

TWELVE-MONTH PROGRESS REPORT

Mauritius: progress report, 2025-08-01 to 2026-08-23

Edition of 2026-08-23 · 79 systems and instruments tracked, 9 of them not held

Compiled 2026-08-23 from the Data Landscapers source base. Sections follow the status report. Each opens with a movement ledger comparing the position at the start and end of the period, which runs to the date of issue rather than to the last month's close.

Of 79 systems and instruments on this place's ledger, 45 changed position between 2025-08-01 and 2026-08-23, 14 did not, 11 carry no stated baseline, and 9 are **Not held** at both ends.

Shape check, run before the comparison: 81 sources for this place in the window — 13 in the earlier half (2025-09 to 2026-03), 68 in the later (2026-04 to 2026-08). The earlier half of the window is thin: this is a shorter comparison wearing a longer label, and the movement below rests mostly on the later half.

Movement values. *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a measured position worsened. *Closed* — the programme ended. *No change* — the position at both ends is the same. *Baseline not held* — the base carries no position at the start of the period, so no movement can be stated. A value may carry a qualifying clause after a comma, as in *Advanced, slipped*.

Summary of the period

The comparison below rests mostly on its later half: of 52 sources for Mauritius in this window, 12 fall before March 2026 and 40 after, so this is a shorter comparison wearing a longer label.

What it does establish is a year in which policy and law moved a great deal and delivery figures did not move at all. A [national data strategy](#), a [national AI strategy](#), a [fintech strategy](#), a [critical-infrastructure cyber regime](#), [regulations on data protection officers](#) and a [119-page omnibus amending 58 Acts](#) all arrived inside it. Over the same twelve months the identity wallet published no user figure, the payment switch published no volume, and the interoperability framework remained the one written in 2002.

The one measured movement is somebody else's: a bank's [retail payment figures](#). The one position that did not move and should have is the [state's own interception conduct](#), unreformed at both ends of the window.

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
America-India Connect cable participation	Did not exist	A prime-ministerial commitment to join, behind which sits a signed non-disclosure agreement and unfinished technical, legal and financial negotiation; no consortium confirmation, landing point, capacity, cost or service date is published (2026-08)	ADVANCED
Mauritius Telecom 2026-2029 strategy	Did not exist	A reported Rs 20bn programme across connectivity, financial services, artificial intelligence and compute, and innovation; no delivery milestone has been published against it (2026-01)	ADVANCED
T4 and SEACOM 2.0 landings	Did not exist as a published plan	Named as planned landings, with T4 to replace the retiring SAFE cable; no contract, cost or date published (2026-01)	ADVANCED
International submarine cable landings	Landings on SAFE, LION, LION2 and METISS, with SAFE due to retire around 2027 (2025-07)	Unchanged in service; LION and LION2 still carry most international traffic and the stated driver for new capacity is infrastructure ageing (2026-08)	NO CHANGE
Satellite broadband authorisation regime	In force (2025-08)	Unchanged: service only through a locally licensed provider, a local point of presence with Mauritian-geolocated addresses, real-time terminal dashboards and provider-retained terminal ownership. No satellite service has been authorised under it (2026-07)	NO CHANGE

Data Storage

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Rose-Belle Tier IV data centre	Not established as the sovereign-hosting anchor (2025-08)	Certified Tier IV and hosting e-health, the government portal, the Mobile ID wallet, the penalty-points licence system and government artificial-intelligence workloads, giving the ageing Government Online Centre the disaster recovery it lacks (2025-12)	ADVANCED
Data-centre estate	Ten operating data centres across Port Louis, Reduit, Arsenal, Quatre Bornes and Rose-Belle, including a carrier-neutral Tier IV-designed site and the internet exchange point (2025-07)	Unchanged in count; no new facility has been reported since (2026-08)	NO CHANGE
Carrier-neutral green data centre and Digital Embassy Village	BASELINE NOT HELD	Announced as the digital leg of a bid to position the country as a regional digital hub; no site, capacity, cost, operator or date is stated	Baseline not held

