

STATUS REPORT

Mauritania: status report

Edition of 2026-08-17 · 57 systems and instruments tracked, 4 of them not held

Compiled 2026-08-17 from the Data Landscapers source base, from [outputs/reports/MRT/ledger.csv](#) (57 systems and instruments, 4 of them **Not held**). Each section opens with its ledger; specific events are covered in the monthly updates. Figures are dated because most are time-varying.

Status values. *Implemented* — in operation or in force. *Piloting* — running with a limited user group or in a controlled environment. *In development* — build or drafting under way, not yet operating. *Planned* — announced or provided for, no build or draft on record. *Enacted* — an instrument passed into law; pair with a qualifying clause for its in-force date. *Under review* — a law or policy currently being reconsidered. *Discontinued* — closed or superseded. *Not held* — the base carries no reliable statement of status; these are the gaps to fill and are listed again at the end.

Summary of position

Mauritania has a working identity and payments stack and a thin published record of what governs it. The [National Population Register](#) stands at 5.1m against 3.4m in 2019, the [Houwiyeti](#) application reports 1,511,139 beneficiaries, and financial inclusion is put at 55% in 2026 against 21% in 2019–20 [by the financier of the programme that delivered it](#).

The instruments are the weak side. The National Digital Transformation Agenda ran to 2025 and no successor is held; the [National AI Strategy 2025–2029](#) and the data protection authority are known only from a foreign government's reference guide; the [universal-access fund's governing decree was replaced in July 2026](#) and neither the new text nor the one it repeals is held, because both national gazette hosts return NXDOMAIN.

Delivery is measured where it is measured at all, and the most useful figure in the base measures the state against its own system: of 642 legally constituted public bodies, [339 are active with the tax administration and just 3 pay through the electronic platform](#).

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
5G licences	IMPLEMENTED ↗	Chinguitel launched the first commercial 5G network, Nouakchott, 10 August 2026

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
ACE submarine cable landing	IMPLEMENTED ↗	Sole international cable since 2011
Chinguitel network modernisation	IMPLEMENTED ↗	Full modernisation completed in Nouakchott with Huawei
EllaLink second submarine cable	IN DEVELOPMENT ↗	Phase-1 coastal landing completed at Nouadhibou
IPv6 deployment across operator networks	IN DEVELOPMENT ↗	All licensed operators have activated IPv6 across networks and services
MEDUSA cable, sub-Saharan component	PLANNED ↗	EIB financing recorded for the sub-Saharan component
Sahel digital connectivity support	IN DEVELOPMENT ↗	Ericsson with Luxembourg and Swedish support named for Sahel connectivity
Satellite internet licences	IN DEVELOPMENT ↗	Three firms provisionally selected across two lots

Data Storage

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
National cloud platform	IMPLEMENTED ↗	Launched 29 June 2026 at the Nouakchott National Data Center
Nouakchott Tier III national data centre	IMPLEMENTED ↗	Inaugurated 8 May 2025, EUR 15m EIB-financed and Uptime-certified

Energy

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
SOMELEC digital-transformation programme	IN DEVELOPMENT ↗	FY2024 procurement plan (revised 4 December 2024) itemises a data-centre fit-out, an ERP/CRM system and smart-metering and dispatch studies, each with a target completion date
Power supply to network sites and the data centre	NOT HELD	—

Cybersecurity

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Central Bank digital reputation protection platform	IMPLEMENTED ↗	Detection figures for the first half of 2026 reported by PAFIID
National computer emergency response team	PLANNED ↗	Provided for under the 2022-2025 cybersecurity strategy; nothing on record built
National Cybersecurity Strategy 2022-2025	IMPLEMENTED, PERIOD EXPIRED ↗	Ran 2022 to 2025; no successor is published

International capacity is a single point of failure until EllaLink commissions. The [ACE cable](#) has carried the country alone since 2011; the [EllaLink branch](#) — 669 km, 200 Gb/s rising to 12 Tbit/s, financed by the EIB and the EU — completed its coastal phase at Nouadhibou in May 2026 with offshore laying scheduled for August 2026. A [MEDUSA sub-Saharan component](#) is financed and has no landing on record.

