

STATUS REPORT

Sudan: status report

Edition of 2026-08-11 • 45 systems and instruments tracked, 13 of them not held

Compiled 2026-08-11 from the Data Landscapers source base, from [outputs/reports/SDN/ledger.csv](#) (45 systems and instruments, 13 of them Not held). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

The base for Sudan is heavily back-loaded — 9 of the last 14 months' sources fall before January 2026, against 46 from January onward — so the picture below is mostly a 2026 one, not evidence that little happened earlier in the war. Three digital authorities (cybersecurity, data and AI, digital transformation) were created by prime-ministerial decree in November 2025, ahead of any primary data-protection law; a package of three draft laws covering the same three domains was sent back to committee by the Council of Ministers on 6 August 2026 with no text yet published for any of them.

Payments infrastructure shows the clearest split between restoration and new build. [Bankak, Bank of Khartoum's mobile-money app, is reported dominant in retail settlement](#) — driven by cash scarcity and currency collapse rather than technology uptake — while the Central Bank's [national payment switch launched in August 2026 with exactly one bank connected](#), explicitly framed by the Bank itself as restoration of war-damaged infrastructure rather than a new rail. [SUDAPASS, the national digital identity platform, went live in May 2026](#) on a population base last counted in the 2008 census, against more than 14 million people displaced by the war.

Thirteen of forty-five ledger rows are *Not held* — no compute capacity, satellite-data programme, technical-standards framework, open-data portal, or EU, US, Chinese or Indian digital engagement is on record for Sudan, and neither is any digital-literacy or applied-research programme.

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
4G tower expansion programme	IN DEVELOPMENT, 60 BUILT / 200 MORE PLANNED ↗	Digital ministry reports 60 4G towers built, with 200 more planned during 2026
Horizon Fiber Initiative (Djibouti-Ethiopia-Sudan corridor)	IN DEVELOPMENT, BINDING AGREEMENT SIGNED ↗	Tripartite binding agreement signed in Djibouti, converting the Dec-2024 MoU
Starlink satellite internet — regulatory status	IMPLEMENTED, UNLICENSED/INFORMAL ↗	RSF banned and confiscated Starlink devices in Al-Nuhud, West Kordofan, from 2025-11-29

Data Storage

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Khartoum State data centre (1,300 m2)	IMPLEMENTED ↗	Restored and operational after technical rehabilitation; equipped for cloud computing, data security and AI-application hosting
Port Sudan alternate National Data Centre	PLANNED ↗	Announced as one of the digital ministry's future projects

Energy

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National policy linking digital infrastructure to energy supply	NOT HELD	—

Technical Capacity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Compute or high-performance computing capacity	NOT HELD	—

Cybersecurity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Draft Cybersecurity Law	UNDER REVIEW ↗	Council of Ministers sent the draft back for further study, alongside the draft Data and AI Law and draft Digital Transformation Law 2026
Sudanese Cybersecurity Authority	IMPLEMENTED ↗	Established by PM decree alongside the Digital Transformation Authority and the Sudanese Data and AI Authority

The [Horizon Fiber corridor converted from a December 2024 MoU to a binding tripartite agreement in February 2026](#) between Djibouti Telecom, Ethio Telecom and Sudatel: a roughly 2,800km, 144-fibre-pair route linking Djibouti's subsea landings through Ethiopia to Port Sudan, interconnecting with the existing Port Sudan–Jeddah cable, with no physical-completion date stated in any of the six accounts held. The digital ministry separately reports 60 4G towers built against a target of 200 more in 2026, with no later source confirming progress. Starlink

remains unlicensed and legally informal — the Sudanese authorities banned imports in December 2023 — and [RSF forces confiscated devices and imposed a local ban in Al-Nuhud, West Kordofan, from late November 2025](#), even as both SAF and RSF are separately reported renting access to it.

The [Khartoum State data centre was restored and returned to operation in October 2025](#), equipped for cloud computing, data security and AI-application hosting, though the date it went offline is not established; a second, Port Sudan-based national data centre is announced but not yet built. Three digital authorities, including a Sudanese Cybersecurity Authority, were created by decree in November 2025; a draft Cybersecurity Law was sent back to committee on 6 August 2026 with no text published. No compute or high-performance computing capacity, and no policy linking digital infrastructure to energy supply, is on record for Sudan.

