

## STATUS REPORT

# Congo: status report

Edition of 2026-08-10 • 80 systems and instruments tracked, 8 of them not held

Compiled 2026-08-10 from the Data Landscapers source base, from [outputs/reports/COG/ledger.csv](#) (80 systems and instruments, 8 of them Not held). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

**Status values.** *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

## Summary of position

The state's digital effort is concentrated in revenue collection, and there it is compulsory. Certified electronic invoicing has been [mandatory for every economic agent except the state, local authorities on public-service missions and diplomatic bodies since 1 July 2026](#), with no phase-in by firm size and no assisted route stated; an order of 22 May makes [all public revenue payable exclusively through one national platform, payment outside it void](#).

Against that, the institutions are thin. The data-protection commission was [installed on 22 January 2026 and has produced no decision, sanction, registration regime or guidance since](#); the country has had a [cybersecurity agency since 2019 and a national strategy now out to international tender](#), bids closing 2 September 2026.

The money is legible and the delivery is not: the sector vote is [FCFA 30,139,589,283 for 2026, up 30.5%](#), on 2025 execution of FCFA 3,158,525,582, and no audited figure exists for any year. Eight of the rows below are *Not held*.

## Infrastructure

### Connectivity

| SYSTEM OR INSTRUMENT                        | STATUS <a href="#">↗ source</a>                  | AS AT                                                                                                             |
|---------------------------------------------|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| Alternative submarine cable connection      | <a href="#">PLANNED</a> <a href="#">↗</a>        | The regulator stated a connection to another cable could be operational within three weeks after weeks of outages |
| Digital transformation acceleration project | <a href="#">IN DEVELOPMENT</a> <a href="#">↗</a> | A fifth steering-committee session adopted a balanced 2026 budget of FCFA 21,872,000,000                          |

| SYSTEM OR INSTRUMENT                                            | STATUS <small>↗ source</small>  | AS AT                                                                                                                               |
|-----------------------------------------------------------------|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| National backbone transferred to the state operator             | IMPLEMENTED <small>↗</small>    | A council of ministers decree contributing the first three phases in kind against a capital increase                                |
| Quality-of-service enforcement against the two mobile operators | IMPLEMENTED <small>↗</small>    | Formal notices served on both operators after drive tests in 20 interior localities, with a six-month deadline to the next campaign |
| Rural broadband site programme                                  | IN DEVELOPMENT <small>↗</small> | The ministry reported 20 of 76 built-and-equipped sites fully operational at a mid-term review                                      |
| Universal access and service fund                               | IMPLEMENTED <small>↗</small>    | Appropriated at FCFA 1,000,000,000 for 2026 as a special treasury account                                                           |

## Data Storage

| SYSTEM OR INSTRUMENT                   | STATUS <small>↗ source</small>                         | AS AT                                                                                                        |
|----------------------------------------|--------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| National data centre                   | IMPLEMENTED, ASSERTED IN PASSING ONLY <small>↗</small> | The minister cited the data centre's inauguration as accomplished at digital-regulation conferences          |
| Regional data centre feasibility study | PLANNED <small>↗</small>                               | A centre of excellence and a non-governmental body signed a protocol opening a feasibility study             |
| Sovereign data-centre programme        | PLANNED <small>↗</small>                               | A ministerial adviser published a roadmap naming national data centres as one of nine structuring programmes |

## Energy

| SYSTEM OR INSTRUMENT                                          | STATUS <small>↗ source</small> | AS AT                                                                                                                  |
|---------------------------------------------------------------|--------------------------------|------------------------------------------------------------------------------------------------------------------------|
| Co-regulation accord on shared fibre and pylon infrastructure | PLANNED <small>↗</small>       | The regulator met operators on urban fibre and announced the imminent signature of an accord with the energy regulator |

## Technical Capacity

| SYSTEM OR INSTRUMENT                    | STATUS <small>↗ source</small> | AS AT                                                                                                                       |
|-----------------------------------------|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| Regulator satellite regulatory capacity | IMPLEMENTED <small>↗</small>   | The regulator's network-services directorate completed specialist low-orbit training in France and met a satellite operator |

