

PROGRESS REPORT

Nigeria: progress report, August 2025 – August 2026

Edition of 2026-08-26 • 270 systems and instruments tracked

Of 270 systems and instruments on this place's ledger, 158 changed position between 2025-08-01 and 2026-08-26, 54 did not, 48 carry no stated baseline, and 9 are **Not held** at both ends.

SUMMARY OF THE PERIOD • GOVERNANCE • FINANCE • ICT INFRASTRUCTURE • DPI • DIGITALISATION •
TECHNOLOGY • CAPACITY • INCLUSION • DATA • GEOPOLITICS • WHERE THE RECORD IS THIN

Shape check, run before the comparison: 696 sources for this place in the window — 93 in the earlier half (2025-08 to 2026-01), 603 in the later (2026-02 to 2026-08). The earlier half of the window is thin: this is a shorter comparison wearing a longer label, and the movement below rests mostly on the later half.

Movement values. *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a measured position worsened. *Closed* — the programme ended. *No change* — the position at both ends is the same. *Baseline not held* — the base carries no position at the start of the period, so no movement can be stated. A value may carry a qualifying clause after a comma, as in *Advanced, slipped*.

Summary of the period

Nearly four times as many sources sit in the later half of this window as in the earlier, so arrival counts measure coverage as much as construction.

No system climbed a maturity band, and every system that changed band went backwards. Satellite broadband regressed, its largest provider pausing new orders over congestion and then brought inside a biometric verification regime; the retail central bank digital currency is under review and being redesigned toward a wholesale model; and enforcement of the new internet-platform rules was paused pending a unified framework. One programme stalled — 260 state schools whose January 2026 completion date passed with many incomplete.

Everything else arrived or held. Nigeria's digital state was substantially built before the window opened.

The same year produced a data-localisation directive, a virtual-assets executive order, a crypto tax circular, an identity statute, an open-banking launch and a three-year payments vision.

Governance

Strategies, plans and policies

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
National Digital Cloud Policy	Did not exist	In force on publication apart from its sovereignty provisions, which await presidential approval. It makes cloud the default for new federal systems, with time-bound exemptions assessed by the IT development agency against published criteria and kept in a register; pools ministry demand through the government infrastructure company under framework agreements bought on a National Digital Marketplace, with the procurement bureau overseeing compliance; and sorts government and regulated data into four levels, Level 4 national-security data hosted only in Nigeria, Level 3 financial, health, biometric and identity data stored at rest in Nigeria, Level 2 hybrid by prior authorisation and Level 1 unrestricted. It imposes no general localisation on commercial data, and a regulator must apply to have a category designated sovereign. A US\$50m private cloud and data-centre investment target is set for 24 months	ADVANCED
National Telecommunications Policy rewrite	Did not exist	First rewrite since 2000, in drafting	ADVANCED
Payments System Vision 2028	Did not exist	A three-year horizon from 2025 baselines of ₦1.2 quadrillion in electronic transactions, carrying 2028 targets of 95% financial inclusion, 5m QR merchant outlets and a 70% cut in fraud losses	ADVANCED
Draft National Policy on Data and Cloud	In draft (2021)	Five years a draft, while the localisation question was settled by circular instead	NO CHANGE
National DPI framework and the 2027 services target	In development (2025-03)	Still in development against a 2027 target	NO CHANGE
Presidential Committee on DPI Implementation	Constituted (2025-05)	Operating	NO CHANGE
Artificial Intelligence and Cyber Diplomacy Unit	BASELINE NOT HELD	Unit inside the Ministry of Foreign Affairs coordinating engagement on emerging technologies	Baseline not held
Federal civil service digital transformation committee	Not held	An eleven-member technical working committee inaugurated by the Head of Service to coordinate the federal civil service's cabinet-approved digital transformation agenda, tasked with drafting the architecture, roadmap and governance mechanisms within one week, ahead of a steering committee	BASELINE NOT HELD
Strategy for the digital transformation of technical and vocational education	Not held	Validated at an Abuja workshop by UNESCO, the federal education ministry and the technical education board, which flagged connectivity, teacher digital competency, financing and coordination as the gaps to close before implementation	BASELINE NOT HELD

Legislation and regulation

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
7.5% VAT on electronic banking fees	Did not exist	7.5% VAT on electronic banking fees	ADVANCED
CBN payments data-localisation directive	Did not exist	Binding from 2027-01-01; no power sequencing published	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
DEON digital consumer-lending regulations	In force (2025-07)	In force and enforced, with the WASPAN appeal before the Court of Appeal and the existing framework held in place by ministerial direction	ADVANCED, NOW UNDER APPEAL
FCCPC competition probe of platforms and AI firms	Did not exist	Competition law used against uncompensated AI training on Nigerian journalism	ADVANCED
Framework for Compensation of Consumers	Did not exist	Automatic airtime credit in listed local government areas, with the qualifying thresholds unpublished	ADVANCED
Internet-platform regulation	Rules in force	Enforcement paused pending a unified digital-economy policy framework	REGRESSED
Market-concentration caps and operational ring-fencing	Did not exist	25% of issuing against 15% of acquiring, on monthly market-share returns	ADVANCED
National Digital Economy and E-Governance Bill	Did not exist	Would elevate NITDA to a super regulator; overlap flagged by stakeholders	ADVANCED
NDPA amendment bill	Did not exist	Before the assembly	ADVANCED
NIMC Act 2026	Did not exist	Replaces the 2007 Act; the NIN made the foundational credential	ADVANCED
Presidential Executive Order on Virtual Assets Coordination	Did not exist	A Virtual Asset Council and Office with its secretariat at the central bank	ADVANCED
Private enforcement of data-protection rights	Did not exist	₦15m general damages for marketing after consent was withdrawn	ADVANCED
Risk-based AI regime in the digital-economy bill	Did not exist	High-risk systems would face annual impact assessments; the bill is not passed	ADVANCED
Securities regulator virtual-asset rules	Did not exist	Draft out for comment with thresholds set	ADVANCED
Social-media local-presence bill	Before the assembly (2025-03)	Through a Senate committee public hearing and into public consultation, with organised support and organised opposition on the record	ADVANCED
Tax collected by the revenue service	<i>Baseline not held</i>	NGN 27.1 trillion (US\$19.93bn) between January and July 2026, an average NGN 127.83bn (US\$93.98m) a day - 95.76% of the whole of 2025's collection and two-thirds of the NGN 40.71 trillion 2026 target - which the revenue service credits to digitised tax systems, four 2025 reform laws and an executive order closing loopholes	ADVANCED
Virtual-asset tax framework	Did not exist	1.5% stamp duty withheld in the asset itself and remitted in the originating token, alongside value-added tax and withholding tax; peer-to-peer and over-the-counter traders warned on 2026-08-14 that the charge could push activity into unregulated channels, the rules having been signed 2026-07-31 and announced 2026-08-03	ADVANCED
Cybercrimes (Amendment) Act 2024	In force (2024)	In force; lawyers argue it is misapplied against dissent	NO CHANGE
FCCPC consumer-protection penalty against Meta	Imposed, under appeal (2025)	Under appeal	NO CHANGE
Investments and Securities Act 2025 treatment of crypto	In force (2025-05)	Crypto inside the securities perimeter	NO CHANGE
Nigeria Tax Act 2025 and Tax Administration Act 2025	In force (2025)	The statutory base for the virtual-asset tax circular	NO CHANGE

