

STATUS REPORT

Cape Verde: status report

Edition of 2026-08-10 • 122 systems and instruments tracked, 45 of them not held

Compiled 2026-08-10 from the Data Landscapers source base, from [outputs/reports/CPV/ledger.csv](#) (122 systems and instruments, 45 of them Not held). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

Cape Verde's digital state is delivering systems while its published budget for them falls away. The unified public-services portal Gov.cv went live on 24 February 2026, consolidating services that on the Prime Minister's own account had not communicated with each other ([launch account](#)), and the state began producing identity cards, passports and residence permits on national territory on 18 May 2026 ([producer's account](#)). Against that, the digital ministry's appropriation fell 87.5% across two budgets, from CVE 1,390,965,632 for FY2024 to CVE 174,200,533 for FY2026, with capital at a printed zero for a second year ([budget law](#)).

The gap between the two is filled outside the vote. At 31 March 2026 the ministry's reprogrammed budget stood at CVE 1,614,624,282, 9.3 times the figure Parliament passed ([quarterly account](#)). The published appropriation and the money actually being spent have almost no relationship to each other, and no audit instrument covers either: the Court of Auditors' published opinion series ends at FY2023. The plan of record has also lapsed, the digital governance action plan having run to end-2025 with no successor held ([plan presentation](#)).

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
AUDA-NEPAD Programme for African Developing Island Economies	IMPLEMENTED ↗	Launched at the STC-TTIM Ministerial Segment, Abidjan

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
CSIRT incident statistics	NOT HELD	—
Cybercrime caseload and prosecutions	NOT HELD	—
Final forensic audit of the 2026-05-17 election-night incident	NOT HELD	—
National Cybersecurity Strategy	NOT HELD	—

The regulator's own market series stops before the window opens. At 30 June 2025 Cape Verde held 484,929 internet subscriptions, 94 accesses per 100 inhabitants and 592,769 active SIM cards, with the incumbent on 72.3% of the internet market and the satellite entrant on 0.2% nine months after starting ([regulator indicators](#)). No quarter after that is held, so the National 5G Strategy's target of 90% internet penetration by 2026 cannot be tested against any measurement.

That strategy was approved by resolution on 20 February 2026, but no spectrum assignment, licence award or network build is on file ([strategy presentation](#)). The state separately approved a guarantee of up to EUR 37 million to the incumbent operator for inter-island cable renewal and international connectivity; the competitor objected publicly, demanding neutrality and separation of strategic infrastructure management from commercial service provision ([resolution account](#)).

Cybersecurity is the section's clearest movement and its clearest measure of prior neglect. A national security operations centre and response team began operating inside the state network on 30 October 2025, and the FY2026 budget then inscribed the first cybersecurity budget unit in the Cape Verdean budget at CVE 20,000,000 – 0.02% of state expenditure, five years after the decree that created the response team ([budget law](#)). No incident count, staffing figure or service catalogue has been published since.

Use of satellite data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
State use of Earth observation or satellite data	NOT HELD	—

Cape Verde's public-service layer consolidated in the window. Gov.cv opened on 24 February 2026 as a single web and app gateway covering finance, civil registration, identity, tax, higher education, transport and social services, with departmental portals to migrate into it; no count of migrated services has been published ([launch account](#)). The criminal-process component of the justice information system was handed from the state IT agency to the justice ministry on 17 March 2026, in operation in every comarca in the country ([handover account](#)).

Identity is where the state moved furthest. Production of the identity card, electronic passport and residence permit had been contracted to Portugal, with over CVE 176 million ratified after the services were supplied; since 18 May 2026 the documents are produced domestically ([producer's account](#)). No enrolment count, activation count or coverage rate is held for either the card or its mobile credential, from any date.

What is missing is the layer beneath. A diploma on interoperability standards for public-administration systems and a diploma regulating data governance were both named as 2024 legislative deliverables and neither is adopted two years past that year ([committee statement](#)) — while interoperability is asserted as a working property of the new portal, the company registry and the civil-registration to identity linkage. An open-data portal announced in the same statement is likewise not held, and the household income and expenditure survey fielded in December 2022 has published no definitive results.

