Governance

Strategies, plans and policies

- **Zanzibar launches new system to fix stalled projects** — The Citizen, 10 September 2026 TANZANIA

Zanzibar's government is introducing a monitoring framework to curb delays in development projects, its deputy minister for finance and planning told the House of Representatives at Chukwani. No system name, supplier, cost or timetable is given. *Also under [Sectoral management information systems](#).*
- **US tech giants flag Kenya investment risks** — Daily Nation, 10 September 2026 KENYA

Executives from four large United States technology and payments companies told a Nairobi business summit that unpredictable taxes, regulations and approvals could deter new capital from Kenya. They said investors need policy certainty to commit and expand, a warning aimed at the country's bid to be East Africa's digital investment hub. *Also under [ICT Industry](#) and [US / hyperscaler activities](#).*
- **Uganda Targets AI Sovereignty, Minister Says** — Nile Post, 10 September 2026 UGANDA

Uganda is developing an artificial intelligence strategy aimed at building national capacity to develop, govern and benefit from the technology rather than depend on foreign systems, its science and technology minister said. He named data, computing infrastructure, energy, models, applications and skills as the foundations that need investment. *Also under [AI](#).*
- **Serikali: Uchumi wa kidijitali unahitaji uwekezaji zaidi** — Mwananchi, 10 September 2026 TANZANIA

Tanzania's digital economy needs more investment, the deputy communications minister said at a tower company's fifteenth anniversary event in Dar es Salaam. The operator is targeting 4,500 sites in the country by the end of 2026, against more than 4,000 now. *Also under [Connectivity](#) and [Rural digital data capture](#).*
- **Oversight and supervision in open finance: Considerations for African regulators** — Cenfri, 10 September 2026 AFRICA

A research organisation sets out what African regulators need to weigh in supervising open finance, on the argument that the evidence of financial reliability for millions of people sits scattered across mobile wallets, savings groups and informal ledgers. Connecting that data, it argues, is how providers could design products for the unbanked and underbanked. *Also under [Data protection](#) and [Access to services](#).*
- **Nigeria Shifts From Regulation to Market Enablement to Attract Digital Infrastructure Investment** — Tech Africa News, 10 September 2026 NIGERIA

Nigeria's technology development agency is shifting from a traditional regulatory posture to actively enabling market growth and private investment in digital infrastructure, its director-general said in a fireside chat at a Nairobi conference. The session formed part of a workshop on the country's digital infrastructure opportunity. *Also under [Data Storage](#) and [ICT Industry](#).*

- **Modernisation de la justice : Les plateformes e-Justice et Jokko Ak Yoon officiellement lancées** — Seneweb, 10 September 2026 SENEGAL

Senegal officially launched two judicial digital platforms at the Lat Dior courthouse in Dakar, in a ceremony chaired by the justice minister's chief of staff. The launch is presented as a turning point in the modernisation and citizen accessibility of the judicial system. *Also under [Other GovTech](#) and [e-Gov](#).*

- **Malawi set to introduce digital ID wallet** — Malawi24, 10 September 2026 MALAWI

Malawi's national registration bureau is to introduce a digital identity wallet, giving citizens a digital version of their national identity alongside the existing physical card. It is presented as an additional way of presenting and accessing identification as use of digital services grows. *Also under [Digital Identity](#) and [CRVS](#).*

- **Intelligence artificielle : à Séoul, le Burundi présente ses ambitions** — wearetech.africa, 10 September 2026

BURUNDI

Burundi presented the ambitions of its national artificial intelligence strategy at the Korea-Africa economic cooperation ministerial in Seoul, seeking the financing and partnerships to turn it into concrete projects. The strategy, validated in April, provides for strengthening connectivity, data infrastructure and local skills; the country's digital capacity remains limited. *Also under [AI](#).*

- **Impact IA 2026 : la Côte d'Ivoire veut passer de la stratégie à l'exécution** — Linfodrome, 10 September 2026

CÔTE D'IVOIRE

The second edition of Cote d'Ivoire's national conference on artificial intelligence opened in Abidjan under the Prime Minister's patronage, on the initiative of the digital transition and technological innovation ministry. Accounts of the event differ on which day it opened. *Also under [AI](#).*

