

STATUS REPORT

Cote d'Ivoire: status report

Edition of 2026-08-14 · 108 systems and instruments tracked, 10 of them not held

Compiled 2026-08-14 from the Data Landscapers source base, from [outputs/reports/CIV/ledger.csv](#) (108 systems and instruments, 10 of them **Not held**). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

Côte d'Ivoire has a personal-data statute in force since 2013, a cyber-security agency operating since February 2025, a national root of trust commissioned in July 2026, and an interoperability platform live with twelve public bodies. The ministry puts telecommunications penetration above 130% of population, mobile coverage at 95%, and about [38,000 km of optical fibre reaching nearly one million homes](#) (2026-07). It has no artificial-intelligence statute, no published account of the universal-service levy, and no regulator annual report since 2022. The digital ministry's appropriation rose 37% to [FCFA 83.28bn for 2026](#), while the earmarked operator levies inside it fell and their share of the vote dropped from 65.6% to 42.7%.

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
5G commercial launch	PLANNED ↗	July 2026 launch date passed with nothing on record
CIVIX national internet exchange point	IMPLEMENTED ↗	Average daily traffic put at 36 Gbps
MTN satellite broadband	IMPLEMENTED ↗	Partnership announced April 2026
National IPv6 migration strategy	IN DEVELOPMENT ↗	Draft strategy and action plan validated at Yamoussoukro
National strategy to protect electronic-communications infrastructure	PLANNED ↗	First national assises held at Grand-Bassam
Orange Sat satellite broadband	IMPLEMENTED ↗	Launched January 2026
Programme national de connectivite rurale	IMPLEMENTED ↗	500 villages connected against a 575-by-December-2025 target

GPU Cloud Africa	PLANNED ↗	Stated second-quarter 2025 start passed with nothing on record
National Data Centre	IN DEVELOPMENT ↗	Formal authorisation to proceed at US\$170m
Raxio CIV1, VITIB Grand-Bassam	IMPLEMENTED ↗	Group committed capital lifted to US\$380m
Tier III data centre, VITIB Grand-Bassam	IMPLEMENTED ↗	Inaugurated 2025-10-02

Energy

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Electricity load of data centres and telecom sites	NOT HELD	No measured load published; one facility's design figure is all that is held

Cybersecurity

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
3R Technologie security operations centre	IMPLEMENTED ↗	Launched at Cocody-Angre 2026-05-19
National public key infrastructure	IMPLEMENTED ↗	Commissioning announced 2026-07-23
Reseau national des RSSI	IMPLEMENTED ↗	Launch workshop, Abidjan-Plateau, 10 to 11 June 2026
National cybercrime report	NOT HELD	2024 edition now held in full; no 2025 edition on file

Two operators launched geostationary services in January and April 2026, a low-orbit operator [went live by 17 July 2026](#) on a twelve-month provisional licence, and on 31 July the minister said regional satellite capacity would be routed through the universal-service bodies. Fifth-generation service has missed a second stated launch date: announced for July 2026 in towns above 25,000 inhabitants, with no launch, spectrum award terms or coverage obligation on file.

The emergency phase [connected 500 villages in 2025](#) against a stated 575 localities and 825,675 residents by December, with 300 more announced for 2026; no held source records the shortfall.

The state agency [commissioned the national public key infrastructure](#), announced on 23 July 2026, on the legal basis of the 2013 electronic-transactions law and its 2014 and 2016 decrees, giving the country a sovereign root of trust for every certification authority on its territory. Against that, the state agency's [2024 cybercrime report](#) records 12,100 complaints and 338 arrests, and no 2025 edition has been published. No Ivorian data centre publishes a measured electricity load: the only figure held is a design [1.5 MW of information-technology power at the Grand-Bassam carrier-neutral facility](#), from a 2022 environmental study.

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Grand Abidjan urban planning geoportal	IN DEVELOPMENT ↗	Project launched 2026-06-11 for 2025 to 2027

The national identification register's own director general [put holders at roughly 11 million](#) in a substantially larger population and named historic duplicate identities inside the register (2026-07-30); the register itself is unchanged. The figure comes from a commentary piece, not an official publication, and carries no as-of date. On-time birth registration, the pipeline feeding the register, [fell to 55.4% in 2024](#) from 56.6% in 2023 and 66.8% in 2021, and no 2025 yearbook is held.