Open data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Open-data portal	PLANNED ↗	Named as a 2024 deliverable to the National Assembly's First Committee
Portal da Transparencia	IN DEVELOPMENT ↗	Public consultation closed 2025-07-17
Statistics institute cooperation protocol with the Universidade de Coimbra	IMPLEMENTED ↗	Protocol formalised, reported 2026-03-29
Open-data policy or right-to-information statute	NOT HELD	—

The digital governance action plan ran 2021 to 2025; no successor plan, extension or evaluation is held, so the 2026 statements about a digital nation run without a current published action plan ([plan presentation](#)). The Minister of Economy, Trade, Industry and Digital Transition convened a strategic consultation in Praia on 6 August 2026 to feed a national diagnosis and the priorities of a future digital transformation agenda ([ministry statement](#)). No draft, title or adoption date is held.

Data protection rests on a 2001 statute closely mirroring the European model, last amended in 2021 to require designation of data-protection officers — an obligation the supervisory authority's president said in February 2025 several institutions had not met ([interview](#)). On the face of its own site the authority has published no genuine activity report since 2016, and its FY2025 appropriation of CVE 36,313,115 — roughly a dozen maximum penalties — sits inside the National Assembly's private budget rather than any ministerial vote. Its FY2026 appropriation is unestablished: the budget volume contains no occurrence of the authority in 266 pages.

The electronic procurement platform was re-let at CVE 70,000,000 over four years on terms of perpetual licensing, deployment on national infrastructure and full control of source code, and made mandatory for 2026 ([clarification note](#)).

The Prime Minister told Parliament on 31 July 2026 that the statistics institute produced falsified data and ordered an independent evaluation; the institute's board rejected the allegations on 3 August and offered to host any external evaluation ([both accounts](#)). The two accounts have not been reconciled.

Artificial intelligence and the technology sector

Gulf/UAE activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Any Gulf technology or data-centre engagement with Cabo Verde	NOT HELD	—

Cape Verde's artificial intelligence and data strategies were both at kick-off inside the window. Development of a National Artificial Intelligence Strategy and a Data Strategy for Public Administration was launched at a meeting on 28 April 2026 attended by senior officials, external consultants and European Union representatives, with the stated goal of moving government off siloed systems; no draft, adoption date or lead institution is published ([kick-off account](#)).

The technology park is the sector's one substantial physical asset. Both campuses were inaugurated in May 2025 as a EUR 51.85 million project carrying EUR 45.5 million of African Development Bank financing, hosting 23 companies from seven countries and 311 professionals at full occupancy of 52 offices ([financier's release](#)). No occupancy, tenancy or employment figure dated inside the window is held, so the park's current position rests on a fifteen-month-old measurement. Its second phase went to open international tender on 29 July 2026, with the contract value unpublished.

Several stated instruments cannot be inspected. A startup law with tax benefits and a digital-nomad visa are stated to be in force on a minister's summary in trade press, with no instrument number, adoption date or take-up figure held for either. The government's target of raising the digital economy's share of gross domestic product to 25% is stated against a current share given as about 7% in one account and about 5% in another, neither sourced to national accounts.

Inclusion and capacity

Digital divides

Skodji Digital	IMPLEMENTED ↗	First cohort sessions held at Praia and Mindelo

Research institutions

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National research funding line for digital or artificial-intelligence research	NOT HELD	—

Two fee-financed ceilings define the inclusion picture, and neither has been re-estimated. The universal service fund has carried CVE 122,073,633 unchanged to the escudo across FY2024, FY2025 and FY2026, financed by operator contributions and the radio-spectrum fee and appearing in no organic, functional or economic classification ([budget law](#)). The civil-identification earmark has likewise carried CVE 306,516,802 unchanged across the same three budgets. No expenditure, project or beneficiary record exists for the universal service fund from any date.

Against those, the ministry vote collapsed while spending did not. The digital ministry executed 33.0% of its reprogrammed budget in FY2024 and 37.9% in FY2025 against state-wide rates near 80%, and 10.1% at the first quarter of 2026 against 18.6% state-wide ([quarterly account](#)). Its FY2024 investment line executed a printed zero. The state IT agency's own forecast service revenue of CVE 1,094,297,000 for 2026 is 6.3 times the ministry's entire vote, and no agency accounts have been published since the FY2024 volume.

Training is externally financed and its results unmeasured. A digital-skills programme opened 1,050 first-phase places against a stated 3,000-opportunity target at a reported EUR 400,000, funded by the World Bank ([launch account](#)); no enrolment, completion or placement figure is held.

