

## TWELVE-MONTH PROGRESS REPORT

# China activities: progress report, 2025-08-01 to 2026-08-25

Edition of 2026-08-25 · compiled from the Data Landscapers source base

29 places. Every table below is carried verbatim from that place's own progress report; nothing is written here.

**Movement values.** *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a measured position worsened. *Closed* — the programme ended. *No change* — the position at both ends is the same. *Baseline not held* — the base carries no position at the start of the period, so no movement can be stated. A value may carry a qualifying clause after a comma, as in *Advanced, slipped*.

The place reports do not share one window; the period above is the range they span.

## Algeria

|--------------------------------|--------------------------|-------------------------------------------------------------------------------------------------------------------|--------------------------|
| Huawei ICT Academy in Botswana | <b>BASELINE NOT HELD</b> | Operating with five tertiary institutions; certifications in cloud, networking, data management and cybersecurity | <i>Baseline not held</i> |

## Cape Verde

| SYSTEM OR INSTRUMENT                                        | AT 2025-08-01                                                                                                                                                                                       | AT 2026-08-23                                                                                                                                                                                                                                                               | MOVEMENT                 |
|-------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| <b>Huawei partnership with the Government of Cabo Verde</b> | The base carries no statement of a current partnership at the start of the window; the last dated engagement it holds is the 2019 Safe City Phase 2 contract, whose financing record closes in 2021 | The government describes Huawei as a strategic ICT partner; a delegation was received on 2026-07-29 by the Prime Minister and Finance Minister, the existing partnership was reviewed and a new representative introduced. No agreement, project, sum or timetable is named | <b>BASELINE NOT HELD</b> |

## Central African Republic

| SYSTEM OR INSTRUMENT                           | AT 2025-08-01 | AT 2026-08-23                                                                                   | MOVEMENT        |
|------------------------------------------------|---------------|-------------------------------------------------------------------------------------------------|-----------------|
| <b>Vendor four-axis e-government programme</b> | Did not exist | A programme announced with no contract, amount or timetable, and documented in no appropriation | <b>ADVANCED</b> |

## Chad

| SYSTEM OR INSTRUMENT                                                         | AT 2025-08-01                             | AT 2026-08-24                                                                                                                                                                                                                                                                   | MOVEMENT         |
|------------------------------------------------------------------------------|-------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
| <b>Chinese grant agreements of August 2026</b>                               | Did not exist                             | Two grant agreements totalling 300 million yuan, in tranches of 100 million and 200 million described by the minister of state as immediately mobilisable, which the Chinese side says will finance infrastructure and social development while supporting digital technologies | <b>ADVANCED</b>  |
| <b>Chinese technology and AI scholarships</b>                                | Did not exist                             | A programme of 5,000 scholarships in technology and artificial intelligence announced by the Chinese ambassador to the telecommunications and digitalisation minister                                                                                                           | <b>ADVANCED</b>  |
| <b>Fifth-generation platform request for the state operator's mobile arm</b> | Requested in 2024, with nothing on record | Unchanged as at February 2026                                                                                                                                                                                                                                                   | <b>NO CHANGE</b> |
| <b>Huawei as contractor for the state connectivity programme</b>             | Contractor since 2020                     | Unchanged; a December 2025 ministerial meeting with a regional delegation produced no agreement, figures or timeline                                                                                                                                                            | <b>NO CHANGE</b> |

## Congo

| SYSTEM OR INSTRUMENT                             | AT 2025-08-01                                                                              | AT 2026-08-23                                                                                                       | MOVEMENT                 |
|--------------------------------------------------|--------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|--------------------------|
| <b>Private telecom network at an oil field</b>   | Did not exist, and it is described as the first private network of its kind in the country | Contracted for five years, with no source recording the network built, commissioned or in service                   | <b>ADVANCED</b>          |
| <b>Joint artificial-intelligence laboratory</b>  | <b>BASELINE NOT HELD</b>                                                                   | An announced component, with no source recording it built, staffed, equipped or operating                           | <i>Baseline not held</i> |
| <b>Satellite navigation on the ocean railway</b> | <b>BASELINE NOT HELD</b>                                                                   | Discussion stage: pilots proposed and welcomed, with no contract, amount or timetable, and a return visit announced | <i>Baseline not held</i> |

## Cote d'Ivoire

| SYSTEM OR INSTRUMENT           | AT 2025-08-01                                                        | AT 2026-08-24                                                                                                                                                                                              | MOVEMENT          |
|--------------------------------|----------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| Network operations outsourcing | A Chinese vendor running the incumbent operator's network operations | Ten-year mark stated, with the partnership covering more than 12 subsidiaries and over 100 million customers on the operator's own figures                                                                 | NO CHANGE         |
| Smart agriculture platform     | <b>BASELINE NOT HELD</b>                                             | Plot-mapping, crop-monitoring and input, yield and weather platform given preliminary approval, with the minister asking for closer cooperation on national rollout; no contract, cost, pilot or timetable | Baseline not held |