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Judicial communique on digital evidence and artificial intelligence	BASELINE NOT HELD	Fifty-four judicial officers called for stricter authentication standards for AI-generated evidence and a review of the digital-evidence, cybercrime and privacy statutes, named genuine evidence dismissed as AI-fabricated as an emerging problem, questioned whether clicking agreement constitutes meaningful consent, and asked for electronic case management, virtual hearings and privacy-protected judicial platforms	<i>Baseline not held</i>
NIMC Act 2026 substantive provisions	Not held	On a law firm's reading of the Act: the identity commission becomes the root certification authority for a national public key infrastructure and the national biometric-data repository; use of the national identification number is made mandatory across passports, banking, telecommunications and land dealings, while the Act states that proof of identity is not proof of eligibility or of citizenship; and unauthorised database access carries penalties of at least NGN10m or five years for an individual and NGN20m for a body corporate	BASELINE NOT HELD

Data protection

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
AI-enabled online gender-based violence tracker	Did not exist	Live, with more than 20,000 verified cases already documented at launch	ADVANCED
America First Global Health Strategy MOU	Did not exist	Signed 2025-12-19; US\$1,953,530,560 planned United States support against Nigeria's US\$2,975,634,499. A rights organisation's reading of the seven signed memoranda puts Nigeria among five whose text requires unilateral sharing of specimens and pathogen-sequencing data, and among two whose data-sharing arrangement is deferred to an unpublished Appendix 5, with all seven requiring broad audit access	ADVANCED
Civil-society enforcement against a public body	Did not exist	A Federal High Court suit against the electoral commission	ADVANCED
Federal Government circular on MDA data-protection compliance	Did not exist	Announced by the data-protection commission as Circular No. 59805/S.I/74 of 27 July 2026 directing service-wide compliance, but the document itself is not in the public record: searches of the Secretary to the Government of the Federation's own resource portal by number, keyword and date returned nothing three days after the announcement	ADVANCED
Meta-funded data-protection capacity programme	Did not exist	A two-year programme funded under a court-approved settlement	ADVANCED
NDPC and NCC data-protection MoU	Did not exist	Cooperation between the two regulators	ADVANCED
NDPC enforcement regime	Compliance about 55% (2025-03)	Remediation-first enforcement, compliance above 55%; on 2026-08-13 the commission opened a forensic investigation into a federal university, a bank and a technology vendor over the alleged use of students' personal data to open bank accounts without consent	ADVANCED
NDPC investigations of multinational platforms	Did not exist	Multinational platforms under investigation	ADVANCED
United States-Nigeria Specimen Sharing Agreement	Did not exist	In force 2026-01-18, five-year term renewable once	ADVANCED
MultiChoice data-protection penalty	Imposed (2025-07)	The largest NDPC fine; whether it was paid is not established	NO CHANGE

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Nigeria Data Protection Act 2023	In force (2023)	In force; the Commission sits under ministerial control, and implementation at state level is being pressed rather than achieved	NO CHANGE
Data protection collaboration with the securities regulator	Not held	The data protection commission and the securities regulator agreed to deepen collaboration on data-protection compliance in the capital market, the commission's head visiting the regulator in Abuja and being invited to speak at its compliance summit	BASELINE NOT HELD
Election digital-rights monitoring platform	BASELINE NOT HELD	A civil-society platform tracking political parties' websites and social media for data-privacy violations and access restrictions during elections, piloted at a state governorship election	Baseline not held

Regional collaboration

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Abuja Declaration on Meaningful Connectivity	Did not exist	Adopted with machinery to argue the position at the ITU	ADVANCED
AfCFTA ADAPT cross-border DPI pilot	Pilot named (2025-11)	Nigeria, Kenya and Morocco the first pilots	ADVANCED
Digital Trade Regulators' Working Group	Did not exist	Nigeria-led group harmonising market entry, licensing and regulatory cooperation; no output published	ADVANCED
ECOWAS biometric identity card	Did not exist	In issue	ADVANCED
Nigeria-Benin-Cameroon customs border modernisation (Trilateral Strategic Steering Committee)	Did not exist	Committee committed to digital interoperability, harmonised procedures and coordinated risk management at the Seme-Krake and Mfum-Ekok corridors; no funding, timeline or output published	ADVANCED
Onafriq and PAPSS wallet-based naira-to-Ghana payments	Did not exist	Wallet-based naira-to-Ghana payments in pilot	ADVANCED
Global CBPR Forum membership	Member (2025-04)	Member	NO CHANGE
PAPSS participation	BASELINE NOT HELD	About US\$3.7m for a half-year, on 3,246 transactions	Baseline not held

Standards

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Automated AML baseline standards	Did not exist	In force; the test shifts to governance, integration and explainability	ADVANCED
Crypto trade reporting tied to TIN and NIN	Did not exist	Trades reported against TIN and NIN, aligned to the OECD framework	ADVANCED
End of pre-registered SIM cards	Did not exist	Practice ended	ADVANCED
ISO 20022 migration and PoS geo-tagging	Migration under way (2025-08)	ISO 20022 with PoS geo-tagging	ADVANCED
Migration of government identity to the .gov.ng domain	Did not exist	Government identity still exposed on foreign domains	ADVANCED
National Cloud Computing and Technical Guidelines	Did not exist	Signed and in force in NITDA's framing, with implementation beginning immediately in phases and scope, obligations and thresholds unstated because no text is published	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
National Digital Infrastructure Assurance Framework	Did not exist	Signed, with no published text and no stated assurance obligations, thresholds or commencement date	ADVANCED
National Innovation Hub Standards Framework	Did not exist	A draft framework giving innovation hubs a self-assessment tool across seven dimensions and about 35 assessment criteria with a defined maturity pathway, validated against a count of more than 339 hubs concentrated in Lagos and Abuja	ADVANCED
National Software Quality Assurance Framework	Did not exist	Tiered risk with WCAG 2.1 AA for citizen-facing platforms; not adopted	ADVANCED
Nigeria Government Enterprise Architecture	Did not exist	Hosted by Galaxy Backbone and piloted at four agencies	ADVANCED
Nigerian Digital Trustmark	Did not exist	In issue	ADVANCED
Draft DPI technical standards and the Nigerian DPI Centre	In draft (2025-04)	Still in draft	NO CHANGE

Public debate and participation in policymaking

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Demand to suspend enforcement of the Cybercrimes Act	Did not exist	A rights organisation and the Guild of Editors jointly called on 24 August 2026 for enforcement of the Act to be suspended pending repeal or revision, arguing that the 2024 amendment failed to cure the defect the ECOWAS Court of Justice identified in 2022 when it ruled the original section 24 vague, arbitrary and in breach of the African Charter; the amended text is said to keep ambiguous cyberstalking wording under which a prosecution can turn on someone claiming to feel fear, and the call cites extrajudicial arrests, malicious prosecutions, enforced disappearances and unlawful surveillance reaching as far as posts in private messaging groups	ADVANCED

One position worsened and the rest of the section arrived.

Internet-platform regulation regressed: enforcement of new rules was paused in July pending a unified national digital-economy policy framework. The same month's competition directive put the same class of company under investigation for abuse of dominance.

Data-protection enforcement held its band and changed character within it: already active at the window's start, having lifted compliance from about 4% to 55%+ by March 2025, what the year added was judicial confirmation. The Federal High Court upheld the Commission's registration power in July, and days later a private claimant won the first damages award under the Act without needing the Commission at all. Neither judgment is held, and one has no established delivery date.

What arrived: an executive order that creates a coordination council rather than a regulator, and a tax framework that collects duty in the token. The two rows that held position throughout are the statute itself and the 2021 draft data and cloud policy — five years a draft, while the localisation question it was written to answer was settled instead by a central bank circular.