- **GovTech 2026: SA marks 20 years, pushes digital sovereignty in Durban** — The Citizen, 10 September 2026

SOUTH AFRICA

South Africa marks twenty years of its government technology conference when the 2026 edition opens in Durban, hosted by the state IT agency with the communications department. It brings together government, industry, academia, entrepreneurs and citizens, with digital sovereignty among its themes. *Also under [Other GovTech](#) and [e-Gov](#).*

- **Governo prioriza modernização do Estado, ação climática e juventude na parceria com a ONU** — Expresso das Ilhas, 10 September 2026 CAPE VERDE

Cabo Verde's prime minister named state modernisation and digital transformation, alongside climate action, decentralisation and youth opportunity, as the government's priorities for the new phase of its United Nations partnership, at a high-level meeting with the country team in Praia. *Also under [Other GovTech](#) and [e-Gov](#).*

- **FG scraps data charges for students** — Vanguard, 10 September 2026 NIGERIA

Nigeria's federal government unveiled an initiative for zero-rated access to educational platforms and content, letting students reach approved platforms without paying for internet data. The education minister presented it as removing one of the largest barriers to technology-driven learning; the government also signalled moves to regulate internet access for under-16s. *Also under [Access to services](#) and [Connectivity](#).*

- **Emergent data governance: Operationalising big data analytics in state agencies in Kenya** — South African Journal of Information Management (SAJIM), 10 September 2026 KENYA

A peer-reviewed study of how Kenyan state agencies operationalise big data analytics, published in a South African information-management journal. It examines the data governance that emerges in practice as public-sector uptake grows. *Also under [Standards](#) and [Other GovTech and e-Gov](#).*

- **Djibouti à la conquête de l'espace : un pari sur la science, la souveraineté et l'avenir** — La Nation, 10 September 2026 DJIBOUTI

State media traces Djibouti's space programme since its launch in 2020 as the head of state attends the first international space summit in Paris. It records the training of the country's first specialists and the design and orbiting of two nanosatellites among the steps taken. *Also under [Use of satellite data](#).*

- **Côte d'Ivoire : le ministre Djibril Ouattara appelle à passer de la stratégie à l'exécution de l'intelligence artificielle** — Agence Ivoirienne de Presse, 10 September 2026 CÔTE D'IVOIRE

Cote d'Ivoire's digital transition minister called for a move from artificial intelligence strategy to execution at the opening of the second national AI conference in Abidjan. It now falls to the country to take a new step and deploy solutions concretely for people's benefit, he said. *Also under [AI](#).*

- **ATU calls for stronger spectrum policy as Africa prepares for WRC-27** — TechReviewAfrica, 10 September 2026 TUNISIA AFRICA

The African telecommunications union's secretary-general called for stronger alignment among African administrations on spectrum policy, at the 11th Africa spectrum management conference in Tunis. He singled out the mid-band ranges where mobile broadband demand will need capacity and coordination, and argued that policy must extend beyond identifying frequencies to how spectrum is priced and licensed. *Also under [Regional collaboration](#) and [Connectivity](#).*

- **Africa Gets a Seat at the AI Safety Table as Nairobi Hosts Global Report** — KICTANet, 10 September 2026 KENYA AFRICA

A Nairobi university hosted the first African dissemination of the International AI Safety Report 2026, convened with a foreign mission. It drew policymakers, researchers, civil society groups and technology firms around the question of whether African institutions can keep pace with a technology moving faster than the evidence needed to govern it. *Also under [AI](#).*

Legislation and regulation

- **South Africa rejects blanket social media age verification for under-16s** — Biometric Update, 10 September 2026 SOUTH AFRICA

South Africa's communications minister told parliament the government is not pursuing any blanket policy restricting under-16s from social media, saying platforms should instead strengthen their own protections against harmful content. The position separates the country from a growing number of states, several of them African, adopting age-assurance requirements. *Also under [Digital Identity and CRVS](#).*

- **South Africa is rebuilding the machinery behind its payments system** — TechCabal, 10 September 2026