## Cybersecurity

| SYSTEM OR INSTRUMENT                                        | STATUS <small>↗ source</small>                 | AS AT                                                                                                                                                      |
|-------------------------------------------------------------|------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Audit-provider qualification standard                       | IN DEVELOPMENT <small>↗</small>                | The agency validated the consolidated draft at a working session at its headquarters                                                                       |
| National cybersecurity strategy                             | IN DEVELOPMENT, OUT TO TENDER <small>↗</small> | The security agency launched an open international tender for a 24-month mission to draft the strategy, a national training plan and national conferences  |
| National information systems security agency                | IMPLEMENTED <small>↗</small>                   | The 2026 finance law gives the agency a 10% share of a digital-hub charge and a 20% share of a transfers levy                                              |
| National security operations centre and response team       | PLANNED <small>↗</small>                       | The roadmap names them as its sixth programme of nine                                                                                                      |
| Security label in electronic-invoicing homologation         | IMPLEMENTED <small>↗</small>                   | A decree of 2026-03-31, published 2026-07-09, puts the security agency into joint homologation of every invoicing terminal, software and enterprise module |
| Agency annual report on the state of national cybersecurity | NOT HELD                                       | —                                                                                                                                                          |

Connectivity is externally financed and behind its own schedule. The transformation project adopted a 2026 budget of FCFA 21,872,000,000, inside a consolidated envelope of EUR 136.5m to a 2027 horizon – the same annual figure two years running. Its rural build stands at 76 sites built and equipped, 20 fully operational and 56 in advanced stages, rated unsatisfactory at mid-term, with no updated count in ten months.

Coverage is where the position is worst. An industry report puts rural coverage at 33% for third-generation and 21% for fourth-generation service, with almost 80% of the rural population outside fourth-generation coverage and half outside any coverage, against about 86% national coverage. The same work puts backhaul spectrum fees at about 5% of operators' total revenue against a sub-Saharan median of 0.5%, a premium falling hardest where fibre does not reach, with no regulatory response on file.

The backbone changed owner rather than performance. A decree contributed the first three phases in kind at FCFA 143,878,429,945, raising the state operator's share capital to FCFA 157,297,453,418 and absorbing accumulated losses of just over FCFA 20bn, to prepare a listing. The regulator's enforcement file blames that backbone's outages for northern coverage failures, having served formal notices on both mobile operators.

Hosting is asserted rather than evidenced. The national data centre was reported at 95% complete with works suspended over an unpaid state tranche in October 2025, then cited by the minister as inaugurated three months later; no opening date, capacity or operator is held.

## Digital public infrastructure

### Data Exchange

| SYSTEM OR INSTRUMENT                        | STATUS <small>↗ source</small> | AS AT                                                                                    |
|---------------------------------------------|--------------------------------|------------------------------------------------------------------------------------------|
| CEMAC interoperable QR-code standard        | IMPLEMENTED <small>↗</small>   | The community standard launched at Douala under an April 2026 regulation                 |
| Inter-administration data exchange platform | PLANNED <small>↗</small>       | Named as one of three digital public infrastructure foundations in the published roadmap |

### Digital Identity and CRVS

| SYSTEM OR INSTRUMENT                         | STATUS <small>↗ source</small> | AS AT                                                                     |
|----------------------------------------------|--------------------------------|---------------------------------------------------------------------------|
| Secure digital identity framework and wallet | PLANNED <small>↗</small>       | Named among the roadmap's three digital public infrastructure foundations |
| Unique identification number biometric card  | IMPLEMENTED <small>↗</small>   | Production of the biometric card relaunched                               |

### Digital Payments and Fintech

| SYSTEM OR INSTRUMENT            | STATUS <small>↗ source</small>                 | AS AT                                                                                                            |
|---------------------------------|------------------------------------------------|------------------------------------------------------------------------------------------------------------------|
| European remittance corridor    | IMPLEMENTED <small>↗</small>                   | An instant-transfer application launched on a remittances-as-a-service model                                     |
| Payment-aggregator licence      | IMPLEMENTED <small>↗</small>                   | A regulator licence secured for a unified interface across mobile operators, banks and microfinance institutions |
| Public-revenue payment platform | IMPLEMENTED, ROLL-OUT PARTIAL <small>↗</small> | The platform went live for online payment of taxes, levies and customs duties after the pilot cohort completed   |

| SYSTEM OR INSTRUMENT                                 | STATUS <small>↗ source</small>  | AS AT                                                                                                       |
|------------------------------------------------------|---------------------------------|-------------------------------------------------------------------------------------------------------------|
| Treasury single account at the regional central bank | IN DEVELOPMENT <small>↗</small> | The finance ministry stated the account was still being finalised on the day the payment platform went live |