Finance

New investments

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Agritech commercial paper programme	Did not exist	An agricultural technology company raised ₦5.3bn, about US\$3.93m at the rate it gave, in the first series of a securities-commission-approved ₦50bn commercial paper programme, announced at a Lagos signing on 25 August 2026 and oversubscribed against a ₦5bn target; the proceeds fund working capital for aggregating smallholder produce for off-takers rather than production, and the company states that its operating system is accumulating the farmer transaction and farm-activity data layer intended to let financiers underwrite those farmers directly	ADVANCED
Credit scoring from payment traces	Did not exist	Scores people without bank accounts from payment traces and sells the output to banks	ADVANCED
Domestic bond financing of a fibre build	Did not exist	₦4.05bn of a ₦20bn programme; trivial against the donor and DFI lines	ADVANCED
iDICE debt financing for technology startups	Did not exist	US\$110m of debt financing open	ADVANCED
Telecoms foreign direct investment	US\$107.46m (2021 low)	US\$392.91m in the first nine months of 2025, the strongest since 2019	ADVANCED
World Bank ID4D financing	Running (2024-12)	US\$430m; target raised from 148m to 180m	NO CHANGE
App-based retail securities trading	BASELINE NOT HELD	₦2.86tn of retail equity trading January-May 2026, up 138.76%, at 36.22% of activity	Baseline not held

iDICE opened US\$110m of debt financing for technology startups for applications on 2026-07-30, the section's one financing-instrument arrival in the period.

ICT Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Fixed broadband speed and technology mix	Median fixed download speed 13.50 Mbps in 2023, with fixed wireless access the largest fixed-broadband technology and 84,141 fibre-to-the-premises connections at the fourth quarter of 2025	Fibre overtook fixed wireless access as the largest fixed-broadband technology for the first time, with fibre-to-the-premises connections at 265,000 by June 2026 and the median fixed download speed at 34.47 Mbps in the first half of 2026, a rise of 155%, upload speeds nearly doubled to 25.17 Mbps and latency down from 47.9 ms to 35.8 ms; the gain sits at the bottom of the distribution, the slowest decile improving from 2.24 Mbps to 6.04 Mbps while the fastest moved only from 74.37 Mbps to 90.04 Mbps	ADVANCED
IFC financing for Airtel Africa network upgrades	Did not exist	US\$150m for network upgrades	ADVANCED
Mobile and broadband subscriber base	50% broadband penetration (2025-11)	157m internet subscribers (2026-05), from 154.3m (2026-04); 188m mobile subscriptions and broadband penetration 55.67% (2026-04)	ADVANCED
MTN 400G and 800G optical backbone with Huawei	Did not exist	400G and 800G optical backbone with Huawei	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
MTN acquisition of IHS Towers	Did not exist	Shareholders of the tower company approved the acquirer's cash buyout of the 75.3% it does not already own; the target's first-half 2026 revenue rose 8.2% to US\$844m while rising Nigerian diesel costs and acquisition-related charges cut operating income 38%, and it has exited Latin America to concentrate on African tower operations. Federal strategic review of the transaction is the last position the base holds on the state's side	ADVANCED
MTN fibre-to-the-home programme	Did not exist	In build against an 8m-home target for 2028	ADVANCED
NCC network performance reporting with Ookla	Did not exist	Two editions of crowdsourced urban and rural measurement published	ADVANCED
NIGCOMSAT-2A and 2B satellites	Did not exist	Cabinet approval for the acquisition and deployment of two high-throughput communications satellites, to be delivered by Thales Alenia Space and Israel Aerospace Industries with NIGCOMSAT implementing under the communications ministry, on an operator timetable of NIGCOMSAT-2A by end-2028 and NIGCOMSAT-2B in 2029 or 2030	ADVANCED
Nigeria-Equatorial Guinea subsea cable	Did not exist	Cable bundled with a commercial data centre	ADVANCED
Project BRIDGE national open-access fibre	Announced (2025-05)	US\$1.6bn World Bank-appraised envelope, superseding the ~US\$2bn announced 2025-05-18; SPV incorporated as Bridge Open Access (Bridge OA), with private investors at 51-75% and the state at 25-49%; the communications minister stated on 2026-08-20 that implementation of the 90,000km rollout begins in October 2026 and that the funding has been raised, against the 2027 start for physical deployment the project documents carry	ADVANCED
Protection of telecom infrastructure from vandalism and access denial	Baseline not held	155,397 fibre cuts in April-May 2026 alone (74,276 April, 79,121 May), more than 54,000 attributed to vandalism	REGRESSED
Removal of the 5% telecom excise duty	5% excise in force	Removed	ADVANCED
Spectrum Roadmap 2026-2030	Did not exist	Assignable IMT spectrum to rise from 1.07 GHz to about 3.8 GHz by 2030, against targets of at least 96% 4G population coverage and at least 50% for 5G	ADVANCED
9mobile national roaming on MTN	Live (2025-05)	Roaming live; T2 Mobile flat at 802,534 internet subscribers (2026-05), no visible recovery	NO CHANGE
Internet Exchange Point of Nigeria traffic	1 Tbps (2025-04)	Above 1 Tbps	NO CHANGE
Mobile broadband population coverage	4G LTE 84.60% and 5G 13.28% of population (2024-12)	4G about 85% and 5G about 13% of population (2025), against 2030 targets of at least 96% and at least 50%	NO CHANGE
Sweden network quality-of-experience project	Running (2025-02)	Running	NO CHANGE
Telecom tariff reset	In force (2025-01)	In force; the first rise in about 11 years	NO CHANGE
Airtel Nigeria retail and distribution network	BASILINE NOT HELD	About 17,200 sites, from about 13,000 three years earlier	Baseline not held
Akwa Ibom airport internet backbone	BASILINE NOT HELD	A multi-gigabit backbone activated at the state's international airport over a commercial submarine-fibre network, intended to carry passenger processing, operations and real-time security monitoring	Baseline not held
FiberOne broadband footprint	None published	Live in five cities, six further states named for launch before the end of 2026	BASILINE NOT HELD

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Fibre cuts from road works	Baseline not held	More than 5,000 fibre-optic cable cuts from road works in the first half of 2026, on the regulator's own count	BASELINE NOT HELD
Free-space optical links in Lagos	BASELINE NOT HELD	Close to twelve licence-exempt optical links across Lagos, on the companies' own account; the operator puts nearly a dozen light-beam links in service across Lagos over two years, serving banks, hotels, internet providers and a utility beyond fibre's reach, with plans to extend to Abuja, Ibadan and Kano	<i>Baseline not held</i>
Length of the national fibre backbone	Baseline not held	30,000 km of terrestrial fibre deployed against the 120,000 km the national blueprint requires, with the financier's appraisal stating flatly that there is no national backbone network; the same financier's Board-approval statement frames the BRIDGE programme as laying over 90,000 km and extending the backbone from 35,000 km to 125,000 km	BASELINE NOT HELD
Telecoms sector capital expenditure	BASELINE NOT HELD	About ₦2.13tn invested in 2025 with about ₦1.86tn planned for 2026, on the operators' association's own figures	<i>Baseline not held</i>
Universal communication access tower deployment	BASELINE NOT HELD	About 3,700 towers to be deployed from October 2026 for more than 20 million people in unserved and underserved communities, with a first tower being installed in Delta State and riverine communities targeted before mid-2027	<i>Baseline not held</i>
Utilisation of the deployed fibre backbone	BASELINE NOT HELD	About 101,000 km built, bypassing some 130m Nigerians (2026-07)	<i>Baseline not held</i>