SOUTH AFRICA

South Africa is rebuilding both the rules of participation in its payments system and the infrastructure underneath, three payments executives said at a Johannesburg roundtable. A proposed activity-based regulatory model would let non-banks and fintechs offer payment services directly rather than through a sponsoring bank, alongside richer payment data and faster cross-border rails. *Also under [Digital Payments and Fintech](#).*

- **Reforme bancaire : La Cote d'Ivoire redessine la frontiere avec les fintechs** — CADRECO, 10 September 2026

CÔTE D'IVOIRE

Cote d'Ivoire's banking reform folds digital finance into a wider legal architecture in which competition between banks, payment institutions, electronic money issuers, fintechs, Islamic finance and microfinance turns on licences, their obligations and their cost. The Council of Ministers adopted two bills in April as part of it. *Also under [Digital Payments and Fintech](#).*

- **Pilot operations started for the soon-to-be-launched Unified Economic Number** — Libya Herald, 10 September 2026

LIBYA

Libya's national council for the Unified Economic Number has approved the start of pilot operations for issuing the number electronically. It opens the first phase of a project to give economic, commercial and investment entities a single identity, implementing a Cabinet decision of 2026. *Also under [Digital Identity and CRVS](#), [Registries and Other GovTech and e-Gov](#).*

- **New push for tighter SIM registration to curb cyber fraud** — The Citizen, 10 September 2026

TANZANIA

Communications stakeholders in Rukwa have proposed tighter SIM card registration controls, including a 24-hour waiting period before a person may register another line, as the region records a high number of reported cyber-fraud cases. They also want the communications regulator to work more closely with other agencies on enforcement. *Also under [Cybersecurity and Digital Identity and CRVS](#).*

- **NCC Moves to Strengthen Type Approval Compliance for SIM-enabled Devices** — ThisDay, 10 September 2026

NIGERIA

Nigeria's communications regulator is strengthening enforcement of type approval for SIM-enabled devices through a technology-enabled framework, supported by a device management system that determines compliance electronically. The underlying obligation is in the communications statute, which requires approval before a device may be connected. *Also under [Standards and Connectivity](#).*

- **Mozambique's Internet Shutdown Case: African Courts Draw a Line on Executive Power** — Collaboration on International ICT Policy for East and Southern Africa (CIPESA), 10 September 2026

MOZAMBIQUE

AFRICA

Mozambique's Constitutional Council ruled in July that a government must first have lawful authority to order an internet shutdown before it can justify one. An advocacy organisation reads the ruling as requiring proof both that the power was lawfully created and that it was exercised by a legally authorised body, and sets it against a wider continental pattern of shutdowns. *Also under [Connectivity](#).*

- **Mozambique telecoms complaints surge 44%** — ITWeb Africa, 10 September 2026

MOZAMBIQUE

Mozambique's communications regulator recorded 391,723 consumer complaints in 2025, up 44 per cent on 2024, with 372,846 of the telecommunications complaints resolved and an average satisfaction index of 82 per cent. It attributes much of the rise to better recording rather than worse service, one operator's logged complaints having gone from 213 to 24,036 on a new incident-tracking system. *Also under [Standards and Connectivity](#).*

- **Kenya proposes introduction of standalone data center license** — Connecting Africa, 10 September 2026

KENYA

Kenya's communications regulator opened a 30-day public consultation on a standalone licence for colocation data centres. It says the proposal would give greater regulatory clarity, improve visibility of data-centre operations and support investment, and it follows a broader overhaul of the telecommunications market framework begun in 2025. *Also under [Data Storage](#).*

- **Guinée équatoriale : contribution des plateformes numériques en discussion** — wearetech.africa, 10 September 2026

EQ. GUINEA

Equatorial Guinea intends a mechanism letting the state capture part of the revenue large digital platforms generate in its market, a question sharpened where companies operate from abroad. The vice-president asked in Malabo for talks to be opened with one such platform and with comparable alternatives. *Also under [ICT Industry](#).*

- **CBN Demands Collective Defence Against Cyber, Technology Risks in Financial Sector** — ThisDay, 10 September 2026

