

STATUS REPORT

# Morocco: status report

Edition of 2026-08-10 · 110 systems and instruments tracked, 17 of them not held

Compiled 2026-08-10 from the Data Landscapers source base, from [outputs/reports/MAR/ledger.csv](#) (110 systems and instruments, 17 of them Not held). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

## Summary of position

Morocco has built the systems and not the statute. Fifth-generation mobile service has been commercial since 7 November 2025 on all three networks ([launch account](#)), an electronic identity card is issued at 4.6m a year, a national digital wallet is under construction, and patrol vehicles carrying live facial recognition entered service in Rabat in July 2026 ([deployment account](#)). The governing statute remains law 09-08 of 2009, and the framework bill meant to replace it has been with the general secretariat since November 2025 ([drafting account](#)).

The financing is external and the domestic appropriation stops in 2024. A US\$250m acceleration programme was approved and signed in June 2026 and is not yet in force ([ministry account](#)); the digital ministry's published budget gives its investment appropriation as MAD 1,758.7m in 2024 and nothing since ([ministry budget](#)).

The ombudsman is the one independent measure of whether the digitisation works: 9,958 files opened in 2025, up more than 25% in a year ([report account](#)).

## Infrastructure

### Connectivity

| National cybersecurity strategy to 2030                                    | IMPLEMENTED <small>↗</small>                                                        | Full DGSSI strategy document acquired; named by the ministry at the African Telecommunications Union conference, 2026-07-25      |

Three operators launched fifth-generation service on the same day, 7 November 2025, on 3.5 GHz and 700 MHz, after a July 2025 tender with one-off fees of MAD 900m and MAD 600m ([tender account](#)). The regulator reported 3.2m subscribers by March 2026, 8.4% of mobile-internet users. A measurement firm recorded the fifth-generation median download speed down 38% from 261.7 Mbps at launch to about 160-165 Mbps at month six ([measurement account](#)). Two held accounts of the licence coverage obligation disagree; the specification is not held.

The April 2026 memorandum on the artificial-intelligence platform at Nouaceur gives MAD 12bn over two phases for 36 MW cumulative by end-2027 ([ministry communique](#)) — below the "over 40 MW" the consortium announced for phase 1 alone in June 2025. The last national measurement of the estate is the economic and social council's: 98 MW installed in 2020, of which 14 MW was outsourced ([council avis](#)).

The cloud rules are made and not in force. Decree 2-24-921, in the Bulletin officiel of 20 February 2025, requires vital-importance entities using cloud for sensitive systems or data to use a qualified provider, with level 2 requiring processing, storage and supervision exclusively on national territory and Moroccan majority ownership ([decree text](#)). By its own terms it enters into force only when the arrêté fixing the qualification standard is published, and neither that nor the list of qualified providers is held.

Digital public infrastructure

Data Exchange

|-------------------------------------------|--------------------------------|-----------------------------------|
| National earth-observation data programme | IMPLEMENTED <small>↗</small>   | Morocco's own COPUOS-67 statement |

The police directorate issued 4.6m electronic identity cards in 2024, ran 80 mobile enrolment units serving more than 130,000 citizens, and operated a trusted third-party verification platform with 17 framework agreements and more than 30 authorised institutions ([annual report account](#)). Renewal moved online in May 2026, leaving only biometric capture in person ([renewal account](#)).

Eight partnership conventions signed in February 2026 launched a national digital wallet authenticated by the identity card, on a stated six-month build ([launch account](#)). No launch date, service count or user figure has followed.