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
National technical capacity and public-sector technical capability	The base holds zero sources tagged infra.capacity for Cabo Verde; a national compute, HPC or public-sector technical-capability statement from the telecommunications directorate or NOSi would open the subject	not yet probed
The regulator's own budget, staffing and activity	An ARME budget or activity report for any year; the 2026-08-04 acquisition pass recorded the regulator's website timing out on TCP 443 and holds none	not yet probed
5G spectrum assignment or licence award	An ARME spectrum-assignment decision or a national radio frequency plan; the strategy is approved but no band, auction, price or licensee is on file	not yet probed
Electronic communications market indicators after Q2 2025	The ARME market indicators report for Q3 2025 onward	not yet probed
Submarine cable landings serving Cabo Verde	A cable inventory from ARME or the incumbent naming each system, its landing station and its in-service date; the base names an inter-island cable and one branch and nothing else	not yet probed

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
National fibre network length	An ARME or incumbent network statement; the only figure in the base is a Secretary of State's trade-press interview	not yet probed
Universal service fund expenditure, projects and beneficiaries	A fund account or activity report, or a Conta Geral do Estado that breaks out the earmarked-revenue counterpart; only the unchanged appropriation figure is held	not yet probed
Installed data-centre capacity	A technical specification from NOSi or TechPark CV giving rack count, floor area or delivered electrical load in MW for the Praia and Mindelo facilities	not yet probed
Government cloud, hosting or data-localisation rule	The interoperability-standards diploma and the public-administration data-governance diploma named as 2024 deliverables; the base holds no evidence either was adopted	not yet probed
Electricity supply and cost to Cabo Verde's data centres	NOSi's accounts for 2025, which would carry the photovoltaic project's implementation and the data centre's energy cost structure	not yet probed
Any national policy linking digital infrastructure to energy	A named instrument; the section's only energy-tagged source carries an undated ministerial statement that electricity capacity will be stabilised, with no figures and no programme	not yet probed
National Cybersecurity Strategy	The strategy document itself; the base holds only a secondary report that the Secretary of State cited an update of it in a May 2025 interview	not yet probed
CSIRT incident statistics	A CSIRT or SOC annual report giving incidents handled, sectors affected and response times since the 2025-10-30 launch	not yet probed
Cybercrime caseload and prosecutions	A judicial police annual report; the base holds three dated warnings from the cybercrime brigade and no case, charge or conviction count	not yet probed
Final forensic audit of the 2026-05-17 election-night incident	The completed external audit report NOSi commissioned; only preliminary findings dated 2026-05-26 are held	not yet probed
State use of Earth observation or satellite data	A Cabo Verdean instrument or agreement naming an EO data source or programme; the base holds zero sources on this subject for Cabo Verde at any date	not yet probed
Rural and inter-island last-mile digital service delivery	A programme document or budget sub-line naming rural or outer-island service points, or a deployment schedule with locations; the base holds zero sources on this subject for Cabo Verde	not yet probed
Municipal digital government	A municipal digital services plan or budget from Praia, Mindelo or the national municipalities association, or the municipal component of the state-modernisation programme broken out	not yet probed
Count or percentage of public services actually online	The Digital Cabo Verde results framework or an implementation status report with the services-online indicator reported against the 60%-by-2026 target, or a portal service inventory	not yet probed
Award date and jury report for the e-procurement platform contract	The jury report or adjudication notice for the electronic public procurement tender, or the contract's publication in the Boletim Oficial	not yet probed
Identity-card enrolment count and mobile-credential activation count	A justice-modernisation institute or civil-identification activity report, or a registry issuance series; the reference pages carry no volume figure of any kind	not yet probed
National retail payment switch and its transaction volumes	A Banco de Cabo Verde payment-systems report or the national switch operator's annual report with dated transaction and value series	not yet probed
Instant and inclusive payment system strategy	The Banco de Cabo Verde or government instrument approving the strategy, with its date; a self-published NGO report states only that it was approved in 2025	not yet probed
Government-to-person payment digitisation	A social-protection or treasury instrument stating how benefits and salaries are disbursed, and what share is electronic	not yet probed
Land registry and cadastre digitisation	A territorial management institute or registry directorate report on cadastral coverage and the state of the property register; the justice portal is stated to issue land certificates but nothing states the register behind it	not yet probed
Education management information system	A Ministry of Education systems document or budget sub-line naming a school or student information system	not yet probed
Any named instrument, forum or code of practice on public digital-policy debate	A public-consultation register or a formal policy-dialogue mechanism; the subject carries only two items for Cabo Verde and neither is a nameable object whose position could move	not yet probed