## Registries (population, land, address, etc.)

| SYSTEM OR INSTRUMENT           | STATUS <small>↗ source</small>                                              | AS AT                                                                                                                                                            |
|--------------------------------|-----------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Integrated civil-status system | IN DEVELOPMENT, SOFTWARE VALIDATED AND DEPLOYMENT UNFUNDED <small>↗</small> | A three-day final validation workshop closed with seventeen recommendations validated                                                                            |
| National postal addressing     | IN DEVELOPMENT, ADOPTED BY DECREE AND NOT DEPLOYED <small>↗</small>         | The minister recorded that the regulator has run the addressing project for two years and the ministry has not taken it up for deployment at the postal operator |

## Sectoral management information systems (HMIS, EMIS, etc.)

| SYSTEM OR INSTRUMENT                              | STATUS <small>↗ source</small>                                            | AS AT                                                                                                               |
|---------------------------------------------------|---------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| Civil-service payroll platform                    | IMPLEMENTED, THREE FAILURE MODES MINUTED BY ITS OPERATOR <small>↗</small> | A finance-ministry working session logged data security, recurrent unavailability and a malfunctioning payslip code |
| Forest-revenue information system taxation module | IMPLEMENTED <small>↗</small>                                              | The module launched, the first of the system's three functions to deploy                                            |
| Public-transport insurance data platform          | IMPLEMENTED, ADOPTION VOLUNTARY <small>↗</small>                          | The platform launched in Brazzaville under the financial-institutions directorate                                   |

## Other GovTech and e-Gov

| SYSTEM OR INSTRUMENT                            | STATUS <small>↗ source</small>                     | AS AT                                                                                            |
|-------------------------------------------------|----------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Certified electronic invoicing system           | IMPLEMENTED, COMPULSORY <small>↗</small>           | Compulsory connection took effect for all economic agents three months after the enabling decree |
| Digital roadmap priority services               | IN DEVELOPMENT <small>↗</small>                    | The roadmap set out publicly in a signed opinion piece by the minister's adviser                 |
| Public-administration digitalisation task force | IMPLEMENTED, NO SESSION ON RECORD <small>↗</small> | Gazetted 2026-08-06 as decree 2026-261 of 29 July 2026                                           |
| Tax filing portal                               | IMPLEMENTED <small>↗</small>                       | A user guide published fixing filing regimes, delegation and irreversible submission             |

## Digitalisation of sub-national government

| SYSTEM OR INSTRUMENT                               | STATUS <small>↗ source</small>                                    | AS AT                                                                       |
|----------------------------------------------------|-------------------------------------------------------------------|-----------------------------------------------------------------------------|
| Local-authority revenue dematerialisation platform | IN DEVELOPMENT, BUILD VALIDATED BUT NOT DEPLOYED <small>↗</small> | A final validation workshop closed, stated to unlock operational deployment |

## National statistics

| SYSTEM OR INSTRUMENT                               | STATUS <small>↗ source</small>  | AS AT                                                                                                          |
|----------------------------------------------------|---------------------------------|----------------------------------------------------------------------------------------------------------------|
| Quarterly labour-market and informal-sector survey | IN DEVELOPMENT <small>↗</small> | A regional labour statistician received by the employment minister as the survey entered its preparatory phase |

## Use of satellite data

| SYSTEM OR INSTRUMENT                     | STATUS <small>↗ source</small>  | AS AT                                                                                                 |
|------------------------------------------|---------------------------------|-------------------------------------------------------------------------------------------------------|
| Low-orbit satellite broadband regulation | IN DEVELOPMENT <small>↗</small> | A regulator delegation completed low-orbit regulatory training in France and met a satellite operator |

The public-revenue platform went live on 3 August 2026 on the national payments switch, reconciled in real time and routed to the treasury, with all taxpayers targeted by end-2026. The treasury single account intended to centralise those receipts was still being finalised on the day the platform launched. Certified invoicing runs alongside it under four orders fixing a four-stage homologation, ten-year invoice retention and real-time tax-directorate data access.

