observations on the periodic review in July 2026 record that implementing decrees for the disability law have not been made (observations).<br>Transfers were made to 6,000 children with special needs around the international day in December 2025 (transfers).<br>Nothing on the record addresses digital accessibility of public services for disabled users, which is the question this indicator asks. | NO CHANGE |
| **Mauritius** | A disability pension reform was agreed in Cabinet in November 2025 and carried into the 2026-2027 budget.<br><br>The Protection and Promotion of the Rights of Persons with Disabilities Act 2024 is the governing instrument (Act).<br>Cabinet agreed a disability pension reform in November 2025 (Cabinet), carried into the 2026-2027 budget in June (budget).<br>The 2024 Act carries no accessibility duty for public digital services, and none is held elsewhere.<br>The movement is on income support rather than on access to the systems the state now runs online. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Morocco** | The census analysis counts 1.73m disabled Moroccans, 67.7 per cent with no schooling.<br><br>The analysis of the 2024 census published in March 2026 is the country's current disability baseline: 1.73m people, and 67.7 per cent of them with no schooling — an education gap that precedes any question of digital access.<br>Measurement is being deepened with a third national disability survey launched in January 2026, and the one concrete access measure in the window is transport: a permanent 50 per cent rail fare reduction for disability card holders and their guides.<br>2026-09-03 - preliminary results of the third survey put prevalence at 8.7 per cent, against 6.8 per cent in 2014, with only 20 per cent of people with disabilities reporting internet access; officials attribute part of the rise to broader detection. | MOVEMENT |
| **Mozambique** | Law 10/2024 sets disability rights including accessible information and disaggregated statistics, and a 2026 regulation created a free identification card as proof of status.<br><br>2026-04-14 — the Council of Ministers approved the regulation implementing the 2024 statute, creating a free personal disability-identification card issued by the health ministry as official proof of status for access to services and benefits. It converts a statute into an administrative-access mechanism, which is the movement that matters here.<br>2025-11-05 — the health ministry and partners published a standard operating manual for making sexual and reproductive health and gender-based violence services accessible to persons with disabilities, with accessibility checklists, referral pathways, provider training and monitoring.<br>The frame is the 2024 statute, covering priority public-service treatment, accessible information, health, education, employment, transport, building accessibility and disaggregation of statistics.<br>No card issuance figure, accessibility audit or disaggregated statistical series is yet published. | MOVEMENT<br>the 2024 statute gained the administrative mechanism that makes it usable |
| **Namibia** | A national disability policy committing to accessible ICT came into operation in October 2025, and a sign language app launched in September.<br><br>The policy for 2025 to 2030 was gazetted by substitution into the Schedule of the National Disability Council Act and came into operation on 14 October 2025, committing to accessible information and communications technology, information and electronic government services (policy).<br>No accessibility audit of a government service, and no figure for digital access among persons with disabilities, is held. A commitment to accessible electronic government sits against 31 online services.<br>The Vice-President set out new guidelines and digital systems for disability assessment and access to the disability grant, presented as removing barriers and delivering faster and more accountable service. No system name, supplier, timetable, beneficiary count or accessibility standard is stated, and the claims are the government's own.<br>2026-09-08 - the assessment route went digital and the advocates' warning is about who that leaves out. The health ministry launched a digital disability assessment system, and disability advocates warned that poor rural connectivity, inadequate equipment and limited digital skills could turn it into a new barrier rather than remove one, a youth disability organisation welcoming the shift but saying its success depends on accessibility beyond the major urban centres. No launch date, site coverage, accessibility standard or offline fallback is published. | MOVEMENT |
| **Niger** | A national review in August 2026 recommended a disability inclusion strategy, faster card issuance and better disability data collection.<br><br>The national federation's review, closed on 5 August 2026, produced recommendations for a national disability-inclusion strategy and action plan, disability modules in health-training schools, disability-responsive budget lines, better disability data collection, faster issuance of the equal opportunity card and acceleration of the national support fund.<br>The minister had reported in June 2026 the progressive issuance of 5,000 equal opportunity cards carrying health, education, transport, leisure and humanitarian-aid entitlements, 25 million FCFA of support for 174 disabled schoolgirls and reactivated access-ramp requirements for public buildings.<br>The founding statute is the 2019 disability inclusion law. No accessibility requirement for public digital services is on file. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Nigeria** | A four-and-a-half-year programme for young people with disabilities opened in Lagos, while none of eight public websites audited in May 2026 met baseline accessibility.<br><br>The programme is run by a disability-rights organisation with a philanthropic foundation to expand employment access through digital skills, entrepreneurship and inclusive employment pathways, opened with the state disability office's stated support (programme).<br>No budget, participant target or state-government commitment beyond stated support is published. It is the only disability-specific digital programme in the repository for the country.<br>2026-08-31 — none of eight public websites audited in May 2026, among them the admissions board, the identity commission, the revenue service and the disability commission itself, had baseline accessibility features. An earlier assessment of all 36 states and the Federal Capital Territory found 26 non-compliant with the agency's website guidelines and 14 sites unusable for people with disabilities — different samples, not a series.<br>The guidelines are in force and the web design standards meant to make them buildable published no toolkit a year on, while the regulator ran a fourth assistive-technology hackathon in Abuja on 26 and 27 August 2026 — the assistive half of the problem, not the accessibility half. An estimated 35 million Nigerians are persons with disabilities.<br>2026-09-16 — 47 per cent of about 30 government platforms met an accessibility threshold. | MIXED<br>a disability-specific programme opened while the accessibility standard stalled and no audited public website met a baseline |
| **Rwanda** | A first dedicated disability cash-transfer pilot began in March 2026, under a policy whose strategic plan ran to 2024.<br><br>The national policy and its four-year strategic plan covered 2021 to 2024 (policy); the plan has run its term and no successor is held.<br>Local leaders were trained on 25 and 26 March 2026 to deliver the country's first dedicated disability cash-transfer pilot under the flagship social protection programme (training).<br>A second national dialogue on special needs and inclusive education produced a three-point government commitment (dialogue). Financial inclusion of adults with disabilities is separately tracked on the ledger. | MOVEMENT |