Data Storage

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
1Government sovereign cloud	Did not exist	GovDrive, GovMail, GovECMS and GovE-Sign across ministries	ADVANCED
AFRICLOUD Lagos cloud region	Did not exist	Full compute region in a carrier-neutral Lagos data centre, the third region alongside Lisbon and Johannesburg	ADVANCED
Airtel Nxtra Eko Atlantic data centre	Did not exist	Planned 38 MW GPU-ready build, over US\$120m	ADVANCED
Cassava National Sovereign Cloud	Did not exist	In service	ADVANCED
Digital Realty LKK2 Lagos data centre	Did not exist	In service	ADVANCED
Equinix LG3 Lagos build	Did not exist	In build	ADVANCED
Fringe Ikoyi Metro EDGE facility	Did not exist	In service	ADVANCED
Kasi Cloud LOS1 hyperscale campus	Did not exist	US\$250m campus scaling toward about 100 MW	ADVANCED
National Sovereign Cloud Initiative	Did not exist	The implementation taskforce was inaugurated, moving the programme from framework into implementation: it is to align regulators, government institutions and private operators behind technical standards, cloud governance, infrastructure assurance and investment frameworks, monitor progress and clear regulatory and operational bottlenecks. Two figures frame it - Nigerian organisations are estimated to spend about US\$850m a year on foreign cloud infrastructure, and the national digital cloud policy targets US\$750m in private cloud and data-centre investment within 24 months	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Subsidised sovereign cloud for startups	Did not exist	Subsidised sovereign cloud for startups	ADVANCED
AWS naira billing	In force (2025-01)	Naira billing; the nearest region is Cape Town	NO CHANGE
MTN Sifiso Dabengwa data centre	Live (2025-07)	4.5 MW Tier III, 780 racks and a naira-priced cloud	NO CHANGE
Open Access Data Centres Lagos expansion	In build (2025-03)	To 24 MW by 2027, about US\$240m	NO CHANGE
Visa Nigeria data centre	Planned (2025-03)	Planned	NO CHANGE
Commercial data-centre estate	BASELINE NOT HELD	About 26 facilities, 18 of them commercial colocation, carrying about 50-56 MW of declared live IT capacity and rising to about 124 MW only when operators' design specifications are counted (2026-07); an independent research house measuring capacity active, under lease or readily available for lease puts it at about 28 MW across about 15 live facilities, against about 80 MW at full build and 45 MW in construction (2026-01)	<i>Baseline not held</i>
Dependence on foreign public cloud platforms	Baseline not held	More than 85% of Nigerian workloads on public clouds; 22% of the 1,000 most-accessed sites hosted locally, against a 34% sub-Saharan average (2026-08)	BASELINE NOT HELD

Energy

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Grid supply to the data-centre estate	BASELINE NOT HELD	The grid has never reliably exceeded 6 GW for about 230m people, roughly 41% availability	<i>Baseline not held</i>

Technical Capacity

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
NIMC platform capacity for compulsory NIN use	BASELINE NOT HELD	Servers, databases and networks not sized for compulsory NIN use across 14 sectors	<i>Baseline not held</i>

Cybersecurity

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Cyber Resilience Framework for communications	Did not exist	Binding on every licensed provider on a staged compliance clock ending 2027-02-23, with four-hour incident notification, a dedicated cybersecurity budget line, a Chief Information Security Officer and two-year in-country retention of call logs and traffic data	ADVANCED
Ministerial Advisory Council on Cybersecurity	Did not exist	Announced, with no membership or terms of reference published	ADVANCED
Payment Security Operations Centre	Did not exist	Proposed; no legal basis, funding line or operator named	ADVANCED
United Kingdom-Nigeria cybersecurity partnership	Did not exist	A bilateral partnership under a United Kingdom-funded continental cyber programme and a bilateral cyber memorandum, which the national cybersecurity coordinator rates as more than 90 per cent implemented and credits with the continent's first four SIM3-certified incident-response auditors at the national coordination centre, a reviewed national incident response plan, cyber maturity frameworks for critical national information infrastructure, and foundational work on a national digital forensics policy	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Domestic cyber-insurance market	Forming (2025-02)	Still forming	NO CHANGE
Nigeria Police Force National Cybercrime Centre	Operating (2025-01)	₦8.82bn recovered and 751+ arrests in 2024	NO CHANGE
Standing committee on fibre as critical national information infrastructure	Baseline not held	A standing committee formed by the communications regulator with the works and communications ministries and the National Security Adviser's office, to coordinate protection of fibre designated as critical national information infrastructure; no terms of reference, meeting cycle, budget or enforcement power is published	BASELINE NOT HELD
Synthetic identity fraud	BASELINE NOT HELD	AI-generated identity fraud up 192% in Q1 2025 as document forgery fell 80%	Baseline not held

Satellite broadband regressed. The largest provider had become Nigeria's second-largest ISP on Q4 2024 figures; by September 2025 it had paused new orders over congestion, and by December more than 66,000 of its users were required to submit an identity number and headshot under a regime built for SIM cards. What arrived: a rebased optical backbone, a landing permit for a second satellite constellation, a hyperscale campus at Lekki, four sovereign-cloud initiatives, a cyber resilience framework with four-hour incident reporting, and the removal of the 5% telecom excise duty. The national fibre programme was in development on 2025-08-01 and is in development now. The data-centre estate held its position while the localisation deadline that will test it was set. And the grid behind both has no dated position at either end that the base can state, and the localisation deadline falls on 2027-01-01.

DPI

Data Exchange

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Bilateral MDA integration agreements under the NIMC Act	Did not exist	Nine agencies took bilateral cover under the new Act	ADVANCED
CBN-NCC telecom identity risk management feed	Did not exist	Banks can check SIM-swap and recycled numbers; fraud fell 51% to ₦25.85bn in 2025	ADVANCED
NCC and Rural Electrification Agency data-sharing MoU	Did not exist	Electrification and universal-service deployment data overlaid	ADVANCED
Nigeria Data Exchange	Announced (2025-08)	In production behind the Government Service Portal; the lawful basis is not on record	ADVANCED
National Single Window	In build (2025-01)	Launched in March 2026 and contested in operation: licensed customs agents say clearance paperwork has multiplied rather than consolidated, their association calling for the customs service to take over implementation outright and objecting to electronic manifest transmission outside the customs system. No throughput, clearance-time or adoption figure is published	NO CHANGE
Integration of the identity register with other government databases	BASELINE NOT HELD	Described by practitioners as federated linkage on a shared identifier, not an integrated ecosystem	Baseline not held

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Lagos Smart Health Information Platform	Not held	Being built by Lagos State as a single patient-data platform connecting patient records, laboratory results and biological data across facilities, to underpin an artificial-intelligence-driven health system and population health intelligence, and framed alongside a planned university of medicine and health sciences and a medical and innovation zone; the state cites the Ebola and COVID-19 outbreaks as the case for moving off siloed facility records	BASELINE NOT HELD

Digital Identity and CRVS

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
ICAO Public Key Directory integration	Did not exist	Passport cryptographically verifiable at 111 member states' borders	ADVANCED
National Identification Number and the foundational identity register	About 120m registrations (2025-08)	136m against a target of 180m by 2026-12-31; about 100m still uncaptured	ADVANCED
NIMC as national root certification authority	Did not exist	The identity commission holds the national root certification authority under the NIMC Act 2026, which creates an overlap with the electronic-signature provisions of the still-pending Digital Economy and E-Governance Bill; which instrument governs digital signatures is unresolved on the record	ADVANCED
NIN integration with health insurance records	Did not exist	NIN tied to health insurance records	ADVANCED
V-Pass airport identity verification	Did not exist	NIN and face biometrics for security checks and boarding	ADVANCED
General Multipurpose Card	Announced (2025-01)	In development with NIBSS and AfriGo	NO CHANGE
NINAuth consent-based verification	Live (2025-05)	Consent-based verification	NO CHANGE
Biometric voter accreditation system	BASELINE NOT HELD	In use at the state governorship election of 15 August, with an observer mission calling for a full post-election technical audit and the bar association's election working group separately calling for an audit and an upgrade of the devices before the 2027 general election; its preliminary report, naming the polling units and their registered-voter counts, records devices failing to boot and delaying a poll's opening to 09:45, fingerprint and facial capture failing on some voters — elderly voters recurrently — so that they could not vote at all, slow processing at units of over 1,100 registered voters, an export failure, and a complete device stoppage at one unit, and recommends comprehensive pre-election testing of biometric capture, network connectivity, battery performance and volume handling	<i>Baseline not held</i>
National cooperative digital identity	BASELINE NOT HELD	A six-month revalidation exercise under way to issue cooperatives a verification number and their members an identity credential, under a memorandum between the federal government, the cooperative federation and a private identity supplier	<i>Baseline not held</i>

