

PROGRESS REPORT

Seychelles: progress report, September 2025 – September 2026

Edition of 2026-09-05 · 57 systems and instruments tracked

GOVERNANCE · FINANCE · ICT INFRASTRUCTURE · DPI · DIGITALISATION · TECHNOLOGY · CAPACITY · INCLUSION · DATA · GEOPOLITICS · WHERE THE RECORD IS THIN

This report asks the same set of questions of every country. The rows below are a fixed frame of indicators, one row each, chosen in advance and covering all thirty-eight subjects the base tracks — so what appears here is decided by the frame and not by whichever records happened to accumulate. Each row says what happened on that indicator during the period, with every claim linked to the source it rests on.

Where a row reads *No evidence*, the base holds nothing on that indicator. **That is a statement about this base, not about the country** — it does not mean nothing exists, only that nothing has been collected here yet. The rows that carry evidence say what it is; the rows that do not are left to speak for themselves.

The period is 2025-09-01 to 2026-09-05.

Progress values. *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a reported position worsened. *Mixed* — the indicator's instruments moved in different directions in the period; the clause after the comma names which moved which way. *No change* — the base holds a standing position and nothing in the period touched it. *No evidence* — the base holds nothing on this indicator at all. A value may carry a qualifying clause after a comma, as in *Advanced, regulations still pending*.

Governance

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Strategies, plans and policies	Digital transformation strategy	The President reaffirmed a fully digitalised electronic-government target for 2030 while receiving a foreign envoy's credentials, exploring bilateral technical cooperation. The restatement came in August 2026 at a credentials ceremony (target). No strategy document, delivery plan, milestone set or budget for the target is held at any date. What the base can show against it is a relaunched portal, an electronic case management system, a certificate of origin, a business one-stop portal in pilot, and an invoicing system at procurement — five services, no plan.	NO CHANGE
Strategies, plans and policies	ICT strategy		NO EVIDENCE
Strategies, plans and policies	Broadband strategy		NO EVIDENCE

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Strategies, plans and policies	Data storage / cloud strategy		NO EVIDENCE
Strategies, plans and policies	Data interoperability framework / roadmap		NO EVIDENCE
Strategies, plans and policies	AI strategy	A national science, technology and innovation institute was established by Act with an artificial-intelligence strategy mandate, and the body was reinstated under the Vice-President while no commencement notice for the Act is on record. The Act was assented in December 2025, establishing a body corporate with an artificial-intelligence strategy mandate, a science academy, an open-access scientific-data repository and incubation centres (Act). The institute was reinstated with its secretariat under the Office of the Vice-President and is described as functioning; no commencement notice for the Act is cited anywhere (reinstatement). A body operating under a statute whose commencement cannot be evidenced is worth stating plainly. No artificial-intelligence strategy has been produced under the mandate; what exists instead is an education framework, recorded separately.	ADVANCED
Strategies, plans and policies	Data localisation policies		NO EVIDENCE
Strategies, plans and policies	Data governance policy		NO EVIDENCE
Strategies, plans and policies	Open data policy		NO EVIDENCE
Legislation and regulation	Data protection legislation	The Data Protection Act 2023 is in force in full, its eighteen-month transition having elapsed, and it expressly recognises participation in a global cross-border privacy system. The Act commenced in December 2023 with an eighteen-month transition; that period has elapsed and controllers and processors are now subject to it in full (Act , force , review). A continental review adds that the Act expressly recognises participation in a global cross-border privacy rules system (reforms). A statute fully in force with an explicit cross-border interoperability provision puts this unit ahead of most in the frame on the law. What it lacks is recorded in the next cell.	NO CHANGE
Legislation and regulation	Cybersecurity legislation		NO EVIDENCE

