

STATUS REPORT

Uganda: status report

Edition of 2026-08-11 • 115 systems and instruments tracked, 16 of them not held

Compiled 2026-08-11 from the Data Landscapers source base, from [outputs/reports/UGA/ledger.csv](#) (115 systems and instruments, 16 of them **Not held**). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

The national identity system is the deepest layer of Ugandan digital public infrastructure and the one with the clearest measurement. Migration of [28,571,893 legacy records](#) completed in February 2026, and the registrar's own review sets renewals at [14.3m of a 15.8m target, 90.5%](#), against [first-time enrolment of 6.4m of 17.2m, 37.3%](#). Of [10,152,559 cards printed, 2,581,457 have been collected](#). The system is efficient for people already on the register.

Data protection moved from a paper position to a demonstrated one. The protection office's five corrective orders against a foreign controller were [confirmed complied with on 17 July 2026](#), inside the statutory timelines and without an appeal. Orders against a second foreign controller issued a year earlier have [no compliance record at all](#), and the office has issued nothing on the personal-data processing that ran through the January 2026 election.

Payments carry the largest measured volumes in the base: [UGX 326tn of e-money in FY2024/25, agent banking up 76.1%, and debit-card use down 5.1% with internet-banking users down 6.6%](#). Growth is in agents and handsets while both screen-based channels contract.

The compiled finance layer holds no domestic state budget for Uganda at all, so every state financing figure in this report is an announcement, a levy remittance or a donor commitment rather than an appropriation. Sixteen of the rows below are *Not held*.

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Bayobab Kampala-Malaba fibre route	IMPLEMENTED ↗	Route lit, 260 km, over 1 Tbit/s
Border free public Wi-Fi, Bwera and Mpondwe	IMPLEMENTED ↗	Launched on the DRC border
National Backbone Infrastructure Phase V	IN DEVELOPMENT ↗	Parliament approved an RMB 1.05bn loan 2023-12-06
Northern Corridor regional satellite	PLANNED ↗	Shared-funded feasibility study agreed
Paratus Goma-Mombasa route	IMPLEMENTED ↗	Route switched on, 2,000 km protected
Savanna Fibre Uganda 1 Gbps fixed broadband	IMPLEMENTED ↗	Product launched
Seacom Nairobi-Kampala route	IMPLEMENTED ↗	Launched with 1 Tbps activated
Social media and OTT restriction	IMPLEMENTED ↗	Still blocked a week after general internet was restored
Starlink operational licence	IMPLEMENTED ↗	Licence and MoU signed at State House 2026-05-15
Spectrum assignment and 5G licensing	NOT HELD	—

Data Storage

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
ABQ Cloud sovereign cloud ecosystem	IMPLEMENTED ↗	Launched at the Deep Tech Hub and Raxio Namanve
Aeonian USIO supercomputer at Karuma	PLANNED ↗	Rollout stated to begin 2026, full capacity 2028
Centenary Group Green Tier 3 data centre, Masaka	IN DEVELOPMENT ↗	Launch rebased to Q1 2026
Nxtra Africa Kampala edge site	PLANNED ↗	Named as a future site with no date or capacity attached
Raxio Data Centre, Namanve	IMPLEMENTED ↗	Colocation operating outside Kampala
National data-centre installed capacity	NOT HELD	—

Energy

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Karuma surplus power for compute	PLANNED ↗	Design case only, tied to the USIO rollout
Grid power at national backbone sites	NOT HELD	—

Technical Capacity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National ICT and cybersecurity workforce baseline	NOT HELD	—

Cybersecurity

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National anti-piracy coordination framework	IN DEVELOPMENT ↗	Stakeholder convening; dynamic IP and DNS blocking under exploration

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National Information Security Framework 2026	IMPLEMENTED ↗	Launched by the ICT ministry under the Uganda Digital Acceleration Project
National computer emergency response team	NOT HELD	—

Two new terrestrial routes entered service — a [Goma-to-Mombasa route through Kampala in February 2026](#) and a [Nairobi–Kampala route in June 2026 with 1 Tbps activated and headroom to 30 Tbps](#) — while the National Backbone Infrastructure's most recent published utilisation figure remains the [under 30% of full capacity Parliament recorded in December 2023](#) when approving its fifth phase. Parliament attributed part of that to the absence of grid power at sites the fibre reaches, and nothing later in the base measures either.