NIGERIA

Nigeria's central bank warned that cybersecurity can no longer be treated as each bank's internal responsibility, because a vulnerability in one institution or technology provider can cascade through an increasingly interconnected financial system. Banks' growing reliance on fintechs, payment service providers and cloud operators has widened the channels through which incidents spread, it said, calling for a collective defence. *Also under [Cybersecurity](#) and [Digital Payments and Fintech](#).*

Data protection

- **Sierra Leone enhances child data protection in connected government systems** — TechReviewAfrica, 10 September 2026

SIERRA LEONE

Sierra Leone is strengthening safeguards for children's personal data as government institutions move toward more connected digital public infrastructure. The communication, technology and innovation ministry, with a United Nations children's agency and a digital public infrastructure centre, ran a three-day workshop on guardrails for children examining how government systems handle their data. *Also under [Other GovTech and e-Gov](#) and [Cybersecurity](#).*

- **SAPS wants to deploy AI bodycams with facial recognition** — TechCentral, 10 September 2026

SOUTH AFRICA

South African Police Service body-worn cameras must be able to conduct facial recognition, according to state IT agency tender documents. The requirement sits in the bid specification for a three-year contract covering body-worn and vehicle dashboard cameras and related software, and says the solution must also integrate with various security platforms; bids close on 29 September. *Also under [AI](#).*

- **Nigeria Links Data Sovereignty, AI to Fresh Digital Infrastructure Investment** — Leadership, 10 September 2026

NIGERIA

AFRICA

Nigeria is seeking to convert its digital policies and data-sovereignty requirements into investable opportunities for private capital through a national cloud infrastructure strategy, the technology development agency's director-general said. He was speaking at a Nairobi conference session on turning policy into investable demand. *Also under [Data Storage](#) and [AI](#).*

- **Nigeria Is Building an AI Economy. Who Will Protect Nigerians When the Algorithms Get It Wrong?** — African Arguments, 10 September 2026 NIGERIA

By the time Nigeria assembles the policies needed to regulate artificial intelligence, parts of the technology may already be in service, this piece argues. It takes as its example the open-access multilingual voice and text assistant the federal government unveiled in May with a private developer, a ministry and a research centre, and asks who answers when such systems get it wrong. *Also under [AI](#) and [Public debate and participation in policymaking](#).*

- **Oversight and supervision in open finance: Considerations for African regulators** — Cenfri, 10 September 2026 AFRICA

Summarised under [Strategies, plans and policies](#).

Regional collaboration

- **Nigeria, Cameroon launch border modernisation project to ease trade barriers** — Nairametrics, 10 September 2026 NIGERIA CAMEROON

Nigeria and Cameroon launched a border modernisation initiative for the Mfum-Ekok corridor during a joint assessment by their customs administrations. It covers border infrastructure, technology-driven solutions and the reduction of trade bottlenecks, and is presented as supporting the continental free trade area. *Also under [Data Exchange](#) and [Digital Payments and Fintech](#).*

- **Nigeria Cuts AfCFTA Export Certificate to 24 Hours As Trade with Africa Grows** — THISDAY, 10 September 2026 NIGERIA

Nigeria has cut the processing time for continental free-trade certificates of origin to 24 hours from more than five days, the trade minister announced in Abuja. She disclosed it at the third-quarter meeting of the free trade area's central coordination committee, presenting it as easing business for exporters. *Also under [Other GovTech and e-Gov](#).*

- **Kenya and Armenia Explore Digital Cooperation in AI, Cloud and Youth Skills** — Tech Africa News, 10 September 2026 KENYA

Kenya and Armenia have opened discussions on cooperation in digital technologies, education, ICT, trade and investment, after a meeting between the ICT principal secretary and Armenia's ambassador. Artificial intelligence and cloud computing were identified as potential areas alongside youth skills; no instrument has been signed. *Also under [AI](#).*

- **Kagame Seeks Removal of Technology Export Restrictions to Africa** — KT Press, 10 September 2026 AFRICA RWANDA

Rwanda's president warned at the first International Space Summit in Paris that African countries risk losing access to valuable orbital and radio-frequency resources as the global space industry expands, and urged the continent to coordinate its interests and take a stronger voice in rule-setting. He said Africa should be a full participant in the sector rather than only a consumer of satellite services, and sought the removal of technology export restrictions. *Also under [Use of satellite data](#) and [Public debate and participation in policymaking](#).*

- **Cooperation Niger - Algeria : Une delegation algerienne visite l'ESCEP dans le cadre d'un partenariat axe sur le numerique** — Le Sahel, 10 September 2026 NIGER ALGERIA

Niger's telecommunications and post college received an Algerian mission led by the adviser for partnership and development of that country's operator skills-centre network. The visit follows a partnership accord of July aimed at establishing a digital competence centre, and is presented as reflecting the two heads of state's intent. Also under [Training and skills](#).