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Legislation and regulation	Legislation covering digital id		NO EVIDENCE
Legislation and regulation	Digital payments legislation		NO EVIDENCE
Legislation and regulation	Legislation enabling data interoperability		NO EVIDENCE
Legislation and regulation	AI legislation / regulations		NO EVIDENCE
Legislation and regulation	E-commerce legislation		NO EVIDENCE
Legislation and regulation	Statistics legislation		NO EVIDENCE
Legislation and regulation	Access to information legislation	An access-to-information reform whitepaper recommends a centralised access unit, alignment with the data-protection Act and open-reuse licensing, with drafting targeted for end-2025. The whitepaper was published in November 2025 with drafting by the attorney-general targeted for the end of that year (whitepaper). Nothing has entered the base since, so the drafting target has passed with no draft on record. The same body holds both the access and the protection mandates, which is why the whitepaper proposes aligning the two statutes rather than treating them separately.	ADVANCED
Data protection	Data protection authority	The Information Commission names no clear power to enforce its orders as its own most urgent weakness, in its own reform whitepaper. The finding is the Commission's own, set out in its access-to-information reform whitepaper, and it marked data protection day in January 2026 (whitepaper , day). The same body holds both the access-to-information and the data-protection mandates, so the enforcement gap it identifies runs across both. A regulator publishing that it cannot enforce its own orders is unusually direct, and it is the fact that governs how much weight the fully-in-force statute above can carry.	ADVANCED
Data protection	National data protection readiness		NO EVIDENCE

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Regional collaboration	Regional policy collaboration	The country is one of seven covered by a programme for African developing island economies, on a 2026 to 2031 roadmap with digital transformation among six pillars. The continental trade secretariat signed a joint venture in Accra on 31 August 2026 with the same technology company to establish the digital trade corridor (agreement), while the Seychelles memorandum with the two remains under review. The corridor is proceeding through Ghana rather than through Seychelles. The programme was launched at a ministerial segment in July 2026 (programme). No national commitment, allocation or workplan beyond the communique is detailed. It is the same seven-state programme recorded for other island units in this frame, and in none of them can the base say what the individual country undertook.	MIXED the corridor advanced elsewhere while the Seychelles memorandum stayed under review
Regional collaboration	Regional legal harmonisation		NO EVIDENCE
Regional collaboration	Shared regional infrastructure	A digital-trade hub memorandum was signed with the continental trade secretariat and a technology partner, and its terms are not held. The signing was reported during the secretary-general's visit in March 2026, positioning the country as a digital-trade hub (memorandum). A separate claim that a digital trade corridor headquarters sits in the capital is not established and is not conflated with the memorandum here. No value, term, workplan or infrastructure commitment is published, so what a digital-trade hub would consist of is unstated.	ADVANCED
Regional collaboration	Cross-border data transfers		NO EVIDENCE
Standards	National interoperability standards		NO EVIDENCE
Standards	National quality standards		NO EVIDENCE
Standards	Adoption of international standards		NO EVIDENCE
Public debate and participation in policymaking	Non-governmental contribution to national policy		NO EVIDENCE

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Public debate and participation in policymaking	Open discussion of government policy	Parliament amended the broadcasting Act in June 2026 to give appointment and dismissal power over the broadcaster board, and perceived media freedom fell on a survey round fielded in 2025. The base holds no primary text of the amendment; it is reported in a survey dispatch citing two press-freedom organisations (amendment). The perception measure is from a round fielded in 2025 and published in August 2026. It measures what people believe about media freedom rather than the media's legal position, and an international index placed the country 35th globally in 2026, up ten places (perception). Those two point in opposite directions and the cell carries both: a statutory change increasing executive control over the state broadcaster, and an external ranking improving.	REGRESSED

Finance

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Domestic budget appropriations and expenditure	Sustainable domestic financing of digital transformation		NO EVIDENCE
MoUs and other agreements	Strategic relationships	A neighbouring operator announced cross-border payment capabilities with a domestic fintech partner. The announcement is a single paragraph in an otherwise foreign-focused keynote (announcement). No agreement, value, timetable or regulatory approval is named. It is one of three cross-border payment intentions in this unit – the others being a continental interface memorandum and the domestic fintech's own platform – and none has a completed corridor on record.	ADVANCED

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
New investments	Mobilisation of non-state finance	A US\$350,000 pre-seed round closed for a domestic fintech, and a development lender refinanced the telecommunications incumbent in a US\$50m package after arranging US\$70m of acquisition financing in 2019. The pre-seed closed in November 2025 with five named backers (round). The refinancing package of US\$50m replaced US\$48.1m of 2019 debt (refinancing); the lender took about 2.9 per cent of the operator's equity in December 2022, the operator listed on a domestic exchange in September 2022, and a local-currency bond of about US\$12.5m was co-arranged in February 2024 (refinancing). The original acquisition financing of US\$70m syndicated, US\$50m on the lender's own book, took the operator out of foreign ownership in 2019 (acquisition). A regional development lender holding equity in the telecommunications incumbent is a structural fact this base records and nothing examines.	ADVANCED
New investments	Development-partner project financing	A US\$30m results-based social protection programme carries a social-protection registry and management information system as its digital element. The programme was approved in March 2021 (programme). It is the only development financing in this ledger with a named digital component, and the social protection delivery platform recorded separately — briefed to stakeholders in August 2026 — is presumably its output, though no source connects them.	NO CHANGE

