

TWELVE-MONTH PROGRESS REPORT

Benin: progress report, 2025-08-01 to 2026-08-04

Edition of 2026-08-10 · 84 systems and instruments tracked, 4 of them not held

Compiled 2026-08-10 from the Data Landscapers source base. Sections follow the status report. Each opens with a movement ledger comparing the position at the start and end of the period, which runs to the date of issue rather than to the last month's close.

Of 84 systems and instruments on this place's ledger, 52 changed position between 2025-08-01 and 2026-08-04, 13 did not, 15 carry no stated baseline, and 4 are Not held at both ends.

Shape check, run before the comparison: 170 sources for this place in the window — 42 in the earlier half (2025-08 to 2026-01), 128 in the later (2026-02 to 2026-08). The earlier half of the window is thin: this is a shorter comparison wearing a longer label, and the movement below rests mostly on the later half.

Movement values. *Advanced* — a system entered service, a stage was completed or an instrument was made. *Stalled* — a stated target passed without delivery. *Regressed* — an instrument was withdrawn or neutralised, or a measured position worsened. *Closed* — the programme ended. *No change* — the position at both ends is the same. *Baseline not held* — the base carries no position at the start of the period, so no movement can be stated. A value may carry a qualifying clause after a comma, as in *Advanced, slipped*.

Summary of the period

The shape check above passes at full width, so what follows compares the whole twelve months rather than a shorter period wearing a longer label.

Not one existing system climbed a maturity band — nothing went from planned to piloting or piloting to implemented — and nothing stalled except the e-procurement rebuild, whose first tender failed. What the movement table records is rules and reach appearing on top of a stack that was already there.

Benin's foundational layers were all in place and operating when the window opened, and there was no lower band for them to leave. What the year added was rules, reach and disclosure on top of a stack that was already built.

The national digital programme stood at [0.62% of credits ordonnancé at 30 April 2026](#), and no full-year executed figure exists for any Benin digital programme in any year.

Infrastructure

Connectivity

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
5G networks	One 5G operator (MTN, 2024)	Two operators, after Moov Africa Bénin	ADVANCED

New investments

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
WARDIP second-phase regional digital financing	Did not exist	US\$137m for Benin, Liberia and Sierra Leone across three pillars	ADVANCED

No position in this section changed maturity band. The security strategy, the fibre backbone and the data centre all held. What arrived was a second 5G operator, free roaming with Senegal and Togo, US\$137m of regional broadband financing, the [first national vulnerability report](#), and participation in a regional cybercrime takedown.

The security of the online service estate was stated as a problem in June 2026 — more than 230 services, about 40 priority structures under oversight — and the sovereign cloud and national cyber authority urged to answer it entered as a recommendation and nothing more.

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
Domestic payment aggregator	Did not exist	A home-grown rail with more than 13,000 merchants	ADVANCED

National statistics

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
Public reporting of exchange usage	Did not exist	Request volumes, members, systems and services published	ADVANCED
National statistics office as data custodian	BASELINE NOT HELD	Named among four offices being displaced as primary data producers (2026-03)	Baseline not held

The identity system did not change band — implemented on 2025-08-01 and implemented now, at about 98–99% biometric coverage throughout — while issuance kept climbing beneath it. The exchange, instituted in 2020, likewise held its band while usage grew past 138 million requests.

What entered the record inside the window is almost entirely governance and reach. The exchange gained published [conditions of access](#), interoperability referentials, a root certification authority and a cross-border mission with Rwanda and Ghana. Identity gained a residents file by law, an AFIS wired to the regional police exchange, a diaspora passport-renewal platform, and its first use as the electoral roll at a presidential poll.

[Birth registration entered the record as a problem](#) — about 2.5m births declared against under 1m registered — with a pilot fix at 76.56% whose generalisation slipped. And the e-procurement platform entered as a decree retiring the old system followed by a failed tender.

Payments run on a regional rail. Banks and mobile money were fully interconnected in May 2026.

Governance and regulation

Legislation and regulation

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
Data-localisation law	Did not exist	Committed only; no draft, scope or timetable on file	ADVANCED

Strategies, plans and policies

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
Data-protection authority AI policy	Did not exist	A dedicated AI policy with strict purpose limitation	ADVANCED

Open data

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
Open Government Partnership national action plan	Did not exist	Co-creation opened eighteen months after joining, with commune-level consultation	ADVANCED
Budget transparency	BASELINE NOT HELD	Open Budget Survey 2025: 77/100 transparency, 52 participation, 72 oversight	Baseline not held

No instrument here changed band.

The data-protection authority held position as an operating regulator throughout the window. Its [2025 report](#), its AI policy and its cooperation conventions all entered the record inside the window as evidence of an institution already working, not as its arrival.

The rest of the section is a policy stack being rebuilt around a new government. Vision 2060's digital pillar, the 2031 strategy, the presidential programme for 2026–2033 and a renamed ministry with an explicit AI mandate were all published between February and May, and a decree moved the budget programme codes so that any series keyed on ministry breaks at 24 May 2026.

Two commitments are stated and unevidenced: a data-localisation law with no draft, scope or timetable, and a government AI super app listed among foundations the programme already claims.

On disclosure, an [Open Budget Survey score reached 77/100](#), fifth globally, from 1/100 in 2012.

Artificial intelligence and the technology sector

Sectoral management information systems (HMIS, EMIS, etc.)

