

STATUS REPORT

Djibouti: status report

Edition of 2026-08-19 · 68 systems and instruments tracked, 10 of them not held

Compiled 2026-08-19 from the Data Landscapers source base, from [outputs/reports/DJI/ledger.csv](#) (68 systems and instruments, 10 of them **Not held**). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

Djibouti's digital position rests on transit. Twelve submarine cable systems land there, [six connected to Italy](#), and what is built on that base is the part of the record with delivery behind it. Identity is the other: [Mobile ID launched on 9 February 2026](#) over a [biometric card issued nationwide since 2025](#).

The legal layer was built in a single push and is largely untested. The [Digital Code was adopted on 30 June 2025](#) with a [156-article data-protection regime](#), and the [Startup Act signed on 1 December 2025](#). No implementing decree under either is held, the data-protection commission has no record of being constituted, and the [police wear body cameras as standard issue](#) with no published instrument governing the footage.

The largest commitment on the ledger is not built: a [memorandum of 19 July 2026](#) for a US\$1.35bn AI compute centre and special economic zone, with nothing disbursed and no site on file.

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
DARE1 southern extension (Mombasa-Mtunzini)	IN DEVELOPMENT ↗	Extension announced, ready for service 2028
Djibouti Digital Foundation and EARDIP domestic fibre rollout	IMPLEMENTED ↗	Damerjog school, sub-prefecture and clinic connected, October 2025
Djibouti Telecom statutory monopoly (loi 13/1998, loi 80/2004)	IMPLEMENTED ↗	Monopoly restated in the operator's own profile

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Horizon Fiber terrestrial corridor (Djibouti-Addis-Port Sudan)	IN DEVELOPMENT ↗	Binding agreement signed in Djibouti, 4 February 2026
Internet exchange points (DjIX and AMS-IX Djibouti)	IMPLEMENTED ↗	AMS-IX Djibouti launched alongside the existing DjIX
Italian cable inspection and protection project (Med-Or, Piano Mattei)	IN DEVELOPMENT ↗	Project at the landing station reported during the Italian minister's mission, 3 August 2026
Satellite broadband market authorisation	NOT HELD	The incumbent's chief executive states there is no clear regulatory framework for new entrants; no licensing decision on file

Data Storage

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
LinkWise AI compute centre and AI Special Economic Zone	PLANNED ↗	Memorandum of understanding signed 19 July 2026, valid one year
PAIX and Fonds Souverain JIB1 data centre	PLANNED ↗	Joint venture announced; nothing on file since
Wingu TO7 data centre and cable landing station	IMPLEMENTED ↗	Inaugurated 25 November 2024

Energy

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Renewable generation for the AI compute zone	PLANNED ↗	Provided for in the LinkWise memorandum: solar, wind and storage

Cybersecurity

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Autorite Nationale de Cybersecurite (ANC)	IMPLEMENTED ↗	Loi n 195/AN/25 carried in the Journal officiel, 15 December 2025
DJ-CERT national incident response team	IMPLEMENTED ↗	Took part in the IGAD regional exercise, 26-30 June 2026
National Cybersecurity Strategy 2024-2030	IMPLEMENTED ↗	Five-pillar strategy published

International capacity is the country's strongest position and its most concentrated dependency: Med-Or, an Italian foundation, puts [12 cable systems landing there, six connected to Italy, carrying about 18% of international submarine cable data](#). Two extensions are contracted rather than in service: the [Horizon Fiber corridor to Addis Ababa and Port Sudan](#), about 2,800 km on a binding agreement of 4 February 2026, and the [southern extension of DARE1, for service in 2028](#).

The market behind the cables has one licensed operator: [Djibouti Telecom, a statutory monopoly under loi 13/1998 and loi 80/2004](#). No authorisation for satellite broadband entrants is held: its chief executive [stated in April 2025 that there is no clear framework for such players](#), and no licensing decision has followed.

Domestic reach runs through the World Bank-financed Djibouti Digital Foundation and EARDIP, which reported fibre at [Ali-Sabieh regional hospital in June 2025](#) and [Damerjog in October 2025](#). No national coverage figure is published.