ICT Infrastructure

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Connectivity	Mobile penetration	One operator launched commercial fifth-generation service in July 2026, and the incumbent launched fifth-generation with a Chinese vendor in 2020. The commercial launch came in July 2026 with a broadcaster content partnership alongside; plan and pricing detail is paywalled and not held (launch , turnkey). The incumbent launched fifth-generation service in 2020 with a Chinese vendor supplying it (incumbent). An emergency-communications memorandum signed with a Chinese supplier at a 2025 trade congress, for a resilient mission-critical core integrating with the incumbent's network, has had no update in more than seventeen months (memorandum).	ADVANCED
Connectivity	Internet usage		NO EVIDENCE
Connectivity	Mobile affordability		NO EVIDENCE
Connectivity	National fibre backbone		NO EVIDENCE
Connectivity	International internet bandwidth		NO EVIDENCE
Connectivity	Internet Exchange Points		NO EVIDENCE
Connectivity	Satellite broadband licensing and availability	Satellite internet soft-launched at a State House briefing in July 2026, after Cabinet approved the licence in February and the operator incorporated locally by May. Cabinet approved the service provider licence on 18 February 2026, the operator incorporated locally and was in final licensing by May, and the soft launch was confirmed at a State House briefing in July (soft launch , clearance , incorporation , live , coverage). Requiring local incorporation before licensing is the design choice worth recording; several units in this frame licensed the same operator on a full foreign-ownership basis, and this one did not. No subscriber count, tariff or coverage figure is published.	ADVANCED

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Data Storage	Local data centre capacity (all providers)	An operator data centre was built under a turnkey project relocating and modernising the network into a hybrid network cloud. The turnkey award was made in December 2021 (project). Its continued operation is inferred only from the 2026 fifth-generation launch it enabled. No capacity, tenancy or availability figure is published, and no other data centre – commercial or government – appears anywhere in this ledger.	NO CHANGE
Data Storage	Local data centre capacity (national providers)		NO EVIDENCE
Data Storage	Off-site backup capacity		NO EVIDENCE
Energy	Sufficient energy and water for data centres		NO EVIDENCE
Energy	Grid reliability		NO EVIDENCE
Energy	Rural electrification		NO EVIDENCE
Technical Capacity	Robustness of government hardware and software		NO EVIDENCE
Technical Capacity	Local capacity to maintain, manage and develop government systems		NO EVIDENCE
Cybersecurity	National cybersecurity readiness	The National Assembly unanimously approved a motion to accede to the Budapest Convention, and a national cybersecurity coordination committee has a thin record with no founding instrument held. The accession motion was approved unanimously in July 2026; the body of the source is paywalled beyond its opening (accession). The coordination committee reaches the base through a press-freedom day workshop it ran on artificial intelligence, ethics and cybersecurity. No founding instrument or mandate document is held (committee). So the country is acceding to the principal international cybercrime instrument while its own coordinating body exists in the record only through a workshop it hosted.	ADVANCED

DPI

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Data Exchange	National data exchange system		NO EVIDENCE
Data Exchange	Use of digital id in other systems		NO EVIDENCE
Data Exchange	Interoperability of health systems		NO EVIDENCE

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Data Exchange	Interoperability of education systems		NO EVIDENCE
Data Exchange	Interoperability of social protection systems		NO EVIDENCE
Digital Identity and CRVS	Robustness of system	A national digital identity platform runs a two-tier credential built on a foreign vendor's platform, and no source addresses licensing, hosting or exit terms. The platform launched in September 2024 on a foreign vendor's identity platform, with the credential made mandatory for work permit holders (platform , mandate , civil status). The sovereignty question is open: no source addresses licensing, hosting or exit terms with the vendor. For a national identity credential that is the arrangement that matters most, and it is the one thing nothing published says. No enrolment count, coverage figure or authentication volume is held at any date.	NO CHANGE
Digital Identity and CRVS	Registration of entire population		NO EVIDENCE
Digital Identity and CRVS	National maintenance of id and credentials systems		NO EVIDENCE
Digital Identity and CRVS	Authentication		NO EVIDENCE
Digital Identity and CRVS	Digital id from birth		NO EVIDENCE
Digital Identity and CRVS	Interoperability of birth registration and digital id		NO EVIDENCE
Digital Identity and CRVS	Use by other systems		NO EVIDENCE