Identity is the least documented layer. The unique identification number is the authentication key for the public-revenue platform and mandatory for eight economic and five administrative formalities; production of its biometric card was relaunched in October 2025 after a halt whose date and cause are not on file, and no national coverage figure exists. A secure digital identity framework and wallet has been named twice in twelve months with no legal instrument or pilot.

The integrated civil-status system has three modules validated and no funding decision on file; postal addressing is adopted by decree and still held at the regulator, untransferred to the postal operator; and a local-authority revenue platform is validated with no deployment recorded.

The ministry that runs the civil-service payroll platform has minuted data security problems, recurrent unavailability and a malfunctioning payslip code, with no remediation date. An inter-administration data exchange platform is a named roadmap foundation with no design or timetable.

A decree gazetted on 6 August 2026 creates a public-administration digitalisation task force under the Prime Minister, with four organs and interoperability of public information systems as a standing objective; its strategic committee's first listed task is to audit the level of digitisation across the administration. No session is on record.

## Governance and regulation

### Legislation and regulation

| SYSTEM OR INSTRUMENT                            | STATUS <small>↗ source</small> | AS AT                                                                                          |
|-------------------------------------------------|--------------------------------|------------------------------------------------------------------------------------------------|
| Certified electronic invoicing decree           | IMPLEMENTED <small>↗</small>   | Signed 2026-03-31, gazetted 2026-07-09 and compulsory for every economic agent from 2026-07-01 |
| Electronic-invoicing implementing orders        | IMPLEMENTED <small>↗</small>   | Four orders signed 2026-07-09 and gazetted 2026-07-16                                          |
| Public-revenue payment order                    | IMPLEMENTED <small>↗</small>   | Signed 2026-05-22 and gazetted 2026-06-11, with a 60-day conformity window                     |
| Tax on newly imported SIM-capable terminals     | IMPLEMENTED <small>↗</small>   | Instituted by the 2026 finance law and in force from 2026-06-01                                |
| Electronic-communications framework law of 2009 | NOT HELD                       | —                                                                                              |

## Strategies, plans and policies

| SYSTEM OR INSTRUMENT                      | STATUS <small>↗ source</small>  | AS AT                                                                                                                        |
|-------------------------------------------|---------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| National artificial intelligence strategy | IN DEVELOPMENT <small>↗</small> | Drafting launched with external support and a technical committee seated 2026-05-06                                          |

|-----------------------------------------------------|--------------------------------|-------|
| National open-data portal or dataset-release policy | NOT HELD                       | —     |

Fiscal instruments are the only ones being made. Beyond the invoicing decree and the payment order, a [tax on newly imported SIM-capable terminals](#) has been in force since 1 June 2026, earmarked for connectivity and infrastructure, with no rate or yield published.

Data protection is constituted and inactive. [Loi n° 29-2019](#) is in force, its institutional framework completed by a [decree of 31 December 2025](#), and the commission's members were appointed and officers elected with powers to advise, warn and sanction. Nothing states whether controllers must register or notify, what fees or deadlines apply, or whether any enforcement has occurred.

The policy layer is a stack of unadopted documents: a 2030 digital strategy finalised and awaiting a presidential decree; a data governance strategy at landscape-assessment stage; an AI strategy whose technical committee has eleven deliverables and a budget of FCFA 150m to 200m still to be secured; and a ministry roadmap of five ambitions and nine programmes reaching the record through a signed opinion piece rather than an adopted instrument.

Enforcement stops short of outcomes: the regulator gave the operators two further months to complete subscriber identification after finding cards sold pre-activated in twelve named towns, and the deadline expired around end-2025 with no compliance result or sanction on file.

