

PROGRESS REPORT

Egypt: progress report, August 2025 – August 2026

Edition of 2026-08-26 · 199 systems and instruments tracked

Of 199 systems and instruments on this place's ledger, 82 changed position between 2025-08-01 and 2026-08-26, 18 did not, 45 carry no stated baseline, and 54 are **Not held** at both ends.

SUMMARY OF THE PERIOD · GOVERNANCE · FINANCE · ICT INFRASTRUCTURE · DPI · DIGITALISATION · TECHNOLOGY · CAPACITY · INCLUSION · DATA · GEOPOLITICS · WHERE THE RECORD IS THIN

Shape check, run before the comparison: 212 sources for this place in the window — 40 in the earlier half (2025-08 to 2026-02), 172 in the later (2026-03 to 2026-08). The earlier half of the window is thin: this is a shorter comparison wearing a longer label, and the movement below rests mostly on the later half.

Movement values. *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a measured position worsened. *Closed* — the programme ended. *No change* — the position at both ends is the same. *Baseline not held* — the base carries no position at the start of the period, so no movement can be stated. A value may carry a qualifying clause after a comma, as in *Advanced, slipped*.

Summary of the period

Egypt's twelve months to 6 August 2026 were a year of instruments arriving rather than measurements moving. The Personal Data Protection Law was operationalised by Executive Regulations on 1 November 2025, more than five years after passage ([regulations summary](#)); a US\$3.5bn spectrum award doubled operator holdings ([award account](#)); and the government first published a count of its inter-agency exchange ([cabinet readout](#)).

That last figure needs reading carefully. The base carries no connection count for Egypt a year earlier, so 105 bodies is a first measurement rather than a year's achievement, and several positions here carry no stated baseline for the same reason. Where measurements exist at both ends, two moved: financial inclusion upward, and mobile download speeds downward.

Governance

Strategies, plans and policies

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Digital Egypt service-coverage targets	The platform was in operation; the base's last count before the window is more than 170 e-government services (2024-09-30), and no target series is on record	The minister set out 242 services at 2026-07-21, a target of over 270 by end-2026 and about 450 by 2030, under a legislation and governance pillar alongside digital transformation, technology localisation, digital infrastructure and capacity building	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
National data-centre strategy	Did not exist	Under preparation, framed around data localisation, a regional storage and processing hub, digital sovereignty and digital-services exports, and reaffirmed by Cabinet on 2026-07-05 and by the minister on 2026-07-21; no publication date, draft text or governing instrument is held	ADVANCED
National Digital Health Strategy	Did not exist	Launched in November 2025 on secure, interoperable systems and data-driven decision-making, and carried forward in the FY2026/27 economic and social development plan, which targets expanded use of artificial intelligence in health - diagnostic support, predictive models built on electronic health records, precision medicine and drug-research efficiency - and calls for specialised health datasets carrying the professional terminology used in diagnosis	ADVANCED
National Spectrum Strategy 2026-2030 and the 410 MHz award	Did not exist; the strategy's period begins in 2026	410 MHz of additional spectrum awarded across 1.8 GHz, 2.6 GHz and 3.5 GHz, doubling operator holdings in a single transaction, for US\$3.5bn paid by the operators to the regulator; the minister stated the award matches all spectrum allocated in Egypt over the previous 30 years	ADVANCED
National Cybersecurity Strategy	The base carries no dated statement of which edition was in force at 2025-08-01, or of the strategy's content	The second edition is being implemented through projects to protect digital infrastructure and build cyber defences, and a third edition is being prepared; the national emergency readiness centre is being developed to use AI against cyber threats	BASELINE NOT HELD

Legislation and regulation

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Child national ID card proposal	Not on record	A member's proposal for a national identity card for children carrying a photograph from age five, requiring amendment of the Child Law, discussed at two workshops; recommendations included a unified national child-data platform, a full biometric identification system for children, and linkage between health, education and other government databases. No bill has been tabled	ADVANCED, A MEMBER'S PROPOSAL ONLY
Electronic service of judicial notices	Not on record	The postal service's digital postbox becomes the official platform for electronic delivery of judicial notices to individuals, companies and institutions, bound to the user's national identification number and carrying identity verification, electronic signatures and seals, encryption, delivery timestamps and correspondence tracking, so that a registered electronic message has the same legal validity as registered paper mail	ADVANCED
National register of personal-data use, proposal	Did not exist	A member proposed on 24 August 2026 a national register letting citizens see which bodies have obtained or processed their personal data and why, on a secure platform logging onward sharing, with instant alerts where data is suspected of being used to open an account, mobile line or e-wallet, binding deadlines for handling misuse complaints and remediation costs borne by the offending body, and a data-minimisation rule; he cited mobile lines registered on citizens' data without their knowledge and a school taking loans in parents' names, and argued the 2020 data-protection law needs enforcement rather than replacement	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
PDPL Executive Regulations, Decree 816 of 2025	Did not exist. The Alexandria Economic Court decided the Orange Egypt case in February 2025 on tort grounds precisely because the regulations were still pending, more than four years after the law passed	In force, establishing the approvals model, a separate licence for each cross-border transfer specifying destination, purpose, data categories and safeguards, extra approvals for electronic marketing and certain public-space surveillance, registered data-protection officers, and breach notification within 72 hours to the regulator and three business days to affected individuals	ADVANCED
Real property register conversion, Manshah section, Sohag	The title register was due to take effect for the Manshah city survey section on 2026-07-01 under a decision of 2000	Deferred by one year to 2027-07-01 by a justice ministry decision published in the Official Gazette, with settlement forms admitted for that section for two months from 2026-07-01 to complete the legal procedures	STALLED
Regulator unit monitoring AI-manipulated social-media content	Not on record	The ICT minister told Cabinet that a unit had been formed inside the telecommunications regulator which already detects and acts on AI-manipulated video and imagery, but that legislative amendment is needed to address the practices at root	ADVANCED
Social-media legislative review	Not on record; the base holds no proposal to amend the social-media statutes before 2026-07-29	A cabinet meeting chaired by the Prime Minister agreed on a review of the governing statutes, heavier financial penalties and public awareness campaigns; the ICT minister said a comparative study of other states' approaches is being prepared. No bill, text or timetable is stated	ADVANCED
Standalone digital-privacy statute proposal	No standalone digital-privacy bill on record	A member called on the government to bring forward a comprehensive digital-privacy bill criminalising recording and publication without consent, imposing takedown duties on platforms, raising penalties where fake accounts, defamation, extortion or vulnerable victims are involved, and widening investigators' powers to trace anonymous accounts	ADVANCED, A MEMBER'S DEMAND ONLY
Property ID Law	Approved by the House, having been introduced in August 2023; it mandates a unique digital ID for every property recording location, use, ownership, licensing, violations and transaction history, tied to a unified digital base map, and makes the property ID a prerequisite for registry or notary registration and for utility connections	Unchanged; no prime-ministerial decree naming the overseeing authority, no executive regulations and no commencement date are on record fifteen months later	NO CHANGE
Regulatory framework for foreign satellite operators	In force since 2024-07-09, the standing licensing instrument for any foreign satellite operator serving earth-station terminals in Egypt, granting categorical licences to operators supplying space capacity to licensed providers	Unchanged; no foreign low-earth-orbit operator has been licensed under it	NO CHANGE
Digital space bill	BASELINE NOT HELD	A 54-article, seven-chapter party draft that would require digital platforms to appoint a legal representative in the country and register influencers on a national platform, and would regulate the use of artificial intelligence, deepfakes, online extortion, gambling and child protection online; not tabled, and no text is published	Baseline not held

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Financial Regulatory Authority technology sandbox	The base carries no position on the sandbox at 2025-08-01; the authority states that 2026-08 closes its first year	Live testing approved for three months, renewable, for two of the seven projects given preliminary approval in the first year: remote inspection and damage assessment in comprehensive motor insurance, and verification of foreign nationals' identities by reading electronic passports with NFC-equipped phones against international travel-document public-key standards, so that non-Egyptians can reach insurance, investment and other non-banking financial services; the authority reports 49 applications received, 7 given preliminary approval, 2 in live testing and regulatory guidance given to 45 entities	BASELINE NOT HELD