Hosting is thin. [Wingu's TO7 facility opened on 25 November 2024](#); the [PAIX and Fonds Souverain joint venture of May 2024](#) has no groundbreaking or revised date on file, and no operator discloses rack count, megawatts or utilisation for any facility.

Cybersecurity has institutions ahead of evidence. The [Autorité Nationale de Cybersécurité was created by Loi n° 195/AN/25 of 15 December 2025](#), replacing a pre-statutory label, and its DJ-CERT team [took part in the IGAD exercise of June 2026](#), where the state daily reports it placed first in both scenarios; the organiser published no result.

Digital public infrastructure

Data Exchange

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Djibouti Port Community Systems (DPCS)	IMPLEMENTED ↗	Made the mandatory national single-submission platform by Decret n 216/2023/PR/MDENI
Prices database and central-administration data-exchange platform	PLANNED ↗	Ordered by article 38 of the 2026 budget law
Real-time identity verification for banks and social protection	PLANNED ↗	Named as in preparation by the Direction generale de la Population et de la Famille

Digital Identity and CRVS

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Biometric national identity card and Registre national des personnes physiques	IMPLEMENTED ↗	Issued nationwide since 2025, with mobile enrolment kits
Mobile ID national digital identity platform	IMPLEMENTED ↗	Launched at the National Digital Identity Forum, 9 February 2026

Digital Payments and Fintech

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
D-Money mobile wallet	IMPLEMENTED ↗	In service since June 2020
D-Money online payment gateway	IMPLEMENTED ↗	Launched under the Prime Minister's patronage, 10 December 2023
Smart Wallet national digital wallet (Visa, Tech5)	PLANNED ↗	Memorandum of understanding signed 16 September 2025

Registries (population, land, address, etc.)

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Civil-registry archive digitisation	IN DEVELOPMENT ↗	Digitisation running alongside enrolment; staffing and archive space named as the constraints
Fichier Unique of state personnel	IMPLEMENTED, UNDER STATUTORY UPDATE ↗	Update ordered by article 32 of the 2026 budget law
Online company creation platform (ANPI)	IMPLEMENTED ↗	Launched by the Prime Minister, 26 January 2026

Sectoral management information systems (HMIS, EMIS, etc.)

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Inter-hospital medical record sharing over the DFN fibre	IMPLEMENTED ↗	Ali-Sabieh regional hospital connected

Other GovTech and e-Gov

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
ASYCUDAWorld customs clearance (e-Guichet)	IMPLEMENTED, ELECTRONIC CLEARANCE COMPULSORY ↗	Constituted as the e-Guichet by article 121-ter, loi de finances 2026, promulgated 2025-12-31
G2B integrated digital platform	IN DEVELOPMENT ↗	Design phase launched 15 December 2025
Government archive dematerialisation programme (SGG)	IMPLEMENTED ↗	Letter of accord with UNDP signed 2 August 2026

National statistics

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Third national statistics development strategy (SNDS-3, 2025-2029)	IN DEVELOPMENT ↗	Validated at an INSTAD workshop, 29 April 2025

Use of satellite data

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Earth-observation or geospatial data programme	NOT HELD	One AI weather system on file and no programme document; no national geospatial mandate held

The [biometric identity card has been issued nationwide since 2025](#), enrolling fingerprints, iris, photograph and electronic signature against a national identification number, with mobile kits for the elderly, hospitalised and remote. [Mobile ID launched on 9 February 2026](#) on top of it, biometric data held only at the Interior Ministry. Interoperability with driving-licence and health records, and [verification for banks and social protection](#), are in preparation with no date.

D-Money has run [since June 2020](#), with an online gateway from [10 December 2023](#); the Smart Wallet with Visa and Tech5 remains [a memorandum of 16 September 2025](#) with nothing in service, its 60% cash-reduction target the parties' own.

In trade and company formation, [Djibouti Port Community Systems is the mandatory national platform for import, export and transit data](#) and customs runs on ASYCUDAWorld, which the 2026 budget law [constituted as the compulsory e-Guichet single window](#), interconnected with the treasury, alongside orders for a [central-administration data-exchange platform and a prices database](#) — none of them dated or funded in the text. A [platform for online company creation opened in January 2026](#); the broader [G2B platform is still in design](#).

