

STATUS REPORT

Ghana: status report

Edition of 2026-08-11 · 121 systems and instruments tracked, 9 of them not held

Compiled 2026-08-11 from the Data Landscapers source base, from [outputs/reports/GHA/ledger.csv](#) (121 systems and instruments, 9 of them Not held). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

Ghana has a data-protection statute in force since 2012, an identity credential registering 19.2 million adults and integrated with 262 institutions, a mobile-money market carrying [GH¢492.9bn on 954 million transactions in June 2026](#), and a national artificial-intelligence strategy launched in April 2026 at a US\$270m headline. The 2026 appropriation carries [GHS 729,947,850 for ICT infrastructure, regulation and capacity building](#). It has no register of licensed digital lenders, no open-data instrument, and no telecom statistics from the regulator later than the third quarter of 2024, and no published text for any of the bills the government has named.

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
5G spectrum request for applications	IN DEVELOPMENT ↗	Submission deadline moved to 2026-08-27
Dig Once policy	IN DEVELOPMENT ↗	Draft finalised, cabinet approval pending
Ghana-Burkina Faso frequency coordination agreement	IMPLEMENTED ↗	Finalised at a bilateral meeting
MTN Ghana capital programme	IMPLEMENTED ↗	First half-year accounts published
NGIC exclusive wholesale 5G licence	DISCONTINUED ↗	Exclusivity provision deleted, effective 2026-07-15
Register of authorised internet service providers	IMPLEMENTED ↗	Register as at the second quarter of 2025
Regulator quarterly telecom statistics	IMPLEMENTED, PUBLISHED ABOUT EIGHT MONTHS IN ARREARS ↗	Third-quarter 2024 bulletin published May 2025

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Rural coverage schedule for the dominant operator	IMPLEMENTED ↗	Rewritten from licence-relative years to fixed dates
Satellite licensing framework	IMPLEMENTED ↗	Operating since end-August 2024
Seventy per cent population coverage obligation	IMPLEMENTED ↗	Extension refused outright
Shared 5G wholesale network	IMPLEMENTED ↗	Activated March 2026
Significant-market-power spectrum premium	IMPLEMENTED ↗	Recharacterised in writing as a price, not a remedy
Submarine carrier services authorisation	IMPLEMENTED ↗	Issued November 2024
Transfer of the country-code domain to state control	PLANNED ↗	Announced by the minister January 2026

Data Storage

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Africa Data Centres Accra facility	IN DEVELOPMENT ↗	No dated status since the 2023 announcement
Agility Logistics Park data-centre campus	IMPLEMENTED ↗	Listed among Africa's largest facilities, July 2026
Digital Realty Accra data centre	IMPLEMENTED ↗	Inaugurated late 2025
National AI Compute Centre	PLANNED ↗	Reaffirmed at the AI summit
National Data Centre	IMPLEMENTED ↗	Modernisation stated at the AI summit

Energy

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Data-centre power arrangements	NOT HELD	Probed 2026-08-05; no facility-level arrangement published

Technical Capacity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Submarine cable inventory	IMPLEMENTED, LIST UNDATED ↗	Regulator landing-licence page, undated

Cybersecurity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Commercial AI-driven security operations centre	IMPLEMENTED ↗	Launched 2025-05-09
Community media cyber capability project	IMPLEMENTED ↗	Launched 2026-08-03
Critical information infrastructure designation	PLANNED ↗	Announced as forthcoming, March 2026
Cross-network mobile-money fraud monitoring	PLANNED ↗	The dominant operator says it is working toward it
Cybersecurity Act 2020	IMPLEMENTED ↗	Assented 2020-12-29
Financial Industry Security Operations Centre	IMPLEMENTED, EXPANSION INCOMPLETE ↗	Full fintech onboarding still an open recommendation
Joint Cyber Security Committee	IMPLEMENTED ↗	Named as the apex coordination mechanism
National computer emergency response team	IMPLEMENTED ↗	RFC 2350 profile v2.0 published 2021-10-02

A request for applications now offers eleven spectrum lots on a US\$230m aggregate reserve, after the exclusive wholesale 5G licence was deleted with effect from 15 July 2026. The regulator's [consolidated response of 31 July 2026](#) moves the submission deadline to 27 August, refuses any extension to the 70% population coverage obligation of 6 March 2027, and rewrites the dominant operator's rural schedule into fixed dates of 2029, 2032 and 2035.