Data protection

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Data-protection compliance guidelines and templates	Did not exist; no regulator guidance is recorded in the base before 2026	Ten guidelines published, covering consent, lawful bases of processing, electronic direct marketing, the data protection officer, officer categories, data users, principles, records of processing activities, licences and permits, and privacy notices, together with breach-notification and records templates	ADVANCED
Face-print collection for mobile line registration	Identity verification for a mobile line without published biometric collection	Rights organisations called on 24 August 2026 for the regulator to withdraw the directives making biometric verification a condition of registering, managing or recovering a mobile line, arguing that the regulator - which on 10 August 2026 referred all four mobile operators to the Public Prosecution over lines registered without their holders' knowledge - has published neither an account of where registration failed nor any assessment of whether those same operators can protect biometric data	REGRESSED
Personal Data Protection Law 151 of 2020	In force since 2020 but never operationalised, with no executive regulations issued	Operationalised by the Executive Regulations; the law's obligations on purpose limitation, approvals, cross-border transfer licensing, data-protection officer appointment, 72-hour breach notification and guardian consent for under-15s become enforceable from 2026-11-01 at the end of a one-year grace period	ADVANCED
Data-protection enforcement actions	One award on record: the Alexandria Economic Court ordered an operator to pay EGP 10 million in February 2025, on facts from November 2022, after an unconsented SIM replacement	The same single judgment. The base records no regulator decision, fine, registration figure or cross-border-transfer licence issued at any date to 2026-08-06	BASELINE NOT HELD
Personal Data Protection Center	The base carries no dated statement of the Centre's standing, staffing or activity at 2025-08-01; its first appearance in this section's source base is 2025-11-16	Confirmed as the body implementing, monitoring and enforcing the law, running the approvals and cross-border-transfer licensing regime, officer registration and breach receipt; the acting chief executive framed data sovereignty as a strategic necessity at a November 2025 workshop	BASELINE NOT HELD

Regional collaboration

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Chairmanship of the Arab AI governance and quantum working groups	Did not exist. The Arab Permanent Committee for AI and Emerging Technologies was created by a ministerial resolution at a session Egypt hosted in January 2026 and held its first founding meeting in May 2026	Egypt chairs the AI Governance Working Group, whose remit is a guidance framework for AI governance, technical tools and mechanisms for activating the Arab Charter for AI Ethics, and the Quantum Computing Working Group, whose remit is an Arab quantum strategy and quantum-cybersecurity deployment	ADVANCED
UN E-Government Development Index position	95th of 193 with a score of 0.6699 on the 2024 index, inside the global top 100 but below Egypt's 2010 peak of 86th	The same 2024 figure; no later reading is held at 2026-08-06	NO CHANGE

Standards

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Transfer-pricing guidance	The approved guide dates from 2018 and has not been revised despite successive changes to the legislation and to international standards	Unchanged. The chair of a chamber of commerce tax committee told a financial daily the file needs urgent intervention, and appeal committees have begun relying on statutory provisions requiring a minister-approved guide, with the result that some transfer-pricing penalties have been cancelled	NO CHANGE
Sustainable Finance Taxonomy	Not held	Under development by an inter-ministerial working group formed by the central bank with the finance, investment, environment and financial-regulatory authorities, ahead of official issuance	BASELINE NOT HELD

Public debate and participation in policymaking

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Council of State digital transformation plan	The base carries no record that the administrative-justice branch had a digitisation programme	The head of the Council of State told a meeting of administrative-court circuit presidents that the Council continues to implement an integrated digital transformation plan, developing its information infrastructure and adopting current technology to speed litigation; no named system, date, figure or deliverable is stated	BASELINE NOT HELD
VAT credit-refund period reduction	The base carries no earlier statement of the refund period or of the proposal	A proposed cut of the credit-refund period to four months for taxpayers and three for small and medium enterprises is still awaiting its legislative steps; a tax association board member added that the reduction will not meet its objects unless the operational problems obstructing proof of balances are resolved first	BASELINE NOT HELD

The defining governance movement of the period is that a statute in force since 2020 was finally made operable. Executive Regulations were issued on 1 November 2025, establishing the approvals model, a licence for each cross-border transfer, registered data-protection officers and breach notification within 72 hours ([regulations summary](#)). Enforcement runs from 1 November 2026, and ten compliance guidelines followed in early 2026.

What did not change is enforcement. At the start of the period the only award on record was a February 2025 judgment grounding liability in tort precisely because the regulations were pending ([judgment note](#)); at the end it is still the only one.

Several instruments went from nothing to a stated intention. Cabinet agreed on 29 July 2026 to review the social-media statutes and raise penalties, after the ICT minister disclosed a regulator unit already acting on artificial-intelligence-manipulated media ([cabinet account](#)). A national data-centre strategy and a national quantum strategy both entered preparation. One instrument did not move at all: the Property ID Law, approved by the House in April 2025, still has no decree naming its overseeing authority, no executive regulations and no commencement date fifteen months later.

Finance

Domestic budget appropriations and expenditure

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Budget allocation for data centres and state AI	None published	An intended allocation of up to US\$860 million a year from the general budget, from FY2026/27 to the end of 2030, for data centres, computing infrastructure, data security and privacy, and artificial-intelligence use inside state-owned companies, on a stated target of 0.10-0.15 per cent of GDP	ADVANCED
ICT sector public investment	Not held	EGP 13bn of public investment allocated to the communications and information technology sector in the 2025/26 plan, against plan targets of US\$8.5bn in annual digital exports of which US\$6bn from outsourcing	BASELINE NOT HELD

MoUs and other agreements

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Central bank memorandum with Afreximbank on a pan-African Gold Bank	Did not exist	At feasibility-study stage, to assess technical, commercial and regulatory requirements for a Gold Bank sited in a designated free zone in Egypt, scoped to include an internationally accredited refinery, secure vaulting and associated financial and trading services	ADVANCED
Fawry point-of-sale integration partnership	Did not exist	An integration connecting the payments company's acceptance terminals with a point-of-sale software provider's system, targeting hospitality, retail chains and hypermarkets	ADVANCED
Memorandum on a regional IT outsourcing delivery centre	Did not exist	A framework for expanding the firm's operations in Egypt and establishing a regional outsourcing delivery centre serving Middle East and North Africa clients in business consulting, risk management, cybersecurity, digital engineering, data analytics, AI and business platforms, stated as creating more than 1,000 jobs over three years	ADVANCED
Central bank cooperation with Eswatini	The base carries no dated position on the relationship at 2025-08-01, though prior cooperation on capital standards, financial inclusion, small-business finance and climate-related risk is described	Eswatini seeking to draw on Egypt's continental payment-system accession experience, with Egypt also offering its currency-circulation system, its currency printing house and banking institute training programmes	BASELINE NOT HELD

New investments

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Blk consumer lending facility	Did not exist	US\$12.5m Series A equity led by a domestic venture fund with three development and regional investors, plus US\$24.6m in local-currency debt from three Egyptian banks, against a point-of-sale lending network of more than 3,000 merchants	ADVANCED
Egypt Startup Charter and unified financing initiative	A government framework in preparation, with a stated unified financing initiative of EGP 50bn to support 5,000 startups and help 500 of them attract more than US\$1m each, against targets of US\$5bn in investment over five years and 500,000 jobs; no launch, appropriation, disbursement or governing instrument on file (2025-12-19)	The Startup Label certification is issuing under the Charter: UMAMI E-Learning Solutions named as one of the first Egyptian companies awarded the Startup Label Certificate, assessed on innovation, technological reliance, scalability and investment readiness; no cumulative certification count, and no appropriation or disbursement figure for the stated EGP 50bn financing initiative, is held	ADVANCED
Fawry revenue and market capitalisation	No 2024 figures are on file; the source states market capitalisation had nearly doubled over the previous year	2025 revenue of EGP 8.65bn and net revenue of EGP 3.1bn; market capitalisation of EGP 67.72bn, given by the source as about US\$1.3bn at April 2026, with about six million transactions processed daily	ADVANCED
Hassan Allam Digital Infrastructure data-centre licence	Did not exist	Licence to build and operate a data centre, developed with a technology partner, backed by a stated initial US\$400m first-phase investment and described by the regulator as the tenth data-centre licence issued in two years; no site, capacity in MW or opening date stated	ADVANCED
Sale of a majority stake in the Regional Data Center Hub	Did not exist at 2025-08-01; the agreement was announced 2025-09-07	Cancelled for unmet conditions, with the buyer having been due 75-80% of the unit; the hub is instead to be carved out as a wholly-owned subsidiary with its own technical and commercial team	CLOSED
Sinai hyperscale data centre proposal	Did not exist	Targeted investment approaching US\$1bn, starting at 10,000 sq m with an expansion vision to 500,000 sq m, seawater cooling, and power wholly from the consortium's green hydrogen and solar project; the minister required a full feasibility, financing structure and shareholder file, and coordination with three ministries and security bodies	ADVANCED
State telecom infrastructure investment since 2019	No cumulative investment figure is on file at 2025-08-01	More than US\$6bn invested in telecom infrastructure since 2019, with about 3,000 new towers planned in-year, more than 9,000 over three years and a stated target of 40,000 towers by 2028	BASELINE NOT HELD

State investment in the sector is stated only in dollars by ministers, at more than US\$6bn since 2019 ([ministry account](#)), and no Egyptian budget document supports any appropriation figure in this report.