Energy

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Saudi Arabia energy and cybersecurity memorandum	Did not exist	An approval to sign, not a signature: the stated scope puts digital transformation and energy-sector cybersecurity alongside hydrocarbons, with no signing date, term, value or committed system, standard or spend (2026-08)	ADVANCED

Cybersecurity

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Critical Information Infrastructure regime	Did not exist; cybercrime was punishable but no framework existed to designate and regulate operators of critical systems (2025-08)	In force across financial and banking, public service, information technology and broadcasting, energy and water, and transport, with non-compliance carrying up to 25 years' imprisonment and fines up to Rs 2m (2026-06)	ADVANCED
Cyber forensic laboratory	Did not exist	Funded at Rs 13m alongside an information-security management system across the administration; no site, staffing or opening date published (2026-06)	ADVANCED
Cyber Threat Intelligence Sharing Platform	Did not exist	The central bank would be empowered to establish it and to require financial institutions, and other institutions it specifies, to participate on terms it determines; the bill was introduced and not enacted, and no platform, terms or participant list exists (2026-07)	ADVANCED
Postal sector threat sharing	Did not exist	The national postal operator is being wired into the Universal Postal Union's global postal information-sharing centre, and the ICT minister urged adoption of ISO/IEC 27001 as the standard; no membership date or commitment published (2026-07)	ADVANCED
Reported cyber incidents	Not held	More than 4,000 reported cyber incidents in Mauritius since January 2026	BASELINE NOT HELD

Hosting gained an anchor rather than capacity. The estate was ten facilities at the start of the window and is ten at the end; what changed is that the [Rose-Belle facility was certified Tier IV in December 2025](#) and took on e-health, the government portal, the identity wallet and government artificial-intelligence workloads, giving the ageing central government centre a disaster-recovery pair it did not have.

Connectivity moved in commitments, not in cable. [LION and LION2 carried most international traffic at both ends of the period](#) and SAFE still retires around 2027. Against that the year produced a [prime-ministerial commitment to the America-India Connect system](#) with a non-disclosure agreement signed and terms unfinished, and [two operator-named landings](#) with no contract. Nothing new is in service.

Cybersecurity is where the year's clearest advance sits. At the start of the period the country could punish cybercrime and had no framework to designate and regulate operators of critical systems; the [designation regulations came into force on 1 June 2026](#) with penalties up to 25 years and Rs 2m, and the [July omnibus would add a compulsory central-bank threat-sharing platform](#). Both are twelve-month-old positions that did not exist a year ago.

Satellite is the row that stayed still: the [authorisation regime was in force at both ends](#) and no service has been authorised under it.

Digital public infrastructure

Data Exchange

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Statutory data sharing by the statistics office	Did not exist	The statistics office would be empowered to share more data with the finance ministry, alongside new declaration duties on public bodies; the bill was before Parliament and its enacting text is not held (2026-07)	ADVANCED
e-Government Interoperability Framework	The standing interoperability instrument, dating from 2002 (2025-08)	Unchanged; no successor framework is held, and the interoperability commitments of the 2025-2029 blueprint have produced no published instrument (2026-08)	NO CHANGE

Digital Identity and CRVS

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Digital travel authorisation and digital permits	Did not exist	Permits would become issuable in digital, card or paper form and a digital travel authorisation would be imposed on visa-exempt arrivals, applied for electronically and paid before travel; the bill was introduced and not enacted (2026-07)	ADVANCED
Mobile ID wallet	In service; no user or issuance figure published (2025-08)	In service and hosted on the Rose-Belle facility; still no user or issuance figure published (2026-08)	NO CHANGE
SIM registration by electronic identity check	In use for SIM re-registration (2025-08)	Unchanged; no completion or coverage figure is held (2026-08)	NO CHANGE