Operators recorded [more than 8,000 fibre cuts a year](#) as at May 2026. The dominant operator's own half-year accounts show [capital expenditure of GHS 2,100.4m for the six months to 30 June 2026](#), down 36.3%, with intensity falling from 29.1% to 14.0%. The [submarine carrier services authorisation](#) issued in November 2024 runs five years, charges an annual fee of 1% of revenue, and requires six years' retention of charging and financial data. The copy held is the template.

The largest facility, at [30 MW designed for expansion to 150 MW](#), is known only from a regional trade round-up, while an analyst brief for the EU digital investment facility put the whole commercial market at [about 4.8 MW of live critical IT load in 2024](#). No power arrangement is published for any named Ghanaian site.

The [Cybersecurity Act 2020](#) establishes the Cyber Security Authority and provides for designation and compliance audit of critical information infrastructure, though nothing has been published under those powers. The authority's community media project, launched on 3 August 2026, is to train [about 60 media houses and more than 100 journalists](#) in Accra through August 2026 and in Kumasi in September, certifying those who complete every session into a proposed press corps. The regulator's latest statistical bulletin covers [July to September 2024 and appeared eight months later](#), putting one operator on 75.09% of the market, and its register of authorised providers has [42 of 78 operational](#).

Digital public infrastructure

Data Exchange

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Mobile money interoperability	IMPLEMENTED ↗	Live since 2018

Digital Identity and CRVS

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Biometric SIM re-registration	PLANNED ↗	Announced for the first quarter of 2026; timetable still unannounced
Ghana Card	IMPLEMENTED ↗	Backlog of 640,000 cards cleared and distributed by September 2025
Ghana Card as sole banking identity	IMPLEMENTED ↗	Revised central-bank guidance note, January 2026
Ghana Card enrolment for children aged 6 to 14	IMPLEMENTED ↗	Registration resumed 2026-05-05
Ghana Card photocopy ban and verification service	IMPLEMENTED, IN TRANSITION ↗	Enforcement dated 2026-11-02
National Identity Register Amendment Regulations 2026	IMPLEMENTED ↗	In force 2026-06-09, signed 2 March and gazetted 27 March
Paid 24-hour identity service centre	IMPLEMENTED ↗	Opened 2026-08-01

Electronic procurement system	IMPLEMENTED ↗	The finance minister directed all state institutions onto it
Fiscal electronic device policy	PILOTING ↗	Pilot ends August 2026; 40,000 devices approved
Ghana.gov services portal	IMPLEMENTED ↗	Re-architecture workshop, 19 to 21 May 2026
Second public sector reform strategy	IN DEVELOPMENT ↗	Validated at a national stakeholder workshop 2026-07-30

Digitalisation of sub-national government

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Local government electronic services	NOT HELD	No statement on file

National statistics

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Governance Series survey	IMPLEMENTED ↗	Wave 3 report launched 2026-08-06
Quarterly employment statistics	PLANNED ↗	The finance minister asked the statistical service to develop a methodology

Amendment regulations came into force on 9 June 2026 making biometric matching against the register the only lawful means of verification and barring photocopying, scanning and retention. Banks, telecoms operators and hospitals have [until 2 November 2026](#) to install readers and integrate. The biometric SIM re-registration announced for the first quarter of 2026 has still not begun.

Registered wallets rose from 76.4 million to 84.6 million in the year to June 2026 with 26.4 million active at ninety days; interoperable transfers ran to [GH¢6.2bn, about 1.3% of total mobile-money value](#). The digital-credit licensing deadline of 30 June 2026 elapsed and the central bank [named twenty unlicensed lending applications on 3 August 2026](#), framing the harm first as a violation of customer data privacy. The promised register of licensed providers is not published.

The central bank and the securities regulator launched the Ashanti Regional phase of the [National Virtual Asset Literacy Initiative](#) on 10 August 2026, a template for nationwide rollout with no funding or date stated.

