Strategies plans and policies

NITDA Inaugurates Taskforce to Drive Nigeria's National Sovereign Cloud Initiative — Tech Africa News, 25 August 2026 NIGERIA

NITDA's own account of the same inauguration sets out the sequence and the mandate: the taskforce follows the launch of the initiative's regulatory, technical, assurance and investment instruments, and is the principal multi-stakeholder mechanism for putting them into effect, with responsibilities spanning regulatory concurrence, institutional coordination, implementation monitoring, indigenous capacity and investment mobilisation. The agency states that it complements rather than replaces the statutory responsibilities of the regulators and agencies taking part. *Also under [Data Storage and Standards](#).*

Nigeria launches national cloud taskforce — ITWeb Africa, 25 August 2026

NIGERIA

Nigeria has inaugurated the National Sovereign Cloud Initiative Implementation Taskforce, moving its sovereign-cloud programme from framework to implementation. The taskforce is to align regulators, government institutions and private operators behind technical standards, cloud governance, infrastructure assurance and investment, monitor progress and clear the bottlenecks that slow adoption. Two figures frame it: Nigerian organisations are estimated to spend about US\$850 million a year on foreign cloud infrastructure, and the National Digital Cloud Policy targets US\$750 million of private cloud and data-centre investment within 24 months. *Also under [Data Storage and Standards](#).*

Niger Advances Construction of Local Electronics Plant for Smartphones, Computers and Tablets — Tech Africa News, 25 August 2026 NIGER

Niger's communications and vocational-training ministers inspected the DHY Technologie electronics assembly plant under construction at Hamdallaye in Tillabery region on 20 August, with the authorities reporting the smartphone, computer and tablet facility more than 60% built after six months. The government frames locally assembled devices for citizens and public institutions as a way to build domestic technical capacity and cut dependence on imported equipment. *Also under [ICT Industry](#).*

China offers Botswana AI support — ITWeb Africa, 25 August 2026

BOTSWANA

China's ambassador to Botswana has publicly offered artificial-intelligence cooperation in smart mining, digital government and talent training, pitching Chinese technology as a lever for the economic diversification Botswana is pursuing away from minerals. The offer is placed against Xi Jinping's July pledge at the Shanghai World AI Conference of 5,000 training places for developing countries and AI application cooperation centres for bodies including the African Union. It is a media note from an embassy, not an agreement. *Also under [China activities](#) and [AI](#).*

Kenya Appoints Martin Koyabe as Inaugural Chair of National Cybersecurity Agency — Tech Africa News, 24 August 2026 KENYA

Kenya has named Dr Martin Koyabe the inaugural non-executive chairperson of the board of its National Cybersecurity Agency, announced by ICT and Digital Economy principal secretary John Tanui, who set the new agency against the government's stated ambition to grow the digital economy to 30% of GDP. No other board member, budget or commencement date is named. *Also under [Cybersecurity](#).*

Kenya and US Business Community Deepen Cooperation on Digital Economy and AI — Tech Africa News, 24 August 2026 KENYA

Kenya's ICT cabinet secretary received an American Chamber of Commerce delegation to discuss deeper cooperation on artificial intelligence, digital skills, cybersecurity, data governance and cross-border data flows. He pressed for training programmes that end in certification and employment rather than in courses, and pointed to a September summit as the place where the discussion would become commitments. Nothing was signed, and no target, budget or timeline was set. *Also under [US / hyperscaler activities](#) and [AI](#).*

Ghana and Malawi Strengthen Digital Transformation Cooperation Through Knowledge Sharing — Tech Africa News, 24 August 2026 GHANA MALAWI

A Malawian delegation led by deputy chief secretary Stuart Ligomeka took a study tour of Ghana's Ministry of Communication, Digital Technology and Innovations, where deputy minister Mohammed Adams Sukparu presented Ghana's work on digital infrastructure, digital identity, cybersecurity, e-government, digital skills and innovation ecosystems. Ligomeka described Ghana as an important reference point for Malawi's own digital transformation and both sides proposed sustained cooperation between their technical teams; no instrument was signed and no programme, budget or timeline was announced. *Also under [Regional collaboration](#) and [Other GovTech and e-Gov](#).*

Legislation and regulation

SpaceX appeals to South Africa's regulator — Advanced Television, 24 August 2026 SOUTH AFRICA