- **Can PAPSS overcome regulatory hurdles to transform intra-African payments?** — TechCabal, 10 September 2026 AFRICA

An account of what the pan-African payment system has built in four years and the regulatory obstacles still limiting it: 30 countries connected, about 200 financial institutions, and cross-border payments settling in an average of seven seconds against a 120-second design target. The system says it has cut the cost of cross-border transfers by up to 95 per cent and that volumes have grown more than tenfold over the past year. Also under [Digital Payments and Fintech](#).

- **At ITW Africa 2026, Africa's Digital Future Came Down to Power, Fibre and Execution** — Kenya Engineer, 10 September 2026 KENYA AFRICA

At two Nairobi conferences the talk was more physical than usual, this account records: behind every model, cloud service and digital transaction, speakers returned to electricity, fibre, data centres, transmission networks, regulation, capital and the engineers needed to keep it running. Also under [Connectivity](#), [Data Storage](#), [AI](#) and [Energy](#).

Public debate and participation in policymaking

- **Le Président Guelleh au Sommet international sur l'Espace : Djibouti défend une ambition spatiale au service du développement** — La Nation, 10 September 2026 DJIBOUTI

Djibouti's president took part in the second day of the first International Space Summit in Paris, arguing for a national space ambition serving development. The summit gathered delegations from more than 120 countries, including heads of state and government, institutional leaders, scientists, commercial operators and civil society. *Also under [Use of satellite data](#).*

- **Kenya examines AI, democracy and human agency in digital governance** — TechReviewAfrica, 10 September 2026 KENYA

Kenya's special envoy on technology met a foundation representative to discuss the changing relationship between technology, democracy and human agency. The engagement covered the country's digital and artificial intelligence agenda and open government, with participation, accountability and information integrity as the stated tests. *Also under [AI](#).*

- **Intelligence artificielle en Afrique : avant le numérique, bâtir les fondations** — Fraternite Matin, 10 September 2026 AFRICA

Without reliable energy, solid infrastructure and technical skills, artificial intelligence risks deepening the continent's technological dependence rather than accelerating its development, an Ivorian engineer argues here. The piece puts the foundations before the applications. *Also under [AI](#) and [Technical Capacity](#).*

- **Intelligence artificielle : l'Afrique peut-elle échapper à une nouvelle forme de colonisation technologique ?** — Maliweb, 10 September 2026 AFRICA

Will Africa be an actor in the artificial intelligence revolution or a market absorbing technologies designed, trained and controlled elsewhere? A researcher sets out the dependence risks the continent faces, against a technology usually presented as universal and available to anyone who connects. *Also under [AI](#) and [Data Storage](#).*

- **From technological self-determination to the AI shift: The Global South must stop being mere AI consumers** — NewsDay, 10 September 2026 GLOBAL

China's pursuit of technological self-reliance offers Africa a conceptual lesson, this piece argues: technological sovereignty is not isolation but the bargaining power to make independent choices in global technical cooperation, and to escape permanent dependency. *Also under [AI](#) and [China activities](#).*

- **Cybermenaces : ce que l'ANINF dit vraiment des 900 000 alertes qui font polémique** — GabonReview, 10 September 2026 GABON

Gabon's national agency pushed back against reading its 900,000 intrusion alerts as evidence of a vulnerable national digital system, saying the figure shows a system capable of seeing threats rather than one already submerged by them. In a dossier seen by the publication it addresses the confusions in the public reaction and the controversy over firewalls. *Also under [Cybersecurity](#).*

- **AI must strengthen, not replace, INEC - Amupitan** — Vanguard, 10 September 2026 NIGERIA

