

## TWELVE-MONTH PROGRESS REPORT

# US / hyperscaler activities: progress report, 2025-08-01 to 2026-08-14

Edition of 2026-08-16 · compiled from the Data Landscapers source base

28 places. Every table below is carried verbatim from that place's own progress report; nothing is written here.

**Movement values.** *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a measured position worsened. *Closed* — the programme ended. *No change* — the position at both ends is the same. *Baseline not held* — the base carries no position at the start of the period, so no movement can be stated. A value may carry a qualifying clause after a comma, as in *Advanced, slipped*.

## Angola

| SYSTEM OR INSTRUMENT                        | AT 2025-08-01                                                | AT 2026-08-14                                                                                                                                                                                    | MOVEMENT          |
|---------------------------------------------|--------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| International wholesale partnership         | Did not exist                                                | Combines the state cable company's three subsea systems with a US network of more than 300 metro markets and 386,000 km of fibre; no value, term or capacity commitment stated                   | ADVANCED          |
| US cybersecurity and connectivity agreement | US\$170m announced with a US\$25m first phase, nothing built | Unchanged; the first phase for a national cybersecurity agency and vendor training, plus an undersea cable, with no disbursement, contract or delivery on record in fourteen months              | NO CHANGE         |
| Transport corridor fibre link               | <b>BASELINE NOT HELD</b>                                     | A domestic submarine cable to interlink the main coastal cities, with the transport corridor connected to international systems; no route, cost, contractor, financier or completion date stated | Baseline not held |

## Botswana

| SYSTEM OR INSTRUMENT      | AT 2025-08-01   | AT 2026-08-14                                                                          | MOVEMENT |
|---------------------------|-----------------|----------------------------------------------------------------------------------------|----------|
| Artemis Accords accession | Not a signatory | Signed as the 68th signatory, about fifteen months after the national satellite launch | ADVANCED |

## Burkina Faso

| SYSTEM OR INSTRUMENT      | AT 2025-08-01                                                         | AT 2026-08-14                                                                                                                                                                       | MOVEMENT |
|---------------------------|-----------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| US AI training initiative | Digital-cooperation talks at a preliminary stage, no agreement signed | A major training initiative on digitalisation and artificial intelligence announced for 2026 in US-run spaces in three cities, with no delivery, cohort size or start date reported | ADVANCED |

## Burundi

| SYSTEM OR INSTRUMENT                  | AT 2025-08-01 | AT 2026-08-14                      | MOVEMENT |
|---------------------------------------|---------------|------------------------------------|----------|
| United States health-sector agreement | Did not exist | US\$156m committed over five years | ADVANCED |

## Cameroon

| SYSTEM OR INSTRUMENT                    | AT 2025-08-01 | AT 2026-08-14                                                                                            | MOVEMENT |
|-----------------------------------------|---------------|----------------------------------------------------------------------------------------------------------|----------|
| CAMTEL and Amazon Web Services approach | Did not exist | Talks only: no agreement, investment commitment, timeline, or answer on where Cameroonian data would sit | ADVANCED |

## Cape Verde

| SYSTEM OR INSTRUMENT               | AT 2025-08-01                                                                                                                             | AT 2026-08-14                                                                                  | MOVEMENT  |
|------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|-----------|
| Third Millennium Challenge compact | Cabo Verde selected for a third compact, stated as directed at connectivity in transport, services and digital with the African continent | Unchanged; no compact document, size, signature date or programme detail is held at 2026-08-06 | NO CHANGE |

## Central African Republic

| SYSTEM OR INSTRUMENT                                  | AT 2025-08-01                                                                                          | AT 2026-08-14                                                                                                                                                                                        | MOVEMENT |
|-------------------------------------------------------|--------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Incumbent-operator privatisation and recapitalisation | Did not exist at the window's start; the memorandum was signed 2025-09-18 at a development round table | An operational phase declared, with US\$150m announced for network modernisation, a data centre and a connectivity ecosystem; definitive agreements, a steering committee and a schedule unfinalised | ADVANCED |