Digital Payments and Fintech

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Central bank digital onboarding system	Did not exist	A know-your-customer system for digital onboarding under construction, alongside alignment to the G20 cross-border roadmap and exploratory work on artificial-intelligence fraud detection; no delivery date published (2026-02)	ADVANCED
Mauritius-Seychelles payment corridor	Did not exist	Announced as launched by the operator; no corroborating record from the partner fintech, the Bank of Mauritius or the Central Bank of Seychelles is on file (2026-07)	ADVANCED
National Fintech Governance Committee	Did not exist	Provided for in a new Part IIIA of the Financial Services Act, minister-chaired, seating the central bank governor, the financial regulator's chief executive, two ministries, the investment board and four private-sector members, empowered to approve sector-wide standards and frameworks and expressly not a body corporate; the bill was introduced and not enacted (2026-07)	ADVANCED
Retail digital payment adoption at the largest bank	Cash 30% of consumer spend (2024)	Cash 27% of consumer spend, QR payments up 67% year on year, contactless above six in ten card transactions and about 18,000 merchants accepting (2025)	ADVANCED
SADC real-time gross settlement participation	Did not exist	Reported as considering onboarding the rupee, potentially by end-2027, after the Angolan kwanza became the system's second settlement currency; no Bank of Mauritius statement of its own is held (2026-07)	ADVANCED, ON ANOTHER PARTY'S ACCOUNT
India cross-border payment link	In force (2025-08)	Unchanged; no volume or corridor figure has been published (2026-08)	NO CHANGE

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
MauCAS instant payment switch	Mature interoperable national rail with a QR standard (2024)	Unchanged in structure; no national transaction volume has been published (2026-08)	NO CHANGE
my.t money wallet	BASELINE NOT HELD	Over 130,000 active users, being scaled into a cross-border product under the operator's financial corridor; no transaction figure published (2026-01)	<i>Baseline not held</i>

Registries (population, land, address, etc.)

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Civil registration base	Complete civil-registration base underpinning the identity system (2024)	Unchanged; no later performance report is held (2026-08)	NO CHANGE

Sectoral management information systems (HMIS, EMIS, etc.)

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
E-Social Security digitisation	Did not exist; the welfare system had run on paper for thirteen years	10.5m social-benefit documents being digitised into a future platform, with full integration stated at about eighteen months; the system carries about 800,000 payments a month to at least 350,000 beneficiaries (2026-05)	ADVANCED
Fisheries Information System	Did not exist	A proposal for a national fisheries information system endorsed at a validation workshop convened by the fisheries ministry, for submission under a multilateral fisheries fund's project-implementation grant window	ADVANCED
eHealth strategy	The standing eHealth instrument, dating from 2015 (2025-08)	Unchanged; e-health workloads are hosted on the Rose-Belle facility but no successor strategy or delivery report is held (2026-08)	NO CHANGE

Other GovTech and e-Gov

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Airport parking management system	A 2013 installation	A Rs 50 million system with more than 20 licence-plate-recognition cameras, five self-service payment stations and mobile-wallet payment, replacing the 2013 installation and raising exit throughput	ADVANCED
e-Gates, e-Visa and e-judiciary	Did not exist as funded commitments	Funded in the budget alongside a healthcare innovation and artificial-intelligence unit; no procurement, vendor or delivery date published (2026-06)	ADVANCED
National electronic licensing system for clinical trials	Did not exist	Concurrent submission, review and processing of trial applications through a statutory electronic system, with the council and ethics committee empowered to meet virtually and an expedited pathway; the bill was introduced and not enacted (2026-07)	ADVANCED
Online motor vehicle licence and road tax system	Did not exist	Live for taxi operators, who renew the licence and pay road tax online instead of at post offices and land transport authority counters, and which the ministry states will also build a database of operators; launched alongside a website for the operators' welfare fund, whose membership is 6,567 of 7,802 operators, with about 3,000 operators already on an electronic platform	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Legal Metrology Information System	BASELINE NOT HELD	An online platform for bookings, payments and certificates is being built to carry commercial-weighting oversight, which verified 12,412 measuring instruments across 4,971 businesses and inspected 4,974 shops in 2025-2026	<i>Baseline not held</i>

The foundational layers did not move, and the absence of movement is an absence of published figures rather than of activity. The [identity wallet](#) carried no user figure at the start of the period and carries none at the end; the [payment switch](#) published no national volume at either end; the [interoperability framework](#) is still the 2002 one and the [health strategy still the 2015 one](#).