ICT Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
5G and aggregate mobile download speeds	5G median 110.5 Mbps on launch day and 106.80 Mbps in month one; pre-launch 4G baseline 32.8 Mbps; combined 4G and 5G median 37.68 Mbps	5G median about 89 Mbps at month six; combined 4G and 5G median 34.77 Mbps, below the pre-launch baseline, with 4G down 17%	REGRESSED
Active international submarine cable systems landing in Egypt	13 systems landing on the eastern coast with a stated plan to expand to 18 (2024-11-18, operator-reported)	About 15 active international systems, the largest concentration in Africa (2025-11)	ADVANCED
Fixed broadband subscriptions	11.51 million (2024)	12.60 million (November 2025), up from 12.50 million in October, annual growth 8.98%; mobile carried 75.44% of internet access against 72.97% a year earlier	ADVANCED
Starlink service in Egypt	Advanced ministry negotiations reported 2025-06-18 with a possible launch during that year; no licence, no Egyptian entity	Talks moved to a licensed local operator; no licence, no local entity, no service date, and the operator's own map listed Egypt as service date unknown in May 2026	STALLED
Upper 6 GHz mobile trial	Did not exist	The incumbent, the regulator and a Chinese vendor ran a mobile base station and a data call over upper 6 GHz, reported at about 1.7 Gbps per user and stated by the operator as the first such trial in Egypt and Africa; the regulator frames the band as a capacity addition for high-traffic areas	ADVANCED
2Africa submarine cable, Egypt transit and Mediterranean segment	Mediterranean capacity in service since January 2025, with Egypt a transit hub rather than a terminal landing	Same; the system is stated at about 45,000 km across 33 or more countries, designed for up to 180 Tbps on main routes, with most segments expected complete by 2026 (consortium-reported)	NO CHANGE
5G mobile service	In service since June 2025, initial rollout focused on Cairo and Alexandria, on shared refarmed blocks of 20 MHz to 30 MHz of 2.6 GHz	Same architecture; no coverage obligation, subscriber count or population-coverage figure is held for Egypt at 2026-08	NO CHANGE
AWS CloudFront edge location, Cairo	In operation since May 2024, with a vendor-stated latency reduction of up to about 30% for content delivered in Egypt	Same; no capacity expansion or additional presence is recorded	NO CHANGE
Mobile tower expansion programme	The base carries no tower count or programme statement before February 2026	About 3,000 new towers planned in 2026 and more than 9,000 over three years, towers stated as doubled since 2019, against a target of 40,000 by 2028; more than US\$6bn invested in telecom infrastructure since 2019	BASELINE NOT HELD
Share of popular web content served from inside Egypt	No prior reading is held	15% of popular web content served locally, the majority from European servers; Algeria 13%, South Africa 66%, United States 83%	BASELINE NOT HELD

Data Storage

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Telecom Egypt Regional Data Hub 2	Tier III design-certified, estimated IT load 4.6 MW against the first hub's 2.5 MW, completion expected end-2025	Unchanged in the base; no held source states it entered service, and the stated end-2025 completion date has passed	STALLED, ENTRY INTO SERVICE NOT CONFIRMED
East Cairo Logistics Park data-centre campus IT load	No prior reading is held	25 MW operating with plans to expand to 45 MW	BASELINE NOT HELD
Khazna Data Center Egypt expansion	No position is held at 2025-08-01	An Egyptian expansion is named in the continental pipeline; no site, capacity, investment figure or date is given	BASELINE NOT HELD
NTRA data-centre licensing regime	Licensing under the 2003 telecommunications law; the base holds no licence count or list at 2025-08-01	Ten data-centre licences issued over the preceding two years, with the regulator stated to be continuing to expand issuance	BASELINE NOT HELD

Energy

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Renergy green hydrogen and solar project, El-Tor	Did not exist	About 127 sq km with 4 km of Red Sea frontage, EUR 5m of technical studies completed over two years, two phases targeting 160,000 then 400,000 tonnes a year of liquid green hydrogen wholly for export to Europe; put forward as the power source for the proposed Sinai data centre	ADVANCED

Cybersecurity

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
ITU Global Cybersecurity Index standing	100% of index points on the 2023-2024 index, among the top 12 countries globally (reported 2025-02-18)	The same standing restated on 2026-06-10, among 12 states in the first tier at 100%	NO CHANGE
EG-CERT national computer emergency readiness centre	The base carries no dated position on the centre at 2025-08-01	Operating under the telecommunications regulator, with capability development under way using AI techniques against cyber threats; no incident statistics, mandate document, budget or reporting obligation is held	BASELINE NOT HELD

Egypt's spectrum position changed more in one transaction than in the preceding three decades: 410 MHz awarded to the four operators for US\$3.5bn in February 2026, doubling their holdings, under a National Spectrum Strategy whose period begins in 2026 ([award account](#)).

The service that spectrum was meant to carry went backwards on the only independent measurement available: the combined 4G and 5G median fell to 34.77 Mbps from a pre-launch baseline of 37.68 Mbps six months after the June 2025 launch ([measurement](#)). Egypt refarmed 2.6 GHz rather than licensing dedicated mid-band and attached no coverage or quality obligation to the award.

Rural fibre advanced steadily: from 856 of 1,450 phase-one Decent Life villages at end-2024 to more than 1,250 by 30 June 2026, about five million lines ([operator account](#)). Fixed broadband subscriptions rose from 11.51 million to 12.60 million.

Data-centre policy arrived without data-centre figures: a national strategy went from not existing to under preparation ([strategy account](#)) and ten licences were issued over two years ([licence account](#)), while no capacity figure in megawatts entered the record.

DPI

Data Exchange

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Digital treasury of reusable verified documents	The base carries no position at 2025-08-01	An operating model set and applied to a number of government services for gradual expansion, its first output the registration certificate as a verified reusable digital document consumed by the shop-licensing service, implementing the once-only principle	ADVANCED
Stock exchange and commercial registry data integration	Did not exist	A cooperation protocol between the stock exchange and the internal trade development authority to integrate the commercial registry and exchange databases, giving the exchange direct access to commercial registry data for listed companies, with a joint executive committee to oversee implementation and data confidentiality	ADVANCED
Digital trust services, e-signature and e-seal	The base carries no position at 2025-08-01	E-signature and e-seal live and integrated with digital identity, with remote e-signature stated as expanding across government services and the digital post box system stated as being finalised	BASELINE NOT HELD
Government digital switch	The base carries no connection count, architecture statement or lawful basis for the exchange at 2025-08-01	105 government bodies connected and 100 national databases linked for secure inter-agency exchange, named alongside unified digital identity, the Digital Egypt platform, the digital treasury, digital trust services and the digital post box as the enablers of the transformation	BASELINE NOT HELD

Digital Identity and CRVS

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Haweya national digital financial identity	Did not exist	The central bank's board approved the rules governing the digital financial identity system for electronic identification and verification of bank customers, reported 23 August 2026: customers may open accounts and take banking products through digital channels without visiting a branch, with electronic acceptance of terms and conditions and electronic authentication in place of a handwritten signature, and the rules set out system governance, the roles of participating parties, technical and operational requirements and data-protection and cybersecurity controls	ADVANCED
MOIEG-PASS biometric authentication platform	Did not exist	Android pilot in which users scan the national ID card and complete facial recognition to authenticate for a selected number of government services, with scaling to be decided on the pilot's outcome	ADVANCED
National digital identity app	A digital identity card enabling remote verification stated as under development	App released and in its second version, integrated with e-signature and e-seal services, with the civil-registry-linked eKYC extension stated as approaching	ADVANCED
Private eKYC and e-signature licence for the non-bank financial sector	Not licensed; no authorisation for private eKYC or digital contracting in the non-bank financial sector is held	Lending, investment and insurance companies under the financial regulator may create digital IDs, run biometric and non-biometric checks against national-ID and mobile-registry databases, and execute legally binding e-contracts; the licensee reports over 25m verifications a year	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Automated civil-registry kiosks	16 mall-based machines across six governorates and Cairo Airport, issuing birth, death, marriage and divorce certificates and national-ID application forms on fingerprint or facial verification, paid in cash	Same; no expansion, transaction count or withdrawal is recorded in the window	NO CHANGE
Electronic birth and death registration	The base carries no statement on electronic civil registration coverage at 2025-08-01	The health ministry and associated bodies are stated to have taken electronic registration of births and deaths nationwide, credited with faster and more accurate demographic monitoring	BASELINE NOT HELD
Mobile line registration regime	The base carries no position on mobile line registration at 2025-08-01	The regulator is tightening subscriber-registration rules and expanding mandatory facial verification at enrolment through its know-your-customer system, linked to the civil registry, and is advancing a unified national digital-identity project alongside. On 10 August 2026 it referred all four mobile operators to the Public Prosecution over lines registered without customers' knowledge, ordered them to halt new activations on corporate registration systems, contact every existing corporate-line holder to re-register in person by a deadline with unclaimed lines cancelled, and accelerate biometric verification in their applications, warning that non-compliance would cost them sale and activation rights. Public take-up of the regulator's own line-checking service reached 5 million registrations in a week, roughly doubling its user base to about 12 million. Verification at enrolment does not prevent a line being handed on afterwards, which is the gap the case exposed. The regulator logged over 3,000 line-fraud complaints and 100,000 call-centre inquiries in two days, says it checks each disputed registration against the provider's own records, and publishes monthly reports naming penalties. Members of parliament have asked what institutional framework governs the collection, storage and access to the facial-recognition data taken at registration, and digital-rights researchers argue that irreversible biometrics carry their own risk while the protection framework is still being built.	BASELINE NOT HELD