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
AI, drone and geospatial malaria programme	Did not exist	Incidence down 38% and mortality down 39% across 2022-2024	ADVANCED

Regional collaboration

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
Six-country francophone AI-governance framework	Did not exist	Six-country framework in development, Benin co-leading	ADVANCED

Standards

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
Generative-AI compliance regime for public agents	Did not exist	Census of users, a binding charter and no-training contract clauses; concedes the sovereignty risk remains	ADVANCED

Access to services

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
Fon-language voice AI	Did not exist	The first voice-to-voice AI in Fon, across Benin, Senegal and Côte d'Ivoire	ADVANCED

AI

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
National AI and big-data strategy	In force (2023)	In force	NO CHANGE

ICT Industry

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
Domestic content-verification platform	BASELINE NOT HELD	Checks text, images, audio and video, including AI-generated content	<i>Baseline not held</i>

Literacy

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
Domestic AI authorship and frugal-AI argument	BASELINE NOT HELD	A strategy co-author's frugal-AI argument, published 2026-07	<i>Baseline not held</i>

Training and skills

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
National AI Olympiad	Did not exist	First edition held	ADVANCED

No maturity changed. The national AI strategy has run since 2023 and held position throughout; everything else in the section arrived.

Mother-tongue voice AI in Fon in June 2025, built for service access rather than for demonstration. A [compliance regime for generative AI in the public service](#) in June 2026 that begins by admitting officials already use these tools outside any framework, and that concedes contractual terms cannot close the sovereignty risk. A malaria programme with published outcome figures. A first national olympiad.

Two rows carry no baseline: the content-verification platform, founded in 2025, and the domestic authorship and frugal-AI argument that closed the window.

One entry in this section is *Not held*. A government AI super app is counted among the presidential programme's existing foundations and nothing on file establishes that it exists.

Inclusion and capacity

Digital divides

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
Digital usage growth	BASELINE NOT HELD	Rising usage in the regulator's 2025 report, with no disaggregation by gender or rurality	<i>Baseline not held</i>

Access to services

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
Digital access to public services	BASELINE NOT HELD	At least 75% of identification services accessed digitally (2025)	<i>Baseline not held</i>

Training and skills

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
National tele-teaching platform	Did not exist	Authorised, not built	ADVANCED
Sèmè City skills hub network	Operating (2025-10)	Hub network plus a francophone digital-skills programme and an annual digital week	NO CHANGE
State RSSI certification programme	BASELINE NOT HELD	About 85 officers trained (2026-08) against a target of 100 qualified RSSI by end-2026, on CEH and ISO 27001 with practical work at the national Cyber Range; intake opened beyond central government to local authorities, state enterprises and the private sector	<i>Baseline not held</i>

No position changed band.

The first per-programme execution figures Benin has ever published arrived inside the window, showing the [national digital programme at 0.62% of credits ordonnancé](#) at 30 April 2026 against 15.43% across all programmes.

The reading of the estimates volumes established a budget line for the data-protection authority, none for the agency running the CSIRT, the data centre and the PKI, none for the identity agency, and no appearance at all by the telecoms regulator.

The delivery rows are all arrivals: a national tele-teaching platform authorised for 2026–27, the skills hub network and a francophone training programme. And two entries here are *Not held* for the same reason — the performance reports the organic budget law requires have never been published, and no audited figure exists for any digital line — so nothing here can be checked against outturn.

Finance

Domestic budget appropriations and expenditure

SYSTEM OR INSTRUMENT	AT 2025-08-01	AT 2026-08-04	MOVEMENT
Quarterly budget execution reports (RAPEX)	Published quarterly (2024-12)	Published quarterly, with a citizen version; latest instalment held covers to 31 March 2025	NO CHANGE
Budget standing of the digital institutions	BASELINE NOT HELD	The data-protection authority carries its own line (488.3m to 738.3m FCFA); the digital and identity agencies carry none	<i>Baseline not held</i>
Execution of the national digital budget programme	BASELINE NOT HELD	Programme 111 Numérique at 0.62% of credits ordonnancé (2026-04-30), against 15.43% across all programmes	<i>Baseline not held</i>

(narrative not yet written)

Where the record is thin

SYSTEM OR INSTRUMENT	WHAT WOULD SETTLE IT	LAST PROBED
Government AI super app	Any statement, screenshot, service listing or usage figure establishing that the 'Super App IA Gouvernementale' counted among the presidential programme's existing foundations exists, is deployed or is used.	2026-08-04
India digital cooperation	A bilateral MoU, DPI cooperation programme document or ministerial readout naming a Benin-India digital instrument.	2026-08-04
Annual performance reports required by the organic budget law	A Rapport annuel de performance for any gestion; none has ever been published, so no full-year executed figure exists for any Benin digital programme.	2026-08-04
Audited figures for any digital budget line	A Cour des comptes rapport sur l'exécution des lois de finances after 2023, or the published text of loi n° 2026-06 settling gestion 2024.	2026-08-04

Five subjects carry no reliable position at either end, all probed once on 2026-08-04, and two returned a route.

The decree instituting the national data exchange is served as a PDF from the operator's own media host, which an earlier attempt on the government secretariat and a ministry site did not reach. Until it lands, everything stated here about the exchange's legal basis rests on a framework document that cites the decree without reproducing it. The second is the budget directorate's published execution reports, the only published route to executed figures.

Three absences stand dated: no Cour des comptes execution report after 2023, no Benin-India digital instrument in India's own list of twenty-four partner states, and nothing establishing the government AI super app.

Figures are dated because most are time-varying: a figure carries the date it was true, not the date you are reading it. Where the base holds no reliable statement, the document says **Not held** rather than leaving a silence — those are counted, and listed at the end.

This is a dated edition and is not revised after publication. If a figure here has moved, the current edition will say so.