Law 55.19 has been in force since 28 September 2020, and only procedures published on the idarati.ma portal it created are legally recognised and enforceable on citizen and official alike. More than 2,500 procedures were transcribed in the law's first phase, and the ministry reports a 45% reduction in the documents demanded of users where its simplification method has been applied, on unnamed perimeters ([methodological guide](#)). An interior ministry circular reported in July 2026 abolished 22 certificates citizens had been required to produce with no legal basis ([circular account](#)).

|----------------------------------------------------------|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Cooperation agreement with the anti-corruption authority | IMPLEMENTED ↗   | Signed on the margins of the African open government conference, 5-7 May 2026                                                                                              |
| National open-data portal                                | IMPLEMENTED ↗   | Governance structure documented: Comité de Pilotage (10 bodies, ADD-coordinated) established December 2019, ADD/World Bank Open Data Readiness Assessment carried out 2020 |
| Right of access to information law 31-13                 | IMPLEMENTED ↗   | Dahir 1-18-15 of 22 February 2018, published BO 6670 (French)/6655 (Arabic, earlier text governs commencement)                                                             |

The electoral organic bill 53.25, tabled in October 2025 with two to five years' imprisonment and a fine of MAD 50,000-100,000 for four AI-enabled offences, was [cleared by the Constitutional Court on 24 December 2025](#), alongside companion organic law 54.25 on political parties; neither has a promulgation dahir on file, and companion law 55.25 on electoral lists is still committee-reported, not adopted. Two bills remain with the legislature or the general secretariat, neither promulgated: a 50-article digital health bill adopted on 22 July 2026 ([bill account](#)); and the Digital X.0 framework bill, under review since November 2025 ([drafting account](#)).

The operative statute is still law 09-08 of 2009, whose text is not held; an analyst writing in The Conversation states that it was [amended in 2023 towards the European data-protection regulation](#), and no amending instrument or supervisory-commission annual report is held. Morocco ratified Council of Europe Convention 108 during 2019; the Council's committee, opining favourably in 2012, named two defects the base holds no record of closing: a carve-out for security and law-enforcement processing, and a definition of sensitive data omitting sexual life and criminal convictions ([committee opinion](#)).

The commission permitted banks and payment institutions to use it for remote account opening in April 2020 ([banking deliberation](#)) and social-protection institutions for benefit proof of life in July 2020 ([proof-of-life deliberation](#)), both on prior authorisation. On 21 March 2025 it opened hearings towards a deliberation on video surveillance, treating facial recognition on the public highway as an open question; none is published ([statement](#)).

A general [case-by-case facial-recognition authorisation regime has applied since December 2020](#), replacing an earlier moratorium and conditioning future authorisations on a national trusted-third-party identity system; patrol vehicles carrying live facial recognition entered the field in Rabat in the week of 20 July 2026 ([deployment account](#)), but no held account cites a data-protection authorisation reaching them specifically, and law 09-08 does not apply to processing in the interest of national defence and state security.

The national open-data portal runs on a four-volume procedure the digital development agency published to December 2024 ([standards manual](#)); its dataset count is not held.

## China activities

| SYSTEM OR INSTRUMENT                           | STATUS <small>↗ source</small> | AS AT |
|------------------------------------------------|--------------------------------|-------|
| Morocco-China technology cooperation framework | NOT HELD                       | —     |

The artificial-intelligence programme runs on a roadmap named in ministry statements and not published: "AI Made in Morocco", named at a national event on 12 January 2026 where the ministry framed the institute launched there as consolidating Maroc IA 2030 ([ministry account](#)).

The institutes network was signed as regional protocols before its founding institute existed — Guelmim-Oued Noun on 14 April 2025 ([Guelmim protocole](#)) and Nador on 2 July 2025, then Dakhla in November 2025 and Fez in March 2026, the founding institute following on 12 January 2026. No statute, legal form, budget, governance structure or intake has been published for any of them.

The technology sector's measured position is a year old: offshoring employment at 148,500 with MAD 26.2bn in export revenue at end-2024, against a stated 2030 target of 270,000 jobs and nearly MAD 40bn ([agreements account](#)). The agency's own start-up database, released on 3 January 2025, lists 1,028 entries and carries no funding amounts ([dataset](#)), so investment totals remain third-party.

Research and technology cooperation with the United States rests on the two states' 2006 science and technology agreement, extended by a protocol signed at Rabat on 28 July 2023 ([protocol](#)); no digital or artificial-intelligence agreement is held.

