

## TWELVE-MONTH PROGRESS REPORT

# Digital Identity and CRVS: progress report, 2025-08-01 to 2026-08-17

Edition of 2026-08-17 · compiled from the Data Landscapers source base

56 places. Every table below is carried verbatim from that place's own progress report; nothing is written here.

**Movement values.** *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a measured position worsened. *Closed* — the programme ended. *No change* — the position at both ends is the same. *Baseline not held* — the base carries no position at the start of the period, so no movement can be stated. A value may carry a qualifying clause after a comma, as in *Advanced, slipped*.

The place reports do not share one window; the period above is the range they span.

## Algeria

| SYSTEM OR INSTRUMENT                                                                      | AT 2025-08-01                                        | AT 2026-08-17                                                                                 | MOVEMENT  |
|-------------------------------------------------------------------------------------------|------------------------------------------------------|-----------------------------------------------------------------------------------------------|-----------|
| All-digital vehicle registration                                                          | Earlier phases live; local applications still manual | All-digital; manual local applications ended and the biometric ID card required for transfers | ADVANCED  |
| DGSN-UK Home Office biometrics and digital-forensics MoU                                  | Did not exist                                        | Fingerprint-analysis training and biometric verification exchange                             | ADVANCED  |
| Digital-identity and trust-services law                                                   | Did not exist                                        | Before the APN; no promulgation or gazette reference held                                     | ADVANCED  |
| Remote biometric passport renewal for the diaspora                                        | Did not exist                                        | Remote renewal open to consular applicants                                                    | ADVANCED  |
| National electronic-certification authority (ARPCE) and the governmental authority (AGCE) | Designated (2025-02)                                 | Both authorities designated, modernising the 2015 signature framework                         | NO CHANGE |

## Angola

| SYSTEM OR INSTRUMENT          | AT 2025-08-01 | AT 2026-08-17                                                                                                                                                       | MOVEMENT |
|-------------------------------|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| At-home identity-card service | Did not exist | Kz 250,000 for at-home processing and Kz 10,000 for at-home delivery alone, on a 48-hour issuance target, with requests through a web portal and a messaging number | ADVANCED |
| Biometric electronic passport | Did not exist | Issued across all 21 provinces by end-March 2026 and to the diaspora from May 2026                                                                                  | ADVANCED |

| SYSTEM OR INSTRUMENT                            | AT 2025-08-01                                                                                                        | AT 2026-08-17                                                                                                                                                                                                                                                                                                                                                                                                                                                 | MOVEMENT          |
|-------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Civil and criminal identification bill</b>   | Did not exist; voter cards, driving licences and passports accepted as substitutes                                   | Would make the identity card the only valid document for banking, telecoms, school enrolment, property registration and contracts, and set the country's first dedicated identity-data-processing regime                                                                                                                                                                                                                                                      | ADVANCED          |
| <b>Identity card coverage</b>                   | No national coverage figure published; a 2023 diagnostic states only that the country is far from universal coverage | 52.4% of the population aged five and over hold the card, 63% urban against 30.9% rural, leaving 14.9m people undocumented                                                                                                                                                                                                                                                                                                                                    | ADVANCED          |
| <b>Single digital identity</b>                  | Named as a workstream in the 2024 World Bank loan agreement, nothing built                                           | A component of the US\$150m build, with no design, standard, pilot or launch date on file                                                                                                                                                                                                                                                                                                                                                                     | ADVANCED          |
| <b>National identity card</b>                   | In issue, one of several accepted identity documents, coverage unmeasured                                            | In issue nationwide and generated from the birth record by system interoperability, with coverage now measured and sole-identity status pending in a 2026 bill                                                                                                                                                                                                                                                                                                | NO CHANGE         |
| <b>National biometric border-control system</b> | Baseline not held                                                                                                    | Budgeted at US\$112m and awarded in February 2025 to Dolinveste Lda with Poland's Technology for Business, reportedly by direct award rather than open tender; no biometric system operates at the border posts with the Democratic Republic of the Congo, and the one functional post, Santa Clara on the Namibian border, reads passports against the migration service database but has discontinued fingerprint and height capture on maintenance grounds | BASELINE NOT HELD |

## Benin

| SYSTEM OR INSTRUMENT                                | AT 2025-08-01                               | AT 2026-08-17                                                              | MOVEMENT                                      |
|-----------------------------------------------------|---------------------------------------------|----------------------------------------------------------------------------|-----------------------------------------------|
| <b>Diaspora biometric passport renewal platform</b> | Did not exist                               | Available in more than 80 countries, renewals reported at about 15 minutes | ADVANCED                                      |
| <b>Foundational biometric identity</b>              | Biometric enrolment near-complete (2025-08) | 98-99% biometric enrolment; 7.7m numbers and 6.1m certificates issued free | ADVANCED, IN ISSUANCE RATHER THAN IN COVERAGE |
| <b>Citizen mobile wallet</b>                        | Planned (2025-06)                           | Still planned; no build reported                                           | NO CHANGE                                     |