## Artificial intelligence and the technology sector

### AI

| SYSTEM OR INSTRUMENT                            | STATUS <small>↗ source</small> | AS AT                                                                                                                 |
|-------------------------------------------------|--------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| African artificial intelligence research centre | IMPLEMENTED <small>↗</small>   | The centre joined an international alliance, with foreign financing for its third and fourth phases under negotiation |
| Digital and AI regulation conferences           | IMPLEMENTED <small>↗</small>   | Five days of conferences at Brazzaville closing with agreed priorities                                                |
| Research-centre training platform               | PILOTING <small>↗</small>      | The platform presented to the minister ahead of official launch                                                       |

### ICT Industry

| SYSTEM OR INSTRUMENT                 | STATUS <small>↗ source</small>  | AS AT                                                                                                                                          |
|--------------------------------------|---------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| Regional digital transit-hub bid     | IN DEVELOPMENT <small>↗</small> | A state-operator delegation held meetings in the neighbouring capital on interconnection, wholesale capacity trading and international roaming |
| State operator quality certification | IMPLEMENTED <small>↗</small>    | An international standard issued to the state operator, the first telecommunications operator in the country to hold it                        |

### Innovation ecosystem

| SYSTEM OR INSTRUMENT                     | STATUS <small>↗ source</small> | AS AT                                                                                                                                |
|------------------------------------------|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| Obstetric digital reference project      | PILOTING <small>↗</small>      | Launched under the health minister's patronage from one integrated health centre                                                     |
| Ride-hailing and delivery platform entry | IMPLEMENTED <small>↗</small>   | Operations began in Brazzaville, funded from a US\$30m round of equity and debt                                                      |
| Startup labelling regime                 | IMPLEMENTED <small>↗</small>   | A council of ministers adopted decrees fixing the label's withdrawal procedure and the labelling commission's powers and composition |

|----------------------------|--------------------------------|-------|
| Indian technology presence | NOT HELD                       | —     |

Gulf/UAE activities

| SYSTEM OR INSTRUMENT           | STATUS <small>↗</small> source | AS AT |
|--------------------------------|--------------------------------|-------|
| Gulf-state technology presence | NOT HELD                       | —     |

Artificial intelligence is a research centre and a committee. The [African AI research centre, created by law in May 2024](#) and built with a Chinese counterpart, has joined an international alliance, with Russian financing for its third and fourth phases under validation through a debt conversion; no research output, staff count or budget is held. Its training platform holds about 3,000 free online courses against a 10,000-youth target and has published no enrolment figure in fourteen months.

The technology sector is small and its evidence is corporate. The [state operator holds an international quality standard, the first Congolese operator to do so](#), and states an ambition to lead regional digital transit on which no interconnection agreement or capacity contract is on file. The [startup labelling regime adopted in July 2025](#) has no commission sitting or label awarded recorded since.

External technology relationships run to China and Russia and stop at announcement: a [joint AI laboratory with no source recording it built, staffed or operating](#); [satellite navigation on the ocean railway at discussion stage](#); a [five-year contract for a private telecom network at an oil field](#) with no record of the network in service. Nothing is held on United States, Indian or Gulf-state presence.

Inclusion and capacity

Access to services

|-------------------------------------|--------------------------------|-------|
| National digital-literacy programme | NOT HELD                       | —     |

## Training and skills

| SYSTEM OR INSTRUMENT                       | STATUS <small>↗ source</small>                 | AS AT                                                            |
|--------------------------------------------|------------------------------------------------|------------------------------------------------------------------|
| Development-programme cybersecurity course | PILOTING <small>↗</small>                      | A cybersecurity expert presented to the minister in Brazzaville  |
| National cybersecurity training plan       | IN DEVELOPMENT, OUT TO TENDER <small>↗</small> | An open international tender issued with bids closing 2026-09-02 |
| Project digital-skills target              | IN DEVELOPMENT <small>↗</small>                | The target restated in the 2026 work programme                   |

## Research institutions

| SYSTEM OR INSTRUMENT                     | STATUS <small>↗ source</small>  | AS AT                                                                    |
|------------------------------------------|---------------------------------|--------------------------------------------------------------------------|
| National AI strategy technical committee | IN DEVELOPMENT <small>↗</small> | An inaugural meeting of the technical committee with a six-month mandate |

The domestic vote rose and the spending did not follow. The sector programme is [FCFA 30,139,589,283 for 2026 against FCFA 23,348,037,007 revised for 2025](#), while 2025 execution was FCFA 3,158,525,582 — 13.5% of the revised figure, on a numerator excluding personnel. The [treasury banking-function account more than doubled to FCFA 5,968,000,000](#) while the [dedicated public-finance information-systems account stayed flat at FCFA 3,500,000,000](#). No audited outturn exists for any digital line: the settlement-law series ends at exercise 2020.

