Governance

Strategies, plans and policies

- [2030 مصر الرقمية بحلول](#) – [وزارة الاتصالات تستهدف إتاحة 400 خدمة على منصة مصر الرقمية بحلول 2030](#) (Hapi Journal), 9 September 2026

EGYPT

Egypt's communications minister Raafat Hendy put the Digital Egypt platform at about 245 live services and set a target of more than 400 by 2030, and said a digital identity platform has launched so that transactions requiring personal verification — powers of attorney, notarisation — can be completed without attending an office. He also said an integrated data centre strategy is being prepared for launch by the end of 2026, and that outsourcing exports reached \$5.1bn in 2025 against an \$8bn target for 2028; ITIDA put outsourcing employment above 195,000, from about 90,000 in 2021. The report is of the minister's remarks to a business delegation, and none of the targets carries a published implementation document. *Also under [Other GovTech and e-Gov](#), [Digital Identity and CRVS](#), [Registries](#) and [ICT Industry](#).*

- [SA has Africa's deepest AI infrastructure but lags on governance](#) — ITWeb South Africa, 9 September 2026

SOUTH AFRICA

A column by Johan Steyn on the Africa AI Governance Index, published in July by the Nairobi-based Lawyers Hub, which ranks South Africa eleventh in Africa on its capacity to govern AI, scoring 2.10 out of four against Rwanda's 3.25, Nigeria's 2.81 and Benin's 2.58 — the only three the index classifies as having established AI governance. The index scores all 54 states across eight pillars and 80 indicators per country, and finds every African sub-region scoring highest on strategy and lowest on implementation. The argument is that South Africa built the infrastructure first: its draft national AI policy was withdrawn on 26 April 2026 after several cited academic sources were found not to exist, leaving no dedicated policy until revised documents reach Cabinet in November 2026. *Also under [AI](#) and [Public debate and participation in policymaking](#).*

- [Gabon Advances Four Digital Projects to Modernise Public Services](#) — Tech Africa News, 9 September 2026

GABON

Gabon set out four public-administration digital projects at the sixth steering committee of the e-Gabon-SIS project and the Gabon Digital programme on 8 September 2026, chaired by digital economy minister Mark-Alexandre Doumba: migration of the Single Master File to an integrated human resources management system, a government interoperability platform for exchanging data between institutions, a National Digital Identity System, and a government messaging system due before the end of 2026. No budget or delivery date is published for the first three. *Also under [Other GovTech and e-Gov](#) and [Digital Identity and CRVS](#).*

- [Uganda's Digital Economy: Rights Trends, Regulatory Gaps and Policy Responses](#) — CIPESA, 8 September 2026

UGANDA

A rights organisation maps Uganda's digital-economy growth against the gaps it finds in biometric-data, artificial-intelligence and platform-work safeguards. *Also under [Data protection](#).*

Notes from a central bank payments conference in Istanbul argue for rethinking how instant payment systems are regulated. *Also under [Digital Payments and Fintech](#).*

- **Power Brunch: Nigeria's data sovereignty push goes beyond local servers** — TechCabal, 8 September 2026 NIGERIA

With Nigerian financial firms facing a January 2027 data-localisation deadline, the sovereignty argument is moving past where servers sit to backups, access rights and where data is analysed. *Also under [Data Storage and AI](#).*

- **NRS Reform: Inside the drive to build a smarter, simpler tax system** — Vanguard, 8 September 2026 NIGERIA
An account of Nigeria's tax reform argues the authority is entering a phase where the quality of the information it holds matters as much as the revenue it collects. *Also under [Other GovTech and e-Gov](#) and [National statistics](#).*

- **MultiChoice seeks stronger piracy regulations** — ITWeb South Africa, 8 September 2026 SOUTH AFRICA
A South African broadcaster called for stronger rules against pirate streaming, its chief executive telling a briefing that technology alone cannot stop unauthorised distribution. *Also under [Cybersecurity](#).*

- **Le Burkina Faso repense l'aménagement numérique de son territoire à l'horizon 2030** — wearetech.africa, 8 September 2026 BURKINA FASO
Burkina Faso is revising its digital territorial development plan to a 2030 horizon, against an international union figure putting about 70 per cent of the population off the internet in 2024. *Also under [Connectivity](#).*

- **Implementation of the AU Data Policy Framework: South Sudan Data Governance Capacity Building and Engagement Workshop — draft concept note and agenda** — KICTANet, 8 September 2026 SOUTH SUDAN
The African Union Commission, AUDA-NEPAD, GIZ and KICTANet convened a three-day workshop in Juba from 8 to 10 September on domesticating the African Union Data Policy Framework in South Sudan. This is a forward notice of the convening; no outcome or workplan is on record. *Also under [Regional collaboration](#), [Data protection](#), [Technical Capacity](#) and [Data Exchange](#).*