SpaceX appeared before an ICASA panel on the draft amendments to South Africa's spectrum and spectrum-fee regulations gazetted on 15 May, calling the consultation a marked improvement on the existing regime while pressing the regulator over its delay in licensing the operator. Its pointed request was that ICASA say how the minimum 30% equity stake for historically disadvantaged groups applies to the new gateway and user-terminal licence categories. The source dates the hearing only as "last week", which places it in the week of 17–21 August without establishing a day. *Also under [Connectivity](#) and [US / hyperscaler activities](#).*

Nigeria SEC toughens crypto rules — ITWeb Africa, 24 August 2026 NIGERIA

Nigeria's Securities and Exchange Commission has issued draft rules setting minimum capital at N500 million for digital asset platform operators and real-world asset tokenisation platforms and N200 million for virtual asset service providers, on a N30 million registration fee and a fidelity insurance bond covering at least a quarter of paid-up capital. Operators serving Nigerian residents would have to be locally incorporated with a resident top executive,

and no digital asset business could target the market without SEC approval. The article's headline figure of \$1.41m does not reconcile with the naira amounts it goes on to give, and is not repeated here. *Also under [Digital Payments and Fintech](#).*

MTN expects Nigeria rebound as airtime lending resumes — TechCabal, 24 August 2026

NIGERIA

MTN Nigeria has resumed airtime lending, suspended in April when the consumer watchdog brought the service under new licensing and consumer-protection requirements. The operator restarted on four vendors with its lending base cut to about a quarter of the first-quarter run rate, at a stated cost of around 50 billion naira (US\$37.1m) to first-half revenue, and expects the whitelisted customer base to rebuild through the second half. The jurisdictional dispute the suspension turned on — whether airtime credit is telecoms or consumer lending — is still before the Court of Appeal. *Also under [Digital Payments and Fintech](#) and [ICT Industry](#).*

Kenya's crypto party is over. Now comes the compliance bill. — TechCabal, 24 August 2026

KENYA

An assessment of what Kenya's new virtual asset regime will cost the firms it covers, arguing that licence fees are the smaller part of it beside capital, ring-fencing, audit, cybersecurity and specialist staff. Thresholds are low or absent at the specialist end — no minimum paid-up capital for virtual asset investment advisors, KES 10 million for tokenisation providers, KES 20 million for asset managers and ICO providers — so smaller local firms have a way in while stablecoin issuers and offshore platforms face the heaviest requirements and the closest scrutiny. Businesses have until 4 November to transition. *Also under [Digital Payments and Fintech](#).*

Data protection

The Please Call Me millions: The data that didn't exist — ITWeb South Africa, 25 August 2026

SOUTH AFRICA

A reconstruction of the twenty-year Please Call Me claim against Vodacom turns on the operator's position that the data needed to value the idea did not exist: it told the Constitutional Court it retains only six months of operational data and holds no record linking a Please Call Me message to any call it induced, so both sides' figures were modelled rather than measured. Court documents record that Vodacom decided in 2013 not to track the revenue, having been advised to, and the settlement reached at the end of 2025 is confidential, so the amount is not on the record. The case is a data-retention and record-keeping story as much as a compensation one. *Also under [ICT Industry](#).*

Ghana and UK Deepen Cybersecurity Cooperation to Tackle Cybercrime and Protect Children — Tech Africa News, 25 August 2026

GHANA

Ghana's Cyber Security Authority reports talks with the British High Commission on deepening cyber cooperation, covering cyber-enabled crime and financial fraud, child online protection, capacity building and international cyber governance, with the Pall Mall Process and wider African participation in it a particular focus. No agreement, instrument, funding or timeline is announced; it is an engagement reported as discussion. *Also under [Cybersecurity](#) and [Regional collaboration](#).*

NIGERIA

KENYA

SOUTH AFRICA

AWS is pitching a sovereign-by-design cloud to African enterprises as localisation rules tighten around where data may be held — Nigeria's central bank on payments, South Africa's data and cloud policy, Kenya's civil-registration rules and Rwanda's financial and telecoms requirements. Its executive in residence told a Johannesburg summit on

19 August that the company complies with the laws of the hundred-plus countries it operates in. The trade-off is cost: in-country hosting can cut latency below 15 milliseconds but is dearer where power is unreliable, and hybrid arrangements deepen rather than reduce dependence on the same platforms. *Also under [AI](#) and [Data Storage](#).*