## Inclusion and capacity

### Digital divides

| Ministry-Capgemini artificial-intelligence skills memorandum | IMPLEMENTED, FRAMEWORK ONLY <small>↗</small> | Signed in Rabat 2026-07-17  |

## Research institutions

| SYSTEM OR INSTRUMENT                                                               | STATUS <small>↗ source</small> | AS AT                                                                                         |
|------------------------------------------------------------------------------------|--------------------------------|-----------------------------------------------------------------------------------------------|
| National research, development and innovation support programme (PNARDI) 2025-2028 | IMPLEMENTED <small>↗</small>   | First edition's three sub-programmes opened for applications, window 2025-06-03 to 2025-10-15 |

The largest financing on record is external: a US\$250m acceleration programme approved and signed in June 2026, whose entry into force before 23 September 2026 the ministry named as its priority ([ministry account](#)). A US\$70m identity and social-protection operation was approved in December 2024 ([approval account](#)), and two development-bank grants entered the pipeline in 2026. Domestically the digital ministry's published budget puts its investment appropriation at MAD 1,758.7m in 2024, against MAD 11.7m in 2021, and stops there ([ministry budget](#)).

Research funding is domestic and not digital-specific: the programme launched at Benguerir on 7 April 2025 commits MAD 1bn from a joint higher-education ministry and OCP Group fund across four editions to 2028, MAD 200m of it for researchers resident abroad, with no digital or artificial-intelligence share stated ([launch account](#)).

Skills commitments are frameworks without sums: a memorandum with a consultancy on artificial-intelligence skills was signed in Rabat on 17 July 2026 with no value or target ([memorandum account](#)). The one enrolment figure held is the ministry's own: 21,125 students in public-university digital streams in 2023-24, from 10,712 the year before ([talent brochure](#)). No national digital inclusion index exists and no digital literacy programme is named.

Gaps to fill

| SYSTEM OR INSTRUMENT                                                         | WHAT WOULD SETTLE IT                                                                                                                                                                                                                                                                                                               | LAST PROBED |
|------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| Morocco-China technology cooperation framework                               | A signed state-to-state instrument; the base holds six sources on this subject and every one is a vendor relationship, with no government-level framework on file                                                                                                                                                                  | 2026-08-06  |
| Morocco-United States bilateral digital or artificial-intelligence agreement | A signed bilateral instrument on digital or artificial-intelligence cooperation; the base now holds the 2023 protocol extending the two states' 2006 science and technology agreement, which is not one, and otherwise a commercial guide, ambassadorial attendance at two openings and an unresolved satellite licensing position | 2026-08-06  |
| Founding decree or statute for the Al-Jazari institutes                      | The founding agreements or the constituting decree; the base now holds the ministry's own accounts of four regional or thematic signings from 2025-04-14 and of the founding institute launched 2026-01-12, and no statute, legal form, governance structure, budget, campus or intake for any of them                             | 2026-08-06  |
| National artificial-intelligence roadmap "Morocco AI 2030"                   | The roadmap text or a ministry announcement of the roadmap itself; the ministry's 2026-01-12 record names "AI Made in Morocco" as a national event and frames the founding institute as consolidating Maroc IA 2030, so the two names are an event and a framework rather than two roadmaps, and no text of either is held         | 2026-08-06  |
| Official start-up investment statistics                                      | A publication by the digital development agency, the investment agency or the ministry giving funded-company counts and amounts; the agency's own 1,028-entry start-up database (2025-01-03) carries no funding amounts, and investment totals remain two third-party trackers whose 2025 Morocco figures disagree                 | 2026-08-06  |
| Start-up legal status                                                        | A bill, decree or published legal definition of start-up status; the base carries a 3,000-start-up target and several accelerator programmes, and no instrument conferring status                                                                                                                                                  | 2026-08-06  |
| Commune-level rollout of the procedures portal                               | Interior ministry or local-government reporting on commune-level implementation; the subject carries no Morocco sources at all, and local government appears only as the addressee of national circulars                                                                                                                           | 2026-08-06  |
| Accession to the modernised Council of Europe data-protection convention     | The ratification or accession instrument for the modernising protocol, or a statement that Morocco has not acceded to it; accession to Convention 108 itself is now established from the 2012 committee opinion and the regulator's recital of a 2019 ratification, and nothing on file addresses the modernised text              | 2026-08-06  |
| Ombudsman's 2025 annual report                                               | The report's own text; it was presented in Rabat on 2026-07-23 and is known only through two press accounts, and the wiki records that the institution's own site is unreachable                                                                                                                                                   | 2026-08-06  |