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Digital Payments and Fintech	Governance role of central bank	The central bank set a four-stage cheque phase-out running to May 2026, under electronic money regulations in force since 2022, and Cabinet approved widening the authorised-dealer perimeter. The phase-out runs in four dated stages: stop issuing to individuals from January 2025, stop accepting from individuals from May 2025, stop issuing to non-residents from January 2026, stop accepting from non-residents after May 2026. The cheque-volume and card figures behind it carry a proxy date caveat (phase-out , schedule). The electronic money regulations were made under the payment system Act in 2022, giving incumbents six months to comply and a year to reach the capital floor; they were acquired from the Official Gazette only in August 2026, so they are a foundational text newly added to this base rather than a new development (regulations). Cabinet approved amendments widening the authorised-dealer definition to include credit unions and licensed payment service providers (perimeter). A dated, staged withdrawal of an instrument is the most orderly payments transition in this frame.	ADVANCED
Digital Payments and Fintech	G2P functionality		NO EVIDENCE
Digital Payments and Fintech	Revenue collection		NO EVIDENCE
Digital Payments and Fintech	B2B and B2G functionality	A domestic fintech ran its first live transaction on a virtual business-account platform, positioned against the cheque phase-out. The first live transaction ran in July 2026 on a platform offering virtual business accounts, with the company also announcing an operating layer above it (platform , cheques , funding). A domestic company building business payments directly into the gap the central bank's cheque withdrawal creates is the clearest instance in this ledger of policy and private delivery lining up. No transaction volume, customer count or pricing is published.	ADVANCED
Digital Payments and Fintech	P2P, P2G and P2B functionality		NO EVIDENCE
Digital Payments and Fintech	Population uptake		NO EVIDENCE

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Digital Payments and Fintech	Cross-border functionality	The central bank signed a memorandum with an Indian payments body to bring its unified payments interface, with rollout targeted for end-2026. The memorandum was signed during a bilateral visit in June 2026 and the source is secondary, with neither party's primary held (memorandum). Adopting another country's national payments interface is a substantial architectural commitment — it decides the rails, the standards and the counterparty for cross-border retail payments — and the base holds no text stating what was agreed.	ADVANCED
Digital Payments and Fintech	Consumer protection		NO EVIDENCE
Registries	Population register		NO EVIDENCE
Registries	Civil register	Civil-status certificates are issued online with two-working-day delivery, saved to the identity platform's document wallet. Birth, marriage and death certificates are available online with delivery in two working days, saved into the identity platform's document wallet (certificates). That is a working registry-to-credential link — the certificate lands in the same wallet as the identity — and it is one of very few in this frame where the two systems are joined at the point of issue. No transaction volume, registration completeness or uptake figure is published.	NO CHANGE
Registries	Address register	Cabinet approved implementation of a national addressing and postcode system on an international address standard, with the legal framework being drafted. The standard was adopted and a technical committee is drafting the legal framework with the attorney-general's office (system). The source is undated and proxy-dated to 2025, so the status may have moved with nothing later on record. Adopting the international standard before drafting the law is the sequence here, and it is the right one for an addressing system whose value depends on conforming to something.	ADVANCED
Registries	Business register	The President toured the registrar general office, praised its digitalisation and announced unspecified legislative reforms. The tour was in February 2025 and the reforms were not specified (tour). Nothing has entered the base since. A business one-stop portal was separately launched in pilot with a full rollout targeted for June 2026, and no source connects it to the registry.	NO CHANGE
Registries	Social protection register		NO EVIDENCE
Registries	Electoral register		NO EVIDENCE