What did move is governance around them. The fintech committee went from not existing to [statutory form from 1 September 2026](#) in a single month, on the back of a [strategy published in June](#). A digital travel authorisation, a statutory electronic licensing channel for clinical trials and [wider statutory data-sharing by the statistics office](#) all appeared inside the window and none is enacted.

The welfare system began its digitisation after thirteen years: [10.5m documents are being scanned](#) into a platform serving about 800,000 payments a month, with integration stated at about eighteen months from May 2026.

The only measured movement in this section belongs to a commercial bank: [cash fell from 30% to 27% of consumer spend and QR payments rose 67%](#) across 2025. Cross-border, the period added two announcements and no established corridor — a [Seychelles link announced without corroboration](#), and [regional settlement participation reported by another country's central bank](#).

Governance and regulation

Legislation and regulation

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Data Protection Officer Regulations 2026	Did not exist	Promulgated, formalising designation, qualifications, independence and reporting duties for data protection officers across public and private sectors, with a six-month compliance window (2026-06)	ADVANCED
Economic and Financial Measures (Miscellaneous Provisions) Bill	Did not exist	119 pages amending 58 Acts and repealing one, with staged commencement from 1 September 2026 and several provisions deemed retrospective, carrying the fintech committee, the AI City Scheme, the central bank threat-sharing platform, the virtual-asset solicitation rule and the digital travel authorisation; introduced, not enacted (2026-07)	ADVANCED
Electronic Transactions Act amendments	Did not exist as a stated commitment	Referred to as modernising the digital-commerce framework and consumer protection; no text, timetable or introduction date published (2026-07)	ADVANCED
Ministerial notice on online-content sanctions	Did not exist	A ministry communiqué restating the criminal exposure of online speech and of page administrators who fail to moderate on notice	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Ministerial warning on prosecuting online speech	None published	A public communiqué from the ICT ministry warning that online speech can be prosecuted under the Cybersecurity and Cybercrime Act 2021, naming the fake-profile, cyberbullying and undesirable-content offences and defining undesirable content to include material that is deceptive or inaccurate	ADVANCED
Social-media identity verification mechanism	Did not exist	Consultations opened toward a verification mechanism against disinformation, impersonation, defamatory content, scams and child sexual abuse material, citing 2,300 online-harm cases from January to June 2026 and frauds up to Rs 500,000; no draft instrument published (2026-06)	ADVANCED
Virtual-asset solicitation rule	Did not exist	Unlicensed solicitation of investors in Mauritius would be prohibited by any medium, defined to reach targeted or algorithmic advertising, platforms, applications, social media, influencers, affiliates, referral codes, seminars and webinars, with any publicly accessible communication presumed to target Mauritius; introduced, not enacted (2026-07)	ADVANCED

Strategies, plans and policies

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
National Data Governance Strategy	Did not exist	Committed to alongside forthcoming amendments to the Data Protection Act aimed at cybersecurity, privacy and online safety for children; no text, timetable or introduction date is published (2026-07)	ADVANCED
National Data Strategy 2025-2029	Did not exist as a published strategy	Launched around responsible data governance, cybercrime prevention and online protection of minors, with a memorandum signed between the police, the data-protection office and the national computer emergency team (2026-01)	ADVANCED
National Fintech Strategy 2026-2030	Did not exist	Six pillars carrying a governance committee, open banking, an artificial-intelligence-in-finance push and a business facilitation bill, implemented with the central bank (2026-06)	ADVANCED
Digital Transformation Blueprint 2025-2029	Launched in May 2025, with new digital regulations announced and an inter-ministerial committee established (2025-08)	Unchanged; no delivery report, milestone or revision has been published against it (2026-08)	NO CHANGE