The [five-year satellite operating licence signed in May 2026](#) requires a national gateway, a physical point of presence, a staffed local office and registration of every in-country device, and follows a period in which [terminals were disabled on regulatory direction](#). A January 2026 ruling that access would run wholesale through licensed local operators and the May direct licence are not reconciled.

[Social media and over-the-top messaging remain blocked](#) with no lifting on record, having been retained after general internet was restored in January 2026.

An updated national information security framework was [issued in July 2026 citing a 60% year-on-year rise in attacks](#), but the framework document is not held, and the most recent police series remains [446 recorded cybercrime cases for 2024 with UGX 72.1bn lost](#). Uganda has no national computer emergency response team on the record.

The regional communications regulators' organisation puts Uganda's [mobile data price at approximately USD 1.40 per gigabyte, attributing it to a 40% tax burden on smartphones](#), in a dataset covering 2024–2025; the figure is printed in USD with no exchange-rate or conversion basis stated.

Digital public infrastructure

Data Exchange

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
UGHub	IMPLEMENTED ↗	Agency integration baselined at 37% in the NITA-U strategy
UGPass	IMPLEMENTED ↗	Described in an undated agency deck, proxy-dated at ingest

Digital Identity and CRVS

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Enhanced national ID card	IMPLEMENTED ↗	Dispatched to all districts, October 2025
Iris capture on registration kits	IMPLEMENTED ↗	Iris hardware deployed on more than 5,665 registration kits for the 2024-26 campaign
ISER v Attorney General and NIRA	IMPLEMENTED ↗	Dismissed 2025-06-10, each party bearing its own costs
National Secure Identification System	IMPLEMENTED ↗	Migration of 28,571,893 legacy records completed, announced 2026-02-09

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
NIRA register data-breach investigation	IN DEVELOPMENT ↗	Investigation opened with the data-protection office and police, September 2025
Tax identification number merged into the national ID number	PLANNED ↗	Announced under the Tax Procedures Amendment Bill, 2025-11-11

Digital Payments and Fintech

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Airtel Money and Britam insurance distribution	IMPLEMENTED ↗	First product live, reported 2026-07-22
AKIBA tokenised-asset exchange	IN DEVELOPMENT ↗	A majority-stake acquisition moved on 2026-04-08
Cash-withdrawal caps	PLANNED, IN FORCE FROM 2027-01-01 ↗	Circular issued 2026-05-29, effective 2027-01-01
Centenary and MicroPay platform memorandum	PLANNED ↗	Memorandum signed at Mapeera House, reported 2026-07-24
Digital shilling CBDC pilot	PLANNED ↗	Announced within a US\$5.5bn settlement-network plan, 2025-10-08
MTN MoMo separation and listing	IN DEVELOPMENT ↗	Shareholders approved separation into a new financial company, 2025-07-23
National Payment Switch	IN DEVELOPMENT ↗	Reported in progress in the central bank's FY2024/25 account
Okusevinga USSD micro-investing pilot	PILOTING ↗	Reported as a 2026 pilot in a comparative account, 2026-07-31
PAPSS participation	IMPLEMENTED, ONE COMMERCIAL BANK ONLY ↗	United Bank for Africa's Uganda subsidiary announced live on the rail 2026-08-03
RTGS replacement and ISO 20022 migration	IN DEVELOPMENT ↗	Go-live stated for November 2025
SCRIPT stablecoin settlement corridor	IMPLEMENTED ↗	Corridor opened, reported 2026-07-16
Tax payment on MTN MoMo	IMPLEMENTED ↗	Launched 2025-12-23

Registries (population, land, address, etc.)

