

MONTHLY UPDATE

EU activities: monthly update, August – September 2026

Edition of 2026-09-09 · compiled by Claude Opus from the documents in the Corpus repository

9 places. Every block below is carried verbatim from that place's own monthly update, where it was written, sourced and checked; nothing is written here.

EQUATORIAL GUINEA · GAMBIA · KENYA · MALAWI · MALI · MOROCCO · NIGERIA · SENEGAL · SEYCHELLES

The place reports do not share one window; the period above is the range they span.

Equatorial Guinea

The Commission's own country page states the position plainly: [no European Union delegation and no country programme for Equatorial Guinea, with ties run from a neighbouring capital](#). European engagement remains bilateral and unresolved — the President [pressed Spain in October to return funds after a ten-year delay on a stalled digital terrestrial television project](#).

Gambia

The Commission's country page sets the frame at [EUR 193m of grants for 2021-2027, with digitalisation named as one clause under jobs and growth](#), so the digital share remains unstated. The delivered items are smaller and dated: a [EUR 493,346 platform tracking 237 national development plan indicators](#) and the [fingerprint identification system launched in May](#).

Kenya

A European data-adequacy decision was described as being in prospect, in [a development agency interview that mentions it in passing alongside cross-border identity work](#). No application, assessment stage or timetable is stated, and neither the European Commission nor the government has said anything on the record here.

Malawi

The European Union [launched a EUR 143 million annual action plan for Malawi on 21 August](#), four months after the [fourth partnership dialogue covered new gateway investments](#). Neither account states a digital or data-governance component of its own, so what the money buys in this sector is not knowable from the record - which is a different problem from the money not existing.

Mali

There is [no dedicated European Union country programme for Mali for 2025 to 2027](#): the country is funded instead from the central-Sahel complex-settings allocation, with no digital or data-governance activity named in either tranche. No separate termination instrument for the previous programme has been found.

Morocco

Morocco holds [no European Union adequacy decision: the Commission's list names sixteen jurisdictions plus one international organisation, none of them in Africa](#). Neither source establishing this is tagged to Morocco, and no Morocco-tagged governance source the base holds mentions the European Union at all.

Nigeria

The European Union [committed EUR 820m to the digital sector](#) at the Abuja workshop that validated a national innovation hub standards framework, which would set one standard across the country's hubs. The envelope is stated at a workshop rather than in an instrument, the framework is validated rather than adopted, and neither carries a disbursement schedule or a hub count.

Senegal

The delegation's own statement settles what the relationship is not. Cooperation [runs through the union's investment strategy and Team Europe financing rather than a standalone instrument](#), and the delegation states it accompanied Senegal in drawing up its data-management and artificial-intelligence strategies and will support implementation of the priority actions those strategies set out. No standalone memorandum on the digital economy, data or digital governance was located.

Seychelles

The European relationship's digital content is arriving as trade law rather than as projects. The 2026-2030 fisheries protocol was published in the Official Journal on 11 August, [establishing confidentiality and personal-data protection rules for the electronic data the parties exchange about vessels](#). It follows June's conclusion of negotiations on an enhanced Economic Partnership Agreement covering Seychelles, which [carries a binding prohibition of unjustified data-localisation requirements and a permanent ban on customs duties on electronic transmissions](#). Both bind what Seychelles may do; neither builds anything.