Digital public infrastructure

Data Exchange

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
ASYCUDA customs system (Gezira/Hantoub)	IMPLEMENTED, SINGLE-SITE REACTIVATION ↗	Reactivated at Hantoub customs yard after war looting/damage, ahead of resuming formal customs operations
Electronic single window (National Investment Authority)	PLANNED, PRECONDITION-STAGE ↗	Authority says the window will operate electronically only once all investment-related entities are linked electronically; no list, sequence or date given

Digital Identity and CRVS

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
SUDAPASS (national digital identity)	IMPLEMENTED ↗	Launched live; activates via passport/national-number + face biometrics; enables e-services, e-transactions and digital signatures

Digital Payments and Fintech

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Al-Asjad payment-switch licence	DISCONTINUED, LICENCE REVOKED ↗	Central Bank revoked the licence days after the platform's launch; no specific breach disclosed
Bankak (Bank of Khartoum mobile money)	IMPLEMENTED, DOMINANT BY DEFAULT ↗	Reported as dominant retail-settlement rail in Khartoum markets, driven by cash scarcity and currency collapse, not technology uptake
Bede digital wallet (Zain)	IMPLEMENTED, PHASE 1 OF 3 ↗	Launched in Port Sudan; phase 1 covers transfers, airtime, bill payments, merchant purchases, agent cash in/out
Isali / Eisali (electronic government-collection system)	IMPLEMENTED, EXPANDING ↗	Named as the platform to which public authorities are to be linked, per the finance minister's PFM directives
National Instant Payment System / national payment switch (NIPS)	IMPLEMENTED, PARTIAL (ONE BANK CONNECTED) ↗	Launched live, connecting Omdurman National Bank as first and only participant; first ATM withdrawal completed over the switch
USSD banking service	IMPLEMENTED ↗	Rolled out jointly by the digital ministry, Central Bank and telecoms regulator; works without internet access

Registries (population, land, address, etc.)

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Unified Social Registry	IN DEVELOPMENT ↗	Ministers reviewed progress on a foundational social-protection targeting database
Vehicle registration database (traffic police)	IMPLEMENTED, RECOVERING ↗	Restored register: 2,124,750 registered vehicles, 3,161,599 driving licences; backup data centres built inside the states and abroad

Sectoral management information systems (HMIS, EMIS, etc.)

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Afia (health-sector platform)	PLANNED, REFERENCED NOT CONFIRMED LIVE ↗	Digital ministry, Health Ministry and WHO met to set a comprehensive health-digital strategy; Afia referenced, WHO urging acceleration
Bayan (national civil-service HR platform)	IMPLEMENTED ↗	Launched as an integrated national HR database for every public employee's record, held by the Civil Service Diwan

Other GovTech and e-Gov

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Baladna (national e-government platform)	IMPLEMENTED, EXPANDING ↗	Adopted as the sole national platform for all foreign-trade transactions, permits issuable from any location
Judiciary digital-transformation project	PLANNED, CONTRACT SIGNED ↗	Judicial Authority signed a contract with the National Technical Company, financed by the finance ministry, vetted by the justice ministry's contracts department

Rural digital data capture

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Dedicated rural digital-service programme	NOT HELD	—

Use of satellite data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Earth-observation or satellite-data programme	NOT HELD	—

SUDAPASS, the national digital identity platform, launched live on 21 May 2026, activating via passport or national number plus face biometrics and run jointly by the cybersecurity authority, the e-certification authority and the civil registry — on a population base last counted in 2008, against more than 14 million people displaced. Baladna, the national e-government platform, expanded from 28 services at its January 2026 launch to 130-plus electronic health services by July and sole national platform for foreign-trade transactions by August, with no coverage or uptake figures published for any tranche. Bayan, a national civil-service HR platform, launched in August 2026 with no data-protection arrangement disclosed for a database covering every public employee, stood up during an active war.

Payments carry the sharpest contrast between restoration and new build. [Bankak remains the dominant retail-settlement rail](#), a position the base already flagged as a vulnerability in March 2025; the Central Bank's [national payment switch went live in August 2026 with exactly one bank connected](#), explicitly described by the Bank as restoration rather than a new rail, while a competing licence, Al-Asjad, was revoked days after its own July 2026 launch. USSD banking and the Isali government-collection platform both expanded through the year — Isali diffusing state to state and reaching over 90% of transactions in White Nile State on the state's own, unverified figure. The vehicle-registration database's survival through the war is credited to backup data centres built inside the states and abroad. No earth-observation programme and no dedicated rural digital-service programme, distinct from the tower-expansion effort, is on record.