| **Sao Tome and Principe** | The national sign-language dictionary gained a QR code for online access in its second edition, and adapted computer equipment reached a blind persons' association in June 2026.<br><br>The second editions of the sign-language dictionary and a Portuguese manual for deaf pupils were launched in September 2025 under a bilateral cooperation project; the dictionary is organised in 21 thematic areas with 470 gestures and now includes a QR code allowing access through the internet (launch).<br>The incumbent operator handed adapted computer equipment to an association of blind and partially sighted people, winner of its own competition, stating the purpose as facilitating access to information technologies; the association's president said it continues to work for approval of the regulation of the disability law (handover).<br>A disability law whose implementing regulation is still unapproved is the standing position behind both. | MOVEMENT |
| **Senegal** | An advanced-level digital course for blind and partially sighted people launched in July 2026, with no start date for the programme and no funding figure or state role reported.<br><br>The advanced course launched on 6 July 2026 (course).<br>The programme's start date is not stated, so the cumulative figure it reports has no start point, and no funding figure or state role is reported. It is the only disability-specific digital instrument in this ledger. | MOVEMENT |
| **Seychelles** | The government itself records no National Accessibility Action Plan and no supporting legislation, against individual building retrofits.<br><br>The May 2026 statement records concrete accessibility retrofits at the Office of the First Lady and a stadium ramp, and explicitly identifies the absence of a National Accessibility Action Plan and a supporting legislative framework as the structural gap, with a presidential pledge to legislate (statement).<br>The 2025 voluntary national review states that social protection is being digitised to increase efficiency and reach the most vulnerable, including the elderly and people with disabilities (review).<br>The absence is stated by the government rather than inferred from silence, which makes it a finding. No accessibility standard applies to any government digital service. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Sierra Leone** | Assistive devices were handed to disability institutions in November 2025, under the digital transformation project.<br><br>The ministry handed over the devices with support from the digital transformation project (handover).<br>The education ministry's inclusion champions programme is the sector's own approach to inclusive education (brief), and the 2015 census thematic report on disability is the statistical baseline (report).<br>An eleven-year-old census is the most recent population figure the repository holds on disability, and no accessibility requirement attaches to any government digital service on record. | MOVEMENT |
| **Somalia** | A diaspora pilot distributed adapted speaking phones to blind people in Mogadishu; no public accessibility standard is held.<br><br>The pilot distributed individually adapted speaking mobile phones to blind people in Mogadishu, to support digital inclusion, independent communication and access to mobile banking (project).<br>It is a diaspora-run pilot rather than a government programme, and no count beyond the pilot is published.<br>The digital inclusion policy finalised in August 2025 is the one national instrument addressing marginalised groups' access to ICT services (policy). Nothing sets an accessibility requirement for a public digital service. | MOVEMENT |
| **South Africa** | A seven-point plan on disability-inclusive data, universal design and AI-enabled assistive technology was agreed on 12 August 2026, anchored in a proposed centre of excellence.<br><br>2026-08-12 — a seven-point plan was agreed with a bilateral partner to deepen cooperation on disability-inclusive data, universal design and artificial-intelligence-enabled assistive technology, anchored in a proposed disability centre of excellence working with the national statistics office.<br>No instrument, funding, timetable or data-sharing arrangement is published for cooperation that names the national statistics office as a partner, which is the gap worth naming: an agreement about disability data with a foreign partner, and no domestic statement of what data would be collected, held or shared. It is also the only disability-related digital instrument on this ledger. | MOVEMENT |
| **South Sudan** | 1,400 teachers were trained in sign language and Braille across three national institutes, under a 2020 action plan.<br><br>The National Disability Action Plan implements the 2015 policy and sets interventions across data management, health care, rehabilitation, education and law (plan).<br>An education emergency fund programme trained 1,400 teachers in sign language, Braille and inclusive pedagogy at three national teacher-training institutes over two years (training), and a disability-inclusive food security training package was launched in Wau in July 2026 and in Juba later that month (package).<br>Both reach services rather than systems. No accessibility requirement attaches to any government digital service on record. | MOVEMENT |
| **Sudan** | A national strategy for 2026 to 2030 was issued in December 2025, calling for accessible communication including digital channels.<br><br>The strategy, issued by the human resources ministry and the national disability council, identifies the 2017 disability act and the national council as the existing legal and institutional basis, situates itself against the 2021 to 2030 national disability strategy, and calls for disability-inclusive service delivery and accessible communication including digital and social media (strategy).<br>Organisations of persons with disabilities took part in the community consultation informing the 2026 response plan (chapter), and almost 20 of the mechanism's 150-plus community champions have disabilities (chapter).<br>No accessibility standard for public digital services is held. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Tanzania** | The central bank launched braille editions of its publications in August 2026.<br><br>2026-10-12 — a development partner said a tool mapping 32 disability care and support providers in Unguja has been integrated into Zanzibar's Jumuishi management information system; no integration date is stated.<br>The communications regulator reported at a regional cohort meeting of 5 to 9 October 2026 that its initiative on assistive technologies for persons with disabilities was 80 percent complete, its website accessibility work recognised under a new national standard on accessibility of ICT products and services.<br>No print run, distribution channel or digital-accessibility counterpart is published (braille).<br>Braille editions of financial publications are the only disability-specific measure in this ledger, and the absence of a digital-accessibility counterpart is worth noting in a unit whose financial system is overwhelmingly mobile.<br>2026-10-01 - the Prime Minister's Office said its disability information system is connected to 11 government systems and issues a reference number to student loan applicants. | MOVEMENT |