9th Uganda National Household Survey	IMPLEMENTED ↗	80 data collectors commissioned 2026-08-04 for twelve months of collection
Labour, Employment, Productivity and Reporting Programme	PLANNED ↗	Launched 2026-06-15
Statistics House Entebbe office block	IN DEVELOPMENT ↗	Groundbreaking ceremony held, 2026-08-07
National Population and Housing Census 2024 final report	NOT HELD	—

Use of satellite data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Ugandan satellite or Earth-observation programme	NOT HELD	—

The government service bus is [baselined at 37% of agencies integrated](#), against a [73% target for FY2029/30](#), and the only other figure the base holds for it — more than 100 agencies and private entities — [rests on a 2024 case study](#) using a different denominator. The two are not reconciled. The national authentication platform has no user or transaction figure at any date. A hundred further public entities were added to the [electronic government procurement system on 3 August 2026](#), taking it from 36 to 136.

Three registry changes were made in 2026: a [centralised digital register for companies and non-governmental organisations](#), [registration of resident foreign nationals](#) of whom about 1.95m of the roughly 2m in scope are refugees or asylum-seekers, and a [birth-registration drive with a published fee schedule](#). No birth-registration coverage figure has been published since 2016. The registration authority states it is [operating at 70% of its approved workforce](#), with 25 districts served by a single member of staff.

From 1 January 2027 over-the-counter withdrawals are capped at UGX 50m a day for individuals and UGX 500m a day for businesses, with interbank cheque limits halved, in a measure whose stated purpose is a cash-lite economy. A stablecoin settlement corridor across four East African markets, a tokenised-asset exchange under acquisition, and insurance sold over a mobile-money channel. The national payment switch and the real-time settlement replacement are both recorded as in progress with no confirmed go-live.

United Bank for Africa's Uganda subsidiary went live on the Pan-African Payment and Settlement System on 3 August 2026, announced by the operator with no corridor list, volumes or tariff; no held source puts the Bank of Uganda on the system as a settlement participant.

A comparative account of wallet-based micro-investing across the region names Okusevinga, a 2026 Ugandan USSD pilot opening money-market and bond funds to investments from UGX 10,000, aimed at drawing cash and informal savings-group money into regulated instruments; no provider, launch date or user figure is published.

The statistics bureau broke ground on a Statistics House office block at Entebbe on 7 August 2026, to house a data centre, a data-science hub and a statistics-innovation hub alongside training and census-coordination space; the government states the block is fully financed but has published no contract value, budget line or completion date.

Governance and regulation

Legislation and regulation

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Computer Misuse Act ss.11, 23, 26-29	DISCONTINUED ↗	Nullified by the Constitutional Court on quorum and vagueness grounds
Protection of Sovereignty Bill, 2026	IN DEVELOPMENT, ENACTMENT REPORTED BUT UNCONFIRMED ↗	Bank of Uganda technical assessment to joint committees, 2026-04-27
Telecom-infrastructure vandalism enforcement	IMPLEMENTED ↗	Government stated attacks are treated as economic sabotage, 2026-07-31
UCC enforcement against unlicensed public Wi-Fi	IMPLEMENTED ↗	Public notice of 2026-07-07 opening nationwide enforcement
UCC order suspending public internet	DISCONTINUED ↗	Full restoration of internet services announced by UCC 2026-01-26

Strategies, plans and policies

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
NITA-U Strategic Plan FY2025/26 to FY2029/30	IMPLEMENTED ↗	Launched in Kampala 2026-06-22

EU-Uganda bilateral digital cooperation instrument	NOT HELD	—

Open data

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
National open government data policy or portal	NOT HELD	—

On 17 March 2026 the Constitutional Court [nullified sections 11, 23 and 26 to 29 of the Computer Misuse Act, together with the Penal Code's criminal-libel provisions](#), on quorum grounds and for vagueness. Those sections were the state's principal tools for prosecuting online speech.