- **Egypt Targets \$8bn Outsourcing Exports as ICT Sector Records 24.3% Growth** — Tech Africa News, 8 September 2026 EGYPT
Egypt's communications minister put outsourcing exports at US\$5.1 billion at the end of 2025 and set a US\$8 billion target for 2028, opening the sixth Tech Invest Egypt conference in Cairo, and gave ICT sector growth of 24.3 per cent for the fourth quarter of the 2025/26 financial year as the highest on record. It is the third ministerial figure for the same 2025 outturn — US\$4.8 billion and US\$5.2 billion are also on the record — and no statistical release stands behind any of them. *Also under [ICT Industry](#) and [AI](#).*

- **Digital Public Infrastructure Adoption is a Governance Problem** — Caribou, 8 September 2026 ETHIOPIA SOUTH AFRICA GLOBAL
Two development organisations argue that digital public infrastructure fails on governance rather than technology, drawing on Ethiopian and South African examples. *Also under [Other GovTech and e-Gov](#) and [Digital Identity and CRVS](#).*

Legislation and regulation

- **IEC gazettes code to tackle election disinformation** — ITWeb South Africa, 9 September 2026 SOUTH AFRICA

South Africa's Electoral Commission has gazetted a Disinformation Code for the local government elections on 4 November, binding political parties, candidates and anyone acting on their instruction or for reward across all election-related communication, online or offline, paid or unpaid. Parties and candidates must check information before sharing it, publicly retract and correct anything false within 36 hours of becoming aware of it, label AI-generated content and political advertising, and report online disinformation to Real411 within 36 hours; fake accounts, bot networks, coordinated inauthentic behaviour, doxing and cyberbullying are prohibited, as is disinformation targeting the commission or its staff. Contravention carries the sanctions applying to the Electoral Code of Conduct under the Municipal Electoral Act 27 of 2000, and parties will undertake to comply at the signing ceremony on 23 September; the source gives no gazette number or date for the final code. *Also under [Public debate and participation in policymaking](#) and [AI](#).*
- **dLocal Ghana secures enhanced payments licence to deepen local operations** — TechCabal, 9 September 2026 GHANA

dLocal Ghana, the subsidiary of the Uruguayan payments company, has secured an Enhanced Payment Service Provider licence from the Bank of Ghana, letting it provide local collections, merchant acquiring, mobile-money acceptance and payouts in its own name where it had previously routed Ghana flows through its global platform and regulated third-party partners. It will roll the services out on operational readiness rather than at once. Paystack and Flutterwave hold comparable licences and Fincra was licensed in the enhanced category in May 2026; Bank of Ghana data put mobile money at GH¢4.54 trillion in 2025, up 50.8 per cent on 2024. *Also under [Digital Payments and Fintech](#).*
- **South Africa Pushes Subsea Cable, AI and Digital Skills Agenda to Expand Connectivity** — Tech Africa News, 8 September 2026 SOUTH AFRICA

South Africa's operator association has asked the Competition Commission for a five-year exemption letting Vodacom, MTN, Telkom, Cell C, Rain and Liquid share limited infrastructure planning information through an independent third party, to find connectivity gaps and avoid duplicated build. The communications minister, who called the proposal encouraging for rural areas and townships, also argued that disruption to Middle East routes gives the country an opening as an alternative submarine cable hub. *Also under [Connectivity](#), [Training and skills](#) and [AI](#).*
- **Kenya Proposes Standalone Licence Framework for Data Centres** — Tech Africa News, 8 September 2026 KENYA

The Communications Authority of Kenya has proposed a standalone Data Centre licence for co-location operators, taking them out of the Network Facilities Provider-Tier 2 category they currently sit under, and opened comment for thirty days from its public notice. The Authority gives visibility over data-centre operations, support for investment and proportionality with comparable jurisdictions as its reasons; the notice itself is not held, so the closing date is unestablished. *Also under [Data Storage](#).*
- **Congo extends state control over mining with bid to lock down geological data** — The Citizen, 8 September 2026 DRC

The Democratic Republic of Congo is vesting its geological data in the state and charging for access, extending state control over mining; a resource-governance institute questions whether release will be even-handed. *Also under [Open data](#).*

Data protection

- **Kenya Reviews National Survey Findings on Child Online Protection and Safety** — Tech Africa News, 9 September 2026 KENYA

The Communications Authority of Kenya and the University of Nairobi's Institute for Development Studies have begun reviewing preliminary findings from a joint national survey on children's online experiences and safety, agreeing the report structure and thematic areas ahead of validation. The authority says the findings are intended as the evidence base for regulatory interventions on child online protection; nothing has been published yet. *Also under [National statistics](#).*

- **Kenya coast gets first protected subsea cable, LuLu** — TechTrendsKE, 9 September 2026