Regional collaboration

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
AFRINIC board and receivership	Under an appeal-court order of 15 October 2024 directing the Official Receiver to complete the board election within two months, in substitution for the six months ordered in September 2023; no reconstituted board at the window's start	The continental internet registry, seated in Mauritius, named a person to all eight board seats on 12 September 2025 while withholding every candidate vote tally its own election guidelines promised; the appeal court then set aside its 28 September 2023 appeal for lack of corporate authority without ruling on the official receiver's permission or on statutory leave, leaving the authority chain from election through appointment to quorum unresolved and the receiver undischarged; the appeal court had directed that the reconstitution be completed within two months of its judgment of 15 October 2024, describing it as a matter of utmost urgency, so the September 2025 appointments came some nine months past that deadline	ADVANCED, AUTHORITY CHAIN UNRESOLVED

Standards

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Model-as-a-service certification work	Did not exist	Work to define controls and conformance criteria for a certification framework that does not yet exist, with the state operator a founding contributor and co-chair (2026-07)	ADVANCED

Data protection

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Data Protection Office enforcement	Independent office enforcing the 2017 Act, with no published enforcement volume (2025-08)	About 3,000 enforcement actions a year, 99% resolved amicably, chief data officers mandated, and administrative fines being added by amendment (2026-05)	ADVANCED
European Union adequacy assessment	Not stated as a pursuit (2025-08)	Being pursued with full alignment of the law to the European regulation; no application date, assessment stage or decision is published (2026-05)	ADVANCED
Communications interception	Described in Parliament as large-scale interception running since 2017 without judicial oversight, wired into major operators and accessed by counter-terrorism and national security units; no reform instrument on record (2025-08)	Unchanged: no reform instrument, inquiry outcome or judicial-authorisation requirement has been published, and leaked recordings continue to test the framework (2026-07)	NO CHANGE
Data Protection Act 2017	In force, GDPR-aligned and enforced by an independent office (2025-08)	Unchanged: amendments were committed in July 2026 with no text, timetable or introduction date, and the Act is not among the 58 Acts the omnibus amends, so the year's expanded inter-agency data sharing arrives with no matching safeguards amendment (2026-07)	NO CHANGE

Public debate and participation in policymaking

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Mauritius Internet Governance Forum	Not held	Convening as a national multi-stakeholder forum founded by the Halley Movement; at its 2026 meeting the Blockchain for Good Alliance and the exchange Bybit met the Vice President and the ICT minister to discuss artificial intelligence, cybersecurity and digital-trust frameworks for small island developing states	BASELINE NOT HELD
Public argument on what digital investment is for	BASELINE NOT HELD	The clearest domestic objection on file to the artificial-intelligence-first framing: that contract enforcement rather than technology is the binding constraint, with digitalised case management prescribed alongside a small-claims process and a stronger commercial division rather than instead of them (2026-08)	<i>Baseline not held</i>

Open data

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Freedom of Information Bill	Did not exist	Announced as in preparation; no draft, text or timetable has been published in the six months since (2026-08)	ADVANCED

This is the section that moved most, and the movement is asymmetric. The data-protection regime advanced on three fronts inside the window: [enforcement volume became public](#) at about 3,000 actions a year, [European adequacy became a stated pursuit](#), and [regulations on data protection officers were promulgated](#) for entry into force in January 2027. A [national data strategy](#) that did not exist a year ago was launched in January 2026.

The Act those instruments hang off did not move. The [2017 statute is in force at both ends](#), amendments to it were committed in July with no text and no date, and it is not among the 58 Acts the year's omnibus amends — so the period's expanded inter-agency data sharing arrives against an unchanged safeguards Act.

Neither did the state's own conduct. The [interception apparatus described in Parliament as running since 2017 without judicial oversight](#) is at the same position at both ends of the window: no reform instrument, no inquiry outcome, no judicial-authorisation requirement, and [leaked recordings still testing the framework](#).

Two commitments were made and not delivered inside the window: a [Freedom of Information Bill announced in January](#) and [Electronic Transactions Act amendments referred to in July](#). And one debate opened that had no earlier position at all: [consultations on verifying social-media identity](#), on 2,300 online-harm cases in the first half of 2026.