Digital Payments and Fintech

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Card and acceptance stock	Debit cards 26.4m and POS terminals 228,000 at end-2024; national scheme cards 43.5m at end-2024	Debit cards 29.1m at about 40% of the card market, prepaid 34.3m, credit about 7m; over 26,000 ATMs and about 275,000 POS terminals, with national scheme cards still stated at 43.5m from end-2024	ADVANCED
Direct carrier billing licence for government payments	Did not exist; no carrier-billing licence for person-to-government payments had been issued	Citizens may pay utility bills, traffic fines and civil-registry charges from mobile balance or the monthly mobile bill	ADVANCED
Financial Regulatory Authority digital factoring portal	Did not exist; no electronic check on whether an invoice had already been funded	Factoring companies verify prior funding of an invoice electronically through a direct link with the finance ministry and the tax authority, the platform vetting invoices before financing and freezing them to the financing company to enforce Board Resolution 51/2026's ban on double-funding a receivable; a second phase to make the full factoring cycle electronic is not dated	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Instant Payment Network and InstaPay	12.5m users; about 1.5bn transactions worth up to EGP 2.9tn in calendar 2024 (central-bank-reported); domestic transfers only	16m users at end-June 2025; EGP 4.2tn transacted July 2024 to June 2025; inbound remittances credited instantly at all banks operating in Egypt	ADVANCED
onebank digital bank	Preliminary clearance given May 2024, with due diligence on infrastructure, banking systems and cybersecurity under way	Initial approval granted, with products and services stated as preparing for 2026 and no launch on record	ADVANCED
SoftPOS contactless acceptance	Pilot only, capped at EGP 600 per transaction; the pilot is not dated in the source	Merchants may use a smartphone or tablet as an electronic point of sale, accepting contactless card payments with PIN entry on the device	ADVANCED
InstaPay transfer pricing	Priced at 0.1% with a minimum of EGP 0.50 and a maximum of EGP 20 since 2025-04-01, plus EGP 0.50 for balance enquiry beyond ten free monthly requests	Unchanged; no central-bank decision altering the schedule is held	NO CHANGE
Pan-African Payment and Settlement System, Cairo headquarters	Operating from Cairo, connecting the real-time gross settlement systems of participating African central banks, with 25 large commercial banks connected in 2022	Same; no Egyptian participation, volume or value figure has been published in anything the wiki holds	NO CHANGE
Mobile wallet accounts and value	No wallet account or value figure earlier than June 2025 is held	Over 55.5m wallet accounts transacting about EGP 1.8tn to June 2025, growth telco-led through the three operators' wallet products	BASELINE NOT HELD
State digital-finance operator acquisition of a non-bank lender	Not held	The state digital financial infrastructure operator agreed the full acquisition of an Egyptian non-bank lender to small and medium firms, extending its own infrastructure into direct lending	BASELINE NOT HELD
yomo digital bank	Did not exist	Preliminary central-bank approval for a commercial bank to establish a digitally native bank under the digital banks framework introduced in 2023, now entering technology validation, cybersecurity testing and operational-resilience readiness under a newly appointed chief executive; launch remains subject to final regulatory approval. No launch date or capitalisation is stated	BASELINE NOT HELD

Registries

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
National Platform for Regularising State Lands	The base carries no position at 2025-08-01, and the commencement date of the 2025 law that introduced the platform is not established	More than 302,000 applications received against about 1,700 contracts drawn up, 350 plots recovered and compensation collected on about 300 applications, with governorate committees still doing inspection, survey and measurement	BASELINE NOT HELD
Rashid state-owned companies platform	The base carries no position at 2025-08-01	A national platform to enumerate and classify every company the state owns or holds a stake in, with hosting, secure storage and compute for its AI applications supplied under protocol; the applications analyse and monitor the financial and operating performance of the state's corporate portfolio	BASELINE NOT HELD

Sectoral management information systems

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
DHIS2 national health information system	Did not exist	Open-source platform live under the national digital health priorities 2025-2029, with first-year use covering over 180,000 consultations for emergency evacuees across 189 sites, nutrition screening for about 20,000 refugee children, school-health screening for over 100,000 children and tuberculosis follow-up for 7,500 cases at 57 centres	ADVANCED
Social insurance 95-service online catalogue	95 electronic services undertaken within six months from 2026-02-08, opening with a first phase of 40	The 40-service first tranche restated as forthcoming at the point the six-month window falls due; against roughly 170 insurance services in all, only three concern pension entitlement and payment and the rest still require an office visit	STALLED
Social insurance digital transformation system	Did not exist; announced 2026-02-08 as a system in preparation	Running monthly pension disbursement plus an integrated electronic collection function, with electronic signatures, time-stamping and electronic links to other bodies; 167,500 arrears cases paid since go-live and 92% of the accumulated backlog cleared, the remainder attributed to missing citizen data chased by SMS	ADVANCED
Social insurance system users	Zero; the system did not exist	8,621,000 people served in about four months since launch, averaging 2.1m a month (authority-reported)	ADVANCED
Takaful and Karama unified social registry	A unified social registry covering about 12m households, reaching 4.7m active households and about 17m individuals, roughly 20% of families; payments by national scheme card, national-ID-based monitoring across more than 3,000 offices, targeting by proxy means testing plus home verification	Same; no fresher registry, caseload or payment figure is held	NO CHANGE