Regional collaboration

ITU launches Sub-Saharan broadband push — ITWeb Africa, 25 August 2026

MALAWI

The ITU has opened a five-day intermediate GIS and data-management course in Lilongwe for broadband-mapping practitioners from Malawi, Zimbabwe, Botswana and Zambia, hosted by the Malawi regulator MACRA, funded by the European Union and delivered by Esri South Africa College. It sits under the Africa-BB-Maps project, which runs to 2028 and is meant to establish or strengthen harmonised national broadband mapping in eleven sub-Saharan regulators, from Benin and Botswana to Uganda, Zambia and Zimbabwe. *Also under [Connectivity](#), [Digital divides](#) and [National statistics](#).*

Development of Data Centre Infrastructures Underpinning the Digital Economy (PIDA project prospectus) —

African Union / AUDA-NEPAD (PIDA), 25 August 2026

CAR

A continental infrastructure prospectus would put six new data centres in Burundi, the Central African Republic, Sao Tome and Principe, Chad, Equatorial Guinea and Gabon, and reinforce five existing centres in Angola, the Republic of Congo, Cameroon, Rwanda and the Democratic Republic of the Congo. It is costed at US\$9m across the eleven countries, is a quarter of the way through, and is still at project-definition stage. *Also under [Data Storage](#) and [Cybersecurity](#).*

Public debate and participation in policymaking

Data Is Botswana's New Diamond — Taavi Erkkola (LinkedIn Pulse), 24 August 2026

BOTSWANA

A named-analyst argument that Statistics Botswana is moving from custodian of data to active enabler of open data, on the evidence of its microdata portal, a move towards SDMX standards and a hackathon run with the Botswana Digital Innovation Hub and Team Europe. It is direct about what the office's own internal reviews found in the way — ambiguous legal language on the portals, non-commercial licensing clauses that disqualify datasets from counting as

open, and departments with no incentive to publish timely structured data — and rests the case for urgency on youth unemployment that Statistics Botswana puts at 55.6% for 18-24 year-olds and 38.2% across 15-35. The piece carries no visible publication date and is dated here by retrieval. *Also under [Open data](#), [National statistics](#) and [Innovation ecosystem](#).*

Finance

New investments

South Korea Approves \$170 Million Loan for AI and Digital Training Institute in Tanzania — Tech Africa News, 25 August 2026 TANZANIA

South Korea has approved a US\$170 million concessional loan from its Economic Development Cooperation Fund to build an artificial-intelligence and digital training institute in Tanzania, covering campus and laboratory construction, programmes in AI, robotics, data analytics and the internet of things, equipment, curriculum and operations support, tied to procurement from Korean firms. Further training institutes and a large-scale data centre are said to be planned. The source gives no approval or signature date, only its own publication date, so the loan is not recorded as a dated commitment in the finance layer. *Also under [Training and skills](#) and [AI](#).*

Collective X adopts 'always on' approach to skills fund — ITWeb South Africa, 25 August 2026 SOUTH AFRICA

The South African non-profit Collective X has removed the fixed application windows on its R200 million Digital Skills Impact Fund, so employers can apply year-round for co-funding of work-integrated digital skills programmes. It reports more than 1,800 young people through the fund across all nine provinces, 97% of them absorbed into employment and over 75% still employed after six months, against targets of 40,000 digitally skilled workers a year by 2030 and 500,000 young people into digital roles by 2034. The R200 million is a standing application envelope rather than a commitment to a named recipient. *Also under [Training and skills](#).*

2025 Africa Tech Venture Capital — Partech Partners, 25 August 2026

Partech's annual account of African tech venture capital reports that 2025 diverged from the global market's concentration on artificial intelligence, with growth instead in enterprise software, e-commerce, cleantech and mobility, and Series A and B activity picking up in both deal count and capital. Its headline finding is debt: debt financing passed its 2021 peak and made up almost half of all capital raised, which the authors read as a sign that more companies now have the cash-flow visibility and governance to borrow rather than dilute. The page carries no date of its own and is captured here as a reference study. *Also under [Innovation ecosystem](#).*

Tech Credit Fund Backs Women-Owned Molotel's Expansion of Digital Connectivity in South Africa — Tech Africa News, 24 August 2026 SOUTH AFRICA

A private credit platform has extended a structured debt facility of undisclosed size to Molotel, a wholly women-owned South African internet service provider holding both service and network licences from the regulator. The money funds continued fibre, wireless, LTE and hybrid rollout into underserved metropolitan and township areas across five provinces. *Also under [Connectivity](#).*

Stellar x CV Labs Accelerator : trois fintechs africaines selectionnees — wearetech.africa, 24 August 2026