Digital Payments and Fintech

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
ATM and point-of-sale transaction mix	Point-of-sale volumes growing and ATM use in long decline	ATM transactions up 6.6% year on year in the first quarter of 2026 with value up 64.6% to NGN26.3tn, about US\$19.4bn, while point-of-sale transaction volumes fell 19.9% to 2.92bn - the agent-banking limits imposed in October 2025, single-provider terminals, a 70-metre radius rule and a NGN1.2m daily cap, constraining the agent channel as the central bank pushes bank ATM expansion	REGRESSED
cNGN naira stablecoin	In issue (2025-02)	Live on a public blockchain from 2026-08-12, the regulated naira stablecoin backed one-to-one, opening lending, payments, remittance and on-chain foreign-exchange use cases; no supply, holder count or reserve attestation is published	ADVANCED
Consumer trust in digital payments	123,918 fraud incidents (2021)	Fraud losses ₦25.85bn in 2025, down 51% year on year, on 67,518 incidents (2025), with fraud reporting down 34% in Q4 2025	ADVANCED, ON A FALLING REPORTING RATE
eNaira retail central bank digital currency	Retail CBDC in issue	Being redesigned toward a wholesale model	REGRESSED
FX Bureau de Change purchase tracker	Did not exist	Real-time or same-day reporting by every licensed bureau	ADVANCED
Licensing regime for fiat-collateralised stablecoins	Did not exist	A drafted issuer-licensing regime with reserve localisation; no instrument issued	ADVANCED
National Payment Stack	In build (2025-06)	ISO 20022 stack live with instant settlement; the operator reports 26.55 million transactions worth 1.4 trillion naira across 48 institutions in the early phase of the ISO 20022-compliant stack that replaces the instant-payments rail, on a multi-currency platform carrying payments, identity and data together	ADVANCED
NIBSS Instant Payments	US\$187bn (2024-08)	4.12bn transactions; rated the first African instant system of its class	ADVANCED
Open banking	Did not exist	First in Africa; consented data sharing across about 120m bank customers	ADVANCED
Stablecoin business-to-business settlement rails	Did not exist	1,500+ businesses across Nigeria and Kenya on dollar liquidity	ADVANCED
United Kingdom diaspora remittance product of a Nigerian fintech	Launched April 2025 as a United Kingdom diaspora remittance product	Being phased out less than 18 months after launch, with resources redirected to Nigeria and Kenya; the group incorporated its British entity in February 2024, committed 1.2 million pounds in setup expenditure covering administration, technology infrastructure and compliance staffing, spent US\$1.26m between February and December 2024 and placed a US\$2.5m equity deposit in July 2025 to acquire an authorised electronic money institution, against US\$7.39m earmarked for the London expansion in 2025 regulatory filings	CLOSED
USSD end-user billing	Dispute unresolved	Billed to airtime at ₦6.98 per 120 seconds with opt-in	ADVANCED
Airtime credit lending	BASELINE NOT HELD	About 40m users (2026-08) on an industry sizing of ₦300-400bn a year (2026); resumed at MTN on about a quarter of its first-quarter run rate	Baseline not held
Bank-owned fintech subsidiaries as payments infrastructure	BASELINE NOT HELD	Tier-one banks hold payments infrastructure inside the group rather than at arm's length	Baseline not held

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Central bank observer nodes on approved stablecoin blockchains	Did not exist	The central bank intends to run observer nodes on the blockchains carrying approved stablecoins, giving it a real-time view of how the tokens are issued, moved and redeemed rather than relying on issuer reports. No start date, node operator, chain list or reporting standard is stated	BASELINE NOT HELD
Central bank payments system circular	Baseline not held	Imposes market-structure caps of 25% on card issuing and 15% on acquiring, mandatory localisation of payment data by 1 January 2027, and disclosure of ultimate beneficial owners, on banks, fintechs and payment service providers; an estimated US\$850m a year is spent on offshore data hosting and about 90% of Nigerian payment data is currently held abroad	BASELINE NOT HELD
Central bank regulatory sandbox	Baseline not held	A second cohort opened to virtual-asset and data-enabled financial technology firms, applications running 12 to 31 August 2026, with the central bank chairing a new Virtual Asset Council alongside the securities regulator and the revenue service; the stated context is an estimated US\$92.1bn transacted in cryptocurrency by Nigerians between July 2024 and June 2025	BASELINE NOT HELD
Non-bank acquirer access to a global card network	Not held	A Nigerian payments company gained direct access to a global card network as a non-bank acquirer, letting it onboard licensed merchants for card acceptance across online, in-store and mobile channels without a bank sponsor	BASELINE NOT HELD
Securities regulator accelerated regulatory incubation programme	Baseline not held	Three further virtual-asset firms named as admitted in the week to 2026-08-17 - a payment solutions firm, an access provider and a card issuer - letting them test digital-asset services under supervision, on top of the twelve admitted since July. No graduation route, licensing outcome or supervisory condition is published	BASELINE NOT HELD
Withholding tax on creator-economy platform payouts	Baseline not held	The Lagos State Internal Revenue Service is testing whether creator-economy platform payouts are royalties subject to 5% withholding tax and pressing two named platforms to deduct at source under the Nigeria Tax Act 2025; it follows the same authority's earlier attempt to make a ride-hailing platform a value-added-tax collection agent. No assessment, ruling or judgment is published	BASELINE NOT HELD

Registries

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Electronic civil registration and vital statistics	Platform in rollout (2025-11)	Nationwide on the VitalReg platform with paper discontinued from 1 July 2026, but stalled at the health-facility layer: none of 371 targeted facilities live despite completed training, zero birth notifications recorded in the reporting year, 120,469 certificates issued against 443,162 registrations, and an estimated 3.5 million children across seven southern states holding no certificate; the platform also displayed charges of US\$30 to US\$80 for documents the commission says are free, and carried a Lagos man's record with a wife and a son unknown to him until the commission corrected it	ADVANCED, REGRESSED, AT THE HEALTH-FACILITY LAYER
National alphanumeric digital postcode system	An intention with no date	A launch date of 2026-10-01 for a unique address per building, with integration to existing government identity databases to follow	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
National digitised addressing system	Did not exist	The National Addressing Council, chaired by the Vice-President, ratified the preliminary framework and named the science and technology ministry as its secretariat for technical implementation, systems integration, interoperability and standards, with the identity commission assigned individual verification and authentication, the corporate registry business address verification, the postal service postcode administration, and states and local governments implementation; the framework is to replace the 2017 addressing policy, described at the meeting as obsolete, focused on mail delivery and postcodes, silent on business address verification, and misassigning citizen address verification to the statistics bureau	ADVANCED
National Mortgage Registry	Did not exist	Ready for deployment; no launch date, custodian or data-protection basis stated	ADVANCED
Unique learner identification number	Did not exist	A 16-digit Learner's Identification Number issued from April 2026, 1.9m at launch, integrated with the National Identification Number register through the Nigeria Education Management Information System across a stated 80m student records (2026-08)	ADVANCED
National Electronic Assets Register	Live (2025-03)	Live	NO CHANGE
National Land Registration and Documentation Programme	In development (2025-03)	More than 90% of land unregistered	NO CHANGE