Other GovTech and e-Gov

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
African Financial Stability Committee digital portal	Did not exist; the committee had no public platform of its own	A platform carrying the committee's objectives, mandate and organisational structure, its member central banks, its meeting calendar and its two working groups, and the publication channel for the African Financial Stability Report, working-group reports, studies and technical papers; content maintained by the committee secretariat	ADVANCED
Appeal court digitisation protocol	Did not exist	A three-year cooperation protocol signed at the justice ministry on 23 August 2026 between the communications ministry and the Cairo Court of Appeal, covering a unified digital repository archiving and indexing finally adjudicated cases, an electronic portal and mobile application for citizens and complaints, a digital library for judges, and artificial intelligence as a judicial assistant for smart search, summarisation, drafting memoranda and comparing judgments, presented as a model to be generalised to every appeal court	ADVANCED
Digital Egypt platform	About 170 services (2024), 8.1m registered users, 7.8m transactions and enquiries in 2024	242 services and about 20m transactions since the start of 2026, with 73 services exclusive to the platform and other digital channels	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Digital Egypt users and transactions	8.1m users and 7.8m transactions and enquiries in 2024	10.7m users, up 32.1%, and more than 25m transactions and enquiries in 2025; a separate July 2026 trade account puts users at over 12m	ADVANCED
Digital visa-on-arrival at Cairo International	Did not exist; the paper visa sticker was the only channel	A QR code valid seven days from issue, obtainable by mobile app, airport kiosk or the official web portal, with group codes issuable by licensed tour operators; the paper sticker runs in parallel for a limited transition	ADVANCED
Egyptian Tax Authority electronic system	In operation since January 2021, spanning returns, e-invoices, e-receipts, registration, payments, automated audit, refunds, exemptions, appeals and enforced collection	Same coverage, extended by a second facilitation package — a premium tax services centre in New Alamein City and a real-estate transactions app on which citizens register transaction details, upload documents, pay taxes and obtain electronic clearance certificates entirely online, with a telephone guidance service for less confident users — against named defects still on the record: historic credit balances never migrated so companies holding credits are shown as debtors; audit offices demanding paper copies of documents already on the authority's databases; the automated audit form unable to request documents mid-audit; files moved to appeal committees on timer expiry; some payments unevidenced, creating phantom debts; and government bodies not always issuing e-invoices while the private sector is compelled to	ADVANCED
Institutional memory system	Did not exist	A cabinet information centre system for institutional memory being taken to individual state bodies: the nuclear power plants authority received a delegation on it as part of its digital transformation, and the social solidarity ministry held an expanded meeting on its objectives and components ahead of applying it	ADVANCED
Public Prosecution electronic criminal-record enquiry	Did not exist	A citizen may query, through the national digital identity system, criminal judgments registered against their own national number; the Prosecution states the result is not a substitute for official certificates or extracts	ADVANCED
Real-estate registration and notarisation digitisation for investors	Not held	The justice and planning ministers met on 20 August 2026 to take forward digitisation of the real-estate notarisation registry and a wider expansion of technological services, the justice minister naming the planning ministry as the principal partner in developing the ministry's services	ADVANCED
Unified digital platform for manufacturers	Did not exist	An industry ministry platform covering the industrial investment cycle, carrying a complaints-management system with defined response deadlines and real-time indicators on resolution rates and recurring issues, a database and marketplace for locally produced production inputs, and a separate marketplace for finished industrial products with virtual meeting rooms	ADVANCED
Unified Government Services Card	Did not exist; the data-update form on the portal and the mobile app were launched officially in September 2025	One card bundling health insurance, food subsidy, the cash grant and fertiliser subsidy, linked to postal accounts, with lost-card replacement, suspension and mobile-number change services live and 41,500 supply families in the Port Said pilot; the supply ministry has confirmed it intends to route food-subsidy delivery through the card's shared identity and payments rails, with no national rollout date published	ADVANCED
Economic Entities Platform	The base carries no position at 2025-08-01	Announced as a single digital gateway through which investors would establish companies, obtain approvals and licences and complete government procedures electronically by connecting with all relevant authorities; no build stage, launch date, budget or governing instrument is stated	BASELINE NOT HELD

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Unified Digital Justice Strategy	Baseline not held	Signed by the justice ministry and the heads of every judicial body, launching a shared judicial-data platform built with a foreign vendor and setting out three phases covering remote litigation, cybersecurity and artificial-intelligence-enabled services; no text, timetable, budget or data-protection arrangement is published	BASELINE NOT HELD
Unified Government Complaints System caseload	Not held	About 229,000 complaints, requests and inquiries handled in July 2026 - 84% referred to the responsible authority, 14% closed and the rest under review - with governorates taking 17% of referrals, nine of them handling 74% of that share, and government agencies and universities a further 16%	BASELINE NOT HELD
Unified investment-licensing platform	The base carries no position at 2025-08-01	A single electronic window offering 460 licences, approvals and permits from 41 government issuing bodies, with electronic fee payment, real-time tracking and licences issued within 20 working days where documents are complete	BASELINE NOT HELD

Most of Egypt's digital public infrastructure entered the wiki's record during this period rather than moving within it. The digital switch, the digital treasury, digital trust services, the investment-licensing platform, the state-land platform and the 2027 census design all have no stated position at the period's start ([cabinet readout](#)). The 105 connected bodies and 100 linked databases are a first measurement, not a year's movement.

Where both ends can be stated, the movement is real. Services on the national platform rose from about 170 in 2024 to 242, with 73 made exclusive to digital channels ([ministerial briefing](#)), and registered users from 8.1 million to 10.7 million. The instant payment network went from 12.5 million users and EGP 2.9tn in calendar 2024 to 16 million users and EGP 4.2tn in the year to June 2025 ([central bank figures](#)) – while pricing of the national retail rail returned, because the free-use position had rested on a renewable board decision rather than an instrument.

Identity multiplied without being counted. Three biometric channels launched inside the period, and no enrolment figure exists for any of them, nor any identity-specific governing instrument. One position regressed and one reopened: the title-based property register for a Sohag survey section was deferred by a year to July 2027 ([gazette account](#)), and ration-card grievance forms were reopened at 500 post offices alongside the online route.

Digitalisation

Digitalisation of sub-national government

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Public shop licensing on Digital Egypt	Did not exist as a digital service	A single national platform for the whole licensing process, with standardised procedures, real-time tracking, a maximum three-month approval time, immediate temporary operating permits, electronic licence issuance and deemed approval where an authority fails to respond; fees unified across participating agencies with the interior ministry cutting its own by 50%	ADVANCED

Rural digital data capture

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Decent Life rural fibre programme	856 of 1,450 phase-one villages connected at end-2024, up from 267 at end-2023	More than 1,250 of 1,450 phase-one villages across 52 markazes in 20 governorates, about 5 million fibre lines, 75% of village service complexes connected	ADVANCED

Both rows here moved, and in the same direction: procedure replaced by platform. Shop licensing went from no digital service at all to a single national platform covering the whole process, with standardised procedures, real-time tracking, a three-month maximum approval time, immediate temporary operating permits, electronic issuance and deemed approval where an authority fails to respond. The rural fibre programme went from 856 phase-one villages connected at end-2024 to more than 1,250 of 1,450 across 52 markazes in 20 governorates, about 5 million fibre lines, and 75% of village service complexes connected.

Technology

AI

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Egyptian Center for Responsible AI	Did not exist	Established inside the ICT ministry to support safe AI use within government bodies and to develop regulatory models; no mandate document, budget, staffing or output is held	ADVANCED
Karnak Arabic large language model	The base carries no statement on the model before 2026-06-10	The ICT minister stated on 24 August 2026 that the model now tops international evaluation platforms among Arabic models in the 30-billion and 40-billion parameter classes; it is built by retraining the latest global open-source models on curated Egyptian and Arab published data rather than from scratch, is run inside Egyptian data centres as a stated matter of digital sovereignty, handles both Modern Standard Arabic and Egyptian colloquial, and is intended as a base layer for education, legal guidance, government services, translation and language learning	ADVANCED
Karnak Chat conversational assistant	Did not exist	A conversational system built on the ministry's own Arabic large language model, launched in pilot and stated to answer from verified, audited sources, running inside Egyptian data centres and handling both Modern Standard Arabic and Egyptian colloquial	ADVANCED
National Council for AI, Quantum Computing and Emerging Technologies	The National Council for Artificial Intelligence, created 2019, with an AI remit; the base records no quantum or emerging-technology mandate	Remit widened to AI, quantum computing and emerging technologies, and the council is stated to be preparing a national quantum-computing strategy; no decree, membership list or date for the rename is held	ADVANCED, RENAME DATE NOT STATED
National quantum computing strategy	Not on record	The renamed council is preparing a national quantum-computing strategy; no draft, timetable or lead body beyond the council is stated	ADVANCED
National Artificial Intelligence Strategy, second edition	Second edition in force from early 2025, on six pillars of governance, technology, data, infrastructure, ecosystem and skills, following the first strategy of 2021 and the responsible-AI charter of 2023	Same instrument, with delivery bodies added around it: the responsible-AI centre established late 2025, the applied innovation centre's Arabic model, and a university capacity programme the ministry places under the strategy	NO CHANGE

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Cassava AI Factory, Egypt site	No source establishes a position for the Egyptian site before 2026-01-01	Egypt is one of five stated sites in an approximately US\$720m programme; phase one of about 3,000 GPUs is in South Africa, with roughly 12,000 further GPUs planned across Egypt, Nigeria, Kenya and Morocco over three to four years. No Egyptian site, date, capacity or investment figure is stated	BASELINE NOT HELD