## Chad

| SYSTEM OR INSTRUMENT                                                            | AT 2025-08-01                                                                                                                    | AT 2026-08-14                                                                                                                                                                                                                                                                                   | MOVEMENT  |
|---------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| United States digital work programme                                            | No work programme on file, United States contact being limited to a ministerial meeting with the charge d'affaires on 2025-11-26 | Four priority areas agreed - digital infrastructure, satellite connectivity, cybersecurity and digital health - with no instrument signed; a supplier stated its willingness to audit and certify the national data centre, a mandate already held by the tripartite agreement of February 2026 | ADVANCED  |
| Cybersecurity cooperation with the United States infrastructure security agency | Collaboration axes agreed on threat monitoring, engineer training and incident response, with nothing signed                     | Unchanged; no source in the window reports any follow-up                                                                                                                                                                                                                                        | NO CHANGE |

## Cote d'Ivoire

| SYSTEM OR INSTRUMENT                    | AT 2025-08-01                                                                                                                                                                | AT 2026-08-14                                                                                                                                    | MOVEMENT |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <b>US export-credit digital package</b> | A 2023 agreement for a national data centre and a digital administrative city inside a wider trade-agreement package announced May 2025, with no export-credit approval made | Formally authorised US\$170m project covering a sovereign national data centre, a government digitisation platform and smart-border surveillance | ADVANCED |

## DR Congo

| SYSTEM OR INSTRUMENT                                                 | AT 2025-08-01 | AT 2026-08-14                                                                                                                                                                                                                                                                  | MOVEMENT |
|----------------------------------------------------------------------|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <b>Digital infrastructure and cybersecurity partnership</b>          | Did not exist | A framework covering data centres, connectivity, cybersecurity, financial technology and artificial intelligence; no value, instrument type, milestones or delivery established                                                                                                | ADVANCED |
| <b>Payments-modernisation claim in a United States federal court</b> | Did not exist | A claim seeking up to US\$400m on a stated investment of more than US\$72m against an agreed US\$20m state contribution never paid, with bribe-demand allegations; the government calls the signed documents a non-binding memorandum and denies the claims; no ruling is held | ADVANCED |

## Egypt

| SYSTEM OR INSTRUMENT                                 | AT 2025-08-01                                                                                                                                                 | AT 2026-08-14                                                                                                                                                                                                              | MOVEMENT  |
|------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Google AI Pro free student subscriptions</b>      | Did not exist                                                                                                                                                 | A company-announced free one-year subscription for college students, to begin in the coming weeks from 2025-09-22 in Egypt and seven other African countries; no confirmation of launch, uptake figure or end date is held | ADVANCED  |
| <b>Mediterranean capacity partnership with Cisco</b> | Announced before the window opened, as the activation of Mediterranean subsea capacity on the 2Africa system, framed around demand from cloud and AI services | No later source updates the arrangement's status, capacity or commercial terms                                                                                                                                             | NO CHANGE |

## Eswatini

| SYSTEM OR INSTRUMENT                    | AT 2025-08-01                                                                        | AT 2026-08-14                                                   | MOVEMENT |
|-----------------------------------------|--------------------------------------------------------------------------------------|-----------------------------------------------------------------|----------|
| <b>Google partnership with Eswatini</b> | Signed on or before January 2025; workspace, AI, digital addressing and youth skills | Operating and publicly acknowledged; no value or term published | ADVANCED |

## Gabon

| SYSTEM OR INSTRUMENT                    | AT 2025-08-01 | AT 2026-08-14                                                                                                                                                              | MOVEMENT                 |
|-----------------------------------------|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| <b>Amazon acquisition of Globalstar</b> | Not held      | Advanced talks reported for the acquisition of an operator holding spectrum authorisations and partnerships in Gabon for enterprise connectivity and industrial monitoring | <b>BASELINE NOT HELD</b> |