All 39 first-instance tribunals were [connected to the justice platform on 29 June 2026](#), from a two-court pilot in January 2025, with nationality certificates and criminal-record extracts issued nationwide. The interoperability platform is live and populating on a [EUR 387,350 contract for the platform core and five priority services](#), and the minister told a seminar on 21 to 22 July 2026 that the first services onto it [were chosen largely by volunteering rather than against user priorities](#), against targets of 100 services online by end-2026 and 700 within three years.

Retail agents have levied [a flat FCFA 100 on every counter deposit or withdrawal since November 2025](#), on top of roughly 1% operator pricing on withdrawals, authorised by no tariff. Regional instant-payment interoperability became compulsory from 30 June 2026, with no account of Ivorian compliance since. The central bank puts the country at [99,649,204 electronic-money accounts opened at 31 December 2024](#), 40.07% of the union's total, with 26,370,627 active and 34.7% of the union's transaction value.

A working session on 29 July 2026 brought the civil-service ministry's project team together with the information-systems heads of Ivorian banks, through the banking association APBEF-CI, to advance deployment of the e-Administration application, which is to move loan-application supporting documents directly between the ministry and a chosen bank, with paper attestations replaced by electronic-signature-authenticated documents. The reform is scoped to [314,310 civil servants and state agents](#) and builds on SIGFAE, the existing civil-service management system; no go-live date, cost or contracting party is stated.

The data-protection authority's own communique, dated 3 August 2026, confirms the CERTINUM platform's 2 July 2026 launch and [directs all data controllers, correspondants a la protection and advisory firms to use it for their compliance procedures](#) from that date. The wording invites rather than mandates: no cut-off for paper filings, compliance deadline, fee schedule or provision for requests already filed by the old route is stated.

Access to public-interest information programme	IMPLEMENTED ↗	Presented at the Prime Minister's office 2025-07-25

The 2013 data-protection law is in force and unamended, the telecommunications regulator remains the designated authority, and neither the law's text nor any implementing decree is held. Compliance moved online in July 2026: the regulator's new platform [replaced about a hundred physical files a month](#) with online submission, tracking and traceability for conformity, processing authorisations and video-surveillance authorisations. No post-launch throughput figure has been published.

The regulator's own portal states that it must produce an activity report each year and publish it; [no 2024 edition could be located](#), and the most recent findable anywhere is 2022. The regulation levy that funds the authority was appropriated at FCFA 2.58bn for 2026, down 43.8%, so a shrinking levy has no public account of what it buys.

The 2021 to 2025 cyber-security strategy remains the instrument formally in force; a [draft for 2026 to 2030 was put to stakeholder review on 23 July 2026](#), extending scope to artificial intelligence, emerging technologies and cloud, and awaits the Council of Ministers. It is also the only binding-track instrument that puts artificial intelligence inside state scope. A consumer federation [launched a complaints platform on 30 July 2026](#) charging FCFA 150 per report.

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Gulf AI memoranda	PLANNED ↗	Two non-binding memoranda signed July 2025

Two national strategies were handed to the Prime Minister on 13 March 2025 and neither has a held adoption instrument. The artificial-intelligence strategy is costed at FCFA 912bn over five years; no AI-specific line is identifiable in the 2025 or 2026 finance laws the wiki holds, and the strategy text is not held. Three institutions the strategy provides for — a safe-AI label, a national committee, and a national agency the ministry said in July 2025 was being established — have produced no criteria, membership, decree, budget or staffing in the year and more since. The coordination role has meanwhile been taken up in practice by the cyber-security agency through its draft strategy.

A government assistant went live in March 2026 on messaging platforms and a toll-free line, with no usage, cost, vendor or model published. The United States announced on 16 July 2026 that a contractor had received [formal authorisation for a US\\$170m export-credit-financed project](#) covering a sovereign national data centre, a government digitisation platform and a smart-border surveillance system — announced by the United States rather than by any Ivorian instrument, and the figures are US-side approvals rather than Ivorian disbursements. The ministry [launched two accelerator cohorts and a state procurement platform on 29 July 2026](#) against a target of FCFA 5 to 10bn mobilised from banks, funds and donors. The FCFA 100bn innovation fund announced in July 2025 has no capitalisation, manager, governance or first close thirteen months on.