The state's own records are digitised on a state-funded programme running since 2023, which [reports over 200,000 secured digital files for the Presidency and a UNDP accord of 2 August 2026](#). Delivery is asserted by the parties, with no retention schedule or access rule stated. [SNDS-3, the statistics strategy for 2025–2029, was validated on 29 April 2025](#) with no adoption instrument held.

Governance and regulation

Legislation and regulation

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Digital Code (eight volumes, about 800 articles)	IMPLEMENTED ↗	Adopted by the National Assembly, 30 June 2025
Startup Act (Loi n 179/AN/25)	IMPLEMENTED ↗	Signed 1 December 2025; Journal officiel n 23 of 15 December 2025
Startup Act implementing decrees	NOT HELD	None held as at 2026-07-20, so no label award, sandbox admission or visa issue can be stated

Strategies, plans and policies

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
PND-ADEEG 2025-2030 (third National Development Plan)	IMPLEMENTED ↗	Adopted by decree in the Conseil des ministres, 30 June 2026
Vision Djibouti 2035	IMPLEMENTED ↗	Standing national frame, restated at WSIS 2026 as the basis of the digital hub ambition

Regional collaboration

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
African Union Malabo Convention	IMPLEMENTED ↗	Ratified November 2023
United Nations Convention against Cybercrime	PLANNED, SIGNED NOT RATIFIED ↗	Signed in Hanoi, late October 2025, as one of 71 signatories

Data protection

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Data-protection regime within the Digital Code (156 articles)	IMPLEMENTED ↗	Enacted within the Digital Code
Police body-worn cameras	IMPLEMENTED ↗	Described as standard issue for the Police Nationale and road-safety officers
Prior authorisation for national-identifier and biometric processing	IMPLEMENTED ↗	Tiered prior-authorisation regime enacted in the Digital Code
Commission nationale de protection des donnees (CNDP)	NOT HELD	Established by the Digital Code; no record of its constitution, membership, register or decisions
Instrument governing police body-camera footage	NOT HELD	No retention period, access rule, data controller or authorising instrument published as at 2026-08-04

Public debate and participation in policymaking

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Public debate and civil-society record on digital governance	NOT HELD	No civil-society, parliamentary or press-freedom source on digital governance is held for this place

Open data

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Djibouti Open Data platform	IMPLEMENTED ↗	Hosts the national summary data page; access arranged through the African Development Bank
IMF e-GDDS National Summary Data Page	IMPLEMENTED ↗	Launched at the Banque Centrale de Djibouti, 12 June 2025
Journal officiel published online	IMPLEMENTED ↗	126 years of the legal record digitised and published online

The [Digital Code of 30 June 2025](#) folds data protection, cybersecurity and electronic commerce into eight volumes and about 800 articles. Its [156-article privacy regime provides for 72-hour breach notification, mandatory data-protection officers, a public register and tiered prior authorisation over biometric processing](#).

None of that is evidenced in operation. The Commission nationale de protection des données it establishes has no record on file of its constitution, membership, register or decisions, and no implementing decree under the Code is held. The prior-authorisation tier has one concrete test available: the [Police Nationale and road-safety officers carry body-worn cameras routinely in central Djibouti](#), recording triggered manually or automatically by intervention type or detected threat level, and no retention period, access rule, data controller or authorising instrument is published as at 4 August 2026. That account is the state daily's.

The other statutes are recent and equally undecreed. The [Startup Act was signed on 1 December 2025](#), with every operative mechanism — the label, the portal, the fund of funds, the sandbox, the visa — deferred to decrees that are not held; the [PND-ADEEG for 2025–2030 was adopted by decree on 30 June 2026](#) under [Vision Djibouti 2035](#). Djibouti [signed the United Nations Convention against Cybercrime in October 2025](#) and has filed no ratification instrument since.

Open data is strong on legal publication and thin elsewhere: no dataset inventory or update policy is held for either the [Journal officiel](#) or the [IMF e-GDDS page](#). No civil-society, parliamentary or press-freedom account of digital governance in Djibouti is held at all, which is why every statement above rests on official and trade sources.