Mobile is the most changed layer. [Four fifteen-year 5G licences](#) were provisionally awarded in April 2026 to the three incumbents and the new entrant Rimatel, at bids of MRU 252.6m to 305m plus 5% of revenue, and Chinguitel launched in Nouakchott the following month. Chinguitel had [completed a full network modernisation with Huawei](#) in November 2025. Satellite is one stage behind: [three firms were provisionally selected](#) in July 2026 from nine bids,

with two of them required to match the leading offer before a licence issues, and no award, launch date or operating framework published. That account is Agence Ecofin's reading of the regulator's communiqué; the communiqué itself is not held.

The protocol layer is a written state commitment rather than an engineering preference. [All licensed operators have activated IPv6](#), and one unnamed operator has passed 15% of subscribers migrated against a 25% end-2026 target.

Hosting is domestic and recent. The [Nouakchott Tier III data centre](#), EUR 15m and EIB-financed, was inaugurated in May 2025, and the [national cloud](#) launched there in June 2026 with no migration timeline, capacity or cost disclosed. Cybersecurity is thinner: the 2022–2025 strategy's period has ended with no successor and no CERT, and the one operational figure in the base is the Central Bank's — [more than 10,000 electronic threats detected in the first half of 2026, 470 confirmed and removed](#).

SOMELEC's [FY2024 procurement plan](#) sets out its own data-centre, ERP/CRM and smart-metering programme, financed by FADES, SOMELEC and IDA; power to network sites and the national data centre remains not published.

Digital public infrastructure

Data Exchange

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
National data management system	IN DEVELOPMENT ↗	Two-day workshop opened on data governance and blockchain, 27 July 2026

Digital Identity and CRVS

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE

Other GovTech and e-Gov

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Digital consular services platform	IMPLEMENTED ↗	Launched 9 July 2026 with a first phase of nine online services
Electronic invoicing for public institutions	PLANNED ↗	Announced by the Finance Minister, 30 July 2026
Ijraati administrative procedures portal	IMPLEMENTED ↗	Launched consolidating more than 800 administrative procedures
Khdamati remote transactions platform	PLANNED ↗	Named as the third phase of the Ijraati roadmap
SNDE services on the Mes Services portal	IMPLEMENTED ↗	Water utility services integrated into the portal from 4 August 2026
STT electronic tax services platform	IMPLEMENTED ↗	Adoption by public bodies disclosed at a tax workshop, 30 July 2026

Digitalisation of sub-national government

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Municipal or regional digital services	NOT HELD	—

National statistics

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Fifth general population and housing census	IMPLEMENTED ↗	Final regional results presented from 3 August 2026
National Youth Empowerment Index	IMPLEMENTED ↗	Reference document presented at a Nouakchott workshop, 29 July 2026

Identity is the deepest layer. The [National Population Register](#) has risen to 5.1m from 3.4m in 2019 with enrolment now a permanent public service, 238 local commissions installed and more than 613,000 people captured by a survey of enrolment difficulties. Against an aggregate coverage claim of more than 94%, a residual of citizens without papers falls disproportionately on Haratine and Afro-Mauritanian groups. Houwiyeti reports 677,000 activated accounts and 406,871 cumulative civil-status extracts, with its share of passport requests rising to 35.7% by January 2026. Beneath it, a [national PKI](#) is tendered in two lots and twice extended with no award held; the notice title promises a national digital identity system and its operative text describes only e-certification integrating with the existing register. [Biometric SIM identification](#) is enforced by formal notice with sanctions of up to 3% of turnover, and no compliance outcome has been reported.

Government services are being consolidated onto single front doors. [Ijraati](#) directs more than 800 administrative procedures, and the water utility's services were [attached to the Mes Services portal](#) in August 2026 rather than given a platform of their own. The [consular platform](#) launched in July 2026 and went live for [Saudi Arabia, Bahrain and the Maldives](#), with a companion platform building a digital register of national skills abroad.

Adoption is the unresolved question, and the base carries one hard measurement of it. Of [642 legally constituted public bodies](#), [339 are active with the tax administration](#), around 20 are absent from the taxpayer register entirely, and on the electronic tax-services platform 66 are enrolled, 53 file and 3 pay. Electronic invoicing for public institutions has been announced against that background.