| SYSTEM OR INSTRUMENT                                             | WHAT WOULD SETTLE IT                                                                                                                                                                                                                                                                                                                                                                                                                   | LAST PROBED |
|------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| Promulgated organic law amending the electoral code              | The gazette publication of the enacted electoral organic law; the base holds the bill as tabled with its provisions, and no held source carries the adoption or constitutional-review dates, so every citation must say it rests on the draft                                                                                                                                                                                          | 2026-08-06  |
| Digital Morocco 2030 progress report                             | An official progress or monitoring publication against the strategy's stated targets; the base carries the targets and no delivery figure against any of them at any date                                                                                                                                                                                                                                                              | 2026-08-06  |
| Data-protection authorisation for the facial-recognition patrols | A data-protection commission decision, authorisation or opinion covering live facial recognition in the patrol vehicles; the base now holds the commission's 2019-2020 facial-recognition instruments and its 2025-03-21 decision to open hearings towards a video-surveillance deliberation, none of which reaches the patrols, and law 09-08 article 2(4) excludes processing in the interest of national defence and state security | 2026-08-06  |
| Data-protection commission annual report                         | Any annual or activity report of the national data-protection commission; the base now holds four of its deliberations and two communiqués directly, and still no enforcement statistics, registration counts or sanction record for any year                                                                                                                                                                                          | 2026-08-06  |
| National digital literacy programme                              | A named national digital-literacy or basic-skills programme document, or a household digital-skills survey; the base now holds public-university digital enrolment and a training count from the ministry's talent brochure, and nothing on citizen-level literacy                                                                                                                                                                     | 2026-08-06  |
| Digital ministry appropriation in the 2026 finance law           | The 2026 finance law or the ministry's budget annexes for 2025 and 2026; the ministry's own budget-by-chapter series is now held to 2024 and stops there, so no appropriation is established for either year the report covers                                                                                                                                                                                                         | 2026-08-06  |
| National digital inclusion index or indicator framework          | A ministry or planning-commission publication defining inclusion indicators and targets; the base carries the published finding that inclusion objectives are not operationalised and a connectivity baseline from a private tracker, and no Moroccan inclusion index, vulnerability profiling or territorial targeting instrument                                                                                                     | 2026-08-06  |
| National cybersecurity workforce plan                            | A government plan or published target for cybersecurity skills; the base holds one vendor study's figures of 6,000 certified professionals against demand above 12,000, and a general target of training 100,000 people by 2030, with no cybersecurity-specific plan, intake target or progress reporting                                                                                                                              | 2026-08-06  |

The first group is instruments the base can name but not read: the national cloud roadmap, the 2023 cybersecurity strategy, the registry's founding law, and the promulgated electoral organic law whose draft this report cites — which the probe of 6 August located, adopted and ruled constitutional, with its two companion organic laws. The 2021 law credited with requiring local storage of sensitive data is not on file under any number; the base holds the 2025 cloud decree instead.

The second is measurement. The regulator's market observatory is absent for every period, so every subscriber and coverage figure here reaches the wiki through a private measurement firm's article; the probe of 6 August found it publishing quarterly observatories to the first quarter of 2026, so the gap is intake rather than publication. There is no cybersecurity workforce plan, no official start-up investment amounts, no inclusion index, and no appropriation for the digital ministry after 2024.

The third is oversight of what has been deployed: no data-protection authorisation for the patrols, and no annual report of the data-protection commission at any year. Commune-level digitisation and citizen digital literacy carry no Morocco sources at all.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