| **Togo** | The treaty body's 2023 review found incomplete enforcement of accessibility standards; no digital accessibility requirement is held.<br><br>The concluding observations, adopted 24 March 2023 and issued 11 April, are the dated assessment of the standing position after Togo's initial report under a convention ratified in 2011.<br>They name the instruments in force and the gaps found, including the medical model in the 2004 statute and its unfinished revision, incomplete enforcement of accessibility standards, and weak integration of disability into social protection.<br>The statute itself is not held in its operative text: the copy reachable was an undated draft, so the treaty body's own observations stand as the baseline in its place.<br>Nothing in the repository sets an accessibility requirement for Togolese digital public services, and no digital service in this ledger states one. | NO CHANGE |
| **Tunisia** | The disability card moved to a digital platform in December 2025, under a 2019 accessibility circular.<br><br>A 2019 government circular instructs all public bodies to facilitate physical access, priority service, Braille, sign-language and audio aids, accessible bilingual or trilingual websites with resizable and auto-read text, and staff training, naming persons with disabilities as the first of seven priority categories.<br>The social affairs ministry launched a digital platform for the disability card in December 2025 — electronic document upload, tracking through the citizen space, remote renewal and a QR-coded smart card — removing a physical-presence barrier.<br>The standing instrument is a circular rather than a statute, and no audit of public websites against its accessibility requirements is held for any year. | MOVEMENT |
| **Uganda** | An ICT hub for persons with disabilities was commissioned in August 2026 with no commitment value published, and information technology training for youth with disabilities recorded a disbursement for 2025.<br><br>The hub was commissioned with no commitment value published, so the repository carries no finance record for it (hub, commissioning).<br>The training record is a commitment rather than a delivery report, with no trainee count, curriculum or outcome stated (training).<br>Two disability-specific instruments, neither with a published outcome, is more than most units in this frame hold and still not a measurable programme. | MOVEMENT |
| **Zambia** | A national policy replaced the 2015 one and a constitutional amendment reserved seats for persons with disabilities.<br><br>2025-05 — a national policy on persons with disabilities replaced the 2015 policy.<br>2025-08 — a disability inclusive service site assessment tool was validated with the health ministry and partners, a measurement instrument rather than a statement of intent.<br>2025-12 — a constitutional amendment reserved National Assembly and council seats for persons with disabilities.<br>Policy, a measuring tool and reserved representation in seven months is real movement. Nothing in the repository addresses digital accessibility specifically: no website standard, no assistive-technology provision figure and no disaggregated access measure is held. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Zimbabwe** | A Persons with Disabilities Act was passed in November 2025 and awaits commencement; two training programmes ran in 2026.<br><br>A three-month project on accessible digital civic participation for blind communities was launched in Bulawayo (launch).<br>The Act repeals the Disabled Persons Act and establishes a National Disability Affairs Board; its definition of communication expressly takes in Braille, tactile communication, large print, accessible multimedia and accessible information and communication technology, and it carries a universal design standard covering equipment, facilities, programmes and services (Act). It comes into operation on a date to be fixed by the President, and no commencement notice is held.<br>Librarians from more than 22 state universities were trained on assistive technologies over two days in June 2026, the devices, software and inclusive furniture funded by a US$220,000 grant secured by the university libraries consortium (workshop).<br>No figure for digital access or device ownership among persons with disabilities is published.<br>2026-09-03 - a larger round of the same programme ran: a five-day workshop at Chiredzi for 37 teachers with visual impairments and their assistants and aides, drawn from all ten provinces, covering assistive technologies and accessible digital platforms. It reaches teachers rather than learners, and the Act that would give any of it a statutory footing still awaits commencement. | MOVEMENT |

## Inclusion of refugees and IDPs

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Algeria** | The refugee agency's 2025-2027 strategy records that Algeria still has no national refugee law.<br><br>The agency's multi-year strategy for 2025 to 2027 sets targets for faster asylum decisions and expanded resettlement, and records that Algeria still has no national refugee law.<br>The consequence for this report's subject is that registration of refugees and asylum seekers runs on the agency's own case management system rather than on a state register, so this population sits outside the national identity, civil registration and social protection systems the rest of the frame tracks. No registered population figure, and no Algerian instrument on asylum, is held at either end of the window. | NO CHANGE<br>a first stated position with no earlier account behind it |
| **Angola** | All 8,921 registered refugees held identity documents at April 2026, but government registration of new arrivals has been suspended since October 2017.<br><br>The statute is generous and the register is closed. The 2015 asylum and refugee status law guarantees education, health, work, social security and justice on the terms applicable to lawfully resident foreigners, provides for a high-security refugee identity document, a permanence authorisation and a national database, and requires biometric data and a photograph from applicants. It does not confer the national identity card.<br>The refugee agency's April 2026 position shows both halves: 8,921 individuals in 2,101 households, all granted prima facie status on entry and all registered families holding identity documents, births and deaths registered weekly — and government registration of new arrivals suspended since October 2017. 332 were voluntarily repatriated in March 2026. | MOVEMENT |
| **Botswana** | The Refugees (Recognition and Management) Act commenced on 1 November 2025.<br><br>2026-03-01 — the minister confirmed commencing the Act on 1 November 2025, its provisions aligned to protection of refugees' family members.<br>2026-06-22 — 64 long-term refugees were granted citizenship on World Refugee Day, meeting a Global Refugee Forum commitment.<br>2026-04-03 — flooding in the Palapye sub-district between 15 and 19 March 2026 displaced people and cut access to services.<br>No framework for internally displaced people is held, and no figure for registered refugees is published. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Burundi** | Level-2 biometric registration of 54,343 Congolese refugees was completed at one site, and cash transfers reached refugees over their own phones.<br><br>Asylum claims are recorded in an international agency database and claimants enrolled with fingerprint and iris biometrics, with a refugee identity card issued under the 2021 migration law — a registration system operated jointly by the national office and the agency.<br>2025-09 — a cash-transfer programme run by government, the World Bank and the food agency closed in one province after two years, having paid 73,600 BIF every two months over recipients' own mobile phones.<br>2026-07-06 — level-2 biometric registration of 54,343 Congolese refugees was completed at one site, stated as strengthening protection, improving data quality and better targeting assistance.<br>The refugee population is more completely biometrically enrolled than the citizen population, which is the structural fact this indicator keeps recording. | MOVEMENT |