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Registries	Tax register		NO EVIDENCE
Registries	Land register		NO EVIDENCE
Sectoral management information systems	Health	Bilateral consultations are advancing toward potential adoption of another country's telemedicine, office and hospital platforms. The consultations reach the base through a single secondary analytical source, with no domestic primary (consultations). Adopting a foreign state's public-health platforms alongside a memorandum to adopt its payments interface would make one bilateral partner the supplier of two of this country's core public systems. Nothing published states terms, hosting or data arrangements for either.	ADVANCED
Sectoral management information systems	Education	A smart education programme was launched by the education ministry with the incumbent operator and a Chinese vendor across four secondary schools. The programme covers multimedia lessons, real-time assessment and interactive display hardware across four secondary schools (programme). The account is a vendor case study, not verified against a ministry primary. No pupil count, evaluation or data arrangement is published, and the same vendor supplies the incumbent's fifth-generation core.	ADVANCED
Sectoral management information systems	Social protection		NO EVIDENCE
Sectoral management information systems	Justice	An electronic case management system was launched by the President in June 2026, live with immediate effect. It went live on launch (system). No court coverage, case volume, filing arrangement or public-access provision is published. It is one of four government systems this unit brought into service inside four weeks in mid-2026, alongside the portal relaunch, the certificate of origin and the fifth-generation launch.	ADVANCED
Sectoral management information systems	Tax	Mandatory electronic invoicing is at the final stage of procurement, on an expression of interest opened in March 2026. The acting commissioner general stated in July 2026 that the expression of interest opened in March and procurement is at final stage (procurement). No supplier, value, mandate date or taxpayer scope is published. Making invoicing mandatory is the point at which a revenue digitisation reaches every business in the country, and none of the terms on which it will do so is on record.	ADVANCED

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Sectoral management information systems	Customs	The revenue commission launched an electronic certificate of origin with the regional trade secretariat. It was launched in July 2026 for trade facilitation (certificate). No issuance volume, participating trader count or processing-time figure is published. It is the operational half of the digital-trade hub positioning recorded separately, and the only part of it that has actually been delivered.	ADVANCED
Sectoral management information systems	Land		NO EVIDENCE
Other GovTech and e-Gov	e-government services	The government portal was relaunched in June 2026, a business one-stop portal entered pilot with fifteen or more services, and a social protection delivery platform was briefed to stakeholders. The portal relaunch coincided with the fiftieth independence anniversary (portal). The business portal launched with a vendor in November 2025 covering two service journeys and fifteen or more services, with full rollout targeted for June 2026; the account is a vendor press release not verified against a ministry primary (business). The social protection platform was briefed rather than launched in August 2026, with no go-live date, beneficiary count or service list published (platform). Against a 2030 target of full digitalisation, no source states how many services exist or how many are online.	ADVANCED

Digitalisation

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Digitalisation of sub-national government	ICT infrastructure for local government		NO EVIDENCE
Digitalisation of sub-national government	Digitalisation of local government records		NO EVIDENCE
Rural digital data capture	Digitalisation of rural health clinics		NO EVIDENCE
Rural digital data capture	Digitalisation of rural primary schools		NO EVIDENCE
Rural digital data capture	Digitalisation of rural registry offices		NO EVIDENCE
Rural digital data capture	Digitalisation of rural police stations		NO EVIDENCE

Technology

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
AI	Use of AI in government administration		NO EVIDENCE
AI	Use of AI in sectoral management information systems		NO EVIDENCE
AI	Development of national / regional AI systems		NO EVIDENCE
AI	Control of AI abuse	An eight-week video-enforcement pilot repurposes the public camera estate for automated offence detection and remote ticketing, with no data-protection basis stated. The pilot was announced in July 2026 with a foreign technology partner (pilot). No data-protection basis is stated on record. That matters more here than in most units, because the country's data protection Act is fully in force and its regulator has published that it has no clear power to enforce its orders — so the safeguard exists in statute and not in practice. Repurposing an existing camera estate for automated enforcement is a change of purpose for data already collected, which is exactly the kind of processing the Act would govern.	ADVANCED
ICT Industry	National capacity in DT-related production		NO EVIDENCE
Innovation ecosystem	Technology hubs		NO EVIDENCE
Innovation ecosystem	Tech startup ecosystem		NO EVIDENCE

Capacity

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Literacy	Digital literacy (civil service)		NO EVIDENCE
Literacy	Digital literacy (general population)		NO EVIDENCE