Artificial intelligence and the technology sector

AI

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Cross-border data corridor between Shanghai and Djibouti	PLANNED ↗	Named by the signing minister as a success indicator of the LinkWise memorandum
First national artificial-intelligence strategy	IN DEVELOPMENT ↗	Official launch set for the first national AI forum, 2-3 September 2026
MAZU-Djibouti AI weather early-warning system	IMPLEMENTED ↗	Version 2.0 handed over on the sidelines of the World AI Conference, Shanghai

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Instrument governing artificial-intelligence systems in public use	NOT HELD	No AI law, decree or procurement rule is held; the strategy in preparation is not an instrument

ICT Industry

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Federation nationale des entreprises du numerique	IN DEVELOPMENT ↗	Creation reported; a founding member of the African federation under the Marrakech Declaration

Innovation ecosystem

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
LIMO innovation-ecosystem platform	IMPLEMENTED ↗	Launched by the Minister Delegate for the Digital Economy and Innovation
Regulatory sandbox under the Haut Conseil Supérieur de l'Economie Numerique	PLANNED ↗	Provided for in the Startup Act, articles 31-32
Startup visa	PLANNED ↗	Provided for in the Startup Act, article 15: a three-year renewable residence card with an automatic work permit

China activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Industrial and artificial-intelligence cooperation roadmap with China	PLANNED ↗	Presented to Chinese counterparts and China Exim Bank in Beijing, June 2026

India activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Indian digital cooperation with Djibouti	NOT HELD	No India-Djibouti digital agreement, line of credit or programme document is held

Gulf/UAE activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Gulf-state digital investment or cooperation instrument	NOT HELD	Ties with Qatar strengthened in November 2024 are mentioned in passing in one source; no instrument, figure or programme is held

Djibouti has an applied AI system in service before it has a strategy or an instrument for it. The [MAZU weather early-warning system](#), supplied by the [China Meteorological Administration](#), was upgraded to version 2.0 in July 2026, sharpening forecast resolution to 3 km from 9 km. A [first national AI strategy has been in preparation since 27 January 2026](#) with UNESCO and UN ESCWA; no strategy document is held, and no AI law, decree or procurement rule is on file.

The compute the strategy would govern is being contracted in parallel. The signing minister [named a cross-border data corridor between Shanghai and Djibouti as a success indicator of the LinkWise memorandum, alongside full Djiboutian jurisdiction over data generated on the territory](#); the corridor, the capital, the chips and the operating company are all foreign, and the memorandum text is not held.

The domestic sector is small and newly organised: the ministry [launched the LIMO platform in July 2026](#) with no user figures published, and a [federation of digital enterprises was reported in creation in December 2025](#) without a published constitution or membership. The Startup Act's [sandbox and startup visa](#) exist in the statute and nowhere else. No India–Djibouti digital agreement and no Gulf-state investment in digital infrastructure is held.

Inclusion and capacity

Training and skills

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Civil-service digital skills programme	IMPLEMENTED ↗	Programme launched with Djibouti Cloud Operator, Oracle University and INAP
E-SKILLS Digital Houses	IN DEVELOPMENT ↗	Initiative announced across five inland regions
Ecole 42 coding school	IN DEVELOPMENT ↗	Project launched with the European Union, Expertise France and Association 42

Research institutions

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Public research programme in digital or data science	NOT HELD	No research programme document, university centre mandate or published research output is held

Connectivity reaches most of the population. DataReportal's Digital 2026 report puts [internet users at 772,000, a penetration of 65.0%, against 616,000 active mobile connections of which 92.4% are broadband, on data available in October 2025](#). That is a reference study; no state figure for coverage or affordability is held.

The E-SKILLS Digital Houses initiative covers five inland regions, 3,000 to be trained by 2029 at a stated EUR 7m, and an [École 42 coding school was launched in April 2026](#); neither has a published intake, date or site. The programme for officials [publishes no completion figures](#).