Universal service is funded at a fixed figure and reports in inaugurations. The fund carries [FCFA 1,000,000,000 for 2026, spent entirely as transfers](#), flat for three consecutive fiscal years, against a three-year record of 200 sites connected and 2025 targets whose achievement is not established. What is reported is [two further towns connected in January 2026](#).

Skills are targets without outturns. The transformation project has carried the same [1,200-young-people training target for two years with no trained figure published](#); a [national cybersecurity training plan is being procured with the strategy under a 24-month donor-financed mission](#). No national digital-literacy programme, target or measured rate is held anywhere in the base.

## Gaps to fill

| SYSTEM OR INSTRUMENT                                        | WHAT WOULD SETTLE IT                                                                                                                                                    | LAST PROBED    |
|-------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| Agency annual report on the state of national cybersecurity | any single published annual report, or a board deliberation showing the statutory obligation waived                                                                     | not yet probed |
| National cybersecurity and ICT workforce stock              | the national training plan now out to tender, an agency or regulator annual report, or an international index country profile with workforce data                       | not yet probed |
| Energy cost and reliability for digital infrastructure      | the industry report's underlying cost tables, a regulator cost-of-service study, or the gas-plant data-centre feasibility study output                                  | not yet probed |
| Registration, notification and enforcement regime           | the 2019 data-protection law itself, the December 2025 appointing decree, or any commission deliberation, guidance note or fee schedule                                 | not yet probed |
| Electronic-communications framework law of 2009             | the 2009 law's number and gazette text, and any bill or ordinance revising it                                                                                           | not yet probed |
| National open-data portal or dataset-release policy         | an open-data portal or its founding instrument, the statistics institute's dissemination policy, or a transparency-code provision obliging machine-readable publication | not yet probed |
| Public debate on data governance and digital rights         | any held Congolese civil-society, academic, parliamentary or press argument about data governance or digital rights as such                                             | not yet probed |
| United States technology presence                           | a US company, agency or fund instrument naming Congo-Brazzaville                                                                                                        | not yet probed |
| Indian technology presence                                  | an Indian line of credit, export-bank facility, information-technology services contract or capacity programme naming Congo-Brazzaville                                 | not yet probed |
| Gulf-state technology presence                              | a Gulf sovereign-fund or telecom investment, data-centre commitment or memorandum naming Congo-Brazzaville                                                              | not yet probed |
| Audited outturn for any digital line                        | a settlement law later than exercise 2020, with its annexed tables reproduced                                                                                           | not yet probed |

| SYSTEM OR INSTRUMENT                | WHAT WOULD SETTLE IT                                                                                                                                               | LAST PROBED    |
|-------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| National digital-literacy programme | a national digital-literacy programme document, a fund or project training outturn broken out by literacy rather than skills, or a published digital-literacy rate | not yet probed |

Eight instrument rows carry no reliable statement. The [security agency's statutes oblige its director-general to publish an annual report on the state of national cybersecurity before 30 June of the following year](#); none is on file for any year. The electronic-communications framework law of 2009, diagnosed by an industry report as a brake on the sector, reaches the base with no number, title or text. No open-data portal or dataset-release policy exists at all.

Three are relationships that return nothing: United States, Indian and Gulf-state technology presence. The remaining two are the absence of any Congolese public argument about data governance or digital rights, and of a national digital-literacy programme.

Four measures matter for reading this report: no registration, notification or enforcement regime under the data-protection law; no cybersecurity or ICT workforce stock; no energy cost or reliability figure for digital infrastructure; and no audited outturn for any digital line. Each row is in [gaps.csv](#) with what would settle it; none has yet been probed.

ABOUT THIS DOCUMENT

|                 |                                                                                                                                                                   |

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