National digital-skills headcount	NOT HELD	No reconciled national figure exists

Research institutions

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Cyber-security masters degrees	IN DEVELOPMENT ↗	Curricula examined and validated at the 2026-07-28 workshop

The cyber-security agency set a target of **1,200 certified specialists in three years** on 29 July 2026, against about 250 trained in the first half of 2026 and 88 auditors certified that day; a civil-service programme claims more than 37,500 officials cumulatively; a vendor programme claims more than 10,000 young people against a 200,000 target. No national digital-skills headcount exists. The only sex-disaggregated measurement on record is the regulator's household survey: **81.38% of men against 47.19% of women owned a mobile phone** on 2017 fieldwork (n=2,892 households), and nothing since, although several name women as a target group.

Finance

New investments

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
World Bank inclusive digitalisation programme	IMPLEMENTED ↗	Loan agreement ratified by decree at the Conseil des ministres 2026-02-04

Domestic budget appropriations and expenditure

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Telecoms regulation levy programme	IMPLEMENTED ↗	FY2026 finance law
Universal service levy programme	IMPLEMENTED ↗	FY2026 finance law promulgated 2025-12-19
Published accounts of the universal service fund	NOT HELD	No account of the levy's use is on file

For 2024 the settlement law records **FCFA 69.67bn voted against FCFA 54.05bn spent** — 77.6% against the vote but 99.9% against an in-year revision, because the earmarked levy programme was written down by FCFA 8.79bn and then spent to the franc. No audited stage is recorded for any year.

The universal-service programme was appropriated FCFA 33.0bn for 2026 against FCFA 35.3bn for 2025, and the only outturn on file is 2024, at FCFA 24.44bn executed against FCFA 32.30bn voted, a 24.3% shortfall. The agency publishes no annual report, so the fund has no public account in either direction; the state portfolio report is the nearest published statement, putting the agency at [FCFA 7.9bn of tax receipts in 2023](#).

An IDA credit of [FCFA 84,356,070,200 \(EUR 128.6m\)](#) was concluded on 17 October 2025 and ratified by decree on 4 February 2026, financing phase 1 of a US\$330m programme to 2035, fenced to Abidjan, Yamoussoukro and twelve regions, with US\$45m for broadband to public institutions.

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Electricity load of data centres and telecom sites	an operator disclosure or a utility connection agreement would settle it; probed 2026-08-05, the Grand-Bassam operator's environmental study discloses installed IT power at design, not measured load; no utility connection agreement published	2026-08-05
National cybercrime report	an agency report for 2025 would settle it; probed 2026-08-05, the 2024 edition is published; no 2025 edition exists on the regulator's own reports page	2026-08-05
Count of services live on the interoperability platform	a ministry progress report against the 100-service target would settle it; probed 2026-08-05, the ministry's clarification note gives contract, phase and target but states no live-service count	2026-08-05
Regulator annual activity report	publication of the 2024 report would settle it, and is the only route to whether the data-protection function has a separable budget; probed 2026-08-05, the regulator's reports index refused an automated fetch, so publication cannot be ruled out from the site itself; acquisition attempted 2026-08-05 and failed, absence now stated dated on the place hub	2026-08-05
Migration data governance strategy	a reference number or adoption decree would settle it; probed 2026-08-05, referenced only in passing in reporting; no reference number, adoption decree or text located	2026-08-05
Regulator position on mobile-money agent identity copies	a regulator communique or decision would settle it; probed 2026-08-05, the question was put to the regulator in July 2026; no communique or decision in reply is published	2026-08-05
Any Ivorian artificial-intelligence statute	a published bill, act or implementing decree would settle it; probed 2026-08-05, the national AI strategy itself records the absence of a dedicated legal framework and lists adoption of an AI law as a future action	2026-08-05
AI strategy financing	an AI budget line, or a disbursement record for the acceleration programme, would settle it; probed 2026-08-05, a government platform reports the PADCI phase 1 ratification decree; the decree text, an AI budget line and any disbursement record are unpublished	2026-08-05
Published accounts of the universal service fund	the agency publishes no annual report; the settlement law for 2025, due December 2026, would settle the outturn; probed 2026-08-05, ANSUT publishes no annual report or accounts; the state-portfolio directorate's company record and annual portfolio report are the nearest published financials	2026-08-05
National digital-skills headcount	each programme publishes its own cumulative claim and nothing reconciles them; probed 2026-08-05, the only cumulative national figure is a ministerial statement in media, with no document reconciling it against the separate programme counts	2026-08-05

Publication by bodies under a duty to publish is one absence: the regulator has issued no annual report since 2022, the universal-service agency none at all. The strategy layer is the other: the artificial-intelligence, data-governance and migration-data strategies are cited as governing instruments and none of their texts is held.

ABOUT THIS DOCUMENT

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