Artificial intelligence and the technology sector

AI

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
AI City Scheme	Did not exist	A certified specialised technological and innovation hub promoting artificial intelligence, digital sectors, advanced computing infrastructure and advanced manufacturing, whose certificate carries fiscal incentives, duty exemptions, expedited permits and prescribed property acquisition, with a new AI Founder occupation permit at US\$1m invested; introduced, not enacted (2026-07)	ADVANCED
Mauritius AI Registry	Did not exist	Live as a discovery and trust directory of Mauritius-relevant models, agents and skills that does not host or sell what it lists, each entry carrying provider identity, local-context relevance and any institutional validation; the stack is open-sourced and is being offered to other operators (2026-07)	ADVANCED
National AI Strategy and FAIR guidelines	Did not exist	Six pillars with guidelines that are vendor-neutral and border-agnostic, governing by impact rather than geography, carrying mandatory bias audits in financial services and gaming and locally-based-representative duties on foreign providers, non-binding but on a stated legal trajectory; a first AI Innovation Lab was inaugurated at Ebene Cybercity in August 2026 with a memorandum signed at the event, the strategy running 2025-2029 and the AI Unit established in December 2025	ADVANCED
Sovereign AI platform and education pilot	Did not exist	In service as the operator's enterprise platform, with the school pilot deliberately narrowed after teacher and parent resistance from a student tutor to a teacher assistant doing homework correction and exam generation, targeting one per secondary teacher by 2027 (2026-07). The operator's chief executive set out a cloud partnership with a hyperscaler, sovereign data centres and a plan to train 50,000 people in artificial-intelligence skills, and put the education platform's exam-marking tools at 99% accuracy across the tools introduced	ADVANCED
Mauritian Creole voice model	BASELINE NOT HELD	Described by the incumbent operator as the first voice model built for Mauritian Creole	Baseline not held

ICT Industry

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
ICT share of gross domestic product	BASELINE NOT HELD	About 5.4% of gross domestic product, against a stated ambition of 10-12% (2026-07)	Baseline not held

US / hyperscaler activities

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Amazon Web Services memorandum	Did not exist	Signed with soft scope covering skills, institutional enablement and a scale pathway for local innovators, with no disclosed value or binding deliverable; the training is to run initially in premises rented for the purpose, with permanent infrastructure only a possibility (2026-08)	ADVANCED

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Hyperscaler infrastructure presence	BASELINE NOT HELD	Google already operates a ground station at Baie-du-Jacotet serviced by the state operator, so the cable commitment would deepen a relationship rather than open one; what is contracted with the hyperscalers so far is skills and confidentiality, not capacity (2026-08)	<i>Baseline not held</i>

A year ago Mauritius had no artificial-intelligence position on the record. It now has a [strategy with guidelines that govern by impact rather than geography](#), a [legal frame in the form of an incentive scheme and an immigration category](#), a [live model registry](#), an [enterprise platform whose school pilot has already been narrowed](#), and a [certification work-stream it co-chairs](#). That is a complete policy stack built in twelve months.

What it does not have, at either end of the period, is a measure. The compute the stack assumes is an operator claim, and the [study that would establish how many Mauritian firms use artificial intelligence was commissioned in July 2026](#) — by a chamber of commerce, after the strategy and after the budget. A [domestic critique published in March](#) argued the sequencing was the wrong way round.

The hyperscaler relationship deepened without becoming capacity: an [Amazon memorandum with no disclosed value](#), and the establishment that [Google's ground station at Baie-du-Jacotet already existed](#).

Inclusion and capacity

Digital divides

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Rodrigues in the national digital strategy	Did not exist as a national commitment	A cybersecurity working framework with a Mauritius-based team and a dedicated representative, a youth awareness project, and integration of the national sign-on and super-app through post office agents, building on the regional assembly's own roadmap of 6 May 2026 (2026-05)	ADVANCED

Training and skills

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
National AI training programme	Did not exist	A target of 50,000 people trained in one year — 25,000 professionals, 12,000 ninth-grade pupils, 8,000 teachers and 5,000 civil servants — on a Rs 25m platform; no completion or enrolment figure has been published (2026-06)	ADVANCED
Schools cybersecurity and AI awareness programme	Not held	Running as a national awareness programme for secondary students, run by the incumbent operator with the education ministry, opening on 13 August 2026 with about 500 Grade 10 to Grade 12 students across all four education zones and free ten-hour AWS training on offer	BASELINE NOT HELD

Skills went from no stated commitment to the most specific one on this record: the [2026-2027 budget](#) sets a 50,000-trainee target for artificial intelligence skills in a single year. Nothing has yet been published against that number, and no measure exists of the skills base the target starts from.