| **Cameroon** | Two donor registration exercises: more than 32,600 internally displaced people registered and 2,800 households surveyed in one region, and a biometric food-assistance pilot reaching about 4,700 of 5,300 targeted.<br><br>2026-03-10 - a profiling project of a German agency and the refugee agency presented results: more than 32,600 internally displaced people registered and about 2,800 households surveyed across five municipalities in one region, producing an evidence base for municipal service planning and durable-solutions programming.<br>2026-07 - a food agency ran the country's first in-kind digital beneficiary pilot in the Far North, biometrically registering displaced and vulnerable households for food assistance and reaching about 4,700 of a targeted 5,300 beneficiaries with a 98.5 per cent redemption rate, alongside cash assistance reaching 129,500 people nationally.<br>Both are donor systems. Neither is stated to feed the unified social register or the national identity system, and the register itself is reported at low take-up in the regions where displacement is a named pressure. | MOVEMENT |
| **Cape Verde** | A fee schedule in force from 1 February 2026 exempts refugees and stateless persons and issues their travel documents free, and provides for electronic proof of payment where the service is requested online.<br><br>2025-11-27 - the instrument replaces the 1999 and 2012 fee schedules and sets the whole regime of fees and surcharges charged by the foreigners and borders directorate for visas, residence authorisations and the residence title for foreign nationals, in force from 1 February 2026.<br>Three provisions bear on digital access: where the act or service is requested electronically the proof of payment is to be furnished by the same channel; the individual tourism visa requested on the online traveller pre-registration platform is priced at CVE 2,500; and refugees and stateless persons and their families, victims of human trafficking and of gender-based violence are exempt from fees, with travel documents for refugees and stateless persons issued free, while nationals of the lusophone community are exempt from residence-permit fees other than document production costs.<br>Cabo Verde is a country of residence for migrants rather than of internal displacement, and the indicator is read here as access to documentation and digital public services by resident foreign nationals. No count of refugees or stateless persons documented, and no take-up figure for the online channel, is published. | MOVEMENT |
| **Central African Republic** | 37,389 Sudanese refugees are registered with card-based registration and a complaints system recording 535 complaints.<br><br>2026-08-19 - an operational update for the second quarter of 2026 records 37,389 registered Sudanese refugees, card-based registration, and a complaints and feedback system recording 535 complaints. It is the clearest instance the repository holds of a digital feedback channel reaching a displaced population, and it is run by an agency rather than by the state.<br>A national statistics initiative would count them: an effort under way since September 2025 would include, for the first time, forcibly displaced people and those at risk of statelessness - about 447,000 internally displaced and some 62,000 refugees - in national statistics. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Chad** | A memorandum on secure identity for vulnerable populations was signed with a migration organisation, and more than 4,000 refugee identity numbers have been issued in a pilot.<br><br>The memorandum was signed in May 2026 (memorandum).<br>The refugee pilot is lender-funded with the refugee agency and the national refugee commission, on a French supplier's technology (pilot, identities).<br>A refugee digital learning centre was inaugurated at a one-stop shop in the east with Italian funding, and no cohort numbers are held at either end (centre). Biometric enrolment of displaced people, again with no protection statute behind it, is the largest inclusion activity in this ledger.<br>85 per cent of refugees are within 2G coverage and as few as 1 to 3 per cent within 4G, against 13 per cent of Chadians using mobile money (assessment). | MOVEMENT |
| **Comoros** | Seventeen asylum-seekers and seven refugees were registered at 30 November 2025; no national asylum system exists.<br><br>2025-11 - the regional protection dashboard records the Comoros holding seventeen asylum-seekers and seven refugees, twenty-four people, out of a regional total of 197,509 across seven countries - the smallest caseload of the seven, and a first count with no earlier figure behind it.<br>2026-01 - a senior protection officer's mission to Moroni and Anjouan in December 2025 assessed the national response to mixed movements, identified gaps in policy, legal frameworks and operational capacity, recommended the government organise referral pathways and humanitarian assistance delivery, and noted the absence of a national asylum system.<br>Registration in the country runs under the agency's own mandate. Nothing on file gives a refugee a digital identity, a registration route or access to any government service. | NO CHANGE<br>twenty-four people registered and no national asylum system behind them |
| **Congo** | Biometric passports were issued to refugees in February 2026, under the 2021 asylum statute.<br><br>The 2021 statute on the right of asylum and refugee status is the standing instrument.<br>2026-02-07 — biometric passports were handed to refugees, which is documentation issued into the national identity system rather than a parallel one.<br>No count of refugees documented, or of those still without documents, is published. | MOVEMENT |
| **Cote d'Ivoire** | 93,200 refugees and asylum seekers were recorded at June 2026, with registration yielding attestations that serve as proof of identity and documentation gaps a stated protection challenge.<br><br>The statutory basis is in force: on recognition of status a biometric refugee identity card is issued after inscription in the national register of natural persons and serves as residence title, civil-status documents are issued on the same terms as for nationals, and communication of identifying data to the country of origin is forbidden except for travel documents when executing an expulsion; the national organ the law creates awaits its decree.<br>2026-06 - 93,200 refugees and asylum seekers, about 82,254 of them from Burkina Faso, against 930,958 stateless; 3,619 new arrivals in 684 households registered in the north between April and June 2026, with continuous registration entering refugees in the national refugee database and yielding attestations serving as proof of identity, while cost and travel barriers to civil registry offices limit birth registration and so school enrolment.<br>A profiling of 4,209 newly registered asylum seekers found over 90% of adults without schooling and high financial exclusion. | MOVEMENT |
| **Djibouti** | Displaced people were brought into the national household survey through a boosted sample with displacement modules.<br><br>2025-09-08 - refugees, migrants and undocumented residents were included in the national household survey through a boosted sample and a questionnaire carrying modules on migration history, access to services, livelihood barriers and integration, with technical assistance to the statistics institute and anonymised microdata planned for release.<br>2026-05-19 - a technical facility was appraised to improve refugees' and host communities' access to affordable financial services and financial literacy; nothing confirms disbursement or launch.<br>The social registry's founding decree was amended in 2020 with provisions to facilitate refugees' inclusion; no count of refugees registered is published. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **DR Congo** | Fizi Territory has been off calls, SMS and internet since 3 July 2026, and soldiers seized four broadcasters' satellite kits.<br><br>At the window's opening one territory centre was off all networks because generator fuel could not reach tower sites, with other eastern areas reconnected in February 2026.<br>2026-07-03 - Fizi Territory including Baraka went off calls, SMS and internet and was still cut more than six weeks later amid fighting; soldiers seized the satellite kits of four community broadcasters on 8 July, telling journalists the equipment would be returned only when the war ended, and some outlets have suspended news bulletins, an account given from Baraka itself.<br>No licensing or administrative decision for occupied territory is held, and no restoration date is stated. | REGRESSED |