The customs valuation system had [analysed about 366,000 declarations to 17 July 2026](#) with collections up 17.5%, on the finance ministry's own unaudited figures, which importers contest. The land use planning system is [being redeveloped into a web-based platform for planning, development control and street addressing](#) inside a sub-programme appropriated GHS 36,454,968 for 2026, from which no digital share is separable. The statistical service published the third wave of its [Governance Series](#) on 6 August 2026, a six-monthly repeat panel across all 16 regions, and the Government Statistician put its findings to digital remedies – digitising public services and publishing official fees.

Open data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National open-data instrument	NOT HELD	No policy, portal, licence or inventory on file

The 2012 Act is unamended, a draft replacement published during 2025 has not been enacted, and the regulator declared 2026 a year of enforcement without publishing a fine, prosecution or registered-controller count. The central bank issued a [cyber and information security directive on 26 March 2026](#). The enforcement action framed as a data-privacy violation in August 2026 was taken by the central bank, not by the data-protection regulator. The health ministry's [draft AI health policy, presented on 5 August 2026](#), would bar patient data from leaving the country without safeguards and cover the full lifecycle across public and private facilities.

Ghana refused a United States health data-sharing agreement in April 2026. The data-protection regulator's executive director told a state news agency that the offer [covered not only health data sets but metadata, dashboards, reporting tools, data models and data dictionaries](#), gave ten United States entities access requiring no prior Ghanaian approval, sought 25 years of citizens' health records and settled disputes under United States law, against US\$109m subject to congressional appropriation. No text of the offer is held.

The virtual-asset statute was [passed by Parliament on 19 December 2025](#). The central bank's [policy position of November 2025](#) records more than 3 million users and over 100 service providers captured by a registration exercise in July 2025, before any law. On the Bank's own account the Act splits supervision with the securities regulator by activity and places virtual assets outside deposit protection and outside any statutory compensation fund. No gazetted text is on file.

The communications minister named a [National Data Exchange Hub the government plans to establish](#) on 29 July 2026, without saying whether it revives the exchange launched in 2009 or replaces it. The EU mid-term review supplied the [EUR 136m reserved for 2025 to 2027](#), split between green growth, cities, governance and support measures, again with no digital priority area.

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Ghana-Gulf technology investment instrument	NOT HELD	No sources on file for this place and subject

The strategy was Cabinet-approved in early April 2026 and [launched on 24 April at US\\$270m](#), and a [ten-year implementation plan with annual milestones was announced on 29 July 2026](#). Sixteen weeks on, the compute centre has no site, contractor or procurement notice.

The disaster management organisation took ownership on 26 May 2026 of an [AI multi-hazard chatbot](#) built under a UNESCO project funded by the Government of Japan, answering in several local languages; six regions still have no emergency operations centre. The oversight body has been proposed since April 2025 without an establishing instrument, and sources disagree on whether it is one body or an authority plus a ministry office. The only measurement of the sector's size is a [satellite account whose data end in 2014](#), in which the sector's share of gross domestic product fell every year from 3.1% in 2010 to 2.2% in 2014.

Inclusion and capacity

Digital divides

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Household survey of digital access	IMPLEMENTED, NOT REPEATED SINCE 2019 ↗	Abridged report published 2020-11-02 on June 2019 fieldwork
Rural telephony and digital inclusion project	IMPLEMENTED ↗	EUR 140.8m buyer's credit signed 2020-05-13
Universal access fund	IMPLEMENTED, NAMED FOR DISSOLUTION ↗	The draft development fund bill would convert it
Community network licensing framework	NOT HELD	The regulator floats an existing hotspot authorisation as a possible base

One Million Coders Programme	IMPLEMENTED ↗	A university embedded it in curriculum 2026-07-29
Youth agency microdegree programme	IMPLEMENTED ↗	Memorandum signed for 2,000 places
Distance-learning loan for a local government institute	NOT HELD	US\$39m concessional loan signed 2020-10-30
Distance-learning loan for tertiary institutions	NOT HELD	US\$218.49m concessional loan signed 2020-10-30

