

MONTHLY UPDATE

MoUs and other agreements: monthly update, July 2026

Edition of 2026-08-22 · compiled from the Data Landscapers source base

14 places. Every block below is carried verbatim from that place's own monthly update, where it was written, sourced and checked; nothing is written here.

The place reports do not share one window; the period above is the range they span.

Algeria

On 26 July Algeria and Oman [discussed digital cooperation](#) across artificial intelligence, data centres, fintech and space, with the Omani ministry and the Oman Investment Authority offering flexible partnership arrangements. No instrument was concluded at the meeting, so it stands as planned.

Cote d'Ivoire

The month's one agreement is continental in scope and carries no money. An Ivorian mobile operator, an Indian technology company and a continental investment council [signed a five-year memorandum of agreement dated 7 August 2026 and fully executed on 19 August, covering national fibre backbones, 4G and 5G, submarine cable landing stations, internet exchange points, telecom towers, and digital identity, national interoperability, e-government and digital payment platforms](#). No financial commitment is disclosed and no Ivorian project, site or timetable is named; the memorandum is known only from the Indian party's regulatory filing.

DR Congo

The month's one signed arrangement puts a commercial bank inside the digital ministry's programme. The digital economy ministry and a commercial bank [signed a memorandum on 13 August to modernise the financial sector and accelerate banking inclusion](#), covering digital identity and artificial-intelligence integration under the 2019 national digital plan and the 2023 Digital Code. No term, value, workplan or data-protection provision is published — for an arrangement that names digital identity as in scope.

Egypt

A professional services firm [signed a memorandum with the IT industry agency on 6 July for a regional outsourcing delivery centre](#), stated to create more than 1,000 jobs over three years, with no investment sum, site or opening date given.

Gabon

On 14 July, alongside the open-innovation programme's launch, the state guarantee company signed a credit-guarantee accord to put in place guarantee mechanisms reducing the risk borne by institutions lending to innovative young firms ([account of both accords](#)) — the first instrument in the base addressed to the cost of capital for Gabonese digital firms. Its terms were not published: no ceiling, coverage ratio, eligibility test, cost or duration, and it carries no envelope.

Ghana

The country renewed the agreement under which several of its digital customs systems are financed. The [TradeMark Africa country programme memorandum was renewed on 14 August](#), continuing trade-facilitation and continental-free-trade-readiness work, including digital customs systems at the Akanu-Noepe joint border post and support for more than 1,250 women and small-scale cross-border traders. No financing sum, term or workplan is stated — and the same border post is where a regional dialogue on identity-card and transit-system interoperability was held four days earlier.

Kenya

The judiciary took on a foreign partner for its access-to-justice work. A memorandum [was signed at the Supreme Court on 10 August with a Netherlands justice-innovation institute, with an intergovernmental development-law organisation and the Netherlands embassy participating](#), building on the country's own access-to-justice blueprint. No value, term or deliverable is stated. In the same week the chamber of commerce and the council of governors [signed a five-year agreement to harmonise county business licensing and digitise small-enterprise data across all 47 counties](#), with no budget, milestone or data-governance arrangement for the pooled data stated.

Lesotho

The development-partner support named at the Blueprint workshop carries no amount; no appropriation, disbursement or training figure was published in the window.

Rwanda

The month's one agreement is in capital markets. On 7 August the Capital Markets Authority [signed a memorandum with a Nigerian registrar company](#) to cooperate on registrar services, securities administration, investor identification, data management and digital capital-markets systems. It follows a study visit in June to that company's digital investor-services model — virtual shareholder meetings, electronic voting and mobile-based investment tracking. No term, value or workplan is published, and nothing in the account addresses the protection of the investor data the cooperation is about.

Seychelles

[Mauritius Telecom CEO Veemal Gungadin announced a cross-border payments partnership between Mauritius and Seychelles fintech Eboo on 16 July 2026](#), at the AllMyT Summit, as the first of a planned series of Indian Ocean regional payment announcements. No operational detail, launch date or terms were given.

Tanzania

Three external tracks opened in one week, none priced. On 17 July [cooperation frameworks were agreed with Brazil and Poland on AI strategy, digital government and cybersecurity research](#), with memoranda proposed and none signed; [youth and technology-skills agreements with Russia were in drafting](#). On 24 July the ministry's permanent secretary signed a [memorandum in Shanghai covering ICT infrastructure, AI, digital public service infrastructure, developing local professionals, and manufacture and assembly of digital equipment](#). The ministry's own release states no commitment amount, term or financing structure.

Togo

The [indicative cooperation programme with Luxembourg for 2026-2031 is in force](#), carrying a digital transformation component inside a package of EUR 78,550,000. The two accounts held date the signing a day apart.

Uganda

The month's one cross-border approach is exploratory. A ministerial delegation [visited the Ethiopian incumbent operator's headquarters in Addis Ababa on 13 August to explore cooperation on telecommunications infrastructure, digital payments, skills training and technology transfer](#), in support of the national vision and the 2023-2027 digital roadmap. No agreement was signed and no scope, value or timetable is stated.

Zimbabwe

The cross-border fibre corridor from Plumtree to Bulawayo runs under a public-private partnership signed in June 2025; no investment amount was disclosed by either party ([corridor account](#)).

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