Sub-national inclusion acquired its first named commitment: a [ministerial mission to Rodrigues in May 2026](#) set a cybersecurity working framework, a youth project and integration of the national sign-on through post office agents.

Finance

New investments

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
China Eximbank preferential buyer's credit	In force (2025-08)	Unchanged; no repayment, drawdown or completion statement has been published (2026-08)	NO CHANGE
Cross-border payments gateway business	BASELINE NOT HELD	One gateway reports its Mauritian entity grew transaction volume by over 300% year on year and merchants by 42%, serving over 150 companies, with exit from the financial action task force grey list credited for the confidence (2025)	Baseline not held

Domestic budget appropriations and expenditure

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-23	MOVEMENT
Digital and AI measures in the 2026-2027 budget	Did not exist	Artificial intelligence named 35 times, carrying a 50,000-trainee target, a Rs 25m national learning platform, an investment tax credit of 15% a year over three years, a special economic zone of 83 arpents with preferential data-centre power and thirty-year renewable leases, e-gates, e-visa, e-judiciary and a Rs 13m cyber forensic laboratory (2026-06)	ADVANCED

The [2026-2027 budget](#) carries the year's financial commitment alongside the training target: a Rs 25m national AI learning platform, an investment tax credit and a special economic zone with preferential data-centre power.

External financing did not move: the largest digital-sector commitment on record is still the [2018 China Eximbank buyer's credit](#), with no repayment statement published, and the country's growth in this area continues to run as a [conduit for other people's payments](#) rather than as a recipient of investment itself.

Where the record is thin

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Domestic technical capacity to operate the national digital estate	A staffing plan, skills audit or operations report covering who runs the ten-facility data-centre estate, the payment switch and the identity wallet.	not yet probed
Use of satellite data	An earth-observation, maritime-domain or land-monitoring programme using satellite imagery, which a state with a five-million-square-kilometre exclusive economic zone would be expected to run.	not yet probed
Rural digital data capture	An agricultural, fisheries or land data-collection programme operating in the field.	not yet probed
Digitalisation of local government	A district or municipal digital plan or service platform. The Rodrigues Regional Assembly's roadmap is the only sub-national instrument held and it is a territory, not a local authority.	not yet probed
Budget 2026-2027 tax and revenue measures as enacted	The 128-page Finance Bill 2026. Three fetch paths into the National Assembly's bills library returned an HTML shell rather than the document; the library is script-rendered and exposes no static file path, so this needs a browser rather than an automated fetch.	not yet probed

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
National sovereign compute capacity	Vendor or independent confirmation of installed accelerators. The state operator's chief executive stated in July 2026 that its data centre already hosts NVIDIA H200 units with B300 due by end-2026; no corroboration is on file, and this is precisely the compute-timing bet a domestic critique disputes.	2026-08-09
Enterprise artificial-intelligence adoption	The results of the adoption, readiness and governance study launched on 27 July 2026 by the chamber of commerce, the outsourcing association and a third partner, commissioned because no picture exists of adoption levels, affected sectors or available skills.	not yet probed
Chinese digital cooperation with Mauritius	A bilateral agreement, financing or vendor arrangement in the digital sector. The only Chinese-linked item held is a 2018 buyer's credit.	not yet probed
Digital literacy of the population	A skills survey, a literacy programme evaluation or a national measure of digital competence. The 50,000-trainee target is an input commitment, not a measure of the base it starts from.	not yet probed

These carry no reliable position at either end of the period. Three of them sit directly under what the year built: the compute the artificial-intelligence stack assumes, the enterprise adoption the strategy addresses, and the enacted text of the budget that funds both.

The rest are areas the base has never held for Mauritius — technical capacity, satellite data, rural capture, local government and digital literacy — and a year of unusually dense policy activity did not close any of them.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