Governance and regulation

Legislation and regulation

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Border-trade legal framework (state-level protocols)	UNDER REVIEW ↗	Meeting chaired by the finance minister resolved to review state-to-neighbouring-country trade protocols and refer them to the Council of Ministers, to build a single national legal framework in their place
Draft Digital Transformation Law of 2026	UNDER REVIEW ↗	Same Council of Ministers review; sent back for further study

Strategies, plans and policies

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Digital Transformation Authority	IMPLEMENTED ↗	Established by PM decree, alongside the Sudanese Data and AI Authority and the Sudanese Cybersecurity Authority

Standards

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National technical standards or interoperability framework	NOT HELD	—

Data protection

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Draft Data and Artificial Intelligence Law	UNDER REVIEW ↗	Council of Ministers reviewed the draft (paired with drafts on cybersecurity and digital transformation) and sent all three back for further study; enactment route is a joint sitting of the Sovereignty Council and Council of Ministers

EU activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
European Union digital cooperation with Sudan	NOT HELD	—

Open data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Open government data portal	NOT HELD	—

Sudan created three digital-governance institutions by prime-ministerial decree on 5 November 2025 — the Digital Transformation Authority, the Sudanese Cybersecurity Authority and the Sudanese Data and AI Authority — ahead of any primary data-protection statute, a sequencing an external roundup calls "a rare procedural twist" against at least 44 African Union states that already had data-protection laws in force by end-2025. [The Council of Ministers reviewed a package of three draft laws on 6 August 2026](#) — covering cybersecurity, data and artificial intelligence, and digital transformation — and sent all three back for further study; none has a published text, and the base holds no account connecting the November 2025 institutional decree to the platform-level claims (Baladna, Bayan, SUDAPASS) that followed it.

A separate finance-ministry-chaired meeting on 5 August resolved to review state-level border-trade protocols with neighbouring countries and unify them into a single national legal framework, alongside adopting Baladna as the sole platform for foreign-trade transactions — the stated driver is revenue protection rather than service delivery. No national technical-standards or interoperability framework, no open-government-data portal, and no EU digital-cooperation instrument is on record for Sudan.

Artificial intelligence and the technology sector

AI

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Sudanese Data and Artificial Intelligence Authority	IMPLEMENTED ↗	Established by decree, ahead of any primary data-protection law

ICT Industry

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Sudani and Sudatel wartime service continuity	IMPLEMENTED, SELF-REPORTED RESILIENCE ↗	Digital-transformation minister praised operators Sudani and Sudatel at a Port Sudan business-digital event for keeping services running through the war

Innovation ecosystem

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Start-up or innovation-sector support programme	NOT HELD	—

US / hyperscaler activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
United States digital-sector engagement with Sudan	NOT HELD	—

China activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Chinese digital investment in Sudan	NOT HELD	—

India activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Indian digital-sector engagement with Sudan	NOT HELD	—

Gulf/UAE activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Network International-Saudi Sudanese Bank processing agreement	IMPLEMENTED ↗	Dubai-based Network International signed a strategic processing agreement for Mastercard-sponsored digital-payment processing, formalised at Cairo ICT 2025

The Sudanese Data and Artificial Intelligence Authority was established by the same 5 November 2025 decree as the cybersecurity and digital-transformation authorities, against a reported AI-readiness score of 24.63 out of 100. No AI strategy document, sandbox or guidance note is held for Sudan, in contrast to the strategies an external roundup records for several other African states over the same period. [Dubai-based Network International signed a Mastercard-sponsored processing agreement with Saudi Sudanese Bank in January 2026](#), the base's only Gulf digital-sector instrument, with no transaction volumes or rollout figures given. The digital-transformation minister publicly praised operators Sudani and Sudatel in January 2026 for maintaining service through the war, a ministerial assessment rather than an independent one. No Chinese, Indian, US or domestic start-up/innovation instrument is on record.