| **Egypt** | The executive regulations of the asylum law were issued by decree, taking effect three months after publication.<br><br>2026-05-21 - the executive regulations of the foreigners asylum law were issued by decree, published in the official gazette and taking effect three months after publication.<br>The held text states no registration procedure, documentation standard or service-access provision bearing on digital systems, so what the regulations mean for a refugee's access to identity or services cannot be stated from them.<br>No refugee or displaced population figure, no registration count and no service-access measure appears anywhere else on this ledger either.<br>2026-09-07 - the only outcome measure the repository holds for refugee assistance is the delivering agency's own: its year-end monitoring of 2024 multi-purpose cash assistance interviewed 393 of 434 sampled households and found 99% able to buy items they could not previously afford. A self-evaluation on a sample rather than the caseload, reporting purchasing ability rather than any outcome. | NO CHANGE<br>a first stated position with no earlier account behind it |
| **Equatorial Guinea** | The refugee agency records no domestic refugee status law despite treaty accession.<br><br>The agency's rights mapping sets out the position: Equatorial Guinea has acceded to the refugee treaties and has enacted no domestic status determination law.<br>Without a status procedure there is no registration or documentation system to assess, and no refugee population figure appears in the repository for the country. | NO CHANGE |
| **Eritrea** | No framework and no accession. The country is not party to the refugee conventions and has no national protection law; displacement runs outward.<br><br>The refugee agency's legal and governance profile records that the country is not party to the refugee convention, its protocol or the regional refugee convention, has no national legal framework addressing refugee or asylum-seeker protection, and hosts a population of 119 refugees.<br>The displacement that matters here is outward. By December 2025 the agency was aware of over 679,000 refugees and asylum-seekers from the country worldwide, and its guidance note of April 2026 supersedes eligibility guidelines dating from 2011. | NO CHANGE |
| **Eswatini** | 77 machine-readable travel documents were dispatched to refugees between April and June 2026, on a statute in force since 2018.<br><br>The Refugees Act of 2017, commenced in November 2018, provides for the recognition, protection and control of refugees and establishes the commissioner for refugees (Act).<br>The refugee department received 82 applications for machine-readable convention travel documents in the first quarter of 2026/27 and dispatched 77, alongside 70 refugee status permits (quarterly figures).<br>A regional refugee-agency report names the country among those incorporating refugees and asylum-seekers into national civil registration and documentation systems (report).<br>The documents are machine-readable, which is the only digital property the repository records of them. No refugee population figure, and no statement of refugee access to any other digital public service, is held. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Ethiopia** | A refugee-inclusion framework covering 1.1m refugees and 2m displaced people makes the national identity central to a state-led model.<br><br>The framework adopted in July 2026 puts the national identity at the centre of a state-led inclusion model covering 1.1m refugees and 2m internally displaced people (inclusion framework).<br>The lender's March 2026 mission records about 190,000 refugee registrations against 170,000 identity issuances (aide-memoire).<br>Neither figure is broken down by camp, region or status, and the repository holds nothing on what services a refugee holding the identity can actually reach.<br>Mobile-industry research finds refugee women twice as likely to have their SIM registered in a friend's or relative's name, and less likely to own a smartphone or use the internet, which leaves them without control of the line their mobile money and communications run on. It is a first measurement, with no earlier figure to compare. | MOVEMENT |
| **Gambia** | 4,214 refugees and 552 others of concern at 31 May 2026; the 2008 Act provides for cards with no issuance count.<br><br>The Refugee Act 2008 constitutes the refugee commission and provides for status determination, refugee identity cards and travel documents. The 2020-2030 migration policy names it as the operative instrument for refugees, displaced people and statelessness.<br>The population is small and counted — 4,214 refugees and 552 others of concern at 31 May 2026 — and the repository holds no figure for cards issued or for refugee enrolment in the national identity system. The state validated its second migration progress report in May 2026. | NO CHANGE |
| **Ghana** | Refugee registration appears as a line in the identity authority's fee schedule; no refugee population or registration figure is held.<br><br>The identity authority's fee schedule carries refugee registration as its own line, alongside the foreigner identity system and separate regional, continental and rest-of-world tiers - the clearest statement the repository holds that refugees are inside the identity system at all.<br>2026-08-25 - a European Union-funded action on birth registration and legal identity pairs the births registry with the health service in six low-coverage regions, framed around refugee protection as well as registration gaps.<br>No refugee or displaced population figure, no registration count and no service-access measure appears anywhere on this ledger, so the position is that the systems name this group and the repository cannot say how many of them the systems reach. | NO CHANGE<br>a fee line and a registration action with no population figure behind them |
| **Guinea** | The 2018 statute provides for biometric refugee identity cards and travel documents and has never had an implementing decree published, so the entitlement is not operative.<br><br>The statute is described as one of the most comprehensive in West Africa, defining management of refugees and asylum seekers including the eligibility and appeals committees, and providing for access to biometric documents. Although government experts validated the implementing texts in June 2021, no implementing decree has been published for its effective implementation. On internally displaced people the country is party to the regional convention with no national legal framework specifically addressing them.<br>2026-07-23 - the refugee commission's executive secretary set out its mandate: registration of asylum seekers, support to status determination, coordination of international protection, promotion of integration and the search for durable solutions, with the country's global forum commitments named as improving refugee documentation, issuing identity documents and travel titles, strengthening civil status and including refugees in national policies. A commitment and coordination event, with no system named and nothing registered.<br>The population figures do not agree: the ministry publishes over 3,023 refugees and over 3,053 asylum seekers against the refugee agency's 2,171 and 172, and the ministry's statement gives no reference date or method. | MOVEMENT |