Sectoral management information systems

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Customs Electronic Cargo Tracking System	Did not exist	GPS tracking replacing physical escort at a second command	ADVANCED
IPPIS human-resource modules	Did not exist	Biometric onboarding, payroll and workforce analytics across 508+ agencies	ADVANCED
NIN verification of agricultural programme beneficiaries	Did not exist	Planned, on a three-year subsidy taper	ADVANCED
National social register	19.7m households (2025-06)	19.7m households, from 13m	NO CHANGE
Nigeria Digital Health Architecture	BASELINE NOT HELD	Health information, health services and health insurance claims exchanges named as the integration target	Baseline not held

Other GovTech and e-Gov

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Ekiti State digital policy and regulatory reform project	Did not exist	UK FCDO project to produce a digital-economy strategy, a DPI roadmap, a civic-technology strategy and a connectivity-reform framework for the state; value and duration not stated	ADVANCED
Government Service Portal	In build (2025)	Piloting on a four-year KOICA project reported at US\$13m	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Hajj operations digitisation partnership	Did not exist	The IT development agency and the Hajj commission agreed to digitise pilgrimage operations end to end – registration, payment verification, flight-manifest management, logistics and real-time pilgrim tracking – with the agency providing technical support, training and IT project clearance; the commission states it runs its ICT function on two developers and that existing electronic registration, medical tracking and a GPS companion app leave hybrid registration and manifest handling as bottlenecks	ADVANCED
services.gov.ng centralised service gateway	Did not exist	Live as a single point of access to federal services previously spread across agency websites and offices – business registration, trade permits, identity verification, regulatory licensing and government empowerment programmes – with applications and verification submitted through it rather than through intermediaries, and stated as a defence against fraudulent look-alike sites	ADVANCED
Smart National Transport Databank	Approved in principle (2012)	Concessioned and under a project implementation committee, with nothing yet built	ADVANCED
Supreme Court mandatory electronic filing and the National Case Management System	Did not exist	Electronic upload of processes and Records of Appeal compulsory, OCR-searchable and on standardised naming, behind the National Case Management System	ADVANCED
CBN DocFlow and the MDA naira payment solution	Live (2025-01)	Live	NO CHANGE
Falcon Eye maritime surveillance system	In operation since 2015	Coastal radar, electro-optical cameras, satellite feeds and AIS with over-the-horizon radar reaching about 370 km, command centres in Lagos, Yenagoa and Calabar feeding Naval Headquarters in Abuja	NO CHANGE
Treasury Management and Revenue Assurance System	Live (2025-03)	Automatic deduction and remittance across all agencies	NO CHANGE

Almost nothing in this section changed band.

The identity register held the same position throughout: implemented at the window's start and implemented now, with enrolment [rising from 123.9m to 136m](#) against a 180m target. What did enter the record is the statutory layer around it – the NIMC Act 2026, the root certification authority transfer, ICAO directory integration and the ward-level enrolment drive.

The national data exchange was announced in August 2025 and only began moving personal data in production in July 2026, behind the Government Service Portal; the lawful basis for that operation is not on record at either end.

The payments instruments issued in the window were [open banking](#), a national payment stack, automated anti-money-laundering standards, market-concentration caps and the [localisation directive](#) among them. The rails they govern held their positions throughout.

The one regression is the retail central bank digital currency, Africa's first, now under review and being redesigned toward a wholesale model with the Bank stating it is not abandoned.

Digitalisation

Digitalisation of sub-national government

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Cross River Smart Surveillance Infrastructure Project	Did not exist	Phase One approved for a Huawei-specified facial-recognition and plate-recognition network feeding a command centre in the Office of the State Security Adviser	ADVANCED
Enugu smart green schools	260 schools announced (2024-02)	Still 260 schools announced, at about ₦1.3-1.5bn each	STALLED
Enugu TradEX Programme	Did not exist	Free digital storefronts, CAC registration support, digital-trade training and payment enablement open to 1,000 Enugu SMEs; cost, funder and selection method unstated	ADVANCED
AI open-contracting platform in three states	Live (2025-02)	Running in three states	NO CHANGE
Anambra SmartGov	Live (2025-06)	Flagged ₦2.1bn unspent and detected ghost workers	NO CHANGE
Benue civil-service digital skilling	Running (2025-03)	40,000 civil servants	NO CHANGE
Kaduna compensation and valuation land system	Live (2025-02)	Live	NO CHANGE
Lagos Ask INU survivor-support chatbot	Live (2025-02)	Live	NO CHANGE
Lagos digital house-numbering and addressing	Piloting (2025-06)	Piloting	NO CHANGE
Anambra OneGov state services platform	Not held	In its second phase, expanding to digitise state government services and formalise small and medium enterprises; the platform logged about 14,000 visits over three weeks in July despite limited publicity	BASELINE NOT HELD

Rural digital data capture

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Cisco AI for smallholder farmers	Did not exist	Exploratory; no programme, funding, timeline or counterparty ministry named	ADVANCED
Rural connectivity programmes	Baseline not held	About 3,700 towers to start deploying around October 2026 against 23% of rural communities connected (2025-10)	ADVANCED

State-level building runs ahead of anything federal here, and it runs in two directions at once. The new arrivals are commercial and civic - [free digital storefronts, company-registration support and payment enablement for 1,000 small firms in Enugu, with cost, funder and selection method unstated](#), and an Anambra services platform in [its second phase, logging about 14,000 visits over three weeks in July despite limited publicity](#) - alongside a Cross River facial-recognition and plate-recognition network feeding a command centre in the Office of the State Security Adviser.

The schools programme is where a state announcement stops moving: still [260 schools announced at about ₦1.3-1.5bn each](#), unchanged since February 2024. Rural connectivity is at the same stage nationally - [about 3,700 towers to start deploying around October 2026, against 23% of rural communities connected](#).

Technology

AI

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
AI governance framework for tertiary institutions	Did not exist	NUC framework written and the three tertiary regulators committed to harmonise; the text is not held	ADVANCED
Anambra state AI operations automation	Did not exist	The state ICT agency reports having modified and trained an open-source model to automate its own operations end to end, and says it is exploring replication across state government for productivity, revenue leakage and governance	ADVANCED
GovGuide public-services chatbot	Did not exist	On Meta's Llama in English, Hausa, Igbo and Yoruba	ADVANCED
Mandated AI and machine-learning fraud detection	Did not exist	AI and machine-learning fraud detection made mandatory	ADVANCED
N-ATLAS sovereign multilingual model	Did not exist	Open-source and multimodal across four Nigerian languages, on Llama-3 8B	ADVANCED
Responsible AI in Finance Hub	Did not exist	Proposed over an installed base: 87.5% of surveyed fintechs already use AI for fraud detection	ADVANCED
Standing on the responsible-AI and AI-readiness indices	141st on the Oxford Government AI Readiness Index (2023)	38th of 135 countries and Africa's highest scorer on the 2026 Global Index on Responsible AI at 45.93, and 72nd on the Oxford Government AI Readiness Index, up from 141st over three years; the responsible-AI index's own conclusion is that holding AI policies is not the same as enforceable oversight or deployed systems	ADVANCED
National AI Strategy and the National AI Trust	Approved (2025-02)	The strategy itself still in development	NO CHANGE
Service-Wise GPT for the federal civil service	Live (2025-02)	In service across the federal civil service	NO CHANGE
AI Academy Nigeria	Not held	Launched by a platform company with the communications and digital economy ministry, the national skills programme, the artificial-intelligence research centre and a research network, combining a startup pitch competition, artificial-intelligence skills courses and a six-week developer bootcamp; ten startups are shortlisted to pitch at a Lagos technology exhibition on 3 September 2026, with two winners receiving US\$5,000 in cash, US\$2,000 in the company's advertising credits and a trip to its own summit in Istanbul in November	BASELINE NOT HELD
Anambra State Vision 2030 artificial-intelligence programme	Baseline not held	A state-level push on artificial intelligence and paperless government, which the state's own ICT agency says is constrained by weak connectivity and computing capacity; no budget, procurement, delivery date or named system is published	BASELINE NOT HELD