The data-protection office ran a full cycle to confirmed compliance against a foreign platform while the January 2026 electoral processing has produced no decision, complaint entry or public statement on file. The [directives behind the pre-election shutdown were ordered tabled to Parliament on 10 March 2026](#) and the base holds no record that they were.

The pre-election shutdown cut connectivity from 18:00 local on 13 January 2026, with access [returning at 23:00 local on 17 January](#); the communications commission announced [restoration "as of midnight" on 18 January, with social media and over-the-top applications expressly still restricted](#), and platform blocking ran until its [public notice of full restoration on 26 January 2026](#), thirteen days after the order. A joint civil-society [submission to Uganda's fourth-cycle Universal Periodic Review](#), filed in July 2026, seeks statutory independence and fining powers for the data-protection office.

The health memorandum of 10 December 2025 provides for a [Data Sharing Agreement not on record as executed](#), capped at seven years from execution, requiring prior written authorisation with the Government of Uganda as data owner, and binding data activities to the Data Protection and Privacy Act Cap 97 and the National Data Governance Framework.

The five-year agency strategy targets [active e-government use rising from 9.2% to 40% and IT-law compliance from 67% to 81% by FY2029/30](#). The government's own review [found gaps and inconsistencies in the data agencies submit through the national monitoring system](#), stating no error rate and no remediation date.

The procurement portal publishes [26 of 148 required data elements, 17.6%, and 4.2% of required project-level disclosure paths](#). No Ugandan open-government-data policy or portal is held at all.

A bill capping foreign funding at [20,000 currency points, about UGX 400m a year, above which ministerial approval is required](#) was before joint parliamentary committees in April 2026 and was described as recently enacted on 2 August 2026; no assent date, gazette notice or text is held, so the base cannot say whether it is law.

Gulf/UAE activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
Tahaluf national ID system contract	IMPLEMENTED ↗	Migration of more than 28m records completed, announced 2026-02-09

Uganda has no adopted artificial-intelligence instrument. The strategy was described as being in its final stages in April 2025 and was [still in drafting sixteen months later](#), with no text or gazette record; on [4 August 2026 the ICT ministry told the parliamentary committee it is due by the end of the financial year](#). A [secretariat operates inside the ICT ministry](#) with no budget line or mandate document on file. On 2 August 2026 the minister announced a [separate policy to regulate artificial intelligence and social media](#); no other record of it is held.

A [national AI research cloud opened at Makerere in March 2026](#), framed as replacing foreign cloud on data-sovereignty grounds and published with no capacity, cost or user figure. [Sunflower 14B and 32B](#), released open source in October 2025 by a not-for-profit with Makerere University, cover 31 Ugandan languages, with their developer claiming state of the art on translation in 24 of them.

[Four startups raised a disclosed US\\$5.5m in 2025 against two raising US\\$2.4m in 2024](#), on a tracker counting disclosed rounds only. No sector output, employment or contribution-to-GDP figure is held.

The bilateral health memorandum [signed at Kampala on 10 December 2025](#) plans United States support of US\$1,719,960,000 against Uganda's US\$577,001,796, including US\$113,102,289 for data systems. The memorandum itself only provides for a future Data Sharing Agreement (§2.5.2); [ProPublica reported](#) on 23 July 2026 that it reviewed that agreement directly and that it grants the United States direct, real-time login access to nine of Uganda's health data systems for seven years — a term matching the memorandum's own §2.5.2 cap. The agreement's text is unpublished and not held, and neither Uganda's Ministry of Health, its Personal Data Protection Office nor the US Embassy answered ProPublica's questions (reconciled 2026-08-10).