KENYA

A consortium unveiled the LuLu Coastal Cable System at ITW Africa 2026, presented as the first fully protected submarine cable dedicated to Kenya's Indian Ocean coastline: 500km linking five landing points from Mombasa to Lamu, including Vipingo Special Economic Zone, Kilifi and Malindi, pairing a seabed cable with a parallel protected terrestrial route. It is specified at 144 fibres and up to 60Tbps per fibre pair over a 25-year design life, with service targeted for the second quarter of 2028 subject to contract execution, and the Mombasa landing connecting it to cables already landed at the port. The co-developers named are INDOI of Mauritius, Blue Trade Investments as the Kenya-registered landing party, ARISE IIP, AfriTrade Consulting Group and Kingdom Bank; no project value or financing structure is stated. *Also under [Connectivity](#).*

- **Kenya's Flowt raises \$550,000 as it targets a \$1 million loan book** — TechCabal, 8 September 2026

KENYA

A Kenyan fintech raised US\$550,000 to lend to small climate-focused businesses, turning bank and mobile-money records into lender-ready data against a target loan book of US\$1 million. *Also under [Digital Payments and Fintech](#).*

- **Egypt Partners With Vodafone, Elsewedy and Cassava on \$1bn Data Centre Investment** — Tech Africa News, 8 September 2026

EGYPT

Two data centre partnerships announced in Cairo project about US\$1 billion of investment between them. The first establishes Africa Data Centres Egypt, combining Vodafone Business, Elsewedy Electric and Cassava Technologies, starting at 20MW over three years on a targeted path to 200MW; the second, between Vodafone

Business and Cassava, is described as Egypt's first sovereign AI data centre, offering GPU-as-a-Service locally so that AI workloads run without moving data out of the country. The sums are projections stated at announcement rather than committed capital. *Also under [Data Storage](#) and [AI](#).*

- **Zambia launches national digital trust infrastructure** — ITWeb Africa, 9 September 2026

ZAMBIA

Zambia and Altron Security have launched a National Public Key Infrastructure, intended as a sovereign root of trust for digital identity, electronic signatures and secure online government, with certificates carrying legal validity under the country's electronic communications and transactions law. The master cryptographic keys were generated under independently audited conditions in a purpose-built facility and are held offline, split among several custodians so that no single body controls them. The Smart Zambia Institute's national coordinator said the launch is only the beginning and its value depends on whether government can sustain the infrastructure, fund it and get public institutions to adopt it. *Also under [Digital Identity and CRVS](#) and [Other GovTech and e-Gov](#).*

Ghana's communications ministry has launched a five-day AI and robotics summer bootcamp for 100 students from 19 schools, split into four age cohorts covering coding, robotics and AI from ages 6 to 18. Younger participants work through visual and block-based activities and older ones through programming and design exercises. *Also under [Training and skills](#).*

- **Africa doesn't need to build the next ChatGPT to win the AI race** — TechCabal, 9 September 2026

SOUTH AFRICA

AFRICA

An analysis arguing that the consequential AI adoption in Africa is enterprise and industrial rather than consumer-facing — systems processing invoices, optimising energy use and running mines rather than chatbots. It draws on 4Sight Holdings, which frames its work as automating routine business processes rather than adding assistants, and ABB, whose South African process automation manager describes mining's problem as islands of automation that do not operate as one connected system. The case made is that the continent's constraints — unreliable power, cost pressure, dangerous working environments — raise the return on automation rather than lowering it, and that the obstacle is organisational: structured data, mapped processes and change management, not the technology. *Also under [ICT Industry](#).*

- **This AI research company wants to put 1,000 African languages into AI** — TechCabal, 8 September 2026

AFRICA

A research lab founded in 2020 is building training data covering a thousand African languages, after finding what exists both scarce and poor. *Also under [Research institutions](#).*

- **Paludisme : le Bénin intègre l'IA dans son dispositif national de diagnostic** — wearetech.africa, 8 September 2026

BENIN

Benin's health ministry has contracted the South Korean firm Noul to put twenty AI-assisted malaria diagnostic devices into the main public referral hospitals, moving the miLab MAL system from individual facilities into the national malaria control programme, which has classified it as a point-of-service diagnostic. The device automates blood-smear preparation, digitisation and image analysis; the supporting evidence is the vendor's account of a 2025 evaluation in 211 children, and the award date is not established. *Also under [Access to services](#).*

ABOUT THIS DOCUMENT

EDITION	2026-09-09-2
RETENTION	Kept until 2026-09-16. Older bulletins: the country pages and the monthly reports.
THIS FILE	https://corpus.data-landscapers.io/bulletin/corpus-bulletin-2026-09-09-2.pdf
LICENCE	CC BY 4.0

This bulletin is produced automatically at the end of each data collection sweep but only includes items published on the day cited in the edition, and the previous day. Items published in the last month can be found on the [country pages](#). The links to all items stored in the corpus can be found in the [catalogue](#).

Bulletins are kept for a week — the last week's editions are listed above, each at its own dated address — and are then deleted. Older material is in the country pages and the monthly reports.