ICT Industry

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Embedded insurance infrastructure	Did not exist	Open to banks, fintechs, employers and merchants	ADVANCED
Enterprise AI distribution through institutions	Did not exist	Distributed through universities and professional communities	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Telco mobile money	<i>Baseline not held</i>	Revenue up about 132% in the first half of 2026 with one airtime-lending product suspended, and the group chief executive setting a medium-term target of 30 million fintech customers in Nigeria against five million today - the measure of success given as converting 30% or even 50% of the operator's telecom base - with technology brought in from three Chinese payments and commerce groups to compete with the incumbent fintechs, and a stated shift toward lending off the operator's own balance sheet rather than only through the partner banks that currently score its customer data for credit	ADVANCED
Airtel AI spam detection	Live (2025-03)	Live	NO CHANGE
State dividend from the mobile incumbent	BASELINE NOT HELD	About US\$41m due to the state from a US\$406m operator dividend payout (2026-08)	<i>Baseline not held</i>

Innovation ecosystem

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Bango food-market price data platform	Did not exist (founded, launched November 2025)	Crowdsourced food-market price platform with about 2,500 users; extended into direct farmer-to-consumer sales via Shopr by Bango in Abuja; a group-buying feature (Bango Market Day) planned next	ADVANCED
Katsina state technology hub	Did not exist	Planned	ADVANCED
NCC Digital Industrial Park and Learning Centre lease to Enugu State	Did not exist	Two federal facilities transferred to state operation for 15 years, to run as the Enugu Talent City and an AI institute	ADVANCED
Itana digital free zone	Live (2025-06)	Remote incorporation on a US\$100m phase-1 commitment	NO CHANGE
JICA startup hub programme	Running (2025-06)	US\$11.2m startup hub plus US\$40m for social-startup support	NO CHANGE
Moove drive-to-own vehicle financing	BASELINE NOT HELD	A 42,000-vehicle ride-hailing fleet across 14 countries financed against platform earnings, at a US\$2.1bn valuation (2026-08)	<i>Baseline not held</i>

No system in this section changed band, and the governing instrument is still inside a bill.

What arrived: the sovereign multilingual model in September 2025; the risk-based regime's public timeline in January 2026; a proposed governance framework for public-sector AI in June, which asks first for an inventory of what is already running; the central bank's Responsible AI in Finance Hub, proposed over an [installed base of 87.5% of surveyed fintechs](#) already using AI for fraud detection.

What held position: the national strategy and trust, the hyperscaler skilling commitments, and the state deployments. All were in place before the window opened and none moved.

The surveillance estate carries no baseline the base can state: the largest AI deployment in the country by expenditure — [above US\\$470m](#) on facial recognition and number-plate tracking, with about 10,000 cameras — cannot be dated at either end of a twelve-month window, and the research finding attached to it is that there is little evidence it reduces crime.

Capacity

Training and skills

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Abuja Centre for Entrepreneurship training-of-trainers programme	Did not exist	First KOICA-backed cohort of trainers in business management and artificial intelligence, building a trainer pool for the MSME sector; cohort size and cost not stated	ADVANCED
Africa AI Upskilling Programme	Did not exist	US\$1.1m from Google.org to FATE Foundation for a train-the-trainer AI curriculum at 10 Nigerian universities, with the African Institute for Mathematical Sciences	ADVANCED
AI Teacher Capacity Development Programme	A pilot in six unity colleges	Contracted for national rollout to about 11,700 teachers across all Federal Unity Colleges	ADVANCED
Deep-technology teaching laboratories in a private university	Did not exist	Planned; lab count, cost and funding not stated	ADVANCED
Diaspora health-workforce registry	Did not exist	A register standing on no stated legal basis	ADVANCED
EkoAI Academy (LSETF-InnoPower Africa)	Did not exist	Free AI-skills programme targeting 10,000 young Lagosians and 100 certified trainers; cost and funding not stated	ADVANCED
Enugu Talent City and AI Institute	Did not exist	The communications regulator leased its Enugu Digital Industrial Park and Learning Centre to the state government for fifteen years, to be run as a talent city and artificial-intelligence institute for digital skills, startup incubation, outsourcing, research and technology businesses	ADVANCED
Huawei and NCCE Digital Academy for teacher-training colleges	Did not exist	A vendor Digital Academy established at the commission that accredits teacher-training colleges, with the college curriculum revised to add AI and robotics, networking and cybersecurity, data science and analytics, and software and web development	ADVANCED
Lagos teacher AI literacy programme	Did not exist	Entering the classroom through teachers rather than the curriculum	ADVANCED
Mastercard Foundation EdTech Fellowship	Running since its 2019 launch	Twelve startups in cohort 4; 72 companies supported since 2019	ADVANCED, FOURTH COHORT
NBTE National Diploma curriculum in AI for polytechnics	Did not exist	National Diploma curriculum in artificial intelligence launched for Nigerian polytechnics; NBTE reports AI has cut its own curriculum-development costs by about 50% by generating draft curricula and courseware	ADVANCED
Startup Abuja student aid programme	Did not exist	A 50-million-naira programme, about US\$37,000, offering higher-education students tuition support, a monthly stipend and paid remote internships, with applications closing on 31 August 2026	ADVANCED
Three-million technology talent programme	Running (2025)	1.87m registrations across all 774 LGAs, more than 135,000 trained across three cohorts and 15,000 job pathways created (2026-08), against a target of ICT at 22% of GDP by 2027	ADVANCED
Data-protection officer certification pipeline	Running (2025-05)	Aimed at an informal sector that is 65% of employment	NO CHANGE
Microsoft AI training commitment	Committed (2025-02)	US\$1 a trainee, which drew feasibility scepticism	NO CHANGE
Talent-export platform partnership	Running (2025-04)	Running	NO CHANGE

Research institutions

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
National Cybersecurity Centre, Bayero University Kano	Operating (2025-05)	Operating	NO CHANGE

Almost every row in this chapter did not exist a year ago, which is the finding: AI training arrived across the school, polytechnic and university systems at once, and arrived from outside. A teacher programme went from a six-college pilot to [national rollout to about 11,700 teachers across all Federal Unity Colleges](#); a foreign philanthropy put [US\\$1.1m into a train-the-trainer AI curriculum at 10 universities](#); a vendor established a [Digital Academy at the commission that accredits teacher-training colleges, with the college curriculum revised to add AI and robotics, networking and cybersecurity, data science and software development](#); and the polytechnic sector gained a [National Diploma curriculum in artificial intelligence](#).

The national programme is the one with numbers to check, and they are thin against the ambition: [1.87m registrations across all 774 local government areas, more than 135,000 trained across three cohorts and 15,000 job pathways created, against a target of ICT at 22% of GDP by 2027](#). Most of the newer programmes state neither cohort size nor cost.