| **Guinea-Bissau** | 32 refugees and 37 returnees recorded at 31 May 2026.<br><br>The agency's operational data records 32 refugees and 37 returnees for Guinea-Bissau at 31 May 2026.<br>The population is small enough that no dedicated registration, documentation or service system is described for it, and none appears in the repository. | NO CHANGE |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Kenya** | A GBP 2.3m programme across eight arid-lands counties including two refugee-hosting counties passed its March 2026 completion date with no report held.<br><br>Activities were to start in late 2025 (programme).<br>Against it, American-funded inclusion and connectivity programming including work in remote counties slowed or stopped after the 2025 wind-down, with no replacement funder named (withdrawal).<br>2026-09 - a Dutch-funded programme began training refugee and host-community youth in Garissa and Turkana, targeting 1,700, with more than 700 enrolled. | MIXED<br>a Dutch-funded skills programme reached refugee youth while US programming stopped |
| **Lesotho** | Biometric registration for refugees has run since 2018 on a separate system, with no stated pathway into the mainstream one.<br><br>2018-10-11 — a biometric registration system for refugees and forcibly displaced people was handed to government.<br>2026-02-26 — the 2026 identity work plan advances the mainstream platform and states no refugee or displaced-person inclusion pathway.<br>Two identity systems run in parallel and the newer one is being built without a route from the older. No count of registered refugees is published. | NO CHANGE |
| **Liberia** | A March 2026 memorandum enrols eligible refugees in the national biometric system and issues specialised refugee cards.<br><br>The Refugee Act 1993 already entitled every recognised refugee to a prescribed identity card and empowered officers to take fingerprints, palm-prints and photographs, so biometric refugee identity is not new in law.<br>What is new is the connection to the national register: a memorandum under Executive Orders 144 and 147 has the refugee commission screen and validate integrated Ivorian and other eligible refugees while the identity registry enrols them and issues specialised biometric refugee cards. In June 2026 Executive Order 159 rebranded the commission and extended its mandate to statelessness, deportees, returnees, displaced persons and migration governance. | MOVEMENT |
| **Libya** | Registered foreign residents were opened to electronic wallets in March 2026, on lower transfer limits.<br><br>Registration itself is the agency's rather than the state's: 44,223 refugees registered on the agency's own system with biometric enrolment deployed from August 2020.<br>Financial access moved in the window. The central bank opened electronic wallets to Libya's registered foreign residents with lower daily transfer categories in March 2026, and a commercial bank launched the first such wallet, requiring no bank account. Both reach the repository through press reporting rather than a published circular. | MOVEMENT |
| **Madagascar** | A rights mapping entry records a refugee reform bill and a pledged office; no digital service for displaced people is held.<br><br>The rights mapping entry records a reform bill scheduled for a vote in 2025 and a pledge to establish a dedicated office by the same year (entry).<br>The page carries no publication date of its own; its year is inferred from those forward references, so the position it states may already have moved.<br>No registration system, identity credential, cash transfer mechanism or service portal for refugees or internally displaced people is held, and the social registry's coverage of displaced households is not stated anywhere in the repository. | NO CHANGE<br>a single undated entry with nothing behind it |
| **Malawi** | Dzaleka camp was included in the 2024 demographic and health survey; floods displaced 6,155 households.<br><br>The governing statute is from 1989: it establishes the refugee committee, status-determination procedures and non-refoulement protection, carries no provision on registration data, identity documents or access to digital services, and awaits a reform nothing on file dates.<br>2026-03 - the floods of January to March affected 69,088 households, 310,896 people, with 6,155 households displaced into 84 camps and a 10 million US dollar appeal for restoring basic services. No digital registration or service-access figure attaches to any of it.<br>2026-07 - the refugee camp was included in the 2024 demographic and health survey, the first systematic comparison of refugee indicators against national averages. Inclusion in a survey is not inclusion in a service. | MIXED<br>refugee data entered the national survey while 6,155 households were displaced by floods |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Mali** | The refugee agency publishes quarterly operational updates and the food programme a monthly country brief, which is the dated reporting the repository holds.<br><br>The caseload figures in both are not extracted here; what this records is that the reporting exists and is current (update, brief).<br>Against it, the unified social register that assistance would target from publishes no coverage figure at all, so displaced populations are counted by the agencies serving them and not by the state's own register.<br>2025-05-22 — a statelessness law protects people without documents from penalties and opens a path to nationality; its text is held from the official journal. | MOVEMENT |
| **Mauritania** | Decree 2022-063 replaced the 2005 refugee decree, and refugee registration in the eastern region is reported alongside inscription in the national register.<br><br>The decree of 5 May 2022 fixes how the international refugee conventions apply in Mauritania (decree), and the refugee agency's 2025 overview for Hodh Chargui reports registration there (factsheet).<br>No registered-refugee count, card issuance figure or statement of what the national register records for refugees is carried in either, so inclusion is provided for in law and unmeasured in practice. | MOVEMENT |
| **Mauritius** | A treaty body's concluding observations are the only account on file; no digital service for displaced people is recorded.<br><br>The racial discrimination committee's concluding observations of May 2025 are the whole of what the repository holds on the question (observations).<br>No refugee or statelessness framework, registration system, identity credential or service portal is recorded.<br>The absence is dated and searched. What would settle it is a framework instrument, or any digital service the repository can show reaching displaced people. | NO CHANGE<br>a searched absence with one treaty-body account behind it |
| **Morocco** | 18,900 refugees registered at the end of 2024; no digital service route for them is described.<br><br>The refugee agency records 18,900 refugees registered at the end of 2024, and the census counted 148,152 foreign residents, up 76 per cent since 2014.<br>Neither source describes how either population reaches Moroccan digital services. The identity credential that carries service access is a national one, and no equivalent for non-nationals appears in the repository. | NO CHANGE |