Inclusion and capacity

Young Africa Works in Uganda	IMPLEMENTED ↗	US\$200m commitment recorded, running to 2030

Research institutions

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT
KOICA distance-education project, Makerere University	IMPLEMENTED ↗	US\$12.2m grant recorded for 2025-2030; e-content for 2,560 courses across ten colleges

The universal service fund's revenue base is statutory, and half of it does not reach the fund: the regulator's executive director stated at the handover ceremony of 30 July 2026 that of the [statutory 2% of licensee gross annual revenue, half goes to the Consolidated Fund and only half is retained](#). The fund publishes no balance, annual total or audited disbursement at any date. Its last reported quarterly outputs are [3,000 riders skilled, 4,900 tablets delivered, laboratories in 70 secondary schools and 60 public access centres](#), for the quarter to September 2025.

[Six of nineteen planned centres were operational on 27 July 2026](#); four months earlier the permanent secretary [described one site as the only operational centre for three years](#). Both accounts are government-sourced and the two have not been reconciled.

The state ICT institute reported [48,448 people trained in FY2025/26](#), 1,932 of them government officers, on its own unaudited figures. A [US\\$200m ten-year programme targeting 4.3m young Ugandans in dignified work by 2030](#) carries no progress, disbursement or beneficiary figure inside the window.

Finance

New investments

SYSTEM OR INSTRUMENT	STATUS ↗ source	AS AT

Domestic state digital-transformation budget	NOT HELD	—

(narrative not yet written)

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Spectrum assignment and 5G licensing	a UCC spectrum award notice or a National Radio Frequency Plan	not yet probed
National data-centre installed capacity	a UCC or NITA-U facility register with MW or rack counts	not yet probed
Grid power at national backbone sites	a NITA-U or energy-ministry statement of how many backbone points of presence are grid-connected	not yet probed
National ICT and cybersecurity workforce baseline	a UCC or NITA-U ICT skills survey, or a named certified-professional count	not yet probed
National computer emergency response team	the National Information Security Framework 2026 text, which should name the incident-response body and the reporting duty	not yet probed
PDPO action on election-period personal-data processing	any data-protection decision, complaint-register entry or public statement on the January 2026 electoral processing	not yet probed
EU-Uganda bilateral digital cooperation instrument	a Global Gateway country package, an EU-Uganda digital memorandum, or a financing agreement naming Uganda	not yet probed
National open government data policy or portal	a named Ugandan open-data policy, a national data portal with a publication schedule, or a dataset-release instrument	not yet probed
Uganda ICT sector output and employment series	a statistics-bureau or UCC sector statistic, or the ICT ministry's development-plan sector targets	not yet probed
India-Uganda technology relationship	a named India-Uganda instrument - a line of credit, a training agreement or a supplier contract with a value	not yet probed
National Population and Housing Census 2024 final report	a text-extractable copy of the 2024 census final report volume 1, whose body is currently scanned imagery	not yet probed
Ugandan satellite or Earth-observation programme	a regional-satellite feasibility contract or cost share, or a Ugandan entry in a named continental launch programme	not yet probed
Rural DPI service delivery programme	a named last-mile programme with a target - a district-office expansion plan with a costed establishment, or a universal-fund award with a rural service line and a beneficiary count	not yet probed
Subnational digital service systems	a district or municipal system with a dated statement of what it does and how many people use it	not yet probed
National digital-literacy rate	a statistics-bureau or UCC household ICT survey reporting a digital-literacy or digital-skills rate	not yet probed

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Domestic state digital-transformation budget	a finance-ministry approved estimates or ministerial policy statement volume carrying the vote lines for the ICT ministry, NITA-U and UCC	not yet probed

Sixteen rows carry no reliable statement in the base, in three groups. Measurement absences: no national data-centre capacity, no ICT workforce baseline, no digital-literacy rate, and a census report the wiki cannot read. Instrument absences: no national computer emergency response team, no open-data policy or portal, no spectrum award or frequency plan, no bilateral European Union instrument. And one structural absence: **no domestic state digital-transformation budget**. None of the sixteen has yet been probed on a date.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