## Djibouti

| SYSTEM OR INSTRUMENT                                                  | AT 2025-08-01 | AT 2026-08-21                                           | MOVEMENT |
|-----------------------------------------------------------------------|---------------|---------------------------------------------------------|----------|
| Industrial and artificial-intelligence cooperation roadmap with China | Did not exist | Presented; no agreement, instrument or figure (2026-06) | ADVANCED |

## DR Congo

| SYSTEM OR INSTRUMENT               | AT 2025-08-01 | AT 2026-08-23                                                                                                                                                                                | MOVEMENT |
|------------------------------------|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Congo River fibre-optic memorandum | Did not exist | About 2,100 km — 1,700 km along the river plus nearly 400 km terrestrial — at a stated US\$1.5bn with more than US\$400m required for the first phase; no financing close, contract or works | ADVANCED |
| Police cooperation accord          | Did not exist | Chinese technical assistance to the national police naming cybercrime alongside urban crime and mining fraud, with a standing joint working group                                            | ADVANCED |

## Egypt

| SYSTEM OR INSTRUMENT                              | AT 2025-08-01                                                                                                                                | AT 2026-08-25                                                                                                                                                                                                                                                                                                                      | MOVEMENT                             |
|---------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|
| Fibre-to-the-room service with Telecom Egypt      | Did not exist; the source presents the service as a first for Egypt                                                                          | Commercial launch of in-home fibre-to-the-room with the incumbent's consumer brand; no coverage, subscriber, tariff or contract-value figure is stated                                                                                                                                                                             | ADVANCED                             |
| Chinese-supplied smart-city surveillance in Egypt | A United States firm's safe-city package recorded as adopted in Egypt (2023-09-27); Chinese supply into Egypt was not separately established | Egypt is one of eleven countries where Chinese firms were found to supply smart-city surveillance equipment, and one of the states where Chinese banks financed such systems; Cairo's New Administrative Capital is listed with multiple named vendors. No Egyptian contract, value, camera count or command-centre detail is held | NO CHANGE, NEW MAPPING EVIDENCE ONLY |
| Huawei Cloud Egypt region                         | Operating since 2024 with data held in country                                                                                               | Same, with the company stating regulator certification, Tier 3 licensing and adherence to financial-regulator data-residency requirements, and running a Cairo fintech summit in June 2026 aimed at financial-sector migration                                                                                                     | NO CHANGE                            |

## Equatorial Guinea

| SYSTEM OR INSTRUMENT                 | AT 2025-08-01                                                                   | AT 2026-08-23                                                          | MOVEMENT  |
|--------------------------------------|---------------------------------------------------------------------------------|------------------------------------------------------------------------|-----------|
| China technology cooperation roadmap | In place, with INSTTIC training and a Djibloho cybersecurity and AI forum named | Unchanged; no delivery, disbursement or completion figure is on record | NO CHANGE |

## Ethiopia

| SYSTEM OR INSTRUMENT                      | AT 2025-08-01 | AT 2026-08-25                            | MOVEMENT |
|-------------------------------------------|---------------|------------------------------------------|----------|
| Ethio Telecom and Huawei enterprise stack | Did not exist | Scoping only; no value or term disclosed | ADVANCED |
| Inspur and Shandong data-centre track     | Did not exist | Planned; no site or value stated         | ADVANCED |

| SYSTEM OR INSTRUMENT                                              | AT 2025-08-01 | AT 2026-08-25                                                                            | MOVEMENT |
|-------------------------------------------------------------------|---------------|------------------------------------------------------------------------------------------|----------|
| World Artificial Intelligence Cooperation Organization membership | Did not exist | One of 29 founding states; constitutive text, powers and binding force all unestablished | ADVANCED |

| SYSTEM OR INSTRUMENT      | AT 2025-08-01            | AT 2026-08-25                                                                   | MOVEMENT          |
|---------------------------|--------------------------|---------------------------------------------------------------------------------|-------------------|
| Chinese AI model adoption | <b>BASELINE NOT HELD</b> | DeepSeek about 20% of chatbot use, the top of its 11-14% Africa range (2026-03) | Baseline not held |

## Gabon

| SYSTEM OR INSTRUMENT                     | AT 2025-08-01                                                                                           | AT 2026-08-24                                                                                                                                                                                                                                   | MOVEMENT |
|------------------------------------------|---------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Huawei digital transformation memorandum | An exploratory ministerial mission to the supplier's sites on 26-28 June 2025, with no agreement signed | In force on three pillars - a joint project committee, integration of Gabonese start-ups, and skills transfer - with the connected-schools programme to expand from 2026                                                                        | ADVANCED |
| Huawei skills accord under Kimba Connect | Did not exist                                                                                           | The supplier is to create smart rooms, run training in networks, cybersecurity, artificial intelligence and software development, and give access to its certifying training kits; no room count, trainee target, cost or duration is published | ADVANCED |

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