ICT Industry

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Electronics and handset localisation programme	3 million handsets produced in 2024	10 million handsets produced by end-2025, with ministerial targets of more than 15 million during 2026, a 30 million capacity by 2028 and local content of about 45%	ADVANCED
ICT sector growth and share of GDP	Sector growth of 15.2% in FY2022/23 contributing 5.1% of GDP, up from 4.4% in FY2019/20, with US\$4.2bn of investment (reported 2025-11-21)	Growth of 20.3% in the third quarter of the last fiscal year, described as the sector's highest rate, and a GDP contribution of about 6%, targeted at 8% by 2030	ADVANCED
Konecta Egypt regional headquarters and generative-AI centre	A memorandum of understanding between the Egyptian state and the company signed in the Prime Minister's presence in January 2025; no facility	Regional headquarters for the Middle East and Africa plus the group's first global generative-AI centre of excellence, backed by a company-stated US\$100m, with about 800 staff and company targets of 1,000 by end-2026 and about 3,000 by end-2028; the group's agentic-AI platform is developed, tested and localised by Egyptian teams	ADVANCED
Outsourcing and digital-services exports	Outsourcing exports of about US\$2.4bn in 2022	Outsourcing exports stated at US\$4.8bn in 2025 alongside total digital exports of US\$7.4bn by one minister, and at US\$5.2bn in 2025 by his successor, against a stated target of US\$8bn by 2028	ADVANCED
Egypt-United Kingdom ICT cooperation	The base carries no statement on Egypt-UK ICT cooperation before 2026-01-15	Discussions covered digital transformation, digital skills, artificial intelligence, startups, cloud computing, data centres, cybersecurity and fintech, plus a proposed joint event and university partnerships; no agreement, funding or date is stated	BASELINE NOT HELD
Systems Limited Egypt delivery centre	The base carries no statement on this operation before 2026-07-31	About 250 engineers in software development, IT services and outsourcing, with more than 380 further jobs stated; the group says the Egyptian centre is planned to become its second largest worldwide, and that about 85% of its business is export-directed	BASELINE NOT HELD
Technology parks programme	The base carries no statement on the programme before 2025-11-21	Six technology parks recorded as under development, with no completion date, cost or occupancy stated; separately, the higher-education minister named technology parks inside universities as a next step without an instrument or date	BASELINE NOT HELD
Venduo B2B fashion and textiles marketplace	The base carries no position on this platform before 2026-08-10	Egypt's first digital B2B marketplace for fashion and textiles, connecting 8,000 brands and designers with more than 2,000 contract manufacturers across over 30 specialisations; about EGP 40m transacted since launch, EGP 20m of it in the first half of 2026, with international brands including Zara, Adidas, Nike and Mango representing about 30% of platform brands; manufacturers pay a fixed annual subscription and brands use the platform free of charge	BASELINE NOT HELD

Innovation ecosystem

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Egyptian startup venture funding	51 Egyptian startups funded in 2024, the highest count in Africa	US\$378.95m across 43 funded startups in 2025 on one tracker's count, 23.2% of the African total and second to Nigeria for a second year, with the number of funded ventures falling 15.7% and average raise rising to US\$8.81m from US\$6.12m; Egypt then led the continent in H1 2026 with US\$327m raised, US\$183m of it equity	ADVANCED, DEAL COUNT FALLING
InfiniLink	Independent Cairo deep-tech semiconductor startup in a state venture portfolio	Acquired, delivering a reported 400% return to the state venture investor; no consideration, retained-operations or headcount detail is held	CLOSED, ACQUIRED
Stakpak	Independent Egypt-founded AI infrastructure company, founded 2023, bootstrapped for two years, first funding round 2024, operations subsequently relocated to San Francisco	Absorbed as a talent acquisition; no consideration, structure, asset transfer or team size is disclosed, and whether the entity or its product survives is not established	CLOSED, INDEPENDENT OPERATION ENDED
Women in Tech Accelerator	None published	Twelve women-led startups in the 2026 cohort, with USD 35,000 in equity-free grants split between three at the end	BASELINE NOT HELD

Egypt's artificial intelligence institutions were added around a strategy that itself did not change. The second edition of the National AI Strategy has been in force since early 2025; within the period a responsible-AI centre was established inside the ICT ministry, the national council was widened to cover quantum computing and began preparing a quantum strategy, and an Arabic large language model attributed to an applied innovation centre entered the record. The strategy text is not held at either end.

Egypt's regional position advanced furthest: it hosted the Arab ministerial session that created the AI and emerging technologies committee in January 2026 and was elected on 31 July to chair two of its six working groups ([election account](#)).

The outsourcing sector converted commitments into buildings: a memorandum signed with the state in January 2025 became an inaugurated regional headquarters and generative-AI centre in New Cairo on 28 July 2026 ([inauguration account](#)). Handset production rose from 3 million units in 2024 to 10 million by end-2025. The Startup Charter announced in December 2025 with an EGP 50bn financing initiative has produced no launch, appropriation or disbursement ([charter account](#)).

Capacity

Literacy

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Digital financial literacy barrier to mobile money	No Egyptian digital-literacy measure is on file at 2025-08-01	Among Egyptians aware of mobile money but holding no account, not knowing how to use the service affects 21% of women and 15% of men	BASELINE NOT HELD

Training and skills

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
AI Capacity Building Initiative for Universities	Running since 2022 under a ministry agreement with a technology vendor, with three rounds completed and no cumulative figure published at 2025-08-01	Fourth round trained 1,090 students from 10 public, national and private universities producing 445 projects, plus a renewable-energy hackathon of 105 students in 21 teams; cumulative since 2022 reported as 2,710 students and 763 projects	ADVANCED
Cybersecurity SuperHero Academy	Two editions delivered, whose combined intake the national telecommunications institute states the third edition's target roughly matches; the base carries no dates or intake figures for them	Third edition targeting more than 6,000 trainees across 17 governorates in three age-banded stages from age 8 upward, delivered through institute premises and innovation centres, with the national emergency readiness centre, the regulator and two technology partners	ADVANCED
National AI initiative for state leaders	Did not exist	A first phase concluded, training close to 200 senior state-administration officials over 10 days and 60 training hours, run by the communications ministry with the national training academy and aimed at 500 leaders across ministries, governorates and public bodies	ADVANCED
ICT trainees under ministry programmes	400,000 ICT trainees in 2023/24, alongside about 250,000 STEM graduates a year and more than 20 innovation hubs	The same 2023/24 figure; no fresher national training total is on file	NO CHANGE

The training programmes publish their throughput, which is what makes them checkable: the university AI initiative's fourth round [trained 1,090 students from 10 universities producing 445 projects](#), for a cumulative [2,710 students and 763 projects since 2022](#); the cybersecurity academy's third edition [targets more than 6,000 trainees across 17 governorates in three age-banded stages from age 8 upward](#); and a new programme for officials concluded a first phase with close to 200 senior state-administration staff over 60 training hours, against a target of 500 leaders.

What has not moved is the national total the individual counts should roll up into: the ministry's figure is still [400,000 trainees for 2023/24, with nothing fresher on file](#). Demand-side literacy is barely measured at all - the only figure the base holds is that [not knowing how to use the service affects 21% of women and 15% of men among Egyptians aware of mobile money but holding no account](#).

Inclusion

Access to services

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Financial inclusion rate, adults 15 and over	76.3% of adults at June 2025, against 27.4% in 2016	79% at end-June 2026, 56.4 million active accounts of a 71.4 million eligible population, counting bank accounts, postal accounts, mobile wallets and prepaid cards; women 72.5% against 19.1% in 2016 and ages 15-35 58% against 36.3% in 2020, with a Second National Financial Inclusion Strategy for 2026-2030 in development	ADVANCED
Ration-card grievance data update at post offices	Did not exist; appeals against the 2026 eligibility criteria ran through the Digital Egypt platform only	Data-update forms accepted at 500 post offices on Friday afternoons and Saturday mornings alongside the online route, with a daily adjudication committee, results notified by SMS, and every case checked against the state's official databases	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Adults without formal access to credit	About 16.7 million Egyptian adults with no formal access to credit and other banking services at June 2025	The same figure; no fresher measure is held	NO CHANGE
Ration-card deletions and appeal outcomes	No prior reading is held	About 850,000 ration cards deleted under eligibility criteria strictly enforced from June 2026, with 2,600 appeals filed, about 0.3%; the ministry attributes the low rate to document hurdles — applicants must obtain proof from other agencies, such as the traffic department certifying they own no vehicle, or updated income records, before an appeal can be assessed, and name collisions and stale entries require correction at the agency holding the original record; a comparable 2019 enforcement round drew objection leading to about 1.8 million reinstatements under presidential directive	BASELINE NOT HELD

Digital divides

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Presidential initiative on digital accessibility of government websites	The base carries no accessibility tooling or standard before this date	A toolbar on every page of the ministry site offering screen-reader compatibility, keyboard-only navigation, text enlargement, contrast switching, font and line-spacing changes, reading-focus highlighting, animation suppression, cursor enlargement and link highlighting, executed by the ministry's academy for persons with disabilities, whose mandate is to propagate the standards to other government bodies	BASELINE NOT HELD

Financial inclusion moved and credit access did not. Inclusion rose from 76.3% of adults at June 2025 to 77.6% at end-2025 ([central bank](#)). Against that, about 16.7 million adults still had no formal access to credit or other banking services at June 2025, and no fresher measure exists ([lender account](#)).