Nigeria's electoral commission chairman told a conference on responsible artificial intelligence and elections in Ottawa that successful deployment in electoral administration depends more on strong institutions, governance structures and safeguards than on the sophistication of the technology. He presented the country's experience of institutionalising responsible AI for that work. *Also under [AI](#).*

Finance

MoUs and other agreements

- **Korea Eximbank expands Africa financing in AI, critical minerals** — The Korea Herald, 10 September 2026 AFRICA
Korea's export-import bank signed a pact with the African Development Bank in Seoul to expand financing for African projects in artificial intelligence, critical minerals and green infrastructure. It was signed during the eighth Korea-Africa economic cooperation ministerial, and the two institutions are to seek expanded joint financing including in digital infrastructure. *Also under [AI](#) and [New investments](#).*

New investments

- **Égypte : Zeal lève 10 millions de dollars pour dynamiser le commerce physique** — wearetech.africa, 10 September 2026 EGYPT
An Egyptian technology company has raised US\$10 million for payment tools that add a layer to shop card terminals, identifying customers at the checkout so merchants can build loyalty. The money is to take the product into the Middle East, Europe and Africa; no investor is named. *Also under [Digital Payments and Fintech](#).*
- **Greek firm Amaco partners with US energy giant for Sh194bn Mombasa data centre** — Business Daily Africa, 10 September 2026 KENYA
A Greek energy group has partnered with a United States energy-equipment company to supply gas turbines for its proposed US\$1.5 billion artificial-intelligence data centre at Mombasa. The turbines would sit in an unmotorised floating power barge feeding local or national grids, and the facility is intended to serve East African demand for computing infrastructure. *Also under [Data Storage](#) and [Energy](#).*
- **EPTC seeks E455m loan for digital transformation** — Times of Eswatini, 10 September 2026 ESWATINI
Eswatini's posts and telecommunications corporation is seeking a US\$26 million World Bank loan to finance the Digital Eswatini Project, under a bill tabled in Parliament. The bill would authorise the finance minister to issue a government guarantee of up to that amount for the loan. *Also under [Other GovTech and e-Gov](#) and [Connectivity](#).*
- **Airtel Africa to Invest \$1.1bn for Network Expansion across Africa** — ThisDay, 10 September 2026 NIGERIA
AFRICA
A pan-African operator has earmarked US\$1.1 billion for expanding and upgrading its network across its African operations, its chief executive said in a broadcast interview. He said spending has already risen from about US\$120 million to US\$390 million across 14 markets, with Nigeria its biggest. *Also under [Connectivity](#).*

ICT Infrastructure

Connectivity

- **Sentech trims losses but remains in the red** — ITWeb South Africa, 10 September 2026 SOUTH AFRICA

South Africa's state signal distributor cut its net loss after tax to R60 million in 2025/26 from R246 million, an improvement of about 76 per cent, and reported a clean audit with no material findings. The previous year's loss was driven mainly by a provision for expected credit loss reflecting customers' economic difficulties. *Also under [ICT Industry](#).*
- **New submarine cable puts Kenya's Coast on digital growth path** — The Standard, 10 September 2026 KENYA

A planned submarine cable would link Mombasa to Lamu through five landing points along Kenya's coastline, with a parallel terrestrial route to keep services running if the seabed link is disrupted. The developers say it will extend resilient connectivity along 500 kilometres of coast and support data centres, cloud services and technology businesses; the consortium is anchored on the Vipingo special economic zone. *Also under [Data Storage](#) and [ICT Industry](#).*
- **MTN South Sudan Targets Nationwide Digital Connectivity Through ICT Hubs** — Tech Africa News, 10 September 2026 SOUTH SUDAN

The operator's South Sudan chief executive restated its commitment to expanding connectivity and opportunities for young people through ICT hubs, at a youth dialogue at the University of Juba. The event was convened by a United Nations agency with the youth and sports ministry. *Also under [Training and skills](#).*
- **MTN Nigeria Crosses 100 Million Subscribers as Market Share Hits 51.76%** — Tech Africa News, 10 September 2026 NIGERIA