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Ratification of the AU Malabo Convention and accession to Convention 108	The AU depositary's ratification list, the Council of Europe treaty office's status page, or the national ratification resolution in the Boletim Oficial; the base establishes no signature, ratification or entry-into-force date	not yet probed
Data-protection commission activity report and any enforcement measure	A genuine annual activity report for any year after 2016; no complaint count, inspection count, breach notification count, sanction or fine can be stated for Cabo Verde from any date	not yet probed
Cybercrime statute and national cybersecurity framework instrument	The Boletim Oficial texts; the base carries an operational SOC and CSIRT and repeated police cybercrime warnings, but no statute and no prosecution or conviction figure	not yet probed
Artificial-intelligence statute	A bill or diploma in the Boletim Oficial; a named analyst argued for one in April 2025 and the data-protection commission president argued that AI cannot be regulated by operators alone, and the base holds no bill	not yet probed
National interoperability framework or standards catalogue	The adopted diploma on interoperability standards announced for 2024, or a published technical standards catalogue; interoperability is asserted as a pillar in every strategy statement from March 2025 onwards and no adopted standard is held	not yet probed
Membership status in the African Telecommunications Union	The union's membership register or the readout of the 2026 ITU Council bilateral; the April 2026 account states that membership-related matters were addressed without saying whether Cabo Verde is a member, an applicant or in arrears	not yet probed
Any act of ratification or transposition of a regional or continental digital instrument	A ratification resolution or transposing diploma in the Boletim Oficial for an ECOWAS supplementary act on data protection or electronic transactions, or for an AU convention	not yet probed
Open-data policy or right-to-information statute	The Boletim Oficial text of an access-to-information law or an open-data policy instrument; the base holds an announced portal and a fiscal transparency portal in consultation, but no governing legal instrument and no dataset inventory	not yet probed
Any binding rule on the use of artificial intelligence	A data-protection commission deliberation or guidance note on automated decision-making, or a draft AI base-law in the Assembly's legislative record	not yet probed
ICT sector share of GDP and ICT sector employment	A statistics institute national-accounts or business-survey release breaking out the information and communication sector; the 7%-to-25% figures in circulation are ministerial targets, not measurements	not yet probed
Technology park disbursement statements and Phase I appraisal	African Development Bank disbursement statements for the two technology-park operations and the Phase I appraisal report; both are on the wiki's acquisition list	not yet probed
Any Indian technology engagement with Cabo Verde	Nothing is held. An Indian technical cooperation record, an EXIM Bank line of credit, or an India-CPLP or India-Africa Forum commitment naming Cabo Verde would settle it	not yet probed
Any Gulf technology or data-centre engagement with Cabo Verde	Nothing is held. A UAE, Saudi or Qatari investment agreement, or an entry in a Gulf sovereign fund's portfolio naming Cabo Verde, would settle it	not yet probed
National digital literacy programme and skills rate	An adopted national digital skills and readiness strategy, or the statistics institute's household survey module on ICT use; the digital-readiness study of over a thousand respondents commissioned under Digital Cabo Verde has not been published	not yet probed
National research funding line for digital or artificial-intelligence research	A budget-table entry naming research or the national university's technology and engineering research centre, in any of the FY2024-FY2026 budget documents held	not yet probed
Free public internet points	A digital economy ministry or universal service fund list of installed sites with dates, or a budget line naming the programme	not yet probed
Island-level and urban-rural access disaggregation	The regulator's quarterly indicators broken down by island or municipality, or the census or household survey ICT module at sub-national grain	not yet probed
Data-protection commission appropriation for FY2026	The National Assembly resolution approving the private budget for 2026; no such resolution is indexed in the Boletim Oficial, breaking a series that ran CVE 35,255,451 for FY2024 and CVE 36,313,115 for FY2025	not yet probed

The absences here are administrative rather than topical. The most consequential is that no audit instrument covers FY2024 or FY2025: the Court of Auditors' published opinion series ends at the FY2023 account, so the finest published record of Cape Verdean digital spending is the executive's own quarterly provisional account ([quarterly account](#)). The rectificative budget approved on 31 July 2026 had not been gazetted at 4 August, and its organic table is what would settle whether the reprogrammed digital budget is ratified or reversed.

Three subjects hold nothing at all for Cape Verde: technical capacity, satellite and Earth observation, and rural or inter-island last-mile service delivery.

The regulator is the other structural silence: no budget or activity report for it is held for any year.

ABOUT THIS DOCUMENT

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