The exchange layer is at policy stage: a [national data management system](#) is being scoped with blockchain proposed as its trust layer, on a policy in consultation since November 2025 naming land administration, trade, public procurement and natural-resource management — [four registries](#), with no draft text, adoption date or budget published.

Payments carry a delivered programme and a new levy. [PAMIF](#) rebuilt clearing, real-time settlement and automated refinancing, and the 2026 finance law introduced a [0.1% levy on electronic transactions above MRU 5,000](#) with 10% on agent commissions.

Governance and regulation

Legislation and regulation

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
ANETA state digital agency proposal	PLANNED ↗	Named 'Agence Numérique de l'État' (AN-État) and proposed as national interoperability operator in a June 2023 strategy, reviving a 2021 UNDP proposal
Startup Act	ENACTED ↗	Loi n° 2024-002 P.R relative aux start-ups technologiques et innovantes promulgated 2 January 2024
Universal Service Access Fund governance	IN DEVELOPMENT ↗	Council of Ministers approved a decree repealing Decree 2020-152

Strategies, plans and policies

Standards

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
National framework for public digital service standards	IN DEVELOPMENT ↗	Three-day standards and interoperability workshop run by the digital ministry
National IPv6 transition strategy	IMPLEMENTED ↗	A 68-page strategy targeting 25% adoption by 2026, with a national committee

Data protection

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Data protection authority	IMPLEMENTED ↗	Operating under a 2023-2026 plan, per a reference guide
Data protection law and enforcement record	IMPLEMENTED ↗	Loi n° 2017-020 in force since 22 July 2017; the authority reports monthly meetings and sector sensitisation days through May 2026

Open data

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
National open data portal	IMPLEMENTED, THIN ↗	National open-data strategy published, June 2023, naming the existing portal and proposing a governance overhaul

[Loi n° 2017-020](#) has been in force since 22 July 2017; the [authority's site](#) records monthly meetings and sensitisation days through May 2026, with no enforcement record yet published. The National Digital Transformation Agenda covered 2022 to 2025 and [its four axes are known from a ministerial interview](#); no successor is held. The [universal-access fund](#) was regoverned in July 2026 on stated grounds that its object, resources and budgetary integration were unclear after six years — the replacing decree's terms are not reproduced, and both national gazette hosts return NXDOMAIN.

Legislation moved most. The [Startup Act](#) — Loi n° 2024-002 — was promulgated 2 January 2024, after a 2023 draft targeting 300 labelled start-ups and 3,000 jobs over five years; the promulgated text is not held, but the ministry's [pre-enactment deck](#) sets a procurement margin, a start-up fund and guarantee fund, and payroll relief. A state digital agency [proposed by UNDP in 2021 as ANETA](#) remains proposed only, revived by name in a [2023 strategy](#) naming the country's existing, thin open-data portal.

Standards are where the state is otherwise writing. The [IPv6 transition strategy](#) commits the state to impose the protocol on government agencies, educational establishments and critical-infrastructure sectors — an obligation rather than an encouragement — and creates a national committee to own the roadmap. A [national framework for public digital service standards](#) is under development with German support, and nothing has been published from it.

Regionally, the [memorandum with Senegal](#) of January 2025 has produced no recorded deliverable.

Artificial intelligence and the technology sector

AI

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
National AI Strategy 2025-2029	IMPLEMENTED ↗	Recorded by a reference guide; the text is not held

ICT Industry

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Mobile operator market	IMPLEMENTED ↗	A fourth operator entered at the 5G award

Innovation ecosystem

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
IBTIKAR technology park	NOT HELD	—

China activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Urban security system	IMPLEMENTED ↗	Chinese government grant of MUR 629.4m through ETCA

Gulf/UAE activities

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Oman digital cooperation agreement	IMPLEMENTED ↗	Cooperation agreement and memoranda signed at the close of the Nouakchott forum

The AI position is a strategy nobody outside a foreign commercial guide has seen. The [National AI Strategy 2025–2029](#) is recorded as existing; its scope, commitments, budget and implementing body are all unestablished, and no institution is named as owning it.