## Botswana

| SYSTEM OR INSTRUMENT                              | AT 2025-08-01                                              | AT 2026-08-17                                                                                                                                       | MOVEMENT          |
|---------------------------------------------------|------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Electronic Identification System</b>           | Prioritised for FY2025/26 as a partnership, not progressed | Rescoped to integrate digital identity, a national wallet and e-government services; a biometric identity card itemised at P31,700,000 in FY2026/27 | STALLED, RESCOPED |
| <b>Omang card production and replacement</b>      | Replacement operating without reported delay               | Delays running since the start of 2026; no backlog figure, no restoration date and no equipment-replacement commitment                              | REGRESSED         |
| <b>Mandatory SIM registration</b>                 | Mandatory for all users (2024-03)                          | Unchanged; no later regulator statement, registration rate or de-registration figure held                                                           | NO CHANGE         |
| <b>National Public Key Infrastructure</b>         | BASELINE NOT HELD                                          | P423m secured, control transferred to the intelligence directorate, no working system, no timeline and no accountable owner                         | Baseline not held |
| <b>National Registration (Amendment) Act 2025</b> | BASELINE NOT HELD                                          | In force; service providers reported to be refusing even the replacement receipt                                                                    | Baseline not held |

## Burkina Faso

| SYSTEM OR INSTRUMENT                    | AT 2025-08-01                                                                                                                 | AT 2026-08-17                                                                                                                                                                                                                                                   | MOVEMENT |
|-----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <b>Regional biometric identity card</b> | Harmonised regional specifications validated by three security ministers in November 2024, with the older card still in issue | A fifth-generation national card in mass production since January 2026, issuable from age five and required from thirteen, at FCFA 3,500 with ten-year validity, carrying both national and confederal marks and adopted by a second member state in March 2026 | ADVANCED |
| <b>Unique electronic identifier</b>     | A 2024 framework law in force with regional awareness workshops running, no vendor and no enrolment                           | Vendor recruited and a decree organising mass registration through national, regional, provincial and communal committees run entirely by public structures so that fingerprint and iris data stay sovereign, with mass enrolment targeted before end-2026      | ADVANCED |

## Burundi

| SYSTEM OR INSTRUMENT                                              | AT 2025-08-01                                                                          | AT 2026-08-17                                                                                                                                                                                                             | MOVEMENT          |
|-------------------------------------------------------------------|----------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Biometric national identity card</b>                           | Confirmed not ready for the 2025 voter enrolment                                       | Technically ready, awaiting a legal instrument; piloted in about a dozen communes                                                                                                                                         | ADVANCED          |
| <b>Digital civil registry platform</b>                            | Platform unveiled; every citizen to re-register afresh; family-code amendment required | Biometric enrolment operating in 13 pilot communes, decentralised to zone level and interoperable with health-facility birth and death records; national unique identifier planned with fingerprint and facial biometrics | ADVANCED          |
| <b>Domestic appropriation for the biometric identity card</b>     | None on record                                                                         | BIF 16.0bn proposed in the draft FY2026/27 budget                                                                                                                                                                         | ADVANCED          |
| <b>Birth registration and birth-certificate coverage (UNICEF)</b> | Baseline not held                                                                      | 84% of under-5s registered at birth; 66% hold a birth certificate (UNICEF, cited 2026-08-10)                                                                                                                              | BASELINE NOT HELD |

## Cameroon

| SYSTEM OR INSTRUMENT                                | AT 2025-08-01                                                                              | AT 2026-08-17                                                                                                                                                                                                           | MOVEMENT          |
|-----------------------------------------------------|--------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>AILGLES biometric payroll system</b>             | Did not exist; payroll fraud via forged or duplicate birth certificates unchecked          | Operational since early 2025, actively flagging fraudulent payroll claims (53,000+ flagged by June 2026), now running alongside a separate Finance Ministry census of 950,000+ dependent-child birth certificates       | ADVANCED          |
| <b>Biometric national identity card</b>             | In issuance from one production centre                                                     | Two production centres, the second at about 2,000 cards a day, with a displacement-response enrolment track                                                                                                             | ADVANCED          |
| <b>Secondary-school student digital identity</b>    | A unique student identification number only, assigned through a ministry portal since 2024 | A digital identity card provided for, linked to academic, financial and disciplinary records and to school-fee payment; no issuance reported                                                                            | ADVANCED          |

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