## Ghana

| SYSTEM OR INSTRUMENT                           | AT 2025-08-01                                                                   | AT 2026-08-14                                                                                              | MOVEMENT         |
|------------------------------------------------|---------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|------------------|
| <b>Google AI research and community centre</b> | Operating, with a US\$37m cumulative investment figure disclosed by the company | Unchanged; it hosts the new applied AI lab and no further Ghana investment figure has been published since | <b>NO CHANGE</b> |

## Guinea

| SYSTEM OR INSTRUMENT                                       | AT 2025-08-01 | AT 2026-08-14                                                          | MOVEMENT        |
|------------------------------------------------------------|---------------|------------------------------------------------------------------------|-----------------|
| <b>Taxation of United States digital-service providers</b> | Did not exist | In charge, with a 90-day requirement to appoint a local representative | <b>ADVANCED</b> |

## Kenya

| SYSTEM OR INSTRUMENT                                 | AT 2025-08-01                                                                          | AT 2026-08-14                                                                 | MOVEMENT         |
|------------------------------------------------------|----------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|------------------|
| <b>OpenAI Academy Nairobi</b>                        | Did not exist                                                                          | Proposal for East Africa's first OpenAI Academy, unsigned                     | <b>ADVANCED</b>  |
| <b>Safaricom and AWS generative AI collaboration</b> | Collaboration for fraud detection, customer-service automation and engineer upskilling | Unchanged, with no expansion, spend figure or workload detail published since | <b>NO CHANGE</b> |

## Lesotho

| SYSTEM OR INSTRUMENT                                             | AT 2025-08-01 | AT 2026-08-14                                                                                                                                             | MOVEMENT        |
|------------------------------------------------------------------|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| <b>US commercial diplomacy in the digital and energy sectors</b> | Not stated    | Stated by the US Embassy at US\$7.3bn of commercial partnerships facilitated in Lesotho over the previous eighteen months, of which Kobong is the largest | <b>ADVANCED</b> |

## Mauritius

| SYSTEM OR INSTRUMENT                  | AT 2025-08-01 | AT 2026-08-14                                                                                                                                                                                                                                                                              | MOVEMENT        |
|---------------------------------------|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| <b>Amazon Web Services memorandum</b> | Did not exist | Signed with soft scope covering skills, institutional enablement and a scale pathway for local innovators, with no disclosed value or binding deliverable; the training is to run initially in premises rented for the purpose, with permanent infrastructure only a possibility (2026-08) | <b>ADVANCED</b> |

| SYSTEM OR INSTRUMENT                | AT 2025-08-01            | AT 2026-08-14                                                                                                                                                                                                                                                               | MOVEMENT                 |
|-------------------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| Hyperscaler infrastructure presence | <b>BASELINE NOT HELD</b> | Google already operates a ground station at Baie-du-Jacotet serviced by the state operator, so the cable commitment would deepen a relationship rather than open one; what is contracted with the hyperscalers so far is skills and confidentiality, not capacity (2026-08) | <i>Baseline not held</i> |

## Morocco

| United States health-data access agreement | Did not exist | The signed memorandum caps the data-sharing arrangement at seven years from execution, places it under joint steering-committee governance with the Government of Uganda as data owner, requires prior written authorisation through a Data Sharing Agreement approved by both, binds all data activities to the Data Protection and Privacy Act Cap 97 and the National Data Governance Framework, and has Uganda approve the national health information architecture before any United States-financed investment; planned United States support is US\$1,719,960,000 against Uganda's US\$577,001,796, including US\$113,102,289 for data systems. The MOU only provides for a future Data Sharing Agreement (§2.5.2); ProPublica reported 2026-07-23 that it reviewed that agreement directly and that it grants direct, real-time login access to nine of Uganda's health data systems for seven years, a term matching the MOU's own cap. The agreement's text is unpublished and not held, and no Ugandan or US primary has confirmed or denied ProPublica's account (reconciled 2026-08-10) | <b>ADVANCED</b> |