Inclusion and capacity

Literacy

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Digital-literacy programme or measurement	NOT HELD	—

Training and skills

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
MTN Sudan AI-Manssa digital-skills programme	IMPLEMENTED, SINGLE COHORT, UNREFRESHED ↗	Launched workshops in digital media and online marketing for content creators

Research institutions

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Applied digital-research programme	NOT HELD	—

The only capacity-building instrument on record is [MTN Sudan's Al-Manssa programme](#), digital-media and online-marketing workshops for content creators launched in August 2025, with no participant numbers or later update. Field reporting elsewhere in the base — [CALP Network's account of humanitarian cash transfers routed through Bankak into nominated members' personal accounts](#), and [Al Jazeera's account of retail-payment failure modes in Khartoum markets](#) — carries the inclusion story for Sudan more than any standalone programme: a Bank of Khartoum official conceded weak telecom infrastructure, power cuts and low digital awareness as the obstacles the shift has not overcome, and an economist quoted in that reporting called the shift to digital payments real but not a transition to a digital economy without stable telecoms, electricity and broader literacy. No dedicated digital-literacy programme or measurement, and no applied digital-research programme, is on record.

Finance

New investments

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Khartoum Stock Exchange online-trading system (AfDB PFM project)	IMPLEMENTED, HISTORICAL BASELINE, UNREFRESHED SINCE 2016 ↗	Online trading launched on the Khartoum Stock Exchange, financed by the African Development Bank (reported US\$34.8m) under its Public Financial and Macroeconomic Management project

Domestic budget appropriations and expenditure

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Treasury Single Account (TSA) implementation	IN DEVELOPMENT, COMMITMENT REAFFIRMED ↗	State minister of finance reaffirmed commitment to implementing the TSA system, at the African Summit for Social Impact (Abuja)

The [only development-financing instrument on record for Sudan's digital sector is a decade old](#): the African Development Bank financed the Khartoum Stock Exchange's online-trading system, launched March 2016 at a reported US\$34.8m, under a Public Financial and Macroeconomic Management project that also scoped an integrated financial-management system. No later report updates it, and the 2026 PFM directives covering payroll, e-invoicing and e-procurement do not reference it. [The finance ministry reaffirmed a commitment to implementing a Treasury Single Account at the African Summit for Social Impact in Abuja on 2 August 2026](#), with no target date, phase or coverage given.

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
National policy linking digital infrastructure to energy supply	A national policy or programme document connecting grid rehabilitation or generation capacity to digital-infrastructure planning.	not yet probed

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Compute or high-performance computing capacity	A data-centre, cloud or high-performance computing specification, or a hosting contract for a public system beyond the two named data centres.	not yet probed
Earth-observation or satellite-data programme	A national earth-observation or geospatial-data programme document, or an agency mandate covering satellite data.	not yet probed
Dedicated rural digital-service programme	A programme document or budget line for rural digital-service delivery, distinct from the 4G tower-expansion programme.	not yet probed
National technical standards or interoperability framework	A national interoperability framework, technical standard or e-government architecture document.	not yet probed
Open government data portal	A public-sector open-data portal or policy document.	not yet probed
European Union digital cooperation with Sudan	Any EU or European Investment Bank digital financing, programme or memorandum covering Sudan.	not yet probed
Start-up or innovation-sector support programme	A start-up statute, incubator programme or innovation-fund document.	not yet probed
United States digital-sector engagement with Sudan	Any US government or agency digital-sector financing, programme or memorandum covering Sudan, distinct from the commercial Isali/National Workers Bank rail.	not yet probed
Chinese digital investment in Sudan	Any Chinese financing, contract or memorandum covering Sudanese digital infrastructure.	not yet probed
Indian digital-sector engagement with Sudan	Any Indian government or vendor financing, contract or memorandum covering Sudanese digital infrastructure.	not yet probed
Digital-literacy programme or measurement	A digital-literacy programme document, or a published measurement of digital literacy.	not yet probed
Applied digital-research programme	A university, agency or donor-funded applied digital-research programme document.	not yet probed

Thirteen of forty-five rows carry no instrument, concentrated in exactly the areas a war economy would be expected to have stopped funding first: compute capacity, satellite data, technical standards, open data, and all four named foreign-engagement blocs (EU, US, China, India) beyond the single Gulf processing agreement and the Chinese/Indian relationships absent entirely. Digital-literacy and applied-research programmes are also unheld. None of the thirteen names a specific document an automated fetch could plausibly retrieve — each is a genuine absence in the record, not a reading gap.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