Three African payment firms have been selected for a twelve-week accelerator run by the Stellar foundation, offering training, expert advice and funding of up to US\$150,000 to build out cross-border payment and remittance platforms. The figure is a ceiling rather than a commitment, and the countries the three operate in are not named. *Also under [Innovation ecosystem](#).*

New capital quadruples Frogfoot's fibre rollout — ITWeb South Africa, 24 August 2026

SOUTH AFRICA

New investors have subscribed for shares in South African fibre network operator Frogfoot and its Vivica Group sister companies Vox and Hypa, in a transaction implying a combined after-debt equity value of R8.4 billion, with the DNI Consortium the largest shareholder grouping and RMB adviser and funder. The stated purpose is to quadruple Frogfoot's connection rate to 360,000 homes a year within twelve months, aimed at townships and lower-income communities and claimed to create more than 5,000 direct jobs. No subscription amount is disclosed, so the R8.4 billion is a valuation rather than the capital committed. *Also under [Connectivity](#) and [Digital divides](#).*

Blockradar Hits \$1 Billion in Transaction Volume as Stablecoin Infrastructure Scales — Tech Africa News, 24 August 2026

Stablecoin infrastructure provider Blockradar says it has processed more than US\$1 billion in transaction volume, supporting hundreds of fintech businesses across more than 20 countries. The company puts the use cases at cross-border supplier payments, remittances and conversion between stablecoins and local currencies. The figure is the company's own and no country breakdown is given. *Also under [Digital Payments and Fintech](#).*

Askya wants to build 'tech Dangotes' starting with 10 African AI startups — TechCabal, 24 August 2026

Askya Investment Partners has opened applications for a six-week programme for ten African AI startups, with a minimum commitment of US\$200,000 to at least one participant and no cash fee or equity required to take part. Its founder, previously at Proparco's venture programme and chief executive of Digital Africa, distinguishes it from an accelerator on the grounds that accelerators are built to end in a fundraise. *Also under [AI](#).*

AMAN and noon Egypt Partner to Expand Digital Financing for Online Shoppers — Tech Africa News, 24 August 2026

EGYPT

AMAN Consumer Finance has agreed to integrate its consumer credit as a direct payment option on noon's Egyptian e-commerce platform, letting approved customers finance purchases at checkout against an existing credit limit. AMAN says it runs over 150,000 payment points nationwide. No deal value, volume or timetable is published. *Also under [Digital Payments and Fintech](#).*

84 M&A deals worth \$11.4 billion in disclosed value recorded so far in 2026 — TechCabal, 24 August 2026

A trade researcher counted 84 mergers and acquisitions in Africa's digital economy worth an estimated US\$11.4 billion in disclosed value between 1 January and 17 August, past the 68 recorded across the whole of 2025. Financial services led on 27 deals and the targets clustered in South Africa, Nigeria and Egypt, with MTN Group's proposed US\$6.2bn purchase of 75% of IHS Towers the largest disclosed value. Set against US\$1.44 billion raised by startups in the first half, the exit route is now larger than the entry one; the count is disclosed value only. *Also under [ICT Industry](#).*

Connectivity

Tmcel begins ANGOSAT-2 satellite trials — ITWeb Africa, 25 August 2026

MOZAMBIQUE

ANGOLA

Mozambique's state operator Tmcel has begun proof-of-concept testing of Angola's ANGOSAT-2 satellite, a step towards a commercial agreement to carry communication and broadcasting signals across Mozambique over Angolan space infrastructure. It follows the public broadcaster's own trial transmitting television by the same satellite and implements a bilateral memorandum signed in June. Angola is running a parallel pilot with Telecom Namibia for satellite backhaul, both framed as work under the SADC regional infrastructure master plan. *Also under [Use of satellite data](#).*

Fibre is changing Nigeria's Internet. The hard part is getting everyone connected — TechCabal, 25 August 2026

NIGERIA

Fibre has overtaken fixed wireless as Nigeria's largest fixed-broadband technology for the first time, with fibre-to-the-premises connections rising from 84,141 in late 2025 to about 265,000 by June, and the median fixed download speed up 155% since 2023 to 34.47 Mbps on Ookla's data. The gain is concentrated at the bottom of the distribution — the slowest tenth of connections improved almost threefold while the fastest tenth barely moved — so the country is raising its broadband floor rather than its ceiling. What follows is harder: affordability, the cost of rural build, and long-distance fibre concentrated among the few operators able to fund backbone, with the Wholesale Fixed Broadband Market Assessment the instrument meant to force sharing and open access. *Also under [Digital divides](#) and [Rural digital data capture](#).*