Finance

New investments

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Chinese grant for the Urban Security Monitoring System	IMPLEMENTED ↗	US\$23,046,763 committed
Djibouti Economic and Financial Governance Project (World Bank)	IMPLEMENTED ↗	US\$20,000,000 committed

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Higher-education digitalisation (Agence Française de Développement)	IMPLEMENTED ↗	US\$11,422,000 committed
Islamic Development Bank submarine cable financing	IMPLEMENTED ↗	US\$38,830,000 committed to the DARE Regional Submarine Cable Project
Startup fund of funds	PLANNED ↗	Provided for in the Startup Act, articles 25-28; the management company to be tendered

Domestic budget appropriations and expenditure

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Domestic budget appropriation for digital transformation	IMPLEMENTED ↗	ANSIE 2026 budget arrete approved by the Council of Ministers, 30 December 2025; arrete itself not published

Five commitments to Djibouti's cable, financial-governance and higher-education systems are held from external financiers, each committed rather than disbursed and none with an implementation report on file: [US\\$38,830,000 from the Islamic Development Bank for the DARE Regional Submarine Cable Project, 2019](#), [US\\$20,000,000 from the World Bank for the Djibouti Economic and Financial Governance Project, 2025](#), and [US\\$11,422,000 from the Agence Française de Développement for higher-education digitalisation, 2020](#). A Chinese grant for the Urban Security Monitoring System is [recorded at US\\$23,046,763](#), against a record whose own title states US\$20m; the two have not been reconciled. The Startup Act's [fund of funds is provided for in articles 25-28, the management company still to be tendered, no capital committed](#).

No domestic figure had been on file against the 2026 loi de finances, which names no ICT ministry line, ANSIE allocation or e-government envelope. The Council of Ministers' [approval of the ANSIE 2026 budget arrêté, 30 December 2025](#), puts the first domestic figure on record: 396,120,056 FDJ, down 160.6m FDJ from 556.7m FDJ in 2025, of which 108.1m FDJ is investment — application firewalls, an archiving system, datacentre colocation, and support renewals for datacentre equipment and X-Road — the balance largely staff costs. The Council of Ministers records the reduction against the creation of the Autorité Nationale de la Cybersécurité, which took over part of ANSIE's prior mandate. The arrêté itself is not published; this record is the strongest evidence reached.

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Satellite broadband market authorisation	A licensing decision or authorisation register from the telecommunications regulator, or a ministerial statement on satellite market entry.	not yet probed
Earth-observation or geospatial data programme	A national earth-observation or geospatial-data programme document, or an agency mandate covering satellite data.	not yet probed
Commission nationale de protection des données (CNDP)	The decree constituting the CNDP, its membership, its public register of processing, or any published opinion or authorisation.	2026-08-09
Instrument governing police body-camera footage	The arrete, protocol or CNDP authorisation governing body-camera recording, retention and access.	not yet probed
Startup Act implementing decrees	The implementing decrees under Loi n 179/AN/25, or the first arrete awarding the Startup label.	2026-08-09
Public debate and civil-society record on digital governance	A civil-society, parliamentary or press-freedom account of digital governance in Djibouti.	not yet probed

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Instrument governing artificial-intelligence systems in public use	An AI law, decree, procurement rule or published national AI strategy document.	not yet probed
Indian digital cooperation with Djibouti	Any India-Djibouti digital cooperation agreement, line of credit or programme document.	not yet probed
Gulf-state digital investment or cooperation instrument	A Gulf-state investment, financing or memorandum covering Djiboutian digital infrastructure.	not yet probed
Public research programme in digital or data science	A public research programme, university research-centre mandate or published research output in digital or data science.	not yet probed

The gaps cluster in the distance between an instrument existing and one operating. Four concern machinery the Digital Code and the Startup Act created — the data-protection commission, the implementing decrees, the rule governing body-camera footage, and any instrument covering artificial intelligence. Two of the four, the commission and the decrees, were probed on 9 August 2026 and returned nothing. The domestic-budget gap that stood alongside them was settled outside the probe cycle: the Council of Ministers' record of the ANSIE 2026 budget arrêté, approved 30 December 2025, put a figure on file, and the row is no longer carried here. The other eight were not probed.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