| **Mozambique** | About 392,000 people were newly displaced by floods in early 2026 on top of conflict displacement, and a US$6.9m partnership is restoring civil documentation in Cabo Delgado.<br><br>2026-01-30 — the refugee agency recorded about 392,000 people newly displaced by floods, on top of more than 300,000 displaced by conflict in the second half of 2025, with about 100,000 sheltering in around 100 overcrowded temporary centres lacking privacy, lighting and basic services, and elderly people and persons with disabilities struggling to access assistance, and states a 2026 country requirement of US$38.2m.<br>2026-03-03 — a US$6.9m partnership with Japan was signed for 2026-2028 to rehabilitate 27 government service points, train 300 officials and deliver mobile civil-documentation and legal aid to about 100,000 displaced and returnee people in Cabo Delgado, restoring the legal identity that gates health, education, justice and social assistance.<br>The policy frame is the internal displacement management policy approved in 2021, covering prevention, protection, response and reintegration under the disaster management institute.<br>Documentation is the digital dimension of this indicator, and it is being restored by a donor project rather than by the register itself. | REGRESSED<br>displacement rose sharply against a standing policy framework and a documentation gap the response is still closing |
| **Namibia** | 682 refugee identity cards were issued in 2025, and cash assistance through mobile money reached about 6,000 people in 2025.<br><br>Issuance of refugee cards began in June 2024 and 682 were issued in calendar 2025 (cards, system).<br>Cash assistance through mobile money launched in February 2025 for about 6,000 individuals in over 1,000 households, with the agency reporting it held 40 per cent of the resources needed and no record since (assistance). | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Niger** | Displaced people's preference for local integration rose to 98% by February 2026, against thin service access in the last full-year account.<br><br>A survey published in February 2026 finds 98% of internally displaced people now prefer local integration against 2% preferring return, up from 89% in the September 2025 round, while flagging major gaps in livelihoods, economic opportunity and social cohesion with host communities.<br>The 2025 annual report published on 20 July 2026 records over 80,000 people reached with water and sanitation services and over 60,000 migrants, displaced people and host-community members given improved access to essential services.<br>The last full-year account of service access is thinner: 92% access to potable water, 36% to sanitation and 36% of refugee children enrolled in national education in 2024. No figure for displaced people's access to legal identity or digital services is published. | MOVEMENT |
| **Nigeria** | A statute domesticating the African Union displacement convention was assented in March 2026, and a $300 million programme was announced.<br><br>The President assented on 9 March 2026 to the Act domesticating and enforcing the African Union convention on internally displaced persons, a distinct statute from the 2022 commission Act.<br>A $300 million World Bank-financed programme for displaced people and host communities was announced on 16 July 2026, framed as a move from humanitarian relief to development-linked inclusion.<br>The commission's own statutory registry function is unchanged: the 2022 Act requires it to register and personally document persons of concern and to support states in maintaining registers. No registration, identification or service-access figure under any of the three is published. | MOVEMENT |
| **Rwanda** | A joint country action plan signed in August 2025 mainstreams refugee needs into national energy, water, transport, education and finance systems.<br><br>The refugees law enacted in April 2024 governs refugee status and applications, repealing the 2014 statute (law).<br>The joint country action plan for 2025 to 2027, signed on 25 August 2025, mainstreams refugee needs into national energy, water, transport, education and finance systems (plan).<br>No commitment amount is stated anywhere in it — the plan names sectors and intentions — so it carries no financing record. Whether the national digital systems those sectors run on admit refugee identities is not addressed. | MOVEMENT |
| **Senegal** | A regional humanitarian initiative of FCFA 313m launched at Dakar in January 2026, on an asylum route that remains paper-based.<br><br>The initiative launched on 29 January 2026 carries a budget of FCFA 313,083,755 over nine months, implemented with the refugee agency's Dakar office and a local foundation, targeting displaced communities of Casamance and Mauritanian refugees in the river valley across education, livelihoods, health, vocational training and social assistance. No beneficiary count appears in it.<br>The documentation route it sits above is unchanged and manual: applications lodged in person with the national eligibility commission at Dakar on a form with a signed request and four photographs, a six-month renewable paper receipt permitting free movement pending decision, then two interviews.<br>Nothing in the repository records displaced or refugee populations being enrolled in the national identity or social registers. | MOVEMENT |
| **Seychelles** | The refugee agency records no known refugees, asylum seekers, stateless persons or displaced people in Seychelles.<br><br>The agency's own submission to the 38th session of the Universal Periodic Review states there are no known refugees or asylum seekers, no known cases of statelessness and no known internally displaced people in Seychelles (submission); Seychelles has not ratified the 1951 Convention.<br>This is a dated statement that the population does not exist rather than an undocumented gap, which is a different finding and the reason the indicator does not read as absent evidence.<br>Nothing more recent than 2021 was located. | NO CHANGE |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Sierra Leone** | An ECOWAS-supported project for displaced and stateless people launched in January 2026, paying beneficiaries through a commercial bank.<br><br>The project launched at Tiama Town on 8 January 2026, covering internally displaced people, refugees, returnees, stateless people, asylum seekers and host populations, with beneficiary tokens distributed through the Sierra Leone Commercial Bank (launch).<br>The statutory frame is the Refugees Protection Act 2007, which gives effect to the 1951 Convention, the 1967 Protocol and the 1969 OAU Convention and establishes the National Refugee Authority and the Refugee Status Appeal Committee (Act); the disaster management agency recorded internal displacement from the Kono windstorm in June 2026 (displacement).<br>No registration figure, caseload or link to the national identity register appears for any displaced population. | MOVEMENT |
| **Somalia** | The Act for Internally Displaced People came into force in December 2025, and an identity registration initiative for displaced people launched in June 2026.<br><br>The Act, signed on 4 December 2025 and gazetted on 21 December, affirms equal access to public services and legal documentation, prohibits a separate discriminatory legal status for displaced people, creates a sixteen-ministry technical committee and earmarks at least 3 per cent of the national budget (analysis, bulletin).<br>It replaces a 2019 policy that had established equal access to civil documentation and cautioned against blanket registration (policy).<br>A registration initiative launched in June 2026 to give displaced people the national identity card and equal-basis service access (launch). | MOVEMENT |