Côte d'Ivoire – Raxio Group — Raxio Group, 25 August 2026

CÔTE D'IVOIRE

Raxio's own page for CIV1, its Côte d'Ivoire facility, describes the country's first carrier-neutral Tier III data centre, built at Grand Bassam inside the VITIB technology village 30 km from Abidjan, with 2,000 square metres of white space on major fibre routes and serving the wider UEMOA region. It is an undated operator product page captured today, so it records the facility's specification rather than any event. *Also under [Data Storage](#).*

Top ICT tenders: Inmates to get telecoms upgrade — ITWeb South Africa, 24 August 2026

SOUTH AFRICA

South Africa's correctional service has put a fifteen-year contract out to tender for an inmate communication system across 243 centres, replacing copper telephony it says has deteriorated beyond support for about 166,000 prisoners. The winning supplier would design, install, integrate, operate and maintain it and tie it to the inmate cash system so airtime is bought from prisoners' own balances, with monitoring, recording, data storage and compliance in scope. No contract value is published and bids close on 14 September. *Also under [Other GovTech](#) and [e-Gov](#).*

Tanzania President Mwinyi Reviews TTCL's Digital Connectivity Expansion in Zanzibar — Tech Africa News, 24 August 2026

TANZANIA

Zanzibar's president Hussein Ali Mwinyi was briefed on TTCL's connectivity work at the state operator's pavilion during the Kizimkazi Festival, covering the National ICT Broadband Backbone's rollout across the islands, the Faiba Mlangoni Kwako fibre-to-the-home service and the National Internet Data Centre's cloud and colocation offering. It is a courtesy visit rather than an announcement: no new investment, target or date is attached to any of it. *Also under [Rural digital data capture](#).*

MTN is finding its next growth engine outside South Africa — TechCabal, 24 August 2026

SOUTH AFRICA

NIGERIA

MTN's first-half 2026 results put group service revenue up 17.5% in constant currency to R115.3 billion, with the growth concentrated away from home: Ghana, Nigeria, Uganda, Côte d'Ivoire and Cameroon were among the strongest contributors while South Africa managed 1.5%. Data revenue rose 29.2% against 2.4% for voice, the

customer base reached 317.7 million, and almost R20 billion of capital expenditure was committed in the half. Nigeria is guided to at least low-20% service-revenue growth and Ghana to the mid-to-upper 30s, against low-to-mid single digits in South Africa. *Also under [Digital Payments and Fintech](#) and [ICT Industry](#).*

MTN Group Limited – Financial results for the six months ended 30 June 2026 – MTN Group Limited (JSE SENS), 24 August 2026

SOUTH AFRICA

NIGERIA

GHANA

UGANDA

CÔTE D'IVOIRE

CAMEROON

MTN's own half-year booklet settles a figure its two trade-press accounts disagreed on: active data subscribers rose 9.1% to 179.3 million, not 10.3%, which is the growth in wholesale revenue on the same page. Fintech is the line the group leads on – 13.0 billion transactions in the half carrying US\$330.5 billion, up 33.8% in constant currency, on 70.8 million monthly active mobile-money users. Group service revenue was R115.3 billion, up 17.5% in constant currency, with the gains concentrated outside the home market. *Also under [Digital Payments and Fintech](#) and [ICT Industry](#).*

Internet : le Nigeria choisit IAI et Thales Alenia Space pour acquérir deux nouveaux satellites – wearetech.africa, 24 August 2026

NIGERIA

Nigeria's Federal Executive Council has approved the acquisition of two high-throughput communications satellites, NIGCOMSAT-2A and 2B, to be built by Thales Alenia Space and Israel Aerospace Industries. The operator puts 2A in orbit by the end of 2028 and 2B in 2029 or 2030. The award breaks with the Chinese partnership behind NigComSat-1, which failed within eighteen months of its 2007 launch, and NigComSat-1R, now near the end of its design life; no contract value is published and negotiation precedes manufacture. *Also under [Use of satellite data](#).*

FiberOne expands to seven Nigerian states, steps up community investment – BusinessDay NG, 24 August 2026