The market changed shape in April 2026, when a [fourth operator was licensed](#) alongside the three incumbents. The two external technology relationships on the record run in different directions: [Oman](#), where a cooperation agreement and memoranda signed in July 2026 cover capacity-building, cybersecurity, artificial intelligence and data analytics with no value disclosed by either side; and China, whose [grant of MUR 629.4m for an urban security system](#) has no delivery, siting or oversight arrangement on record.

Inclusion and capacity

Literacy

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
National digital literacy measurement	NOT HELD	—

Training and skills

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Youth digital employability programme	IMPLEMENTED ↗	Launched for 2,150 beneficiaries across six cities, 23 July 2026

Research institutions

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
National digital or data research programme	IMPLEMENTED, PERIOD EXPIRED ↗	CNESRS-accredited under arrêté 183 (17 February 2022) for May 2021 to May 2024; no renewal is on record

Training is one programme. [France's Fonds Équipe France](#) finances a 2,150-place digital-employability project across six cities, implemented by Simplon, succeeding a programme closed in 2025. Nothing measures digital literacy nationally. The [Calcul Scientifique, Informatique et Data Sciences unit](#) at the Université de Nouakchott, CNESRS-accredited May 2021–May 2024 with no renewal published, ran 16 doctoral candidates and defended three theses in 2022.

Access is measured by reference studies, cited and not absorbed here. [DataReportal](#) put internet penetration at 37.4% in March 2025; the ITU figures carried in the satellite-licence reporting [put internet use at 45.8% in 2024](#), [3G coverage at 78%](#) and [4G at 73%](#), and a [5 GB mobile plan at 2.94% of GNI per capita](#) against a [2% international benchmark](#).

Finance

New investments

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Digital-Y German cooperation project	IMPLEMENTED ↗	Supporting the public digital service standards framework
EIB COVID-19 resilience submarine cable financing	IMPLEMENTED ↗	Committed in 2020
EIB financing for the EllaLink connection	IMPLEMENTED ↗	More than EUR 43.5m committed by the EIB and the EU
WARDIP digital transformation programme	IMPLEMENTED ↗	Financed the national cloud launched in June 2026
World Bank private sector, digital and human capital reform financing	IMPLEMENTED ↗	US\$30m IDA grant, the second of three operations

MoUs and other agreements

SYSTEM OR INSTRUMENT	STATUS ↗ source	MILESTONE
Islamic Development Bank digital financing	PLANNED ↗	Agreement in principle for US\$50m, 14 April 2026

Mauritania's digital financing record is substantial and almost entirely external. The [World Bank's WARDIP programme](#) financed the national cloud and is running the unawarded PKI procurement; the EIB financed the [EllaLink connection](#) at more than EUR 43.5m, the data centre and a [2020 COVID-19 resilience cable](#); Germany's [Digital-Y](#) project runs at EUR 4m; and the [Islamic Development Bank agreed US\\$50m in principle](#) in April 2026, with no signed instrument or disbursement schedule held. The one domestic figure on record is the [digital ministry's 2026 budget](#), set at [US\\$24.2m](#) and up [104.6% on the prior year](#).

Gaps to fill

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Power supply to network sites and the data centre	An operator, utility or regulator statement quantifying outage exposure or backup provision for telecommunications sites and the Nouakchott Tier III data centre now hosting the national cloud.	2026-08-10
Municipal or regional digital services	A named wilaya or commune digital service, one-stop desk or local e-government platform, with a location and a start date. Ijraati and Mes Services are national portals.	2026-08-10

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
IBTIKAR technology park	Any dated statement of whether the IBTIKAR technology park, named in the 2023 digital agenda, was built, is operating, or holds tenants.	2026-08-10
National digital literacy measurement	A national survey or ministry statement measuring digital skills or literacy in Mauritania, as distinct from the vocational-training place counts.	2026-08-10

One of the four is a document search that found something else: a 2017 FASEP-financed feasibility study for a different Mauritanian technopole, which predates and does not name IBTIKAR, the park cited in the 2023 digital agenda; no dated status for IBTIKAR itself has been located.

The rest are ordinary absences: no municipal or regional digital service against two national portals, nothing measures digital literacy nationally, and power to network sites and the national data centre hosting the national cloud is not published.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