Research institutions

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Innovation centre at a public university	IMPLEMENTED ↗	US\$9m grant, 2022, running to 2027

The flagship coders programme, launched in April 2025 against a target of one million trained by 2030, was [embedded permanently in a university curriculum on 29 July 2026](#), and a youth agency signed for 2,000 vendor-certified microdegree places on 14 July. Fifteen months after launch it has published no cumulative number of people trained. The education trust fund signed a [memorandum with UNESCO on 5 August 2026](#) to train technical and vocational teachers in digital and AI skills, with no commitment amount, cohort size or funding split published.

Of the [GHS 591,947,850 domestically funded](#) under ICT infrastructure, regulation and capacity building in 2026, GHS 536,745,448 goes to the information technology agency, GHS 25,346,198 to the cyber-security authority, GHS 17,308,560 to the ICT capacity centre and GHS 2,827,244 to the domain registry. The data-protection regulator's GHS 9,720,400 is entirely its own internally generated funds, with no Consolidated Fund allocation at all.

The universal-access fund carries the rural telephony project as its top priority, with the last disbursement figure 60.2% as at May 2022; the draft [development fund bill would convert it](#) into a wider digital-economy and innovation fund, with the fate of its rural-access earmark unestablished. No dedicated community-network regime exists, and the regulator told a policy dialogue on 29 July 2026 that [an existing hotspot authorisation could found one](#) — four such authorisations exist, against a [single authorised rural provider that is not operating](#).

An unlimited 100 Mbit/s fibre package [fell from GH¢987 to GH¢299 a month in June 2026](#), a cut extracted from one operator rather than a licensing change letting others compete. The demand side has not been measured nationally since 2019, when the regulator recorded [16.8% of households with internet access](#) and smartphone ownership at 58.4% urban against 28.1% rural.

Finance

(narrative not yet written)

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Data-centre power arrangements	this subject is effectively empty for the country; probed 2026-08-05, no power purchase or supply arrangement is published; an analyst market brief maps the facilities and their power constraints	2026-08-05
Ghana Card payment functionality	probed 2026-08-05, trade press reported an activated card wallet in early April 2026 and the issuing authority denied it on 8 April 2026	2026-08-05
Local government electronic services	a district service platform, or a local-government digitisation report, would settle it; probed 2026-08-05, the ministry's programme-based estimates document the district data platform and MMDA integration	2026-08-05
National open-data instrument	a published policy or a live inventory would settle it; probed 2026-08-05, the 2016 open data policy located; the live inventory exists separately; the 2016 policy acquired on 2026-08-05 turned out to be the GHEITI extractives policy, not a national instrument, so a national open-data instrument remains unestablished	2026-08-05
Ghana-India technology cooperation instrument	a bilateral memorandum, a line-of-credit record or an Indian vendor contract would settle it; probed 2026-08-05, a joint trade committee discussed a possible digital MoU in May 2024; no signed instrument was located	2026-08-05
Ghana-Gulf technology investment instrument	a sovereign-fund agreement, or a data-centre or AI memorandum, would settle it; probed 2026-08-05, the May 2025 innovation hub memorandum is reported with a component breakdown but its text is not published	2026-08-05
Community network licensing framework	a civil-society policy lead places four other African states ahead of Ghana on enabling frameworks; probed 2026-08-05, no dedicated community-network licence exists; the authorised-ISP list defines the classes such a network must fit	2026-08-05
Distance-learning loan for tertiary institutions	connects satellite campuses to fibre; borrowing terms unknown; probed 2026-08-05, the loan agreement is unpublished; terms appear only in a research database, which is a lead rather than a source	2026-08-05
Distance-learning loan for a local government institute	the country announced sovereign default in December 2022; probed 2026-08-05, two attempts surfaced no distance-learning loan to a local-government institute	2026-08-05

What remains unstated is institutional rather than documentary: no published open-data instrument, no account of what local government has digitised, and no bilateral technology instrument on file with either India or any Gulf state. Two Chinese distance-learning loans signed in October 2020 passed their expected completion dates with no completion or disbursement record.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