| **South Africa** | A bill would extend employment services to foreign nationals, refugees and asylum seekers, with work-authorisation verification, and an online biometric asylum registration system is promised for November 2026.<br><br>2026-10-11 — the Inter-Ministerial Committee on Migration said an online, biometric intention-registration and appointment system for asylum applicants is to be operating by 10 November 2026, with assisted registration at Refugee Reception Offices. It is announced, not live.<br>2026-05-29 — a bill was published extending the statutory employment-services framework to foreign nationals, refugees and asylum seekers, creating work-authorisation verification and requiring a framework for collecting information on their recruitment and employment, against the standing refugees statute of 1998.<br>The verification duty is the part that touches this report: it would run against the identity layer, and nothing states how a person without a South African identity number is verified, or what record is kept of the check.<br>It is a bill. No enactment, commencement or implementing system appears, and the white paper reported under digital identity carries the same population without stating how they are registered. | MOVEMENT |
| **South Sudan** | Large-scale biometric registration and re-registration of displaced people ran from April to June 2026, with no data-controller arrangement or retention rule stated.<br><br>The exercise is a humanitarian registration rather than a state system (registration, feedback).<br>No data-controller arrangement, retention rule, consent record or relationship to the national identity system is stated. It is the largest biometric collection in this ledger and the one furthest outside any legal framework, in a country with no data-protection statute. | MOVEMENT |
| **Sudan** | 7.9 million beneficiaries in 2024 including 3.4 million displaced people, and a refugee-facing site in Egypt that became the most visited country site worldwide.<br><br>The 2024 country report records 7,911,328 beneficiaries including 3,432,876 internally displaced people and 879,777 refugees, with more than 1.7 million reached through cash-based transfers worth USD 53.8 million, and a business-to-business distribution model piloted for over 135,000 people in access-constrained locations (report).<br>Sudanese refugees are now over three-quarters of the roughly 1.1 million registered in Egypt, a fourteen-fold rise since 2023, served through digital channels: 12.8 million views on one platform and 3.4 million on the help website in 2025 (fact sheet).<br>A digital learning centre in eastern Chad offers training to up to 400 learners (release).<br>The refugees commission announced smart cards carrying a Foreign Number from June 2026, against a register of more than 950,000 refugees (announcement). Its stated purpose is regulating presence and verifying identity; nothing states which services the number gives access to. | MOVEMENT |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Tanzania** | A disaster management strategy names refugees and displaced people among vulnerable groups; no standalone instrument exists.<br><br>The 2022-2027 national disaster management strategy expressly lists refugees and internally displaced people among vulnerable groups and commits to mainstreaming their needs across disaster-risk management.<br>That is the best combined-scope official instrument on the record, and there is no standalone statute on internally displaced people. Nothing states whether a refugee can obtain a national identifier, and the identity statute's own terms do not reach non-citizens.<br>Mobile-industry research finds that national identity requirements for SIM registration leave refugee women relying on local citizens or intermediaries to register lines. No figure for refugee SIM ownership or any exemption from the requirement is held. | NO CHANGE |
| **Togo** | 10,972 refugee identity cards were distributed in the Savanes in 2025, and a grant now funds 5,000 more registrations.<br><br>The national refugee body states that after four registration operations between 2023 and 2025, 41,773 Burkinabe obtained refugee status, and that a decentralised operation from 22 May to 16 July 2025 produced and distributed 10,972 identity cards across the Savanes, with records updated in its own database and the cards opening access to basic services.<br>A training workshop addressed the finding that socio-economic sections of that database were poorly populated, so reliable data could not be extracted despite the system's completeness.<br>A US$1 million grant approved 4 August 2026 funds registration and documentation of 5,000 new arrivals in a region hosting more than 55,000 refugees and close to 16,000 displaced people. None of this evidences enrolment on the national identity register. | MOVEMENT |
| **Uganda** | 1,999,576 refugees and asylum-seekers were hosted at March 2026, one per cent up on December, against an appeal 14 per cent funded and field operations cut 23 per cent.<br><br>The framework is long-standing: the prime minister's office runs refugee management under the 2006 statute and the comprehensive response framework (department).<br>2026-03 - the population rose and the resourcing fell. The country hosted 1,999,576 refugees and asylum-seekers, the largest refugee population in Africa and one per cent up on December 2025, 52 per cent South Sudanese and 33 per cent Congolese, with women and children 77 per cent of the total and over a million refugee children, against a quarterly appeal 14 per cent funded and a 23 per cent reduction in field operations, alongside a change in how refugee status determination is run.<br>The digital consequence is not recorded anywhere. Refugee data sits in a database the education systems assessment names as an integration target (assessment), and nothing states what a 23 per cent cut in field operations does to registration, identity documentation or access to digital services - which is the gap this indicator now records rather than the absence of a programme.<br>Mobile-industry research puts internet use at about a quarter of refugee women against about half of refugee men, naming handset, airtime and data costs as the main barrier. | REGRESSED |
| **Zambia** | Transfer of the refugee registration database to the home affairs ministry is provided for as a project subcomponent, and two project documents give different card counts and values.<br><br>The safeguards framework gives US$6.5m and about 100,000 cards against the appraisal document's US$6m and about 150,000 (transfer); the divergence is recorded, not resolved (transfer, framework, engagement).<br>The parent project became effective in December 2024, and no disbursement figure, enrolment count or implementation progress within the window is held (project, plans).<br>Moving a refugee database from an international agency to a ministry is a change of controller, and the country's data-protection regulator has no recorded action of any kind. | NO CHANGE |

| COUNTRY | DEVELOPMENTS | PROGRESS |
|---|---|---|
| **Zimbabwe** | A community radio station launched in the Tongogara refugee settlement in February 2026, reaching an estimated 25,000 to 40,000 listeners.<br><br>A digital education partnership between the refugee agency and a foundation has run in four schools in Zimbabwe since 2022, benefiting 5,280 primary students and 109 teachers (partnership). No later figure is held.<br>A community radio station broadcasting from the Tongogara refugee settlement launched in February 2026 and reaches an estimated 25,000 to 40,000 listeners including surrounding host communities (station). Before it, residents had limited access to timely information and poor radio reception.<br>Laptops handed to the first cohort of a technical and vocational bursary programme in July 2026 went to 192 participants, the cohort including 13 refugees and 10 persons with disabilities (handover).<br>All three are donor or partner programmes. Nothing on the repository records a government policy or service that treats refugees and internally displaced people as a distinct group for digital access. | MOVEMENT |