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Training and skills	DT-related training in secondary education	Cabinet approved a National AI in Education Framework 2026-2030 covering every state school, with a mandatory teacher micro-credential and per-school champions, and two artificial-intelligence tutoring and coaching pilots are running. The 21-page policy covers every state school, artificial-intelligence literacy across the curriculum, a mandatory micro-credential for teachers, a champion in each school, and a steering committee maintaining approved and prohibited tool lists (framework , cabinet). Implementation timeline, budget, indicators and tool-approval criteria are unestablished, and an automated attempt to acquire the document failed. A student tutoring pilot covers secondary mathematics and geography (tutor) and a teacher coaching pilot covers lesson planning and classroom practice for upper primary (coach); neither pilot's start date is given. A steering committee maintaining a prohibited-tools list is a governance design few units in this frame have attempted.	ADVANCED
Training and skills	DT-related university facilities and qualifications		NO EVIDENCE
Training and skills	Graduates entering DT ecosystem		NO EVIDENCE
Research institutions	Think tanks and academic departments contributing to DT policy		NO EVIDENCE

Inclusion

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Access to services	Citizen feedback portals		NO EVIDENCE
Access to services	Citizen participation in policy	Public support for access to government information was measured in a survey round fielded in 2025 and published in August 2026. It is the only measure of public opinion on information access in this ledger (support). It arrives in the same dispatch as the media-freedom perception measure and the report of the broadcasting amendment, so a single external survey is carrying the whole of this unit's civic-participation record.	ADVANCED
Access to services	Gender equity		NO EVIDENCE
Access to services	Inclusion of persons with disabilities		NO EVIDENCE
Access to services	Inclusion of refugees and IDPs		NO EVIDENCE

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
Digital divides	Bridging of digital divides		NO EVIDENCE

Data

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
National statistics	National strategy for development of statistics		NO EVIDENCE
National statistics	Censuses and surveys		NO EVIDENCE
National statistics	Statistics from administrative data	Cabinet approved measures operationalising a multidimensional vulnerability index, naming enhanced data and institutional capacity as the instruments, and an island states resilience data programme launched nationally. The Cabinet measures name enhanced data and institutional capacity and the alignment of planning and budgeting frameworks as the instruments for operationalising the index (index). The resilience data programme was launched nationally in August 2026; the grant figure attached to it covers a nine-country programme and the national share is not published (programme , launch). Both are about building the data on which small-island vulnerability is measured, which for this country is the statistical question with the most policy weight attached to it.	ADVANCED
Open data	Use of open data		NO EVIDENCE
Use of satellite data	Agricultural use of satellite data		NO EVIDENCE
Use of satellite data	Meteorological use of satellite data	Cabinet approved accession to the United Nations outer space committee, framed as building geospatial capability for maritime security, disaster preparedness and ocean management. The approval came in July 2026 (accession). No programme, data source, budget or partner is named. For an ocean state whose exclusive economic zone dwarfs its land area, geospatial capability for maritime security and ocean management is the substantive case, and accession to a committee is the first step rather than the capability.	ADVANCED

Geopolitics

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
US / hyperscaler activities	USA / hyperscaler MoUs, engagements and commitments		NO EVIDENCE

TOPIC	INDICATOR	DEVELOPMENTS	PROGRESS
China activities	Chinese MoUs, engagements and commitments	A Chinese vendor supplies the incumbent fifth-generation core and, with the education ministry, the smart education programme across four schools. The vendor supplied the incumbent's fifth-generation launch in 2020 and the school programme in August 2025 (core , schools). A second Chinese supplier holds the stalled emergency-communications memorandum with the same incumbent, unmoved in more than seventeen months. So Chinese vendors supply the mobile core, a school technology programme and a proposed emergency-communications core, and no procurement terms, security review or exit arrangement is published for any of them.	NO CHANGE
EU activities	EU MoUs, engagements and commitments		NO EVIDENCE
Gulf/UAE activities	Gulf MoUs, engagements and commitments		NO EVIDENCE
India activities	India MoUs, engagements and commitments		NO EVIDENCE

Where the record is thin

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
National policy linking digital infrastructure to energy supply	A national policy, strategy or programme document connecting power reliability or generation to digital-infrastructure planning.	not yet probed
Dedicated rural digital-service programme	A programme document or budget line for outer-island or rural digital-service delivery, distinct from the Starlink market entry.	not yet probed
Digitisation of district-administration systems	A district-administration system specification or digitisation programme document.	not yet probed
European Union digital cooperation with Seychelles	Any EU or European Investment Bank digital financing, programme or memorandum covering Seychelles.	not yet probed
Gulf-state digital investment in Seychelles	Any Gulf-state investment, financing or memorandum covering Seychellois digital infrastructure.	not yet probed
Domestic-state digital-transformation budget line	A Seychelles government budget document or appropriation line for digital transformation.	not yet probed

ABOUT THIS DOCUMENT

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