Nigeria's largest operator crossed 100 million active subscribers for the first time in July, ending the month at 100.86 million and 51.76 per cent of the market on regulator data. The national active base rose to 195.11 million from 192.23 million in June and teledensity reached 90 per cent, with the three other operators at 66.76 million, 23.63 million and 3.61 million. *Also under [ICT Industry](#).*
- **MTN Nigeria crosses 100 million subscribers** — ITWeb Africa, 10 September 2026 NIGERIA

A second account of the same milestone puts the operator's July gain at more than two million active subscriptions, from 98.64 million in June to 100.86 million, its strongest monthly rise of the year. Its chief executive has previously linked subscriber gains to stronger customer additions and rising data consumption. *Also under [ICT Industry](#).*
- **Interview: Liquid bets on AI as next growth frontier for Africa's fibre network** — TechTrends KE, 10 September 2026 KENYA AFRICA

The same operator is repositioning from connectivity provider to a layered artificial intelligence, cloud and cybersecurity business on top of its fibre backbone, its vice-president and chief executive said at a Nairobi conference. Connectivity becomes the foundation of digital infrastructure rather than the product, he argued, naming data-centre capacity as the concern African telecom executives raise most. *Also under [AI](#) and [Data Storage](#).*
- **FTTH Connectivity Improved in Q2 as Internet Subscribers on Core ISP Networks Hit 420,989** — ThisDay, 10 September 2026 NIGERIA

Nigeria's fibre-to-the-home subscriptions rose to 319,735 in the second quarter of 2026 from 214,750 in the first, across 99 licensed operators, on the communications regulator's statistics. Internet subscribers on core ISP networks reached 420,989 over the same period. *Also under [National statistics](#).*

- **Econet says to phase out 3G by end of 2027** — NewsDay, 10 September 2026

ZIMBABWE

Zimbabwe's largest operator will shut down its 3G network by the end of December 2027, its chief executive said, retiring 3G before 2G because 2G remains widely used in rural areas by subscribers with basic feature phones. The operator is accelerating investment in 4G and 5G. *Also under [Digital divides](#).*

- **Camtel Expands Fibre Connectivity to Schools Across Cameroon** — Tech Africa News, 10 September 2026

CAMEROON

Cameroon's state telecommunications operator is extending fibre connectivity to schools, covering communities from the northern to the southern and the eastern to the western regions. It presents the programme as digital inclusion in education, aimed at improving school internet access and pupils' reach to digital educational resources. *Also under [Access to services](#).*

- **Airtel Africa Foundation and UNICEF Connect Over 1,200 Nigerian Schools to Digital Learning** — Tech Africa News, 10 September 2026

NIGERIA

An operator's foundation and a United Nations children's agency say they have connected more than 1,200 Nigerian schools to digital learning. The foundation said working with local governments helped it identify the schools that stand to gain most, and cites a Lagos primary school where pupils use the tools and connectivity provided. *Also under [Access to services](#).*

- **The next bottleneck for African digital identity is infrastructure, not software** — Biometric Update, 10 September 2026

CAMEROON

AFRICA

The next constraint on African digital identity is physical infrastructure rather than biometrics, wallets or credentials, this account argues. It cites a US\$300 million raise by a pan-African infrastructure group for data centres, terrestrial fibre and subsea capacity, and a US\$75 million commitment to digital infrastructure in Cameroon including an AI-ready data centre at Douala with its own power plant. *Also under [Digital Identity and CRVS](#) and [Technical Capacity](#).*

ABOUT THIS DOCUMENT

EDITION	2026-09-11
RETENTION	Kept until 2026-09-18. Older bulletins: the country pages and the monthly reports.
THIS FILE	https://corpus.data-landscapers.io/bulletin/corpus-bulletin-2026-09-11.pdf
FEEDBACK	info@data-landscapers.io
LICENCE	CC BY 4.0

This bulletin is produced automatically at the end of each data collection sweep but only includes items published on the day cited in the edition, and the previous day. Items published in the last month can be found on the [country pages](#). The links to all items stored in the corpus can be found in the [catalogue](#).

Bulletins are kept for a week — the last week's editions are listed above, each at its own dated address — and are then deleted. Older material is in the country pages and the monthly reports.