Inclusion

Access to services

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
GoMed-UNFPA digital self-care platform (University of Lagos)	Did not exist	Live for UoL students; routes to free contraceptives via Lagos State Ministry of Health/UNFPA supply chain, discreet delivery, SoftLife 247/U-Plan and GoMed pharmacists; expansion to other Lagos campuses planned	ADVANCED
Ward-level enrolment drive	Did not exist	Free enrolment in every ward, targeting under-enrolled groups	ADVANCED
Zero-rated access to education platforms	Did not exist	Every option consulted on requires registration to control access	ADVANCED
Diaspora Non-Resident BVN	Live (2025-05)	Remote diaspora onboarding	NO CHANGE
NIN-keyed consumer credit scoring	Proposed (2025-06)	Planned; consequences would extend to passport and licence renewal	NO CHANGE
Agent-network microfinance	BASELINE NOT HELD	Agent-network microfinance for microenterprises and the unbanked	Baseline not held
Correction of errors in the identity register	BASELINE NOT HELD	Excludes the about 72% of adults without smartphones	Baseline not held
Financial inclusion	BASELINE NOT HELD	74% financially included (2023), against a 95% target for 2028	Baseline not held
SKYE II rural job centres in Ogun and Plateau	Baseline not held	IT equipment out to tender for rural job centres in two states, under a German-funded youth-employment project; centre count, value and opening dates not stated	BASELINE NOT HELD

Digital divides

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Device affordability	Baseline not held	Sub-\$100 shipments down 34% year-on-year in Q2 2026 and the African average selling price up \$41 to \$202; Nigeria's own market down 11% in the quarter	WORSENERD
Digital Futures programme for young people with disabilities	Did not exist	A four-and-a-half-year programme run by a disability-rights organisation with a philanthropic foundation to expand employment access for young people with disabilities through digital skills, entrepreneurship and inclusive employment pathways, opened in Lagos with the state disability office's stated support	ADVANCED
Gender gap in identity enrolment	BASELINE NOT HELD	38.8% of enrolled NIN holders are women against 61.1% men, a 22.3-point gap (2025-06)	Baseline not held

The section's one movement is a delivery failure. A state programme to build 260 schools, one in every ward, powered by solar and connected before instruction was layered on, promised full opening of all 260 in January 2026. [By May 2026 many were incomplete and unequipped](#) with pupils already resuming. The stated sequencing was power first, then connectivity, then teaching; the schedule was not met.

Everything else here either arrived or held. Arrivals were a zero-rated education consultation, an AI-literacy programme entering schools through teachers and a ministerial declaration on meaningful connectivity; the skills and inclusion programmes all held.

The measurements are baselines rather than movements: [rural access at 23% against 57% urban](#), women at 38.8% of enrolled identity holders, and correction of register errors routed through a smartphone portal in a country where about 72% of adults have no smartphone. None is re-measured inside the window.

Data

National statistics

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Make Inclusive Data the Norm initiative	Did not exist	Widened from three countries to five	ADVANCED
Telecoms contribution to GDP	8.93% of GDP (Q2 2024)	9.19% of GDP (Q1 2026) for telecommunications and information services, within information and communication at 11.31% of GDP (Q1 2026)	ADVANCED
First biometric population census	Planned (2025-03)	Planned; the last census was 2006	NO CHANGE

Use of satellite data

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Amazon Kuiper landing permit	Did not exist	Permit granted; no service	ADVANCED
Starlink Nigeria service	Second-largest ISP by subscribers	Orders paused over congestion, later reopened	REGRESSED
NASRDA direct-to-device satellite programme	Announced (2025-06)	MoU with technology transfer and engineer training; no deployment	NO CHANGE
NigComSat and Eutelsat LEO partnership	Announced (2025-01)	Planned; no service	NO CHANGE

The sector's own weight in the economy is the measure that moved: telecommunications and information services went from 8.93% of GDP in the second quarter of 2024 to 9.19% in the first quarter of 2026, inside information and communication at 11.31%. What has not moved is the count of the population itself: the first biometric census is still planned, with the last census in 2006.

Satellite is a chapter of permits without services. A landing permit granted with no service, a direct-to-device programme at a memorandum with technology transfer and engineer training and no deployment, a low-orbit partnership planned with no service - and the one operator actually selling capacity paused orders over congestion before reopening them.

Geopolitics

US / hyperscaler activities

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
Google AI alliance, research and skilling	Alliance signed (2025-02)	A five-area alliance, ₦3bn across five partners, and a second consecutive year of free student AI subscriptions	ADVANCED
United States fibre and feasibility grants	In place (2025-01)	US\$2m toward the 90,000 km build	NO CHANGE

China activities

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
21st Century and China Mobile sovereign cloud	Did not exist	A sovereignty push riding partly on a Chinese stack	ADVANCED
Huawei Lagos innovation centre	Open (2025-05)	Framed by the minister as a catalyst for tech sovereignty	NO CHANGE
AI surveillance estate	BASELINE NOT HELD	Above US\$470m on facial recognition and number-plate tracking, the continent's largest (2026-03)	Baseline not held

EU activities

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-26	MOVEMENT
cBrain F2 case-management platform	Did not exist	Deployed on an assurance that sovereign data stays in Nigeria	ADVANCED
EU-Nigeria Digital Economy Package	Did not exist	€45m	ADVANCED
Finland-Nigeria cyber and digitalisation MoU	Did not exist	MoU signed	ADVANCED

Every external relationship in this chapter gained something this year, and each gained a different kind of thing. The American strand is skills and grants - a five-area alliance, ₦3bn across five partners and a second consecutive year of free student AI subscriptions against US\$2m toward a 90,000 km fibre build. The European strand is money and software - €45m in a digital economy package and a Danish case-management platform deployed on an assurance that sovereign data stays in Nigeria.

The Chinese strand is the infrastructure the others are built on, and the sovereignty argument runs through it: a sovereignty push riding partly on a Chinese stack, an innovation centre framed by the minister as a catalyst for tech sovereignty, and above US\$470m on facial recognition and number-plate tracking, the continent's largest such spend.

Where the record is thin

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Hyperscaler cloud region in Nigeria	An AWS, Azure or Google Cloud announcement of a Nigerian cloud region or local availability zone, or a ministerial statement of terms offered to secure one.	2026-08-04
Power sequencing plan for the data-localisation deadline	A CBN, NITDA or Ministry of Power statement sequencing grid and data-centre capacity milestones against the 2027-01-01 localisation deadline.	2026-08-04
Public breach disclosure regime	An NDPC or NCC rule requiring breach notifications to be published, or an annual register of notified breaches naming the controllers involved.	2026-08-04
Published interoperability framework under the NIMC Act 2026	A gazetted regulation or published framework stating the lawful basis, consent mechanism, retention rule and audit arrangements for inter-agency sharing of identity data – or the gazetted text of the Act itself.	2026-08-04
Whether foreign cloud local zones satisfy the localisation directive	A CBN clarification, FAQ or supervisory letter stating whether a hyperscaler's in-country availability zone meets the storage-and-management requirement of circular PSS/DIR/PUB/CIR/001/004.	2026-08-04
Consolidated federal budget allocation to digital transformation	A Budget Office appropriation extract or Ministry of Communications, Innovation and Digital Economy annual report carrying total digital and ICT spend across votes.	2026-08-04
India-Nigeria digital cooperation	A bilateral MoU, India Stack or DPI cooperation programme document, or a ministerial readout naming a Nigeria-India digital instrument.	2026-08-04
Proposed responsible-AI governance framework for public bodies	The instrument, terms of reference or ministerial statement establishing the proposed responsible-AI governance framework for public institutions.	2026-08-14
Malabo Convention ratification position	An instrument of signature, ratification or accession to the African Union Convention on Cyber Security and Personal Data Protection, or an official statement of the government's position on it.	2026-08-14

Seven subjects carry no reliable position at either end, all probed once on 2026-08-04. Three became acquisition lines: the gazetted identity statute, the 2026 appropriation vote for the digital-economy ministry, and a cooperation memorandum with India's electronics ministry.

Four absences stand dated, and three of them converge on 2027-01-01. No hyperscaler cloud region or local availability zone has been announced; no government instrument sequences grid capacity against the localisation deadline; and whether a foreign cloud's in-country zone satisfies the directive is the question the circular does not answer. The fourth is the absence of any published register of notified data breaches.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