| United States health financing memorandum of understanding | Did not exist | A leaked five-year draft offering US\$1.012bn in health funding against commitments to hire 40,000 health workers and add US\$400m in health services, plus ten years of health-data access and a 25-year pathogen-data pledge. Zambia confirmed requesting revisions after the funding was linked to a copper and cobalt compact; the draft carried a clause terminating the process if no agreement was reached by 2026-04-01, and no signature is on file. Foreign Minister Mulambo Haimbe said in May 2026 that the proposed five-year agreement, which he put at up to US\$2bn, had stalled over data terms the government considers unacceptable, and the agreement was reported shelved in May after Washington sought signature alongside a critical-minerals pact | <b>STALLED</b> |

| Bilateral health cooperation memorandum                  | Under negotiation; the draft called clearly unbalanced in a December 2025 presidential memo               | Talks ended over long-term United States access to national health data, an attempt to fold in critical minerals, and a bilateral architecture outside the World Health Organization; the United States embassy stated in August 2026 that the conditions were co-investment, financial accountability and the sharing of disease specimens during outbreaks, and that assertions it sought Zimbabweans' personal data are categorically false; about 1.2m people on United States-supported HIV treatment face wind-down. The two accounts were reconciled on 2026-08-09 against the strategy's own model texts, both acquired that day. The model Data Sharing Agreement gives the United States secure, uninterrupted access, expressly including login credentials, to seven national health systems including electronic medical records, for twenty-five years continuing ten years past termination — and in the same clause tells the partner that to the maximum extent practical it should not provide individual level data or personally identifiable information unless there is no other way, the model access role being a viewer role without access to such information. The template memorandum's section 2.1.2 requires physical specimens and related data, including genetic sequence data, of detected pathogens with epidemic potential to be provided within five days of detection for twenty-five years. Both public accounts are therefore supportable on the templates: Harare is describing standing credentialled access to live national systems and specimen transfer, Washington is denying the transfer of identifiable records. Neither template is the Zimbabwe draft, which was never signed and does not exist as a public document | CLOSED    |

| <b>America First Global Health Strategy data-sharing agreements</b> | Did not exist; no bilateral United States health agreement of this kind on record before December 2025 | Memorandums worth US\$20bn signed with more than 30 countries since December 2025, on a model Data Sharing Agreement giving the United States at-will access to seven classes of national health system for 25 years with a 10-year post-termination tail; Ghana refused in April 2026, Zimbabwe withdrew in February 2026 and Zambia shelved in May 2026, and Kenya's framework is before the Court of Appeal with a final ruling due at the end of October 2026; the State Department's standard-form memorandum, held as a blank template dated 2026-03-11, commits a partner government to name and run its electronic medical record, laboratory, pharmacy, surveillance, commodity-inventory and national data warehouse systems, to load 90 per cent of clinical encounters into the electronic medical record within two years of rollout in a facility, to enter a data sharing agreement expected to run twenty-five years, and to provide specimens and genetic sequence data of pathogens with epidemic potential within five days of detection, with section 4.7 making failure on those commitments grounds for changing or discontinuing the assistance; the signed texts are withheld, the department having published a subset of the memorandums in March 2026 and then removed public access, and a freedom-of-information suit covering sixteen African countries (Public Citizen v. Department of State, No. 1:26-cv-01137, D.D.C.) was unresolved when filed on 2026-04-02 | ADVANCED, REFUSED BY THREE STATES ON DATA TERMS |
| <b>US-AUC Strategic Investment Working Group</b>                    | Did not exist                                                                                          | Agreed to channel US private investment into AU-backed infrastructure including digital transformation, on an investment-in-place-of-aid posture; no membership, meeting or work programme held                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | ADVANCED                                        |

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