The acceptance and identity infrastructure widened: debit cards rose from 26.4 million to 29.1 million and point-of-sale terminals from 228,000 to [about 275,000](#), a national digital financial identity app launched in November 2025 enabling remote account opening at 37 banks, and contactless acceptance on ordinary smartphones moved from a capped pilot to a launched service. The national card scheme is the exception, its most recent count remaining 43.5 million from end-2024.

A unified government services card entered a [Port Said pilot reaching 41,500 ration-card households](#).

Training rose where it is counted by programme and stalled where it is counted nationally: the university artificial-intelligence initiative added 1,090 students in its fourth round ([round account](#)), while the most recent national ICT training total remains 400,000 trainees for 2023/24.

Data

National statistics

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
2027 Population, Housing and Establishments Census	The base carries no position at 2025-08-01	Designed as a register-based exercise building central statistical registers of buildings, households, individuals and establishments by matching electronic field enumeration against digital registers and state databases, keyed on the unified national property number; the property-wealth map and secure electronic data exchange are to be finalised before a presidential decree authorises the count	BASELINE NOT HELD
National labour-market data platform	The base carries no position at 2025-08-01	A Senate proposal for a national platform integrating databases and forecasting future skills demand, welcomed by the minister, who pointed to the ministry's own forthcoming digital labour platform; no launch date, budget, governing instrument or lead body is established for either, and the two are not stated to be the same thing	BASELINE NOT HELD

Open data

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
World Bank GovTech Maturity Index position	69th globally with a maturity score of 0.751 on the 2022 index; Group B at 0.649 in 2020	22nd globally with a score of 0.911 in the top band on the 2025 index, a rise of 47 places, with core government systems 0.916, digital service delivery 0.962, citizen engagement 0.896 and enablers 0.869	ADVANCED
National Open Data Policy	The base carries no statement of the policy's existence or content at 2025-08-01	The minister named the launch of the open data policy among the policies and legislation supporting digital transformation; no date of adoption, text, issuing instrument, dataset inventory or national portal is established	BASELINE NOT HELD

Use of satellite data

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Egypt-Japan water, artificial intelligence and satellite-data cooperation	The base carries no position at 2025-08-01	Memorandum with Japan's land and agriculture ministries covering technical missions, joint research and the application of AI and digital models to monitoring water structures and reducing flood risk; Egypt intends to use Japan's satellite rainfall product to monitor rainfall across Nile basin states and improve hydrological forecasting	BASELINE NOT HELD

The state's own ranking moved further than anything it publishes: Egypt went from 69th on the 2022 governance-technology index to **22nd globally at 0.911 on the 2025 edition**, a rise of 47 places, with digital service delivery scored **0.962**. Against that, the open-data policy is named by the minister among the policies supporting digital transformation with no date of adoption, text, issuing instrument, dataset inventory or national portal established, and the national open-data portal is carried as *Not held*.

The 2027 census is the one genuinely new object, and it is a register rather than a count: a **register-based exercise building central statistical registers of buildings, households, individuals and establishments by matching field enumeration against digital registers and state databases, keyed on the unified national property number, with the property-wealth map and secure electronic data exchange to be finalised before a presidential decree authorises it**.

Geopolitics

US / hyperscaler activities

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Google AI Pro free student subscriptions	Did not exist	A company-announced free one-year subscription for college students, to begin in the coming weeks from 2025-09-22 in Egypt and seven other African countries; no confirmation of launch, uptake figure or end date is held	ADVANCED
Mediterranean capacity partnership with Cisco	Announced before the window opened, as the activation of Mediterranean subsea capacity on the 2Africa system, framed around demand from cloud and AI services	No later source updates the arrangement's status, capacity or commercial terms	NO CHANGE

China activities

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Fibre-to-the-room service with Telecom Egypt	Did not exist; the source presents the service as a first for Egypt	Commercial launch of in-home fibre-to-the-room with the incumbent's consumer brand; no coverage, subscriber, tariff or contract-value figure is stated	ADVANCED
Chinese-supplied smart-city surveillance in Egypt	A United States firm's safe-city package recorded as adopted in Egypt (2023-09-27); Chinese supply into Egypt was not separately established	Egypt is one of eleven countries where Chinese firms were found to supply smart-city surveillance equipment, and one of the states where Chinese banks financed such systems; Cairo's New Administrative Capital is listed with multiple named vendors. No Egyptian contract, value, camera count or command-centre detail is held	NO CHANGE, NEW MAPPING EVIDENCE ONLY
Huawei Cloud Egypt region	Operating since 2024 with data held in country	Same, with the company stating regulator certification, Tier 3 licensing and adherence to financial-regulator data-residency requirements, and running a Cairo fintech summit in June 2026 aimed at financial-sector migration	NO CHANGE

EU activities

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Cloud sovereignty cooperation with SAP	The base carries no statement of Egypt's position on sovereignty over data hosted on European vendor platforms	The ICT minister met the vendor's regional president to discuss expanding outsourcing operations and investment, cooperation on cloud computing to support Egypt's push for greater sovereignty over data and applications hosted on those platforms, AI rollout, and a joint study of labour-market demand; no agreement, value or timetable is stated	BASELINE NOT HELD

India activities

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
India-Egypt technology cooperation	The base held no source at all on India-Egypt technology cooperation at 2025-08-01	The two industry ministers agreed a joint study of priority sectors for industrial and investment integration, to be prepared by Egyptian authorities with Invest India and covering market needs, value chains, joint manufacturing, incentives and tariff and non-tariff barriers, with financial technology among the named priority sectors; they discussed linking the two countries' payment systems and settling bilateral trade in local currencies, and Egypt proposed an Egyptian-Indian industrial integration platform matching companies on joint production, component exchange and supplier development	BASELINE NOT HELD

Every relationship in this chapter is at the memorandum stage or earlier, and the base can date almost none of them to a delivered thing. The Chinese rows are the exception in that something is running: a [cloud region operating since 2024 with data held in country](#), the company stating regulator certification and adherence to financial-regulator residency requirements and a [commercial fibre-to-the-room launch with the incumbent's consumer brand](#), with no coverage, subscriber or tariff figure stated. Surveillance supply is [mapped rather than contracted](#) - Egypt one of eleven countries where Chinese firms were found supplying smart-city equipment, with no Egyptian contract, value or camera count held.

The European and Indian strands are both conversations about sovereignty and integration with [no agreement](#), [value or timetable stated](#) on one side and a [joint study of priority sectors](#), with [fintech named](#) and [payment-system linkage discussed](#) on the other. Gulf technology investment is carried as *Not held*.

Where the record is thin

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
National Cybersecurity Strategy, second and third editions, as documents	The published strategy text or the Supreme Cybersecurity Council decision adopting it, with an issue date and edition number	not yet probed
National emergency readiness centre incident and advisory record	An annual report or regulator incident statistics giving reported incidents, sectors affected and response times for 2025 or 2026	not yet probed
Critical information infrastructure protection regulation	A regulator or cabinet instrument designating critical information infrastructure and setting security obligations on its operators, including the data centres now being licensed	not yet probed
Submarine cable protection regime for Egyptian waters	An Egyptian instrument on cable protection zones, anchoring restrictions or repair-vessel access; the analysis the wiki holds is Africa-wide and names none for Egypt	not yet probed
Egypt's internet exchange points	A regulator or exchange-registry entry naming Egypt's exchange points, their members and peak traffic; nothing in the base names one, which sits oddly against the 15% content-locality reading	not yet probed
2Africa Egyptian landing stations and ready-for-service dates	The consortium's landing-station list or the incumbent's segment announcements naming the Egyptian Mediterranean and Red Sea landings	not yet probed
National broadband plan and any universal service obligation or fund	The published national broadband plan or the regulator instrument establishing a universal service fund, with coverage targets and a financing line	not yet probed
5G coverage and subscriber base	A regulator quarterly bulletin giving 5G population coverage, base-station count and subscribers; the equivalent is held for Morocco and Tunisia in the same source and absent for Egypt	not yet probed
Egypt's total operational data-centre capacity in MW	A market report or regulator licence register giving installed and pipeline IT load by facility	not yet probed
Government data centres, location, operator and capacity	A ministry or cabinet statement enumerating the state's own data centres; the base repeatedly refers to government data-centre projects and giant data centres without naming or siting one	not yet probed
Regional Data Hub 2 entry into service	An operator press release or annual report confirming commissioning, Tier III constructed-facility certification, and delivered IT load	not yet probed
Power supply arrangements for Egypt's operating data centres	A grid connection agreement, tariff schedule or power purchase agreement for any licensed Egyptian data centre; the base holds nothing beyond the Sinai green-power proposal	not yet probed
Data-centre energy and water consumption reporting	A licence condition or operator sustainability report giving power usage effectiveness, annual energy draw or cooling-water use for an Egyptian facility	not yet probed
National high-performance computing or public GPU capacity	A ministry or applied innovation centre statement giving the compute on which the Arabic large language model was trained and is served, with location and ownership	not yet probed