NIGERIA

FiberOne Broadband says it will extend its fibre network into Abeokuta, Edo, Ondo, Delta, Kano and Kaduna before the end of 2026, adding to a footprint in Lagos, Abuja, Port Harcourt, Ilorin and Ibadan. The rollout is paired with community works in Lagos, a free engineering training academy that offers its best trainees employment, and a schools connectivity programme rising from 10 schools in 2025 to 30 in 2026. *Also under [Digital divides](#) and [Training and skills](#).*

FiberHome tour targets Kenyan 6G – ITWeb Africa, 24 August 2026

KENYA

At the Nairobi leg of FiberHome's world tour, Kenya's principal secretary for broadcasting and telecommunications Stephen Isaboke said the country would deepen its partnership with the Wuhan-headquartered vendor, citing specialised training for Kenyan students and plans for an East African research and development centre, and framing the work against satellite connectivity, all-optical networks and an eventual move to 6G. FiberHome has operated in Kenya since 2017 and has built segments of the 100,000-kilometre Digital Superhighway; no target, budget or timeline is attached to the intent stated here. *Also under [ICT Industry](#) and [China activities](#).*

Cell C Reports ZAR 4.16 Billion Profit as Turnaround Gains Strengthen FY26 Performance – Tech Africa News, 24 August 2026

SOUTH AFRICA

Cell C reported profit after tax of ZAR 4.16 billion for the year to 31 May 2026, on total revenue of ZAR 12.64 billion and service revenue of ZAR 11.64 billion, with earnings per share of 2,338 cents. Prepaid service revenue grew 9.7% to ZAR 5.51 billion past 8 million subscribers and wholesale revenue 20% to ZAR 1.65 billion as the MVNO base reached 5.71 million; free cash flow was ZAR 1.06 billion. *Also under [ICT Industry](#).*

Christine Imoukhuede utilise l'IA pour structurer l'événementiel — wearetech.africa, 24 August 2026 NIGERIA

A trade-press profile of Christine Imoukhuede, the Nigerian accountant who founded Ahavaplan in 2021 to run event management on a single platform covering budget, calendar, tasks and documentation. Its assistant drafts proposals, builds schedules and shortlists suppliers, with the founder's pitch resting on automating administration rather than replacing the organiser. *Also under [Innovation ecosystem](#).*

Standard Chartered Foundation Launches Women in Tech Accelerator in Egypt — Tech Africa News, 24 August 2026 EGYPT

Standard Chartered Foundation, Entlaq and Village Capital have opened a second Egyptian cohort of their Women in Tech Accelerator, taking 12 women-led technology start-ups through investment-readiness training and mentorship, with USD 35,000 in equity-free grants to be split between three of them at the close. The 2025 first cohort drew 240 applications and backed 11 start-ups; Entlaq's Women in Entrepreneurship Report 2025 puts the funding gap facing Egyptian women founders at an estimated USD 2.2 billion. *Also under [Training and skills](#) and [Digital divides](#).*

Presentation — Ecole Supérieure Africaine des TIC (ESATIC) — ESATIC, 25 August 2026 CÔTE D'IVOIRE

Côte d'Ivoire's Ecole Supérieure Africaine des Technologies de l'Information et de la Communication, created by decree in 2012 and supervised by the Ministry of Digital Transition, describes itself as a public higher-education institution training ICT professionals and carrying a research and development mandate, with more than 900 students enrolled for 2025-2026. It succeeds two earlier posts-and-telecommunications schools running back to 1967. This is a standing institutional page with no publication date of its own, captured today. *Also under [Research institutions](#).*

Institut superieur de technologie (Universite de Bangui) — Universite de Bangui, 25 August 2026 CAR

The University of Bangui's technology institute describes itself as the source of most of the Central African Republic's professional engineering graduates, across civil, industrial, computing, mining and geological engineering, and runs a master's in engineering sciences. It is the first university or research document the base holds for the country, and it publishes no enrolment or output figure of its own. *Also under [Research institutions](#).*

ABOUT THIS DOCUMENT

EDITION	2026-08-25-3
RETENTION	Kept until 2026-09-01. Older bulletins: the country pages and the monthly reports.
THIS FILE	https://corpus.data-landscapers.io/bulletin/corpus-bulletin-2026-08-25-3.pdf
LICENCE	CC BY 4.0

This bulletin is produced automatically at the end of each data collection sweep but only includes items published on the day cited in the edition, and the previous day. Items published in the last month can be found on the [country pages](#). The links to all items stored in the corpus can be found in the [catalogue](#).

Bulletins are kept for a week — the last week's editions are listed above, each at its own dated address — and are then deleted. Older material is in the country pages and the monthly reports.