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
National digital identity enrolment count	A ministry or interior ministry registration figure for the digital identity app, the interior biometric platform or the central bank identity app; three biometric identity channels launched inside the window and the base holds no enrolment number for any	not yet probed
Governing instrument for digital identity and biometric processing	A decree or law establishing the national digital identity system and its biometric processing basis; the data-protection law and its regulations are held, but no identity-specific instrument is	not yet probed
Register of bodies connected to the government digital switch, and its lawful basis	A ministry or cabinet decree establishing the switch, or a published register of the 105 connected bodies and 100 linked databases; only a cabinet readout of ministry-reported counts is held	not yet probed
Relationship between the ministry's digital post box and the postal service's product	A ministry statement naming the digital post box product, or the postal service protocol text; the ministry reported its own digital post box as being finalised on 2026-07-19 and a national-ID-linked postbox appeared as operating on 2026-08-05, and nothing states whether these are the same system	not yet probed
National land registration coverage	A real estate publicity department or justice ministry figure for registered against unregistered properties, or a count of survey sections converted to the title register	not yet probed
Commercial register size and digitisation state	A supply ministry or investment authority figure for registered establishments; the base records nine commercial-registry services made exclusive to the platform from 2026-01-01 but no register size or digitisation coverage	not yet probed
Universal Health Insurance system enrolment and digital architecture	An insurance authority enrolment or governorate-rollout figure; the base holds a policy note proposing automatic enrolment and a note that the national digital health strategy is anchored on the insurance architecture, but no operating position	not yet probed
Education management information system	A Ministry of Education statement or system name; education appears only as one of nine priority sectors and as an area receiving new services, with no named system	not yet probed
National card scheme current issuance	A central bank figure for national scheme cards issued after end-2024; 43.5m at end-2024 is the newest count held, repeated in two November 2025 accounts of the same address	not yet probed
Central bank national payment system statistics	A payment systems annual or quarterly report giving mobile money and switch transaction volumes and values; the base carries only inclusion rates quoted second-hand	not yet probed
Governorate-level service platforms and local-government information systems	A local development ministry statement on governorate digital service centres or a local-government information system; the base holds the shop-licensing platform and nothing on governorate-level systems as such	not yet probed
Statistics agency release programme and publication calendar	The agency's published release calendar or its statistical yearbook for 2025 or 2026; the base holds no agency output at all beyond the census-planning readout	not yet probed
Egypt's own earth-observation and satellite programme	An Egyptian Space Agency statement or satellite mission record; the section's only satellite content is Egypt's intended use of a Japanese rainfall product	not yet probed
Rural digital service uptake, as distinct from rural connectivity	A figure for platform transactions or service-centre usage originating in Decent Life villages; the base holds fibre-line and village counts but nothing on whether rural households use the digital services those lines carry	not yet probed
Data-protection regulator enforcement and licensing record	An annual report or published decisions register giving decisions issued, fines imposed, officers registered and cross-border-transfer licences granted since 2025-11-01	not yet probed
Executive Regulations 816 of 2025, the instrument itself	The Official Gazette text of the decree; the base holds only two law-firm summaries of it	not yet probed
Cybercrime Law 175 of 2018 and its enforcement record	The Official Gazette text with any amendments, plus prosecution or conviction statistics; the base names the law repeatedly but holds no text and no enforcement record	not yet probed
Telecommunication Regulation Law 10 of 2003	The Official Gazette text as amended; the base knows it only through the recital in the regulator's satellite framework and a second-hand reference to one article	not yet probed
Egypt's position on the AU Malabo Convention	The AU depositary's ratification list, or an Egyptian instrument of ratification or accession; nothing states whether Egypt has signed, ratified or acceded	not yet probed
EU-Egypt digital cooperation instrument	The text of any EU-Egypt digital chapter, Global Gateway package allocation or European Commission adequacy assessment naming Egypt; the base holds nothing on Egypt's digital relationship with the EU as an institution	not yet probed
Egyptian national open-data portal	The portal's own landing page with a dataset count and a licence statement, or the text of the open data policy the ICT minister referred to on 2025-12-21	not yet probed

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Public consultation on the data-protection Executive Regulations	A regulator or ministry consultation record - a draft published for comment, submissions received, or a response document; the base holds no evidence the Regulations were consulted on before issue	not yet probed
National Artificial Intelligence Strategy, second edition, the document	The published strategy text giving the six pillars' content, targets, budget and delivery milestones now known only from ministerial summaries	not yet probed
Egypt's AI-specific statute or regulation	A published bill or Official Gazette instrument; nothing establishes any AI-specific law, only the data-protection law and a cabinet-agreed legislative review of 2026-07-29	not yet probed
Egyptian Charter for Responsible AI (2023)	The charter text itself; the base carries only the minister's one-line reference to its 2023 issuance	not yet probed
Applied Innovation Centre	A founding instrument, budget line or annual report; the centre is named in three sources as the developer of the Arabic model but has no establishment date, mandate or funding on file	not yet probed
Artificial intelligence contribution to Egyptian GDP	The study behind the widely quoted figure of about US\$42.7bn or 7.7% of GDP by 2030; no source on file establishes it, and the entity page expressly declines to carry it	not yet probed
Gulf-state technology investment in Egypt	Any source at all; the wiki holds zero Egypt sources on this subject, so no UAE, Saudi or Qatari technology or data-centre commitment can be stated, dated or sized	not yet probed
State appropriation for digital transformation and for the ICT ministry	The finance ministry's published FY2026/2027 budget chapters for the communications ministry, or the ICT chapter of the Economic and Social Development Plan; there is no budget archive for Egypt and the plan document is not held	not yet probed
Economic and Social Development Plan FY2026/2027	The plan document from the planning ministry or as laid before Parliament; the wiki records at 2026-08-04 that it is not held and that the ministry site serves no plan document	not yet probed
Startup Charter EGP 50bn financing initiative, appropriation and disbursement	The cabinet decision or finance law establishing the fund, and the managing body's first disbursement report	not yet probed
Applied Innovation Centre research programme and model documentation	The centre's own published research output, budget or model card; nothing at all is held on research capacity for Egypt	not yet probed
National research and development spending on artificial intelligence and digital technologies	A statistics agency or higher education ministry expenditure series, or the National AI Strategy's own budget annex	not yet probed
Compute access for Egyptian researchers	A dated statement from the AI-factory operator or the Egyptian state on the Egyptian site's siting, capacity and access terms; the base records only that Egypt is one of five planned sites	not yet probed
Enrolment and graduate numbers for the named national training programmes	Ministry or IT industry agency annual reports giving per-programme intake and completion figures; the base names the vehicles at 2026-07-21 but carries no numbers	not yet probed
Internet use as a share of population	Regulator or ministry monthly ICT indicators, or an ITU country profile; no source in the base carries an Egyptian internet-penetration figure with a citable URL	not yet probed
Universal service fund or universal service obligation	The regulator's annual report or the universal-service provisions of the telecommunications law and any levy accounts; no source names such a fund	not yet probed
Postal service digital services and post-office digitisation	A national postal authority progress report; the base holds only 2024 figures of 27 digital services and about 3,000 post offices digitised, with no update	not yet probed
Gender gap in internet and mobile-internet use	An industry association gender-gap country table or a statistics agency ICT household survey for Egypt; only the mobile-money literacy split is held	not yet probed
Affordability of connectivity relative to income	An affordability alliance or ITU affordability series for Egypt; the base records rising consumer complaints about internet prices at December 2025 but no price or income measure	not yet probed

The period's most consequential absence is fiscal: no state appropriation for digital transformation or for the ICT ministry is held, and the FY2026/2027 development plan is not held, so nothing here can state what Egypt commits in its own money.

Research capacity is the second: nothing at all is held on national research and development spending, on the applied innovation centre's output, or on compute access for Egyptian researchers, even though the state's own Arabic language model is attributed to that centre.

Two silences bear directly on the report's strongest claims. No register of the 105 bodies connected to the government digital switch exists and no lawful basis for the sharing is published ([cabinet readout](#)); and no enrolment count exists for any of the three biometric identity channels launched inside the period. Gulf and Indian technology engagement returns no source at all.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
